Apart from the immediate problem presented by the refugees, Turco-Greek relations had necessarily undergone steady deterioration owing to the fact that the fate of the Ægean Islands was still left an open question. Both countries have made strenuous efforts to increase their naval strength, as much with a view to the settlement of that question as with an eye to future eventualities. But Greece, while possessing the advantage in naval programmes, has been outpaced by her rival in the acquisition of large ships. In a few months' time Turkey is due to receive two new battleships, while all attempts on the part of Greece to purchase similar vessels ready-made have failed. If war is to be inevitable, Greece sees it to be to her interests that it should not be delayed. The Government has, therefore, addressed an emphatic Note to Turkey, and has plainly hinted that it does not shrink from the contemplation of war in defence of Greek rights in Asia Minor. Until the Turkish reply to the Note has been given there is no need for undue pessimism. Public feeling in Greece has been roused to fever pitch by the reports of the extent to which the expulsion of Greeks has been carried out, and of the sufferings inflicted upon the refugees. Mr. Venizelos, the Prime Minister, has only just succeeded in weathering the political storm which his policy in regard to Epirus created, and it would be impossible for him to present other than a resolute front to the Turkish persecution of Greeks. But it is not easy to foresee the practical effects of a declaration of war between the two countries. The Greek navy is not likely to be in a position to force the passage of the Dardanelles, and the Greek army will not be anxious for a campaign in Asia Minor. Greece has already occupied all the Ægean Islands which Italy failed to seize, and even if a bombardment of the Asiatic coast were a practical proposition more damage would be done to Greek and foreign property than to Turkish. A blockade of the coast and the Straits might be enforced, but a condition of stalemate would ensue, which would again be more prejudicial to foreign than to Ottoman interests. But while the Greek forces might be unable to engage the Turkish army or navy, the Greek population of Asia Minor would be at the mercy of the Turks, and a more serious state of affairs would arise than the one which the Greeks are now anxious to remedy.

Our faith in Greek statesmanship under the direction of Mr. Venizelos is, therefore, strong enough to warrant the belief that a way will be found out of the present difficulty without a resort to hostilities. Turkey, for her part, can have little desire to provoke a conflict at this stage, least of all over a question in which officially or unofficially she has acted in an unjustifiable manner. The strategic reasons that rendered a purely Turkish population on the Thracian frontier desirable have no counterpart in the case of Asia Minor, and the Porte, having admitted the error of its ways in Thrace, cannot hope to adduce sufficient justification of the persecutions in Asia Minor to defend a resort to war. A conciliatory reply from the Turkish Government will enable "face" to be saved on each side. Some small indemnity for damage to individual property might be paid with good grace by Turkey; but in the light of Bulgarian experiences in Macedonia Greece cannot press her claims for redress too far home, while the possibility of the extent of the actual damage done having been exaggerated must not be overlooked. Europe, with the experience of the Balkan wars behind her, will maintain in future a far more dispassionate attitude on the subject of Turkish sins and excesses. No one will attempt to justify, either on moral, political, or economic grounds, the policy which the Porte has adopted in Thrace and Asia Minor. On the other hand, it will not be forgotten that Greece, in a hardly less aggressive form, had previously introduced exactly the same policy in her new possessions in Macedonia. Before the outbreak of the first Balkan War few people would have instituted comparisons between the ethics of the Balkan States and those of Moslem Turkey. But the former by their actions have challenged these comparisons, and do not always emerge favourably from them. Greece, therefore, in any further quarrel with Turkey may expect the ring to be kept for her, but cannot count on the same measure of sympathy as would have been hers if the Bulgars had not been able to complain of Greek persecution in Macedonia. Now that each Government in the Near East has pursued to excess this policy of compulsory emigration of their neighbours' nationals, we may hope that it will have become sufficiently discredited to be abandoned once and for all. The interests of no country will be served by the outbreak of hostilities between Greece and Turkey, and if the two Governments fail to find of their own accord a way of escape out of their present *impasse* their efforts should be supplemented without delay by the good offices of one or more of the Great Powers.

ENGINEERING IN THE NEAR EAST.

IN an article in a former Engineering Supplement (October 10, 1913) we directed the attention of our readers to British superiority in engineering, and made comparison between the American type of locomotive and the British type, with regard more especially to the inferiority of the former in economy of fuel and in wearing qualities.

The question has been asked, "Why, then, have British railways bought and used American locomotives?" The answer to this question is easy. These American locomotives were acquired because the railways buying them had to provide for an unforeseen increase in the demand for transport, and their existing rolling stock was found to be insufficient to cope with the suddenly inflated requirements.

This occurred at a period when all the British locomotive factories were full of orders, for Britain and for other countries, and were consequently unable to guarantee the speedy delivery stipulated by the buyers of new locomotives. Certain manufacturers of locomotives in the United States, by reason of their standardised system and their comparatively extensive plant, were enabled to promise sufficiently quick delivery, and consequently the railway companies, in their urgent need, were constrained to content themselves with these products, imperfect as they knew them to be.

A Bridge of Boats near the Turco-Persian Frontier.

Where are those makeshift locomotives now? While they have had only a very short period of usefulness, it is not an unknown incident for a British-built locomotive that has been working in the Near East for thirty years to be rejuvenated by the fitting of a new boiler, the engineer-in-charge finding that the old "motion" has plenty of life left in it yet.

The superior quality of British work does not come by chance. Its character is the outcome of many years of development, of sustained effort guided by experience. The British machine is designed and constructed to do its work well, and to continue doing it for a long time, to be economical in upkeep and easy to repair. Theory pure and simple, the theory of the Technical College, does not enter too largely into its design, because its makers have practice and experience to guide them—the bases upon which theories are founded.

Excellence in material and workmanship cannot be achieved without care and expense. British work is therefore not always cheap in first cost; and shortsighted users sometimes prefer its lower-priced rivals on account of the smaller initial expenditure of capital. But in the long run the British work, designed and built to last, is the cheaper, and is all the time more satisfactory to those who use it for industrial and profit-earning purposes.

Following the restoration of peace, industrial activity has naturally revived in the Near East; and it behoves the British manufacturer and contractor to be on the alert in order to secure such good orders as are to be obtained. Our Continental rivals are not neglecting the opportunity; and our readers will gather from the pages of this Supplement many indications of their activity in various directions. We try to perform our part in the fight for the trade of the Near East by giving publicity, but this has to be aided and supplemented by the efforts of the British manufacturer to make it as easy as compatible with good business for the user to buy and to get delivery of the machinery he requires.

It should not be impossible for the proprietors of a number of interests, various and not conflicting, to combine for the purpose of creating a joint representation in each country of the Near East. This representation would serve to disseminate particular and accurate information regarding the goods dealt with, and would collect information about the buyers and their needs. Deferred payments are often suggested, and sometimes have to be accepted, or the business declined. This representation would facilitate decision on the subject of credit or no credit, and when credit was given, would be able to help in financing, being domiciled in the country.

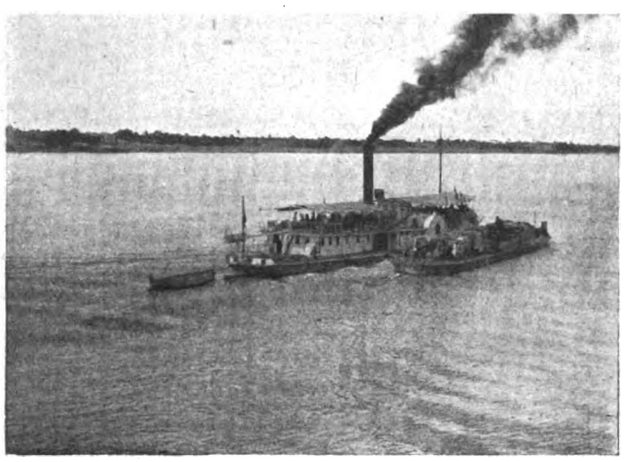
The British manufacturer and contractor would do well to give Egypt a large share of his attention. The development of the resources of that country has progressed under good government, and a great opportunity arises for British enterprise; especially, perhaps, in the direction of pumps for irrigation, gas and steam engines, and motor transport. Egypt now possesses good roads, suitable for motor vehicles, and the makers of cars, vans, and cycles should therefore secure good business. In motor construction, as in other branches of engineering, the British maker is in the forefront for quality and endurance; and the establishment of business relations, agencies, credits, etc., is easier in Egypt than in some other parts of the Near East. This journal will always be pleased to furnish information to manufacturers desirous of opening business relations with any country.

Roumania is worthy of close attention. The country continues to make rapid progress, affording attractive opportunities to the engineer. As the mineral wealth of the nation is realised the needful funds for engineering enterprise may be more readily forthcoming than they are at present.

Servia and Bulgaria have always been good buyers of industrial and agricultural machinery and implements, and now that peace has been established, and every effort is being made by their respective Governments for the development of the productive resources of their old and new territories, there will be a considerable demand for all kinds of machinery, especially those for agricultural purposes. In both these countries the highest opinion is entertained of British engines and machinery, and manu-

Digitized by Google

facturers of these should act promptly. The erroneous idea that in these, as in other countries of the Near East, long credits are required must not stay the efforts of British manufacturers to secure orders in these two agricultural countries. All the world loves a little credit, or the semblance of being trusted; but, as we have pointed out in our Engineering columns, while credit is more or less demanded by buyers of dry goods, etc., the *real* buyers of industrial and agricultural machinery, who in the Near East are usually landowners or men of some means, pay cash, or give ample security for any credit that may be accorded to them. Can one imagine that, in view of the present cutting down of prices, the foreign manufacturer is capable of risking, or can afford to sell on credit, more readily than the British? Another factor to be considered is the existence of co-operation. For instance, in Servia the agricultural co-operative system has been in operation for some years now, and some time ago there were over 300 co-operative agricultural societies which help agriculturists, their members, in buying what machinery, etc., may be required for their estates or small-holdings. Continental firms avail themselves of these societies; and where such societies do not exist the moneylender or capitalist of the district is ready to help, on very reasonable terms, the countryman in buying what he wants. We repeat here what we have often said before: Let British manufacturers approach, directly, the *real* buyers and users of machinery, and they will see the results. Possibly they will realise that they are as safe as in this country. The actual engineering requirements of the different countries with which THE NEAR EAST concerns itself are described in some detail in the following pages. We may therefore conclude this introductory note by mentioning only a few outstanding features which the manufacturer desiring to enter the market would do well to bear in mind.



A Steamer of the Turkish Fleet en route to Baghdad.

Steam engines are still preferred in some districts of Servia, Bulgaria, and Roumania, and even in Egypt, but as a rule oil engines have a marked preference, especially tractors for ploughs, etc., and for driving threshing machines, flour mills, pumps, frame saws, etc.

Water wheels and turbines, also mining machinery and contractors' portable railways, stone-breakers, etc., are at present needed in Macedonia and Thrace (Greece and Bulgaria). Windmills for pumping water for irrigation and for cattle are required in Bulgaria and Roumania. It is advisable that manufacturers answering inquiries should bear in mind that often, if not always, buyers themselves do not know exactly what to order, although they know what they want, and some extra pains in answering, with full particulars as to the size, capabilities, etc., of each machine, often bring the order home.

MOTOR-BOATS IN BULGARIA.

Our Sofia Correspondent writes:—

There are not more than two or three motor-boats at present in the Black Sea ports of Varna and Burgas, but there are excellent prospects in this line of business as regards Bulgaria's new ports of Dedeagatch and Porto Lagos in the Ægean, where motor-boats could be utilised to great advantage. Probably a most profitable business could be built up there if some British company were sufficiently enterprising to obtain a concession from the Bulgarian Government for establishing a factory here. The freedom from customs dues alone would be an adequate compensation for the capital so employed. Bulgaria is weary of Continental States after the great disaster she suffered, and the prevailing tendency is to turn towards England, with whom there is a desire to establish close commercial and political relations. It is up to the commercial community of England to notice this favourable moment for commencing business in Bulgaria.

"THE NEAR EAST" AND ENGINEERING.

The "Engineering Notes" which are one of the regular features of THE NEAR EAST aim at giving in readable form information that shall be of interest to both users and makers of agricultural and factory machinery, of engines of every description, of motor-cars, motor-launches, pumps, electrical fittings, etc., etc. They report also engineering works undertaken or likely to be undertaken in the countries with which THE NEAR EAST concerns itself, and under the heading of "Tenders Invited" particulars are given of contracts open in those countries which are likely to attract British firms.

Amongst the subjects dealt with in its columns this year the following may be mentioned:—"Bridges and Roads in Epirus" (January 3), "Cairo-Khartoum Air Service" (March 6), "Baghdad Electric Lighting" (April 17), "Diarbekir Copper Mines" (May 1), "Prospecting in N. Persia" (May 15), "Pumps in Egypt" (April 24), "Sun Power in Egypt" (April 10), "Egyptian Ploughs in India" (March 13), "Agricultural Implements in Asia Minor" (March 6), "Motor Cycles in Egypt" (April 24), "Motor-Cars in S. Greece" (May 8), "Motor-Boats in Bulgaria" (April 24), "Sudan Irrigation Works" (May 1), "Mex Pumping Station" (May 1), "Ispahan Telephone" (May 8), and "Egypt Wireless Station" (May 15).

The foregoing list of titles, taken at random, will serve to give an idea of the variety of topics dealt with in the "Engineering Notes." In addition to these regular notes, special articles on engineering topics appear frequently as occasion offers. For instance, we may mention "The Oil Fields of Mesopotamia," which appeared in the issues of March 20 and March 27, and gave what may fairly be described as the first authoritative account of the subject published in this country. Other recent articles include: "Cyprus Government Railway" (May 22), "Lebanon Telephones" (May 1), "Communications in Servia" (May 22), "Greek Railway Extension" (March 27), "The Ports of Cyprus" (April 3), "Oil Engines in Mesopotamia" (April 24), and "Servian Railway Construction" (May 22). "British Enterprise in Mesopotamia," a description of the irrigation works upon the Euphrates (January 30), and "Great Britain and Persia: The New Oil Contract," giving particulars of the Anglo-Persian Oil Company's works and the Admiralty contract (May 29), were special illustrated supplements of much interest.

OPENINGS FOR MACHINERY IN GREECE.

The following information is from the report by H.M. Consul for the Piræus (Mr. W. J. Norcop) on the trade of that district in 1913, quoted in the *Board of Trade Journal:* The agricultural districts in Macedonia, Epirus, and the Islands offer openings for a good trade in machinery, flour mills, oil mills, and gas motors for working small plants, as well as in electric tramways and motor-omnibuses for carrying mails and passengers in districts where there are no railways, etc. The business that can be done in Greece is very important and of great value, and United Kingdom engineers and firms should do their utmost to secure at least part of these orders. Goods should be brought direct to the buyer's notice by advertisements, and by efficient representatives, who could explain the working of the machines and help buyers to obtain what is suited to their needs. Credit may be given against security to bonâ-fide agriculturists or proprietors of industrial establishments. United Kingdom machinery, implements, and all kinds of goods and articles have always received a marked preference in Greece; but the better methods adopted by foreign competitors, who have a thorough knowledge of trade conditions in Greece, tend to diminish the opportunities of United Kingdom firms.

Ismailabad Bridge, on Teheran-Kum Road, when in course of construction.

THE RAILWAYS OF BULGARIA.

EXISTING AND PROJECTED LINES.

PART I.—EXISTING LINES.

(By a Correspondent.)

THE development of the Bulgarian railways affords one of the most striking examples of the wonderful progress made by the country during the last forty years, both from the commercial and industrial point of view. When the Treaty of Berlin was signed, the two provinces of Bulgaria proper and Eastern Roumelia, which were welded later into the modern kingdom, contained only two railways which were not connected in any way with each other. These two lines linked up Rustchuk with Varna (length, about 125 miles; constructed by an English company and opened November, 1860) and Belovo with Yamboli via Seimen. This line, which was known as the "Chemin de Fer Oriental en Roumélie Orientale," had been made and opened at different times in sections, as this table will show:—

Table A.—Eastern Roumelian Railway, 199 Miles.

	Length.	Date of Opening.
A.—Scobolevo-Seimen to the frontier...	60 miles	Dec., 1872
B.—Philippopolis-Scobolevo	35 miles	June, 1873
C.—Tatar Pazardjik-Philippopolis	22 miles	March, 1873
D.—Bolovo-T. Pazardjik	16 miles	May, 1873
E.—Tirnovo-Seimen-Yamboli.....	66 miles	Oct., 1874

With independence secured, the Bulgarian Government at once paid the closest attention to the construction of railways, and as a preliminary step submitted a Bill sanctioning State control of all railways and means of communication, which was passed by the Sobranje and became law in 1885. Certain obligations, however, imposed on the country by the Treaty of Berlin had first to be met, and in the same year the Government began to construct the line from the Serbo-Bulgarian frontier, which runs from Tsaribrod to Sofia and on eastwards, and now forms a section of the great European highway to Constantinople. The Tsaribrod-Sofia portion (about 100 miles) was opened in June 1888, and cost in all £702,532. At the same time the Bulgarian Government leased from Turkey the line running from Vakarel to Belovo and from the Compagnie des Chemins de Fer Orientaux the following section from Belovo to Sarambey. Further Treaty obligations had already necessitated the purchase of the Rustchuk-Varna line, and this had been taken over in 1886 at the cost of £2,062,328. These rented sections were finally bought outright in 1909 by the Bulgarian Government, after the recognition of the independence of the kingdom by the Powers, at a cost of £1,684,476.

During this intervening period Bulgaria has busied herself with her own development, as the table appended will show:—

Table B.—Bulgarian State Lines, 788 Miles.

Lines already constructed.	Length in miles.	Date of opening.	Cost.
1. Yamboli—Burgas	46	May, 1890	£452,544
2. Sofia—Pernik and Pernik Mines	21	Dec., 1893	£232,672
3. Shumla—Kaspitchan	15	June, 1895	£104,120
4. Pernik—Radomir	10	Feb., 1897	£39,520
5. Sofia—Roman	45	Feb., 1897	£1,124,588
6. Gebedse—Devnja	5	Nov., 1898	£11,404
7. Roman—Plevna	50	July, 1899	£1,150,076
8. Yassen—Somovit	21	Sept., 1899	£29,352
9. Plevna—Shumla	150	Oct., 1899	—
10. Tchirpan—Nova Zagora...	50	Sept., 1900	£304,216
11. Rustchuk—Tirnovo	80	Oct., 1900	£548,556
12. Sliven—Zimnitza	16	May, 1907	£46,504
13. Radomir—Kustendil	34	July, 1909	£150,800
14. Levski—Sistova	30	Aug., 1909	£168,688
15. Tirnovo—Platchkovtzi ...	30	July, 1910	£585,796
Platchkovtzi-Boroushtitza	14		
16. Stara Zagora-Boroushtitza	35	Aug., 1911	£469,600
17. Philippopolis—Tchirpan ...	36	Oct., 1910	£261,080
18. Devna—Dobritch	11	Dec., 1911	£109,520
19. Tzarevalivada—Gabrovo ...	11	Dec., 1911	£109,520
20. Mezdra — Vratza — Lom Palanka	78	1913	—

It will be seen from these figures that Bulgaria has spared no efforts and has already spent £12,732,600 to develop her means of communication as quickly as possible. Neither strategic nor economic interests have been neglected in the general plan of construction. The central circle Sofia-Plevna-Tirnovo-Stara-Zagora-Sofia (which only requires the linking up of a few miles to be completed) opens up the heart of the country. The line which at present ends just beyond Kustendil may have a great future if the bitterness and ill-feeling bred by the war between the Allies can be mitigated by time and some arrangement made with Greece and Servia. Unfortunately, this line, if continued, will traverse the very country which was the subject of dispute, and it is much to be feared that the two allied nations will strain every nerve towards the isolation of Bulgaria, rather than give the least aid when commercial interests are at stake. If this is so, Bulgaria must console herself with the reflection that the line brought through the Deve Bair pass will still be of the utmost value in case of mobilisation.

Further east the main route to the Orient runs through Philippopolis, which commands the approach to Turkey. Varna and Burgas are two useful trade outlets on the Black Sea, as Rustchuk, Sistova, and Somovit are on the Danube. These two latter towns will be most important when the uncompleted lines are opened up, and, doubtless, Bulgaria will pay especial attention to that region in the hope of compensating in some degree for the loss of that valuable Silistria district. The hitherto neglected north-western corner will also benefit by the new lines.

Bulgarian State Railways.

Year.	Receipts.	Expenses.	Profits.
	£	£	£
1896	171,868	162,068	9,800
1905	446,836	294,884	151,952
1908	572,732	493,268	79,464
1909	793,208	554,944	238,264
1910	904,548	590,008	314,540
1911	1,104,244	694,692	409,552

PART II.—THE PROGRAMME OF CONSTRUCTION.

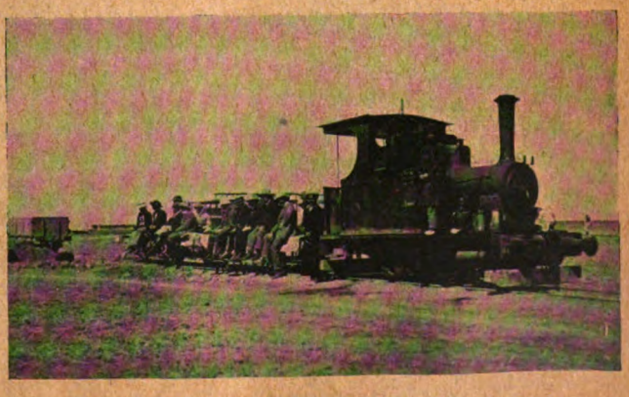
(By Our Special Correspondent in the Balkans.)

The following details concerning present and future plans are based on information kindly placed at my disposal by the chief of the Bulgarian Railway Construction Department. Many of the projects mentioned therein date from before the war, more particularly those amplifying the northern system; others, again, are the result of the change in the map of Bulgaria. The constructions interrupted by the war are four in number, totalling approximately 140 km., and are now building. They are:—

Table D.—Lines Now Under Construction, 87 Miles.

	Length in Miles.	Estimated Cost.
(α) Drazinia-Vidin	53	About £330,000
(β) Ferdinand-Berkovitza	15	,, £93,400
(γ) Kazanlik-Tulovo.....	10	—
(δ) Somovit-Nikopoli	—	—

It is expected that these lines will have been completed by the end of the year. The total length of the Bulgarian State Railway system in exploitation will then be 2,298 km., exclusive of 196.7 km. of the Jonction Salonique-Constantinople across Bulgarian Thrace, and 6.1 km. of the Orient Railway between the old and new Turco-Bulgarian frontiers. The fate of these lines is still doubtful, but the following report has reached me:—The Orient Railway Company is negotiating with the Jonction Salonique-Constantinople for the purchase of the line, with a view, doubtless, to repeat



The First Locomotive in Southern Persia.

Digitized by Google

the financial operation so profitable in connection with the Servian Orient system. In competent Sofia circles there is no immediate desire to acquire the Bulgarian section of the line. The matter will be discussed in Paris when the conference—which I understand has again been postponed till October—finally meets. The value of the section in question can be roughly estimated at from £6,000—£8,000 per kilometre. At present traffic on this line, which was primarily strategic, is nil.

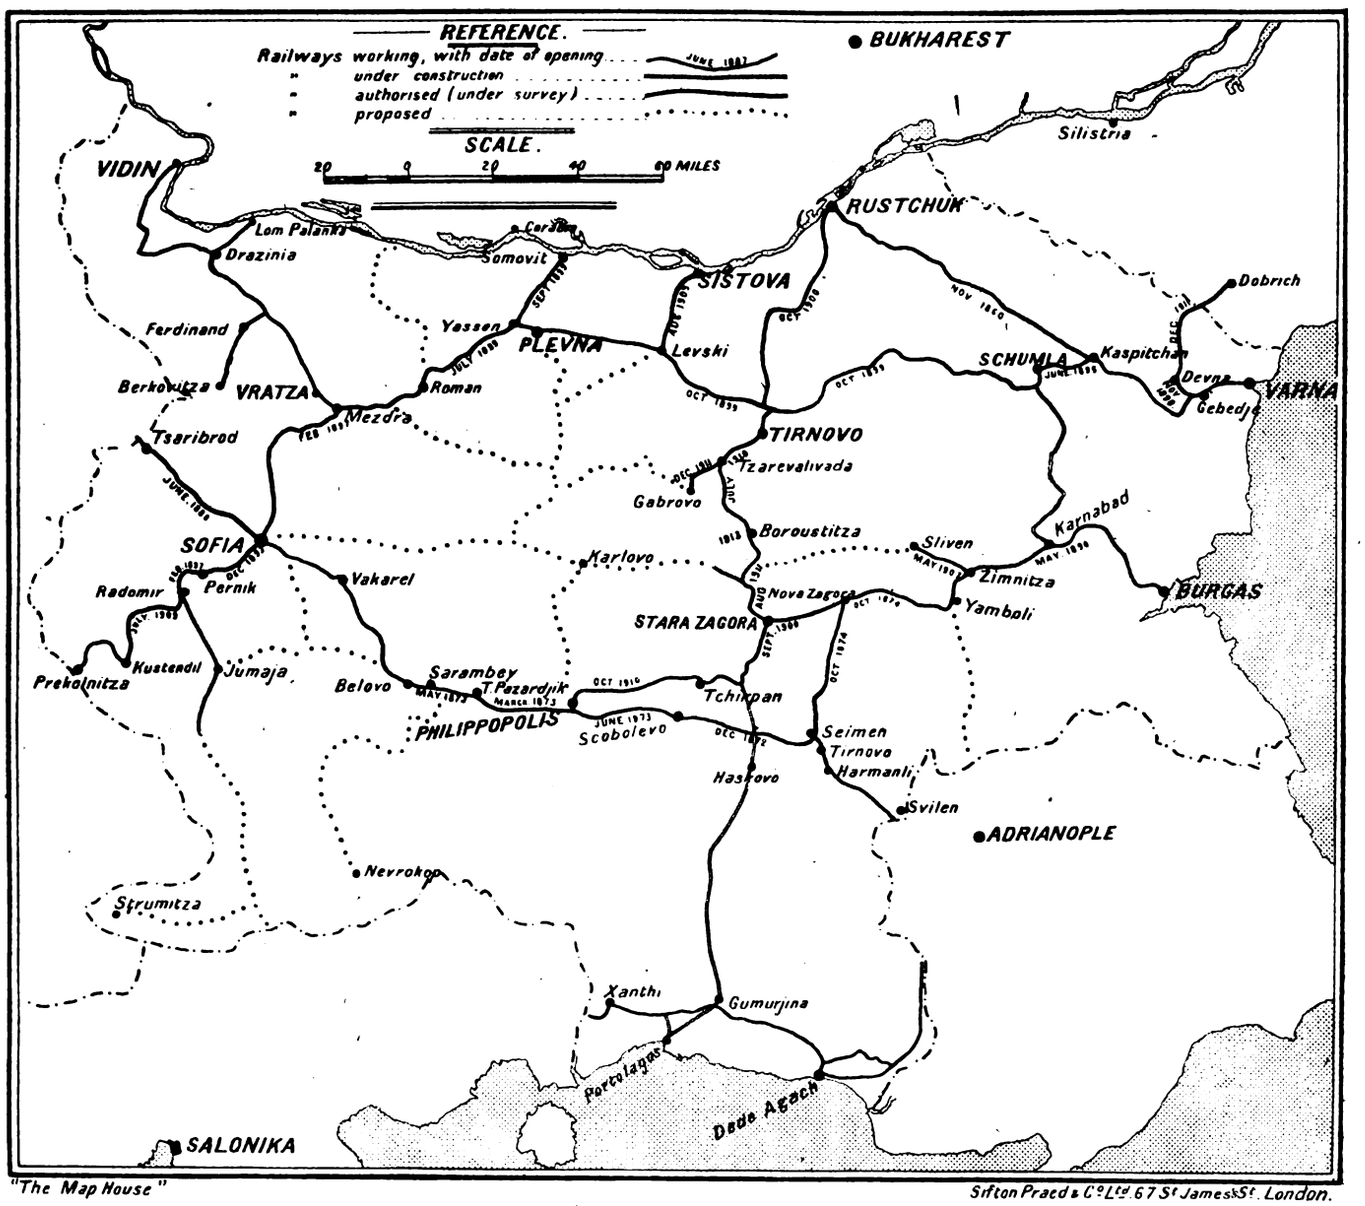
The total length of lines to be constructed is expected to be at least 1,140 miles, and the expenditure necessitated thereby is estimated as being approximately £9,320,000. It may here be stated that the usual procedure followed in Bulgaria in the matter of railway construction is by the publication of an open tender, the work generally going to the lowest bidder. Government payments are regular, in instalments. Practically all the rails here are of British make, but the rolling stock, as a rule, goes to Continental firms. Of the lines to be built, that linking up [I.] Portolagos with the main line will doubtless be appropriated by the group taking up the new Bulgarian loan. The remaining lines are open to offers, and any big British firm of contractors willing to make one would not only find a welcome here, but would be able to do a profitable piece of work. Apart from the Portolagos line, two lines are to be begun as soon as possible—namely, the prolongation of the [II.] Radomir line to Jumaja, and the [III.] third trans-Balkan line from Shumla to Karnabad. The remaining lines will have to wait until a railway loan has been obtained, but the majority of them will be in exploitation by 1920. At any rate, we should not lose sight of the possibilities offered to British firms in connection with railway construction in Bulgaria.

The line which will link up Bucharest and Sofia over a railway bridge across the Danube belongs to neither of the categories analysed below, considering that its construction will depend on the result of the negotiations between the two countries. The Bulgaro-Roumanian project meets with greater difficulties owing to the fact that the Bulgarian bank of the Danube, generally speaking, is higher than the Roumanian, and can therefore command the northern approach. Aware of their strategic inferiority on these grounds, the Roumanians have disapproved of all schemes excepting one—namely, the construction of the bridge near the mouth of the Isker River, one of the Bulgarian tributaries of the Danube. But even so, there are differences of opinion between the two countries, the Roumanians wishing to build the bridge to the east of the mouth and the Bulgarians to the west. If the former site is chosen, the Bulgarian approach will have to be constructed across a marsh, necessitating a costly viaduct; in the case of the alternative, the Bulgarian position will command the bridge. Should the Isker site, as seems now probable, be eventually determined upon, the Bulgarians will have to build a 70 km. line along the lower Isker valley, starting from Kumakova, where the Sofia-Rustchuk line leaves the Isker.

TABLE E.—LINES AUTHORISED AND UNDER SURVEY, 233 MILES.

	Length in Miles.	Estimated Cost.
[I.] Michaelovo-Krumovo-Portolagos (Generally called "Haskovo-Portolagos Line.")	123 ...	About £1,400,000
[II.] Radomir-Dupnitza-Jumaja	40 ...	—
[III.] Shumla-Karnabad	70 ...	—

[I.] This is the most important of the immediate lines, as it will constitute the shortest line between the Danube (Rustchuk) and the Ægean Sea (Portolagos). It will cut Bulgaria in two halves from north to south, and be the making of the new port. The line to be constructed will start at the station Michaelovo, on the Stara-Zagora-Philippopolis section of the Balkan line, follow the course of a river in a southerly direction to the Maritza, which it will cross on a bridge near Krumovo. The same direction will be maintained as far as Gumurjina, on the Salonika-Constantinople line. Three watersheds will have to be crossed, the most important being the Rhodope. Between



"The Map House" Sifton Praed & Co Ltd. 67 St James's St. London.

THE RAILWAYS OF BULGARIA.

Digitized by Google

Haskovo and Gumurjina two big tunnels will be necessary, one of 1,700 metres and the other of 2,800 metres. From Gumurjina the line will follow the course of the Karaja Su to Portolagos, which will also be linked up with Jalumlik, on the line between Xanthé and Gumurjina. Both the harbour at Portolagos and the line are to be completed by 1917. Two large bridges will have to be built—one across the Maritza and the other across the Arda.

[II.] The Radomir-Dupnitza-Jumaja line is the first immediate section of a (L) line intending eventually to link up Strumitza with Sofia. From Dupnitza it will follow the course of the Dzermoeno River, one of the affluents of the Struma, to its union with the latter, and then follow the Struma valley to Jumaja, later on to the Greek frontier; a branch line will eventually run up the Strumitza valley to Strumitza. The total length of the line when completed will be approximately 200 km.

[III.] The third of the trans-Balkan lines is the first section of a north-and-south line between the Roumanian and Turkish frontiers, eventually between Silistria and Adrianople; its immediate value will be the shortening by rail of the distance between Varna and Burgas and between Burgas and the Danube. The other sections of this line will be:—(A) Jamboli to the Turkish frontier along the course of the Tunja River (60 km.); and (B) from Kaspitchan northwards to the Roumanian frontier (approximately 60 km.).

TABLE F.—PROPOSED LINES OF PRIMARY IMPORTANCE (790 MILES).

A.—Jamboli—Tunja Valley—Turkish frontier.
B.—Kaspitchan—Dobruja frontier.
C.—Sofia—Kaslovo—Sliven.
D.—Plevna—Karlovo—Philippopolis.
E,—Sevlijevo—Trojan—Roman.
F.—Sevlijevo—Lovetch.
G.—Lovetch—Osem Valley Link,
H.—Bjela Slatina—Rahovo Branch.
I.—Sofia—Samakov—Dupnitza.
J.—Samakov—Kostenetz.
K.—Sarambey—Nevrokop.
L.—Jumaja—Strumitza.

The Sofia-Sliven line (C) is a pre-war project, which it is hoped will be realised shortly. It will skirt the southern slopes of the Balkan Mountains, and give railway communication to Pirdop, Klisura, Karlovo, and Kaofer, and bring Kazanlik, Sliven Karnabad, and Burgas nearer to Sofia. At Karlovo the line is to be crossed by (D) a fourth trans-Balkan north-and-south line from Plevna, via Lovetch and Trojan, to Philippopolis. Trojan, on the other hand, is to be linked up (E) with Roman, on the Sofia-Plevna line, and ultimately also with Sevlijevo. As this district, between Lovetch, Sevlijevo, and Gabrovo, is the Manchester of Bulgaria, it is intended to link up the three towns mentioned by rail. This line (F) ought to be a paying proposition. Further, Sevlijevo is ultimately to be connected by a branch line [a] along the valley of the Roshitza River with the Plevna-Varna line, and (G) Lovetch with the same line along the valley of the Osem River (43 km.). [b] from Roman, mentioned above, a branch line is in course of time to follow the Rebres River, a tributary of the Isker, to Novacin, and then turn to the south-east via Orhanje to Etropole (57 km.).

Apart from the Isker Valley project referred to elsewhere, there is another project (H) for linking up Rahovo on the Danube with the Sofia-Plevna line. It will in the main follow the course of the Skit River, and pass through Bjela Slatina.

At present Samokov, to the south-east of Sofia, has no railway line. It is, however, to be made the centre of three lines (I), one to the north along the Isker to Sofia, a second to the west, partly along the Dzermoeno, to Dupniza, and a third (J) to the east, along the Maritza, to link up with the Sofia-Philippopolis line at Kostenetz.

Some time before the war it had been decided to construct a line (K) from Sarambey, on the Sofia-Philippopolis line, to the old Turco-Bulgarian frontier. This project is now to be prolonged across the watershed into and along the Mesta Valley, as far as Nevrokop, near the Greek frontier. The total length will be about 135 km.

The following are, with their respective lengths, the minor branch lines, which it is intended to construct:—

TABLE G.—PROPOSED LINES OF SECONDARY IMPORTANCE (194? MILES).

(These are not indicated on the annexed map.)

[a].—Sevlijevo—Roshitza Valley Link	27
[b].—Roman—Orhanje—Etropole	35
[c].—Panaginrishte—Tatar Pararjik—Pestera	38
[d].—Philippopolis—Stanimaka	7
[e].—Kozarevetz—Elena	20
[f].—Eskijumaja—Osmanpazar	20
[g].—Preslav—Verbitza	21
[h].—Zimnitza—Kotel	31

THE MOTOR-CAR INDUSTRY IN BULGARIA.

(BY OUR SOFIA CORRESPONDENT.)

MOTOR-CARS were first introduced into Bulgaria in 1905, when a luxurious 40-h.p. Mercédès was purchased for the royal household. At the end of the year's trial on the rough roads of the country the car proved quite satisfactory, and in 1906 two landaulettes of the same make, of 45 and 35 h.p., respectively, were procured. Three years later a luggage car was added of 35 h.p., capable of carrying a ton, also a landaulette of 25 h.p. and a Fiat landaulette of 14 h.p. Next year an Itala car of 70 h.p. was ordered (this car being covered in) and also a Mercédès 65 h.p. In 1911 an 18-h.p. covered-in Fiat was obtained, together with two 14-h.p. Mercédès, and an 18-h.p. car from the Graf and Stilt Vienna factory. The following year was notable for the purchase of a superbly equipped 90-h.p. Mercédès, capable of climbing the most mountainous roads in the country, a 36-h.p. Daimler, an 18-h.p. Mercédès, and a 35-h.p. Mercédès, the latter car being purchased for the Crown Prince Boris. Last year a 45-h.p. car was ordered from the Knight Zagd-Wagen factory, a 35-h.p. Mercédès omnibus, seating 12 persons, a 21-h.p. sporting car of Mercédès make, and a Mercédès luggage car of 35-h.p.; while this year the Queen has ordered two Mercédès cars. All these cars are housed in magnificent buildings, replete with all the necessary repairing equipment.

As a natural result of the introduction of motor-cars into the royal household motor-cars were also introduced into various part of the country, and their use spread so rapidly that when Bulgaria mobilised against Turkey in 1912 no fewer than 76 cars (including those belonging to soldiers) were obtained from private persons in the capital alone.

Motor-cars have been considerably utilised in establishing communications with towns which are out of touch with the railways, as, for instance:—

(i) In Southern Bulgaria. Philippopolis—Stanimuka; Philippopolis—Carlovo; Philippopolis—Kazinlik (the famous Valley of the Roses) and thence to Shipka Pass; Rakovsky—Haskovo; Tatar Pozareljik—Panagurishe; Tatar Pozareljik—Peshtera; Tanbolj—Kazilagatch; and from Burgas to the Burgas Hot Springs.

(ii) In Western Bulgaria. Sofia—Samokov; Sofia—Banki; Sofia—Orhanie; Randomir—Dubnitza; Dubnitza—Kustendil; Dubnitza—Gornia Djoumaya; Widin—Lom; Widin—Berkovitza; Vratza—Berkovitza; and Ferdinand—Berkovitza.

(iii) In Northern Bulgaria. Orhanie—Mezdra; Orehovo—Tcherven; Greg—Teteven; Pleven—Lovitch; Gabrovo—Sivlievo; and Eski-Djoumaya—Osman Pazar.

As the hills are very severe in this country, the gradient being sometimes as much as 1 in 12½, motor-cars, to be of any use, must be of from 20 to 30-h.p. Motor-cars with higher horse-power are, however, rare. At the mobilisation referred to the motor-cars forming the service between the above towns were all requisitioned, and, together with those gathered at Sofia, were found to number 148.

The cars mentioned above have been furnished by the following firms:—(i) British: Humber, Napier, Wolseley, Rex, Simplex, Belsize, and Commercial Car Company; (ii) American: Flanders, Ford, and Overland; (iii) German: Benz, Mercédès, Neckarsulm, Brennaber, Sperber, Nag, Fafner, Colibri, Dixi, Horch, Manesmann, Daag, and Opel; (iv) Austrian: Daimler-Mercédès, and Laurin and Clement; (v) French: Clement-Bayard, D.F.P., Berlier, Dietrich, and Schneider; (vi) Italian: Fiat, Diatlo, and Itala.

All the branches here of these companies were left by the war with practically no stock, owing to the Government requisition, but this deficit has now been made good.

The Customs House statistics give Germany as the greatest importer of motor-cars, and then comes Austria, Italy, and America, with England at the bottom of the list. The German and Austrian firms, however, trade in credit and easy terms of payment, and, in consequence, have an enormous advantage over their competitors. The present year has witnessed an influx into Sofia of several new firms, chiefly German, for the supply of motor-cars.

The Direction of Posts here is asking for motor-cars for the transport of the mails in the country, but in this and other departments of the State it is unlikely that the existing need will be quickly satisfied.

PROPOSED ELECTRIC TRAMWAY IN TRIPOLIS.

A communication from the Belgian Consulate-General at Smyrna states that a group of capitalists at Tripolis, in Syria, has put forward a request to the authorities for a concession for an electric tramway service in the town. The length of the line would be six kilometres.

OPENINGS FOR ENGINEERS IN ASIATIC TURKEY.

THERE are many who think that the loss of the European provinces to Turkey means the economic crippling of the Ottoman Empire, and that Turkey has been driven back into a strip of land in Asia. Yet Asiatic Turkey covers 1,800,000 square kilometres, an area three times larger than France, with a population of 17 to 18 millions. The most important part of this territory is what is known as Asia Minor, with Syria in the south and Mesopotamia in the east. This region alone will be sufficient, when systematically developed, to bring immense wealth and power to Turkey. Asia Minor, with a population of about 10,000,000, offers almost boundless possibilities of development; and there can be no reasonable doubt that in the near future the

The Hindieh Barrage.

demand for machinery of many descriptions, already considerable, will increase by leaps and bounds.

The prosperity and prospects of the coastal region, with Smyrna as the principal seat of commerce and industry, are generally known and recognised. But the potentialities of Syria are not generally recognised, by the British manufacturer at least. These wealthy provinces, which "concern" every greedy Western Power—not excluding America—have a population of over three and a-half millions, and contain some of the largest towns of the Ottoman Empire—Damascus (350,000 inhabitants), Aleppo (210,000), and Beyrout (150,000) and many others—where commerce and industry are advancing steadily. The carrying out of the promised reforms will turn Syria into one of the richest provinces, if not the richest, of the Ottoman Empire.

Agricultural Requirements.

In the interior of Syria there is an increasing opening for agricultural machinery and implements. The more important farmers, no longer content with their surface-scratching, native-made ploughs, are now casting them aside for British or American light ploughs. The English plough, when made to suit the soil, is highly esteemed. It should be borne in mind by makers that the whole of Syria, with very little exception, consists of stony, cloggy soil, very uneven, and has only weak, inferior cattle for ploughing purposes. Ploughing by steam and oil tractors has already been introduced with success, but at present the unsettled condition of Eastern affairs and the scarcity of skilled machanics prevent landowners from adopting very freely these expensive methods of cultivation. Reaping machines are in good demand, and the only fault found with the English-made machines is that most of them are not constructed to meet the requirements of the stony and hilly districts so frequent in those parts. This, of course, may be the buyer's fault, through not understanding clearly what he is ordering, or omitting to state the nature of the soil on which he works. Threshing machines are also in good demand; these, however, should always be provided with a straw cutting and bruising apparatus. Oil and wine presses for use throughout Aleppo are being supplied by German and Austrian firms. If British makers paid more attention to the kind and size of these oil presses that are required throughout the Near East, they would find a great market for their production. We have often described in these columns the press most suitable for the olive oil districts of the East. Oil engines, flour mills, pumps, cotton spinning plants, windmills, silk and cotton looms, etc., are also in demand throughout Syria.

"THE NEAR EAST"
publishes each week a page of
ENGINEERING NOTES,
which should be read regularly by all who wish to keep in touch with business openings in the Near East.

MOTOR VEHICLES IN SMYRNA.

(By Our Smyrna Correspondent.)

IN most cities the municipality has the right to control and supervise the means of transport of passengers within its limits, both as to the nature of the method of transport and as to the cost thereof to the public. The Smyrna Municipality may have this right, but it does not apparently exercise it—unless, perhaps, to oblige the coachmen to wear a fez and a blue coat with metal buttons. No! unfortunately, Smyrna passenger transport is ruled by a foreign company running an obsolete one-horse tram that would look more in place in a museum than in actual use. The moment one attempts to modernise vehicular traffic and institute a motor-car service for passengers in the public streets, the archaic influence of the crawl-along-as-you-please tram company puts its veto on it, and Smyrna goes on as usual with its worst-in-the-world tram service. This city of 400,000 inhabitants therefore remains without any passenger service or transport motor service, but attempts have been made to run a motor-car with passengers from Smyrna to Vourla. During the quarantine periods such a service is remunerative, as passengers are then landed at the latter point.

There is no doubt that a properly organised company running a dozen or so of motor taxi-cabs in the city would do well, and such a service must perforce soon come, as a city like Smyrna cannot remain much longer a generation behind the times. In all, it is questionable if there are more than twenty motor-cars in the whole province of Aidin, with a population of over a million inhabitants!

Cars for Military Transport.

Previous to the recent Balkan War, Asia Minor, with special reference to the province of Aidin, was used by the Constantinople Central Government merely as a recruiting ground. The loss of Turkey's European territory has changed the military authorities' distribution of troops considerably, and now an Army Corps is stationed in this province. The lack of means of transport at the outbreak of the last war was one of the principal factors in Turkey's defeat. The army which mobilises most rapidly will be able to gain a decisive advantage. In this province there are two great trunk lines—the Ottoman (Aidin) Railway Company and the Smyrna to Cassaba and Afion-Kara-Hissar Company. Both are single-lined companies, and in time of war their rolling-stock is inadequate to transport quickly the troops from the interior. In the event of another outbreak, there is no doubt that the shores of the Aidin province, and possibly Smyrna itself, would be seriously attacked. At present a large number of troops are stationed at the town of Aidin, some eighty to ninety miles from Smyrna. There are no roads connecting the two towns, and only the railway can be utilised. A mobilisation in the case of a sudden attack on these shores should be a matter of hours, and not days and weeks, as happened during the last war. On the receipt of the whole of the proceeds of the loan from France, a certain portion should be laid out on making good military roads, along which motor vehicles could bring down troops, war stores, guns, etc., in the shortest of time.

Let us look at what motor vehicles the Government authorities have in the province. The Governor has one car and the Military Commandant has another. That about completes the list! There is plenty of scope for a number more, as over 30,000 troops are stationed permanently here, and tens of thousands of recruits and reserves would come from the interior when war broke out. Given good roads, the transport of these troops could be effected very speedily by motor vehicles, but until these roads are made little use can be made of military motor-cars, vans, or lorries.

ROAD MAKING & MOTOR TRANSPORT IN PERSIA

FROM A CORRESPONDENT IN PERSIA.

NOW that the political situation in Northern Persia is comparatively settled and security to life and property has become assured, the time appears to have arrived for the introduction of motor transport for goods and passengers along the roads leading to the capital. Motor transport must, we believe, for the present be confined to the North, for there only do we find roads suitable for this class of traffic, and the country freed from the pest of brigandage. A transport service to operate on the Resht-Teheran road has already been under the consideration of Russian and Persian commercial interests, and we understand that it has been definitely decided to proceed with the establishment of a regular service of light motor vehicles, to be followed, as experience may dictate, by a heavier type of vehicle adapted for goods traffic.

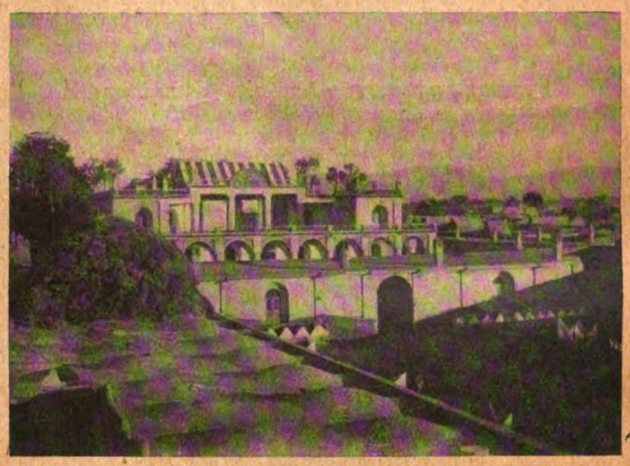
The road between Enzeli, the well-known port on the Caspian, passing through Resht and Kazvin to Teheran, carries, for its length, a greater proportion of merchandise than any road in Persia, whilst the passenger traffic is constant and assured. This is natural, for it is the main channel of communication between the Caspian and the capital for Russian goods. It has been improved out of all knowledge of recent years and is kept in a fair state of repair by Russian engineers who, in so far as road building is concerned, having a well-earned reputation. This road was aligned for the special purpose of conversion, when the opportunity arises, into a railway track, and attention has been paid to its gradients, though work still remains to be done in this respect.

A Characteristic Road in Persia.

The character of the road varies greatly in different sections. The first section, between Enzeli and the foothills, passes over a swampy region subject to a heavy rainfall, where construction has been difficult and maintenance is expensive. Thence, it enters the Elbourg mountains, which divide the coast region from the great plateau of Persia, debouching on the Kazvin Plain at the city of that name, and so on to Teheran at the level of the plateau. Its course through the mountains is tortuous and the gradients are somewhat exacting. The surface is fair and suitable for motor traffic, though at times it suffers from wash-outs in its mountain course, and for several months of the year snow at times lies deep, both on the higher levels and on the plateau. During periods of severe weather motor traffic would be seriously impeded, if not totally interrupted.

Traction by Lorries.

Traction by lorries will probably have to wait until experience has been gained with the lighter classes of motor vehicles. It is very questionable, indeed, whether under present conditions heavy lorries could be profitably worked. South of Teheran the roads have been taken in hand by the Persian Transport Company—one of the Lynch enterprises—a company which holds a concession for the construction of roads extending in one direction to Ispahan viâ Kum and Kashan, in another viâ Sultanabad and Burujird to Mohammerah on the Persian Gulf. Owing to the unrest from which Persia has been suffering of recent years, roads have been constructed only as far as Kum, on the Ispahan road, and to Sultanabad, on the Mohammerah road. The road from Teheran to Kum is well laid with numerous bridges and is suitable for motor traffic. There are no gradients of any consequence, the ravines and rivers are well bridged, and the surface is for a greater part of the year satisfactory. The branch to Sultanabad is said to require



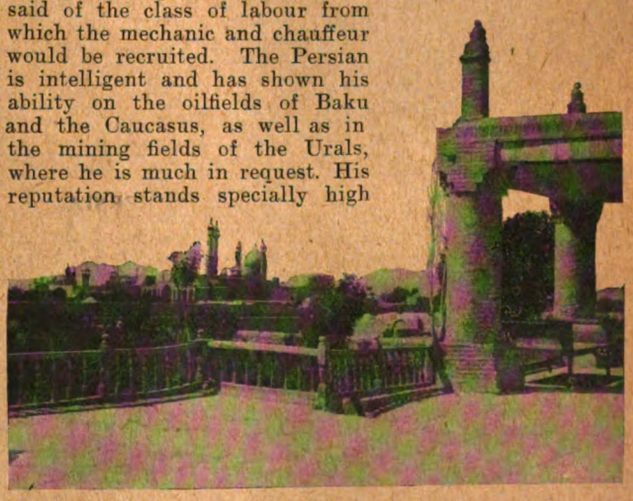
A Caravanserai at Kazvin.

some surface improvement, but we have not passed over it and can only speak from hearsay. It could certainly, however, readily be made good for motor traffic.

The town of Kum, 92 miles from Teheran, may be taken as the most southerly point to which a regular service might at present be extended. The Persian Transport Company have been granted an extension of seven years to complete their roads, and will probably turn their attention in the first instance to the construction of the Kum-Kashan-Ispahan prolongation. A line of mountains separates Kashan from Ispahan, where road-making will not be easy, though exceptional difficulties are not to be expected, as horse-drawn vehicles traverse this section regularly. Ispahan should, in the not too distant future, be brought within a five days' motor journey from the Caspian.

The Type of Car Required.

Regarding the type of car suitable for use under the special conditions of Persia—with its extremes of heat and cold, its dryness of atmosphere, the difficulty of obtaining supplies of fuel and components, the inexperienced quality of the raw human material for artisan labour—very careful consideration is necessary. The lighter and cheaper type of car, such as is turned out by the thousand from the workshops of America, has not proved a success so far in Persia, and it would appear that where economy, combined with efficiency, is a *sine quâ non*, we must pin our faith to the type of colonial car manufactured by well-known firms in Great Britain. Before describing in some detail the special type we have in mind, something should be said of the class of labour from which the mechanic and chauffeur would be recruited. The Persian is intelligent and has shown his ability on the oilfields of Baku and the Caucasus, as well as in the mining fields of the Urals, where he is much in request. His reputation stands specially high



The Guest House at Kum, with the Great Mosque in the distance.

where the trained man is required, but trained subordinate engineers and mechanics are attracted abroad.

Digitized by Google

They are few and far between in Persia and would prove expensive. They would in any case require European supervision.

Returning to the type of car, we suggest a 16-20 h.p., 4-cylinder poppet valved car, to seat four persons and a chauffeur, with baggage, for the open body or landaulette. The following remarks will also apply generally for a heavier car for passenger traffic of the char-a-banc type, with greater engine power:—

The chassis should be short between the axles. The framework of the car should be of exceptional strength, while attention should be paid to springing and shock absorbers. It should be of high clearance, with the radiators and tanks as for tropical climates. The gearing should be low, since speed is of secondary importance. The wheels should be of solid steel.

A Possible Solution of the Tyre Difficulty.

The tyres are not easy to deal with, as heat and sun will cause rapid deterioration, and replacements cannot be

A Bridge on the Resht-Teheran Road.

readily effected owing to the distance from the manufacturing centres in Europe, to which it is necessary to have recourse; moreover climatic conditions preclude the storage of large reserves. A way out may be found in solid tyres for both the 16-20 h.p. car and the heavier char-a-banc class. Solid tyres have proved invaluable in Europe for passenger traffic, and the difficulty of adapting the chassis for the purpose has been solved successfully.

A solid tyre for tropical work has been already manufactured by such well-known firms as the Dunlop and, we believe, the Prowodnik companies, and should certainly be given a trial for comparison with the pneumatic tyre on cars of similar type working under equal conditions.

Spare parts should be liberally provided, as for some years to come only running repairs will be readily taken in hand on the spot.

There should be no difficulty about fuel with the Baku oilfields near at hand. Paraffin would be the ideal fuel, but in the absence of a carburetter efficient and reliable at all times petrol must continue to be supplied.

We are of the opinion that, as regards methods of transport, Persia is on the eve of a revolutionary change. The Trans-Persian Railway, uniting the Caucasus with the Persian Gulf, will not be long delayed, and it would seem that a practical working arrangement with British groups will greatly facilitate the furthering of this scheme. Railways from the direction of the Karun River, northward, are also under discussion. Meantime, awaiting the materialisation of these far-reaching undertakings, there appears, undoubtedly, to be a good opening for motor transport along the routes to which attention is now drawn in this article.

DEMAND FOR MOTOR CARS IN PERSIA.

The *Chamber of Commerce Journal* says:—There should be a demand before long in Persia for motor-cars and motor trucks, as the Government contemplates a road-building scheme and has already decided to improve those roads (if such they can be called) connecting the principal cities, and for this purpose engineers are being brought from Belgium. Enzeli, the principal port of Persia on the Caspian Sea, is already connected with Teheran by an excellent road, 240 miles in length, which passes through Kazvin, built and kept in repair by a Russian company to whom the Persian Government granted a concession. The road to Meshed from Teheran can be negotiated by a motor-car, likewise the road to Shiraz, *viâ* Ispahan; these roads, however, are only caravan trails and wagon tracks, with steep ascents and sharp turns. There are in Persia some dozen motor-cars and two motor trucks of various makes—Mercedes, Napier, Spa, Martini, Benz, Mannesmann, Peugeot, Brasier, and one American machine, a Ford.

RAILWAYS AND HARBOURS IN SYRIA.

(By Our Beyrout Correspondent.)

As soon as France secured England's official declaration of disinterestedness in Syria she set diligently to work to complete the economic conquest of this land. At one time the Syrian question formed the pivot of French policy regarding Turkey, and apparently the successful conclusion of the famous loan negotiations, of which the issues were so great for Turkey, hinged upon the Syrian concessions.

It is not generally realised how far-reaching are the consequences of the concessions obtained by France in Syria; but the extent of these concessions may be gauged from the fact that the important railway and harbour enterprises are to be undertaken practically at the expense of the Turkish Government; and in view of the chronic impecuniosity of the latter, it is not illogical to conclude that the enterprises in question will ultimately revert to France. The harbours at Jaffa, Haifa, and Tripolis are to be constructed with French money, but for account and at the expense of Turkey, while the Rayak-Lydda railway, being kilometrically guaranteed by the latter, leaves the whole financial onus of the enterprise on the Turk, at least while the country is in its undeveloped condition.

The plans of the Haifa harbour were drawn up and completed some time ago, and it is now announced that the work of construction will be taken in hand about the beginning of July. The Jaffa harbour works are also said to be imminent. As regards the Tripolis harbour, however, a new factor has cropped up, which is more than likely to prevent its materialising, at least in the near future. A section of the population of Beyrout, helped—and possibly inspired—by important foreign financial concerns, such as the leading banks in this city and the French Railway Company and Port Company, has lately been agitating for the construction of a broad-gauge railway between Beyrout and Tripolis; and the movement culminated lately in the departure to Constantinople of a delegation, ostensibly representing the Chamber of Commerce, to make representations to the Government and try to obtain a concession for such a line, with a kilometric guarantee attached, as without this guarantee the scheme would have a poor chance of being taken up.

In other circumstances it would have been sheer folly to expect the Turkish Government, already groaning under such burdens, to consent to the guarantee of such a line, but, as things happen to be, the reverse is the case. The estimate of the cost of the Tripolis harbour is about forty million francs. Now, in spite of the impetus that the Tripolis-Homs railway has imparted to the trade of that port, the movement is still far from warranting such an outlay; and it may be affirmed, without much fear of contradiction, that, even taking into account future developments, the trade of Tripolis will not fully warrant the outlay; for the existence of Beyrout and Haifa to the south and of Alexandretta to the north interposes limitations to the growth of the trade of Tripolis. Therefore, to avoid the onerous obligation of paying interest on the forty million francs or thereabouts that France is going to advance on the harbour works at Tripolis, with but little hope of covering a small part of this interest by harbour dues, the Turkish Government may quite probably welcome the idea of exchanging the Tripolis harbour concession for that of the standard gauge line between Tripolis and Beyrout, even with a kilometric guarantee. Indeed, once Tripolis is condemned to a stationary position the preeminence of Beyrout as a trade centre will be assured, and the receipts of the line may safely be expected to cover the guarantee in the not distant future.

It has always been argued that instead of going against natural influences and trying to displace an important centre like Beyrout by building a harbour at Tripolis, it would be much more rational to link this centre with the standard gauge railway systems in Northern Syria by the easiest and least expensive route. As the initial mistake of building a narrow cog-wheel line between Beyrout and Damascus cannot be retrieved save by the additional heavy expenditure involved in the Hammana tunnel, it seems now more logical to build a broad line between Beyrout and Tripolis, of which the cost would be at any rate much less than that of the harbour at Tripolis. This line would not encounter any very great engineering difficulties. Indeed, the existing narrow line between Beyrout and Ma'ameltein, and the sixteen kilometres extension that is being constructed further on to Jubeil, about half-way to Tripolis, help to solve part of the difficulty, as it may be transformed into a broad line.

AUTOMOBILISM IN GREECE.

THE USE OF THE MOTOR-CAR IN WAR.

(BY OUR COMMERCIAL CORRESPONDENT IN ATHENS.)

MOTORS were unknown in Greece until 1901, when the first small motor vehicle, a Clement-Bayard of about 4 h.p., was imported by Mr. Christomanos for his own personal use. Some time afterwards the second car followed, imported by Mr. Condogiannakis, also for private use; and towards the end of 1903 the third car came into the country—a small two-cylinder German—for the then Crown Prince Constantine. The next arrivals were an American (Olds Mobile) for Professor Theofanopoulo; a four-cylinder car of English make, which was presented by the Tsar to Prince Andrew; and, in 1906, another four-cylinder for King George. Thereafter the importation of motor-cars grew steadily, and as far as it is possible to ascertain, the number of cars, for private use and for hire, imported up to 1912 was about eighty-five.

Shortly before the Balkan War a good many cars and motor vehicles were imported by the Greek Government for the use of the Army. For use during the war the Government also took over sixty-seven of the privately owned cars that were then in the country—all that were approved as suitable for Army use. Of these, it may be of interest to note, seven were destroyed, while the remaining sixty were returned to their owners at the close of the (second) war.

Increase in Car Imports.

During the wars and since the coming of peace a good many cars have been brought into the country, for private use or for purposes of hiring out; and, judging by the very generally expressed desire to own a car, it is safe to predict that we shall see the importation go up by leaps and bounds as soon as the heavy import duties are reduced and manufacturers arrange easy terms of payment. This view is borne out by comparing the number of motor vehicles in the country in 1912 with the numbers to-day, which, as closely as can be ascertained, are as follows:—

Motor-cabs and cars in private use	82
,, employed for hiring purposes	85
,, owned by the Royal Family	10
,, ,, ,, Red Cross	8
Motor fire engine (English make)	1
Tank carts (4—5 tons capacity each)	3
Lorries, owned by private firms	5
,, ,, Government, for Army use	100

Of the above vehicles:—

About	40	are of a maximum	horse-power	up to	15
,,	35	,, ,,	,,	,,	18
,,	70	,, ,,	,,	,,	24
,,	30	,, ,,	,,	,,	35
,,	30	,, ,,	,,	,,	40
,,	5	,, ,,	,,	,,	45

The motor lorries employed in the Army service are of about 2-ton capacity and capable of travelling at about 40 kilometres an hour; and those owned by private firms are of about the same capacity and speed.

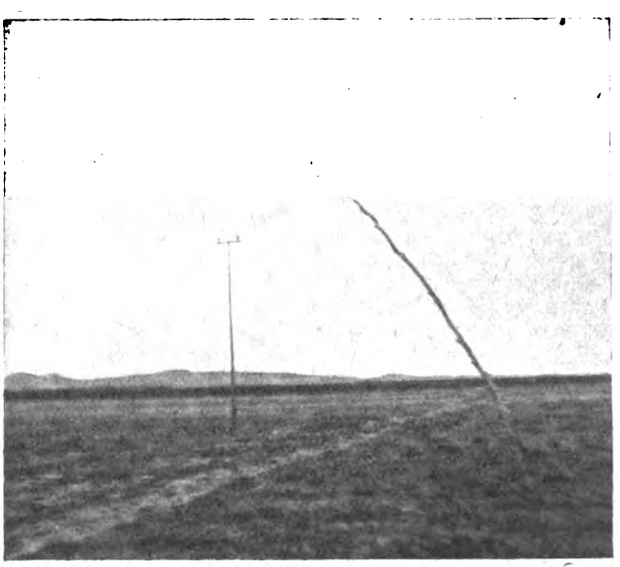
Easy-Payment System.

Most of the well-known makes of cars are now represented in the country, but so far none of them has secured a commanding lead in public favour. Those which appear to have gained most ground are in the order stated:—The Ford, Renault, Bleriot, Picard, Fiat, Mercedes, Dietrich, and Overland. It is too early yet to say which of these will eventually become the most popular, or whether a newcomer may not capture the first place. With regard to Government orders, a great many points will have to be considered before final preference is given to this or that make. As to private purchasers, things are rather different; the average buyer will consider, next to material and workmanship, the question of price and the terms of payment; and there can be no doubt that the granting of easy terms will play a very large part in the securing of orders, especially from buyers who wish to place the cars on hire. I am informed that several French and American firms are showing the greatest readiness to do business on the "easy payment" system, viz., by accepting 20 per cent. of the price down, and the remainder by monthly instalments of about 200 francs. Other makers who wish to obtain a footing in this market are sending one or two cars on consignment; but it is remarkable that while Continental and American makers are contending for the market British manufacturers show no signs of activity whatsoever.

Motor-cars have been, and still continue to be, regarded in Greece as very great luxuries. The heavy import duty on cars—ranging from 800 francs up to 4,200 francs, according to horse-power, capacity, etc., of the car—and petrol combine to make the possession of a car an impossibility for all but the richest. For the reason given, the hiring of a motor-car for short runs in towns is out of the question for most people, 15 francs being about the lowest fare!

According to the new tariff now before Parliament, the import duties on motors in general will be considerably reduced. Lorries will pay from 7 francs to 15 francs per cwt., the total duty not exceeding 275 francs (£11). Passenger cars will also pay from 7 francs to 15 francs per cwt., the maximum duty not exceeding 300 francs (£12). Ordinary motor-cabs up to 600 kilos, 20 to 40 francs per cwt.; over 600 kilos, 25 to 50 francs per 100 kilos on their total weight. Under this tariff, it is estimated, the import duty will be reduced to about one quarter of what is now paid. Petrol will also benefit under the tariff.

Up to the present motors have so far been of little or no service in the way of public communications as far as Old Greece is concerned, partly owing to expense and partly to bad roads with steep gradients. In New Greece, however, where other means of communication are at present lacking, motors have rendered, and still render, valuable service both to the Army and to the public. For instance, in Epirus the transport of ammunition and provisions from Preveza to Janina and thence all along the frontier is carried on by motors, which also carry the mails. There are also four private motors which run between Preveza and Janina, so that, whereas passengers had previously to travel in a (so-called) carriage for twenty-four hours to get from one of these points to the other, they can now do the journey in from three and a-half to four hours. The same tale is true of Macedonia, where motors maintain regular communication between Salonika and the interior.



The Old and the New: Persian Government's Telegraph Line (right) and Anglo-Persian Oil Company's Telephone Line (left).

The Lesson of the War.

The most important and valuable service that the motor-car has rendered to Greece, however, was during the two wars in 1912 and 1913. Then, in view of the rapid advance of the Greek troops across country lacking railway communications, the provisioning of the troops and the supply of ammunition would have been almost impossible but for the use of motors; and the transport of the wounded would also have been a much more difficult matter. It is generally recognised that although motors had never been employed before in the Army, the organisation was so good that things went without a hitch. Perhaps the most surprising feature of this business was that though all the chauffeurs employed were quite new to the work—the great majority of them knew nothing whatever about motors, and were taught to handle their machines for the occasion—no serious accidents were reported. For repairs there was a depot on each side, in Epirus and in Macedonia. Now there is a permanent repair shop at Janina, another at Salonika, and one, well-equipped, in Athens. The Greek Government, appreciating the valuable services rendered to the Army in both the Balkan and the Greco-Bulgarian wars, has decided to raise and equip a complete battalion of expert chauffeurs with 400 lorries, etc.

ENGINEERING ENTERPRISE IN ROUMANIA.

PREFERENCE SHOWN FOR BRITISH ENGINEERS.

BY OUR BUCHAREST CORRESPONDENT.

ENGINEERING opportunities in this country are so many and varied that it is a matter of some difficulty to specify them. For one thing, foreign engineers are preferred to those who have attained their knowledge locally, since their experience is naturally so much more extensive. British engineers are appreciated above all others, especially in the petroleum industry, where even in American companies Englishmen are employed.

The formalities that have to be gone through before an engineer can practise in this country are very simple. He must have a knowledge of the language and must furnish certificates from an engineering institution. Little further is required. The term engineer in this country generally carries with it the word contractor, and, as a matter of fact, it is the custom of an engineer not only to prepare plans for enterprises, but also to give estimates for them and carry them to completion. In consequence, engineering is more profitable here than in most countries.

Building Schemes.

The vast amount of building that is going on here at present opens a wide field to foreign enterprise. Practically every day some new undertaking is announced, which a timely tender by a man on the spot might secure. The Government itself has all kinds of work in view, particularly in the Dobruja, where, as already mentioned in THE NEAR EAST, a number of barracks and other military works are to be constructed. The contracts for these works will be given by public tender, and will prove highly remunerative undertakings. Much road-making and railway construction will also be undertaken in the Dobruja.

The above remarks apply also to Roumania proper, where the construction of several railway lines is under consideration. New bridges will also be built, notably the proposed structure across the Danube, connecting Roumania with Servia. Roumania is to construct this bridge, but Servia is sharing in the expense. As in the case of the Czernevoda Bridge, the undertaking will be given to a syndicate. Then there is the proposed bridge connecting Bulgaria with Roumania, though in this case the negotiations are rather at a deadlock, due to a difference of opinion as to a suitable site. There can be no doubt, however, that an agreement will soon be arrived at, when the construction of the bridge will be quickly proceeded with by this country. A third bridge is to be constructed at Harsova, to act as another connecting link with the Dobruja. The Roumanian State Railways have charge of this undertaking, which will doubtless be placed in the hands of some firm.

In Bucharest itself, a large central railway station is shortly to be constructed, also a new town hall and various Government offices; while in other towns there is much to be done in the way of electric lighting, tramways, and waterworks. The following extract from one of to-day's papers will better illustrate my meaning:—"H.M. the King has signed the decree approving the result of the adjudication for the construction of a new palace of justice at Tarqu-Jin. The work will be executed by Mr. D. C. Atanasiu, and will cost 521,662 lei." Putting the margin on this piece of work as low as 3.7 per cent. one has a profit of about £600. The engineer, it might be noted, is of Greek nationality.

An Opening for Capitalists.

While on the subject of construction, I must point out the great opening in Bucharest for capitalists who are prepared to erect dwelling houses suitable for middle-class clerks and minor Government officials. The last three decades have witnessed such an advance in every way in Roumania that living has come to cost double what it did. A great influx to the towns has taken place, with the result that house rents have reached an impossible figure. In this year's Budget, grants are made towards the house rent of Government employees in order partially to allay the pressure. A company on the lines of English building societies should certainly obtain handsome profits in this direction, especially if the rents were arranged with a view to the house becoming the tenant's property at the end of a number of years.

Other openings for engineering enterprise are to be found in the ceaseless demand for factories to produce articles formerly obtained abroad. Almost every week some new factory is being erected, as can be seen at a glance in the commercial journals.

Electricity is also being widely introduced, while artificial irrigation is now being studied with a view to attempting to bring into cultivation the large tracts of hitherto uncultivated land.

MOTOR CARS AND BOATS.

NO attempt has been made so far either by our own manufacturers or by those of other countries to introduce motor-boats into Roumania. Yet there is a large market for motor-boats along the whole course of the Danube, not only at the great ports of Sulina, Galatz, etc., but also at the various river stations where grain is collected for transport. Merchants and their representatives, for instance, wishing to visit steamers or lighters would find these craft of the utmost use. At present they are compelled to go to these vessels, which always lie on the far side of the river when not actually at the quays, in a row-boat. Motor-boats would also be in great demand for sport and pleasure. Above all, the Government, if the advantages of motor-boats were properly put before it, would doubtless order several for police work at the river ports and at Constantza, as well as for the use of Government officials. The thefts from steamers and lighters that occur yearly during the loading season are a cause of intense annoyance to the harbour authorities. So far all the measures put into force have failed to prevent these thefts, which occur almost nightly at Braila, Galatz, and other ports, and the authorities are quite at a loss to deal with the question. The motor-boat is the obvious solution. Its rapidity would permit the overhauling of any suspicious craft, and would ensure the adequate patrolling of the ports during the night hours.

Method of Doing Business.

Firms constructing these craft desirous of securing business in Roumania should first despatch an agent to study the question on the spot and to get in touch with the Government authorities at Bucharest and with the heads of the principal steamship and export firms at the ports, so as to determine the most suitable type of boat. In this way a few orders would be obtained, and after they had been carried out business would begin to flow in. It would be necessary, of course, to engage a reliable agent, and this would fall to the lot of the representative while engaged in the preliminary work.

Steam lorries are already on the market in Roumania, and some months ago, as mentioned in THE NEAR EAST at the time, the Ministry of War invited all agents possessing these vehicles to participate in a competition, when a large number of lorries were purchased by the Government. The utility of steam lorries was proved during the occupation of Bulgaria, and there can be no doubt that in the future more will be ordered. Other Government departments make use of steam lorries, as well as factories in various parts of the country. For the manufacturer of steam lorries the market is in nowise filled, but to compete with the types already on the market it will be necessary to show the advantages a type possesses over those in use. The best way of coming into this market would be to employ a garage company, or failing that, an agricultural machinery agent.

What has been said of the prospects for steam lorries applies equally to motor-cars. But here for British manufacturers there enters the vexed question of credit. French and German houses give uniformly long credit to the garage companies here, who sell on commission. British firms must do the same or else open their own garages, as selling through catalogues is quite out of the question. There is much business to be done, as the market is by no means overstocked. There is a good opening also for cars of better quality on hire, as the few taxis and other cars plying for hire here are avoided on account of the exorbitant charges.

RAILLESS ELECTRIC TRACTION.

AMONGST the many factors contributing towards development in the Near East, few are more important than the increased attention being devoted to improved transport facilities. In much of the territory, indeed, these facilities are terribly overdue, and future development of the many important industries and of the districts and cities which are potential large centres of industry are altogether dependent upon cheap and rapid transport of the workers as well as the carriage of produce and goods by some economical and satisfactory means of transport.

The latest method of dealing with the problem is by means of "railless electric traction," which is already operating so satisfactorily in Great Britain and abroad as to fully justify the claims of its advocates as to reliability and cheapness of operation. This system is already known in that part of the world, the R.E.T. Construction Co., Limited, of London and Leeds, having agencies throughout India and in the Near East. The vehicles are driven by electric motors deriving their power by trolley poles from overhead wires in a similar manner to ordinary tramcars, but without any rails.

Among the outstanding advantages of the "R.E.T." system are:—Its extreme adaptability and flexibility, its low cost of installation (which is less than one-fifth of the average cost of British tramways), and the rapidity with which it can be constructed. The cars can be steered through other traffic and past obstructions and under low bridges with the same facility as any ordinary road vehicle. Passenger and goods vehicles can be operated simultaneously on the same traction line, and in the event of one car being delayed the rest of the service is not disorganised or delayed.

The company has made a special study of goods transport by railless traction, and has designed some useful vehicles for carrying general merchandise and produce. These range from 5-ton covered wagons to a freight train with a combined capacity of twenty tons.

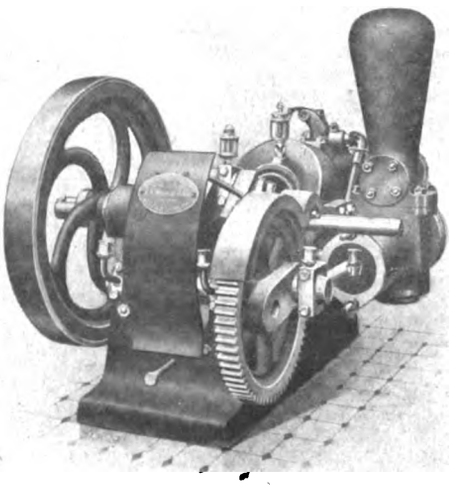
Passenger cars on this system are either single or double decked, and carry from sixteen to forty-eight passengers, according to requirements, and one or two trailers may be attached to the cars, thus increasing the capacity of the system to handle a large volume of traffic. Two trolley wires are necessary, as there is no rail for the return of the current. The power consumption is remarkably low, being about 0.14 of a unit per ton mile.

The "R.E.T." system, it may be pointed out, uses overhead equipment of standard tramway type, and the cars are able to travel at full speed on any portion and from side to side of the roadway without side pressure on the trolley wires. Complete freedom for crossings, junctions, and interrunning with tramcars are important points in favour of the system, as this also enables the vehicles to carry passengers and merchandise over tramway routes without altering the tramway wires and obviates change of cars. The motors employed are attached to the frame of the chassis, and their weight is consequently entirely spring-suspended from the axle. Each of the rear wheels is independently driven and the necessity for differential gearing obviated.

The "R.E.T." system, which is entirely of British invention and manufacture, though new, is a proved form of road transport, which is specially suited to foreign countries. For the Near East in particular it offers advantages over and above the transport facilities it affords, as the construction of "R.E.T." lines between towns and from towns into agricultural districts will also enable farmers and others along the routes to obtain cheap light and power, as well as ensuring their produce and merchandise speedily reaching their markets.

"WHEATLEY" OIL ENGINE AND PUMP.

The "Wheatley" oil engine and pump is undoubtedly a mechanical combination which will be found very useful in the Near East, where durability, simplicity of construc-



tion, easy management, and adaptability to a variety of work are most essential for the success of an engine or any other class of machinery. To the "Wheatley" engine is attached a single-acting horizontal ram pump, which can be used for water supply of mansions, country houses, farms, villages, and for draining quarries, mines, etc. It can also be used for other purposes, by having a sliding pinion fitted to disconnect the pump gearing, and thus employing it for driving an electric light plant, barn or dairy machinery, agricultural flour mills, etc. Pumping with the "Wheatley" oil engine combination, it is claimed, does not exceed one penny per thousand gallons, pumped to a height of 120 ft., which is, of course, extremely cheap. All the main parts of the pump are made of gunmetal, the cylinder has gunmetal liner and piston, also gunmetal valves and seats. The "Wheatley" engine is run on ordinary paraffin or kerosene oil, but can also be supplied to work on gas or petrol at same price.

ENGINEERING PROJECTS IN EGYPT.

HUGE DRAINAGE SCHEME.—LARGE DEMAND FOR PUMPS.

(BY OUR CAIRO CORRESPONDENT.)

DURING the past year there has been considerable industrial activity in Egypt, and a proof of this has been afforded by the Customs statistics, which in this respect showed an increase of over £E1,000,000 as compared with the importations of the preceding year. Especially has this activity been noticeable amongst the importers of irrigation and agricultural machinery, of centrifugal pumps, and of motor pumps of the smaller sizes. Of course, in a country like Egypt the bulk of the work that interests the engineering world is done by the Government. It may therefore be useful if we give some details of what has been done so far and of what it is proposed to undertake in the near future in this respect.

The most important enterprise is undoubtedly the Delta drainage scheme, on which about £E2,500,000 is to be expended, and which is destined not only to free what is very rightly termed the cotton field of Egypt from its present comparatively water-logged state, but also to enable the reclamation of a vast area, which is taken up at present by the lakes and marshes, to be effected. The work on this scheme is being confined to the Behera and Gharbia districts, the latter of which is the more important. In this section a huge pumping station is to be set up at Baltim, on Lake Borollos, for the purpose of pumping the drainage water out of the drains into the sea. This station will consist of large centrifugal pumps, half of which will be driven by steam engines and half by Diesel engines. This arrangement would at first sight not appear to be in accordance with sound engineering, but when it is explained that half the station only will be required during eleven months of the year it will be readily understood that it affords the Government a safeguard against any shortage in supply in the oil or coal markets. The order for this machinery has been placed with a Swiss firm, at a price about £E4,000 less than the lowest English tender.

Mex Pumping Installation.

With regard to the Behera section, the pumping station will be set up at Mex, near Alexandria. The order for the pumps has been given to the Humphrey Pump and Power Company, and the installation will at first consist of ten Humphrey pumps, to be increased to eighteen when the other irrigation work is completed. It is claimed that these pumps are simpler and more efficient than ordinary centrifugal pumps, and experience will show whether this claim is justified. This station will be called upon to cope with a volume of 7,200,000 cubic metres of water per day, and each pump is designed to lift 450,000 cubic metres of water per diem.

Serious competitors for the Diesel engines of the smaller sizes are what is known as the semi-Diesel engines. The Egyptian Government has recently placed an order for seven pumping sets ranging from 14 to 50 h.p., and, driven by these engines, the result will be watched with much interest. The semi-Diesel engines, although consuming 5 per cent. to 10 per cent. more fuel than the Diesel engine, costs only half the price; the attendance can be of the cheapest nature; and in addition it is understood that the repair bill is very small. A large future should therefore await the semi-Diesel engine up to 150 h.p. in Egypt. Another competitor for the Diesel engine is the semi-fixed high superheat engine made by such well-known firms as Garrett, Marshall, Robey, etc. It is understood that these makers are prepared to guarantee a coal consumption not exceeding 1.6 lb. per t.h.p. per hour. In fact, many of these engines have been introduced into Egypt, and to all accounts they are giving the utmost satisfaction.

'Tis an ill-wind that blows nobody any good, and the phenomenally low Nile of last year, whilst it may have caused many an anxious moment to the financial and irrigation authorities of the country, has certainly benefited the suppliers of pumps and motors of the smaller sizes. These have been required for pumping from the artesian wells which the cultivators have sunk all over the country, especially in Upper Egypt, in order to tap the subterranean water. The boom in this category of machinery seems now to be over, as the fellaheen appear to have sufficient to carry them over to the next flood; but if expectations as to its size are not realised a further demand will most certainly arise.

Increased Orders for Rolling Stock.

The purchase by the Egyptian Government of the Heluan and Mariut Railway lines has naturally led to an increase in the orders for rolling stock. Recently the State Railways asked for tenders for some locomotives. The result of the adjudication is certainly worthy of notice. The lowest English tender was £E3,760 per engine, whilst that submitted by a well-known German firm was £E3,100 per engine. This difference in price is, to say the least of it, surprising, and one naturally is curious to know how it has come about. It is stated that English makers are so busy that they do not care for further orders, but this condition of affairs could scarcely justify such a very large difference in price. What makes this discrepancy more extraordinary is that the engines in question are not to German design, but that they are to the English specification and design of the engineer of the State Railways. In this connection it is further worthy of note that on some engines recently delivered in this country, the prices of the tenders for which bore almost the same proportion as those mentioned above, all the fittings were English and were bought in England!

To the layman these facts must appear extraordinary, and certainly such a difference in price on the same articles seems to indicate that there is something mysteriously wrong somewhere. A very large order for coaches and wagons was recently placed by the State Railways in Austria and Belgium. This is understood to have been a repeat order, and for this reason no English firms were asked to tender. One often hears the remark in this country amongst the natives that, notwithstanding that Great Britain is predominant in Egypt, and that the officials responsible for the placing of orders are English, most of the large orders go to foreign firms.

Forthcoming Public Works.

With regard to projects in the near future, mention might be made of the Assuan power scheme, which, it is understood, is being seriously considered. Details at the present moment are not available to the public, but we may expect some definite views in the coming autumn. It is understood that the project is a very extensive one, and that although the authorities are quite clear in their minds as to what they want, the details of the various sections which it will comprise require the most careful study, as, of course, the question of initial expense and future upkeep plays a very important part in the matter.

There are also several large pumping stations in prospect, one for a large estate near Cairo and several for Upper Egypt. And further, there are the dams on the Blue and White Niles, which are to be taken in hand almost immediately. As readers of THE NEAR EAST may remember, a commission visited the Sudan last winter with the object of choosing the sites for these two great works, the first of which is to turn the country immediately to the south of Khartoum into a cotton field and granary, and the second of which is to save Egypt from a repetition of the experience which she is now going through to provide water for a more extended area, and to guard her against all future eventualities. It is as yet early in the day to give any details, and full particulars will not be available until after the return from England at the end of the summer of Mr. L. N. Cooper, who, under the direction of Mr. Murdoch Macdonald, Under-Secretary of State for Public Works, will be in charge of the Blue Nile scheme.

Main Drainage System for Alexandria.

Tenders will shortly be called for by the Alexandria Municipality for the construction of a system of main drainage for that city. The specification has not yet been published, but it will be within the next few weeks. It is understood that it is proposed in this case to use centrifugal pumps driven by electrical motors installed in various pumping stations at different points in the city, the pumps for pumping the raw sewage being of the stereophageous type. The current will, as far as is known at present, be supplied by the Tramway Company. This is quite a different system to that adopted in Cairo, which, as your engineering readers are no doubt aware, is on the Shone system of compressed air ejectors.

In mentioning Cairo we may say that the drainage work is now well advanced. The main collector is completed, and the machinery is now being installed at Kafr-el-Gamous. It is hoped that within the next two or three months the drainage of Zeitoun and Abbassia will be diverted into the new sewers, for which temporary pumping machinery is being installed. The remainder of the city will follow in due course.

THE MOTOR-CAR IN THE NILE VALLEY.

REMARKABLE IMPROVEMENT IN MEANS OF COMMUNICATION.

(BY A CAIRO CORRESPONDENT.)

TWO years ago Egypt was almost as roadless as Albania is to-day. There were a few roads round Cairo; one could always motor to the Pyramids along a road with a first-rate macadamised surface. There was, too, the road to Heliopolis, another to Zeitoun, and it was quite possible, though not pleasant, to motor out to Meadi. Alexandria was worse off, for except the streets in the town and the road to Ramleh, which, thanks to the Municipality, was always in atrocious condition, there was nothing fit for a car.

It was perhaps surprising, or it would have been surprising anywhere else but in Egypt, that under such conditions motor-cars should have any vogue at all. Yet there was, even at that time, a good demand for them in Cairo, and there were always plenty to be seen about the streets of Alexandria.

The last two years have witnessed remarkable changes in Egypt in many respects, but in none more than in the matter of roads. Lord Kitchener saw at once the need for better means of communication in the provinces, and he had not been six months in the country before work was being pushed on to make the road between Cairo and Alexandria passable. Then a special Government Department was created exclusively to look after the roads, with the result that to-day there are some hundreds of kilometres of good roads in the Delta, along which it is possible to motor in comparative comfort, while every year the department is increasing the scope of its activities. It is unfortunate that the fall in the revenue has not enabled the Government to grant as much to the Roads Department for the coming year as it would have done under more favourable conditions. However, the £E16,000 which has been allocated to the construction and keeping in repair of the main roads in the provinces will enable some progress to be made. It might be explained that the roads are not macadamised, except occasionally in the proximity of the big towns, but are made of earth, which is rolled down to form a hard surface. It is not a method which is calculated to stand heavy traffic, but anyone who has not motored over roads of this kind would be surprised how good they often are, speeds of 30-40 miles per hour being quite possible.

Officials Provided with Cars.

The Government has not been slow to see the advantages its officials enjoy in being able to get about by motor instead of riding the old-fashioned way. Only a few weeks ago the Minister of the Interior decided to allow all the mudirs of the Delta provinces a motor-car each. The Irrigation officials have also for some time been using motor-cars in the course of their work, and the inspectors now do their *murur* by motor-bicycle whenever and wherever it is possible. And not only officials are utilising the motor-car and motor-bicycle in the provinces. The country notables are also taking them up, and it is already getting the fashion for the *fellah* Bey and Pasha to have his car; they will soon be as essential for them as they are now for the Beys and *bashawat* of Cairo and Alexandria.

This activity in road-making in the provinces has been reflected both in Cairo and Alexandria, where the mileage of good roads is increasing by leaps and bounds. The Cairene now can motor to Heluan along a charming road that runs for nearly twenty miles by the side of the Nile; the road to the Barrage is now macadamised for a great part of the distance, and Alexandrines will soon be able to make delightful motor excursions to Abukir, whilst they can now motor many miles along the banks of the picturesque Mahmudia Canal on a road that has been lately macadamised.

A Growing Demand for Motors.

It is obvious from all this that there is a growing market for motors in Egypt, and also a market with widely varying requirements. Cairo and Alexandria will continue to demand a car for town work, pure and simple. Most of the best makes of English and French cars are used for this purpose, though it is rare to see anything over 20 h.p. Amongst the native Egyptians and with the foreign community the limousine is the most popular type. This suits the requirements of the harem better than any other; the Pasha, too, generally prefers a closed car of this kind.

There are also the English officials and business people in Cairo and Alexandria, most of whom have their car. With them an open car is generally preferred, running usually to about 12-16 h.p. For this type the demand is perhaps greatest. It is certainly the most serviceable all-round car one can have in Egypt, for it can be used not only in the two large towns, but also practically anywhere in the provinces. This, too, is the kind of car purchased by the Government for official purposes. The Napier, 16 h.p., colonial model, has proved itself a most useful car of this type, as also have the Wolseley, Arrol-Johnston, and Siddeley. This type of car, the 12-16-20 touring model, is also that which the country notable will prefer. The closed limousine car is too heavy for country work, while the cabriolet and the landaulette, both of which are fairly popular in Cairo, are also heavy and hardly sufficiently light or simple for country districts.

Then, again, there is a strong demand for the small two-seater car. The number of bachelors in Egypt is proportionately high amongst the European communities, and an unmarried man, as a rule, prefers a two-seater car, which is lighter, easier to garage, and more economical. Of this kind there are some Singers, a few Humbers, many Fords, and a multitude of other makes on the streets of Cairo and Alexandria. The Fords, indeed, are proving a very popular car, and one sees all the three types put on the market by this enterprising firm everywhere.

The Coming of the Motor Cycle.

Last, but not least, comes the motor-bicycle. Nowhere has its conquest been more complete than in Egypt. The present writer three winters ago was one of the first persons in Cairo to ride a motor-bicycle. Now there are over 400 in the capital alone, whilst all over the provinces they are in use, and are proving themselves invaluable. They can often go

Convicts building the New Heluan Road.

where a car cannot. Inspectors of Irrigation use them all over Lower Egypt and up as far as Minia, and they find that a daily tour of inspection of sixty or seventy miles is relatively easy. Of the makes used there are again many, but the most popular appear to be the Douglas and the Motorêve, a Swiss machine, which is, or was, cheaper than the British-made article. The Irrigation Department appear mainly to use these two makes, though they have also purchased a good many Enfields, which are giving entire satisfaction. The Rudge-Whitworth, the Triumph, and the Indian are other machines which are in favour to a less extent. The motor-cycle that is to succeed in Egypt does not require to be more than 3 h.p., but it must have two speeds, and it is essential that it should be extremely strong.

On the whole, it cannot be said that British makes of car have not at present their fair share of the Egyptian trade. As I have said, the motor manufacturer who wishes to push his cars in this country should turn out a strong and light touring car, ranging from 12 to 20 h.p. The car of this kind suitable for the home market, with very little alteration, such as the strengthening of springs, a specially large and airy hood, and sprung rather higher from the ground than an English touring model, should do very well.

MOTOR-CRAFT FOR THE SUDAN.

THE NEAR EAST has consistently advocated the employment of motor craft on the waters of the Upper Nile, and it is interesting to note that in his annual report on the affairs of the Sudan for 1913 (Cd. 7,358) Lord Kitchener writes:—"Mention may here be made of the discovery of a channel between the Jur and Lol Rivers. The opening up of this waterway and the clearing of the Bahr el Ghazal are desirable whenever funds are available . . . the penetration into new districts of the Sudan has emphasised the need for light-draught handy vessels for use on the smaller tributaries of the Nile, and it is proposed to make a trial with a lightly built stern-wheeler to be driven by crude oil motor."

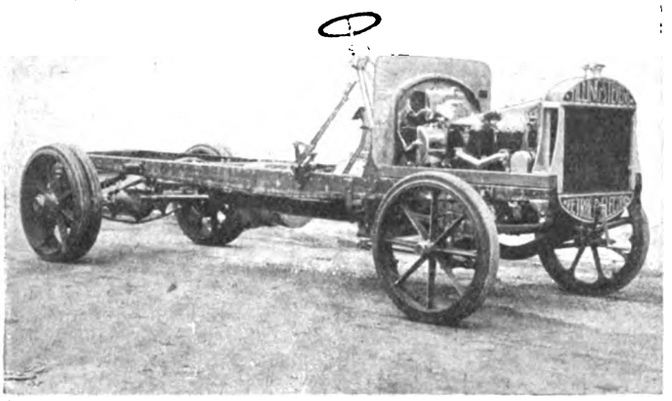
PETROL-ELECTRIC VEHICLES.

In our issue for May 22 we drew attention to a communication from our Special Correspondent in the Balkans stating that a motor-'bus service for post, passenger, and freight traffic was shortly to be introduced between Veles and Monastir. At the time that communication was written it was understood that the order for the cars had not been placed, and in view of the many excellent types of vehicles now manufactured in Great Britain, it is very much to be hoped that the contract has come to this country. A type of 'bus well fitted to meet the requirements of the Servian concession referred to is that of the "Tilling-Stevens" petrol-electric vehicle, which, during the last three or four years, has made so much substantial headway not only in Great Britain but abroad. The manufacturers, Messrs. W. A. Stevens, of London and Maidstone, have agencies in many foreign countries, and are now appointing representatives in the Near East. In this type of 'bus the weak features in a gear-driven car, namely the clutch and gear box, are eliminated by the substitution of a flexible electrical transmission between the engine and driving wheels. The final drive is effected by an electric motor, driving, by means of a cardan shaft, the worm gear on the back axle. The electrical supply for the motor, instead of being provided by a battery as in the ordinary electric vehicle, is supplied by a specially constructed dynamo, directly coupled to the petrol engine, which is the mechanical source of power. Under the system of electric transmission employed, it is impossible for the driver to "jerk" the 'bus, and the over all commercial efficiency running in normal omnibus service has been found to be 79 per cent., being 90 per cent. on the motor and 88 per cent. on the generator. A four-cylinder engine is installed with a bore of 121 mm. and a stroke of 140 mm. No clutch is employed. The dynamo is driven off the flywheel by means of a flexible coupling, and the drive from the electric motor to back axle is by means of a propeller shaft fitted with flexible joints at each end.



Front View of 40 h.p. Chassis.

The whole electric transmission arrangements have been designed to ensure the greatest possible simplicity of construction. The generator, which is capable of an output of from 1 to 30 kilowatts, at a speed varying from 350 to 1,400 r.p.m. at a voltage varying from 0 to 300, is designed with a falling characteristic, so that any increase in the demand for current when the engine is fully loaded is accompanied by a corresponding reduction in voltage. The output in kilowatts at any speed is proportional to the power exerted by the engine, but the volts and ampères may vary over a large range according to the gradient, speed, or degree of acceleration required. The ampères required by the series wound motor are nearly proportional to the torque on the cardan-shaft, and the speed of the motor is to a less degree proportional to the voltage of supply. It thus follows that when the vehicle is running on the level road the demand for ampères will be small, but on gradients it will considerably increase, with a corresponding decrease in voltage, resulting in a slower speed with increased torque; this change takes place automatically.

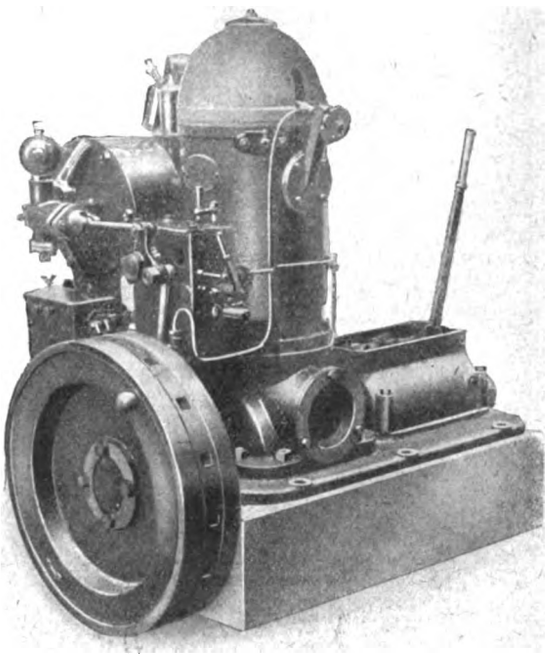
On level roads and ordinary gradients the whole of the control is effected by the gas throttle pedal operated by the right foot of the driver. On stiff gradients the shunt resistance has to be employed to allow of increased engine speed.

The system is equally applicable for omnibuses, char-a-bancs, delivery vans, lorries, and tramcars. Special vehicles are supplied for military purposes.

THE NAT OIL ENGINE.

The importance of the Near East as a market for the motor-boat has been frequently urged in this journal. It is satisfactory, therefore, to note that British manufacturers of this class of craft, more particularly, perhaps, makers of suitable types of prime movers for such vessels, are giving very much increased attention to the exploitation of this territory, where their Continental competitors have already made headway.

We illustrate below a type of engine very suitable, either as prime mover or auxiliary, for practically every class of pleasure or commercial craft likely to be employed for Near Eastern service; also for stationary purposes. Known as the Nat hot-bulb oil engine, it is manufactured by the Torbinia Engineering Co., of London and Lowestoft. It is of the semi-Diesel type, working on the two-cycle system with a moderate speed of 350-450 r.p.m., and is made in sizes from 7 h.p. up to 90 h.p., in one, two, three, and four-cylinder types. Any grade of common paraffin or residual oils from a petroleum base with a specific gravity up to .900 is suitable for running in these engines. Fuel consumption varies from .5 to .7 pint per b.h.p. per hour, according to the size of the engine, and these figures have been worked out from actual installations.



Whilst comparing most favourably in design, method of manufacture, and materials used with the best engines of similar types, the Nat engine has two outstanding features of considerable importance to Near Eastern users—the entire absence of water injection so necessary with most other engines of the semi-Diesel type, and the new infinitely variable stroke governor.

The satisfactory running and power developed by the Nat engine without a water injection is accounted for by the special design of fuel sprayer nozzle which, in conjunction with the special design of cylinder head and hot-bulb, breaks up the fuel so that the vaporising and ignition is perfect, giving off full power with a perfectly clean exhaust. The cooling of the cylinder head is arranged for by an improved design of water-cooled head and the great disadvantage of having to carry fresh water on board for engine purposes is done away with.

Many advantages attach to the infinitely variable stoke Governor fitted to the Nat engine, as, whether running light for any length of time or under full load, the same satisfactory and sweet running is obtained. There is no cut-out of the fuel supply, the length of the fuel pump being automatically and instantly shortened or lengthened according to the varying of the load. It is claimed that this new governor is really a combination of all the good points to be found in both the "hit and miss" and "centrifugal" types, with the elimination of undesirable features.

For powers over 90 h.p. the Torbinia Company manufacture a special type working on the Diesel principle, but more simple in construction and working than a full Diesel type engine. Hot-bulbs are entirely eliminated, the engine working with air-blast injection and compression sufficiently high to cause ignition when the fuel is injected.

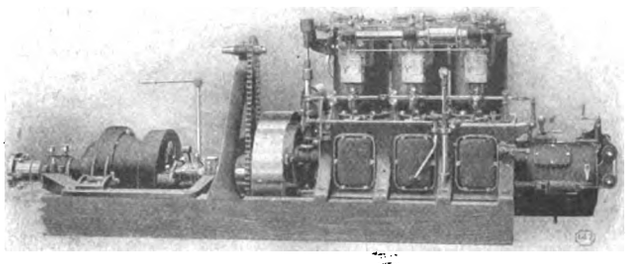
THE "GARDNER" MARINE OIL ENGINE.

THE steady increase in the popularity of the motor-boat during the last three or four years has been one of the interesting stages of the development of the marine motor generally. This popularity is more noticeable in the Near East, where Governments are equipping harbour and Custom-house authorities with motor-craft of all sizes for ordinary and special service; while private concerns and individuals are adopting them for commercial and trade use, or for pleasure. It is satisfactory to note that British engines are making more headway in those regions than any other of foreign construction. Some appreciable and important points which are always considered by such buyers in selecting an engine are extreme simplicity, good material and finish, economy of fuel consumption, and easy management—i.e., not requiring very skilled mechanics to attend to it. These good points, as well as other equally, and perhaps more, important, are the principal characteristics of the "Gardner" marine oil engine. The makers, Messrs. Norris, Henty, and Gardners, Limited, of 87, Queen Victoria Street, London, E.C., whose extensive works, the Barton Hall Engine Works, are at Patricroft, near Manchester, are the constructors also of a variety of types of engines for oil, gas, or spirit as fuel. Their marine engines are designed on the two-cycle high-compression system, with crank-case scavenging. The four-cylinder engines are reversible, so that there is no necessity for a reversing gear between the engine and propeller shaft. The starting and reversing are effected by compressed air, which is furnished by an air compressor built in with the engine. Both operations are effected as quickly and with the same ease as for a steam engine. If the engine be running at, say, full speed ahead and it be required to reverse, a hand lever cuts off the fuel supply by putting out of action the fuel pump. A hand wheel then alters the angular position of the cam shaft, putting in the required position for reverse running. A second lever then puts into action the compressed air valves; the engine then commences to run astern. The whole operation, from full speed ahead to full speed astern, is a matter of only a few seconds.

A feature of the "Gardner" engine is the method of governing. This operates by varying the stroke of the fuel pump. The fuel is injected into the combustion chamber by accurate cam-driven pumps, one to each cylinder. The stroke of the fuel pumps is controlled by a special, variable speed, centrifugal governor, so that the fuel charge is varied according to the load of the engine. This prevents racing when the propeller leaves the water during heavy pitching. A special device on the governor permits of a great variation of speed of the engine.

The Slow Speed "Gardner" marine engine is a type that will be found very suitable for service in the Near East, for



Gardner Petroleum Engine.

it is particularly suitable for commercial craft, fishing boats, etc., and is built for either spirit or refined petroleum, thereby allowing quick starting, easy manipulation, and working economy. It is compact in design, yet substantial and simple. For general purposes and in nearly all localities ordinary refined petroleum (commonly known as paraffin lamp oil or kerosene) is the most serviceable fuel, as it is cheap, safe to use, and obtainable in almost any part of the world.

It is a significant fact that "Gardner" marine engines have proved equally suitable for every type of craft. Yachts, fishing boats, auxiliaries, pinnaces, cutters, dinghies, barges, cargo boats, traders, passengers, and mail packets' vedette boats, etc.; and this speaks much for the progress that has been made by British engineers in that line of modern engineering.

RIVER HARNESSERS.

The Ipswich firm of engineers, Messrs. Ransomes and Rapier, Limited, deserve the title of "River Harnessers" if any firm ever did so. As sole makers of the "Stoney" Control Sluices with Stokes' Patent Improvements, they have taken an active part in dam, weir, and lock construction throughout the world. The Egyptian Government, having fixed upon the site at Assuan for the great dam, instructed their engineers to consider the appliances available for controlling the water. After examining all the apparatus in use on the Continent, it was finally reported to the Government that the "Stoney" system of sluices

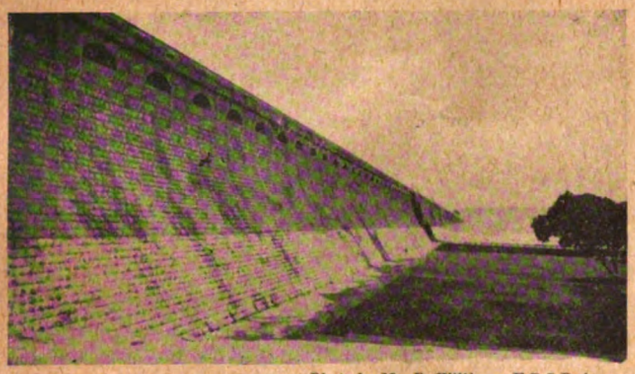

Photo by Mr. R. Williams, F.R.I.B.A.

The Heightened Assuan Dam: Sluices Delivering Water.

was the only one which could deal with the problems presented at Assuan, with the result that it was finally introduced in the gigantic Nile Dam. The firm was likewise under contract with the Egyptian Government for the supply of the sluices for the Esna Barrage, and the success of both these constructions would be proof sufficient, if it were at all needed, of the superior stability and general excellence of the firm's world-known appliances for harnessing the waters of the earth to do man's bidding.

The business carried on by Messrs. Ransomes and Rapier, Limited, was established in 1868 at the Waterside Works, Ipswich. In 1897 the present company was formed, and has still further improved its reputation for supplying plant of the best design, workmanship, and materials, and for carrying out their contracts in the best interests of their customers, irrespective of cost to themselves.

Although the company manufactures various classes of work—such as every kind of crane, railway plant, and permanent way accessories, turntables, traversers, hydraulic buffer stops, water cranes and tanks, swing bridges, capstans, etc.—it has devoted a great deal of attention to the subject of water control, and especially to the manufacture of the Stoney Sluice with the Stokes' Patent Improvements, of which it is the sole maker.

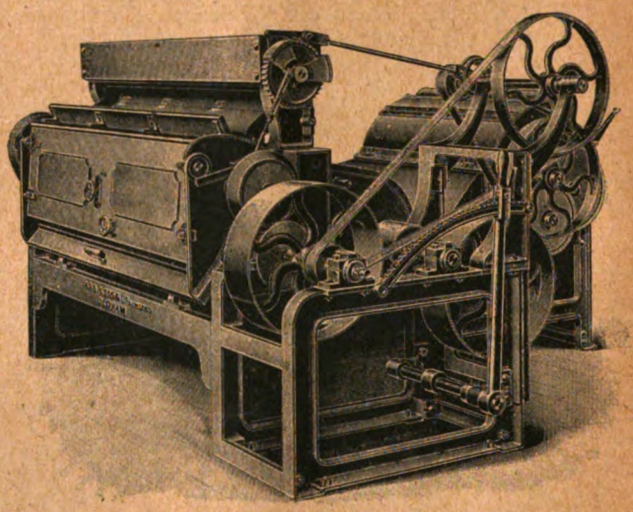
SCOTCH ENGINEERS IN THE NEAR EAST

During recent years Scotch engineering firms, with that nomadic instinct which is characteristic of the hardy men of the North, have figured largely in connection with railway and constructional works in the Near East, and one of the principal firms in this respect is Messrs. P. and W. MacLellan, Limited, who control the Clutha Works, Glasgow, and whose showrooms and offices are situated in Trongate, in the same city. Only quite recently this firm, which specialises in the construction of railway wagons, bridges, jetties, lock gates, sluices, and constructional ironwork, completed a large order for Messrs. Sir John Jackson, Ltd., in connection with that firm's huge irrigation contract in Mesopotamia, Messrs. MacLellans supplying the regulator and lock gates, lift bridges, winches, etc. Previous to this they supplied similar material for the great Assiout Dam on the River Nile, and they have also executed large orders for Messrs. S. Pearson and Sons, Ltd., in connection with that firm's wharves at Puerto, Mexico, and many other large works in the East bear the hall-mark of P. and W. MacLellan. Besides the class of work mentioned, the firm execute a vast amount of steel railway wagon contracts for both the Indian and Colonial Governments, and many of India's finest bridges have come from their works at Glasgow, and only a very short time ago they completed the manufacture of the large travelling gantries which were employed in connection with the erection of the Sara Bridge, over the River Ganges. Contractors and others in the Near East would do well, when requesting information concerning any of the material mentioned above, to communicate through the office of this journal or direct to Messrs. P. and W. MacLellan's offices, Trongate, Glasgow, Scotland, at the same time kindly mentioning THE NEAR EAST.

THE ASA LEES COTTON GINS.

Among British firms of machinery makers who enjoy a world-wide reputation, Messrs. Asa Lees and Co., of the Soho Works, Oldham, occupy a prominent position as makers of all kinds of machinery for preparing, combing, spinning, and doubling cotton, wool, worsted, etc. Cotton-seed linters and gins are among their best-known specialities. Their Macarthy Gin, which is illustrated on page 233, is universally known, more particularly on account of its strong framework and accurate fitting. It can be made either single or double action, the difference consisting in applying to the double-action machine two moving knives, both of which reciprocate at an equal speed, but which are so arranged as to rise and fall alternately. The production of the gin is thus greatly increased without increasing the speed of the crank-shaft, which gives two strokes of the knives for each revolution. Another feature of the Macarthy Gin is that it is self-feeding, all that is required being to place the seed cotton on the feed-table. The leather roller is kept well supplied by means of the pusher board, which has a reciprocal motion.

Another well-known machine made by Messrs. Asa Lees is their Improved Saw Gin. The framework is made entirely of iron, which makes the machine more durable than that with a wooden framework. It is also less liable to take fire, and can be more accurately adjusted. Moreover, all attached surfaces being planed or milled, the parts are interchangeable. A strong feature in favour of the saw gin is that the saw shaft, brush, and condenser cage can be easily removed without disturbing the framework; the necessary adjustments to alter the speed and closeness of the ginning and the separation of the motes can be easily made without stopping the machine. All the power gins



Improved Cotton-seed Linter.

are supplied with fast and loose pulleys, and can be driven from above or below.

The Asa Lees Cotton-seed Linters for oil mills are likewise made entirely of iron, and offer the same advantages as the machine described in the foregoing paragraph. The advantage of an all-iron framework, especially in a warm climate like that obtaining in the Near East, where wood is apt to warp, with the resultant loss of accurate adjustment, need not be insisted upon. The facility with which the 106 saws, which are separated by cast-iron distance blocks, can be taken off and replaced by others if necessary, is a distinct advantage that will not be lost sight of by prospective purchasers of linters in the Near East.

DEMAND FOR SAFES IN SERVIA.

Our Belgrade Correspondent writes:—Iron safes are being sold in Servia to a very considerable extent, and although British-made safes enjoy universally the highest repute, the trade done in Servia in this article is almost entirely restricted to German manufactures. Even the Servian Finance Minister, who has just ordered forty-eight large safes, has placed the order in Germany.

OIL IN EGYPT.

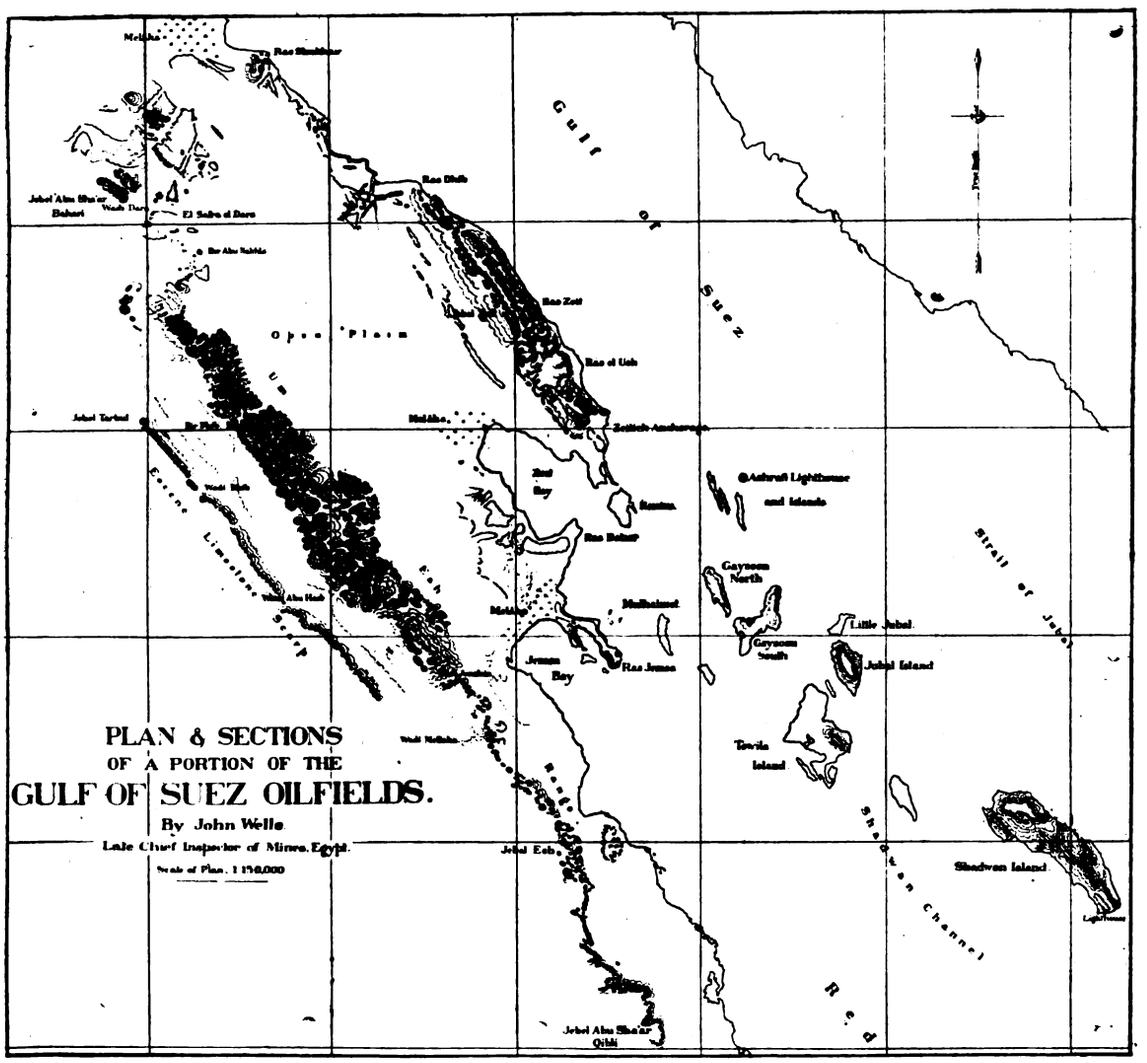
By JOHN WELLS,
late Chief Inspector of Mines in Egypt.

RECENT events in the development of the oil industry in Egypt have given results of no mean order; in fact, a successful issue of very considerable importance has been attained. Less than ten years ago the suggestion of oil existing in commercial quantity in Egypt was scoffed at, even by men well in the front rank of the profession. However, in those days it was fashionable in Egypt to condemn the supposition that the land could contain mineral wealth; even serious-minded officials smiled and murmured that it was impossible. To-day the old order has departed, disbelievers have been partially converted, and the minerals are beginning to blow their own trumpets. Fuel, whether for power, heating, or lighting, is a very important factor in the general scheme of things Egyptian, *vide* the returns of yearly imports of coal and oil. Despite the importance of its agricultural wealth, Egypt, as well as the Sudan, is largely dependent upon an extraneous supply of fuel, and a cessation of supplies on account of external warfare, whether industrial or military, is daily becoming of greater and more serious moment as the population increases and larger land areas come under irrigation. Not only is power required for industrial purposes generally, heating and lighting, but also for lifting water from the rivers and canals, more important still for the drainage of low-lying areas in the Delta. Thus, it will be seen that an adequate fuel supply stands between the State and disaster, and, consequently, it must be admitted that an internal source of fuel is a matter of the very highest importance.

Egypt is dependent upon supplies of fuel from abroad, and we may consider briefly the value of even a small internal production. Roughly, every ½ lb. of oil is equivalent to one horse-power hour. 100 tons (2,000 lbs. each) production per day is equivalent to 16,666 h.p. per hour throughout the 24 hours. With fuel at 50s. per ton, the monetary value is £10 5s. 6d. per hour, or £246 12s. per day, and £90,009 per year, from which it may be deduced that the fuel cost of 1 h.p. per year would be £5 4s. The cost of a horse-power year in different parts of the civilised world from power station varies from £1 to £15 per horse-power, according to the means available for its generation, distribution, etc. In Egypt, with its many small power units, it is safe to assume that a horse-power year under present conditions is costing at least £12, *i.e.*, double the figure given with oil at 50s. per ton. If we assume that out of Egypt's total fuel imports the value of the essential or necessary fuel for power and light is £960,000 approximately, we arrive at the fact that an oil output of 1,000 tons per day would suffice. If, however, we put the "State" owned fuel into power stations (with the fuel produced at cost only to the State) and bring our horse-power year down to £6, then 500 tons per day of production satisfies the power requirements of the country, *i.e.*, an output of 500 tons per day, 3,500 per week, 182,000 tons per year —not a colossal output for an oilfield, and well within the potentialities of the Egyptian field, if we may accept recent events on the headland of Jemsa.

As to the past, present, and future of oil in Egypt, certain facts and figures stand out prominently, viz.:—At the beginning of the present decade the geology and stratigraphy of the Egyptian oilfield was but little understood. Indeed, that which is at present known concerning these two was not even surmised, and would be to-day unknown had it not been for the drill. Egypt was then supposed to possess but 2,000 metres of sedimentary rocks younger than and including the Cretaceous; now, 4,000 metres are recognised, of Cretaceous, Eocene, Miocene, Pliocene, and recent ages, and, in addition to the above, between 1,000 and 2,000 metres of the carboniferous formation are exposed.

At the beginning of the decade the small outcrops were



Digitized by Google

considered merely as matters of academic interest, and as indications of fuel oil only in small quantities, generated in the raised tertiary beaches. The writer of these notes did not agree with these assertions, and was much struck by the indisputable fact that oil in the outcrops, in lieu of being a heavy tarry product, was so full of light constituents that it would burn in an ordinary kerosene lamp, indicating its origin from a considerable depth and well sealed reservoirs. Moreover, the idea of its origin in the raised beaches not only appeared to be ridiculous in itself, but the occurrence of oil in rocks from early Cretaceous down to those of quite recent times gave the lie direct to any such hypothesis.

Correlation of data obtained by drilling, coupled with extensive surface surveys, has provided a general key to the stratigraphy, yielding data which is not only indisputable but indicates a series of circumstances and conditions not only comparable but in parallel with those existing in most of the oilfields of the world.

For comparisons and parallels it will serve to take a cursory run over a world-wide area and in perspective to cover Galicia, Roumania, Baku, Caucasia as a whole, Persia and Burma, thence returning up the Red Sea past the Fersan Islands, with a side journey into Mesopotamia, again into the Gulf of Suez, through the canal into the Mediterranean, surveying in turn Algeria, Tunis, Spain, Italy, portions of Turkey, the Greek Archipelago, and so back into Egypt. As a result of this rapid survey we are immediately struck with certain facts, not only indisputable as to their verity, but world-wide in their application :—

(*a*) The occurrence of oil in every place mentioned, in rocks of widely different ages from early Cretaceous down to comparatively recent times.

(*b*) A certain similarity in the conditions of deposition of formations possessing collectively a thickness approaching 20,000 ft., viz. : deep and shallow seas, lagoon stages, estuarine conditions, desert areas, and among them luxuriant circumstances of land and marine flora and fauna, buried deeply or exposed according to subsequent movements of the earth's crust.

(*c*) The development of great producing oilfields not only in areas greatly plicated and disturbed, but equally so in those areas that have not been subjected to great tectonic movements.

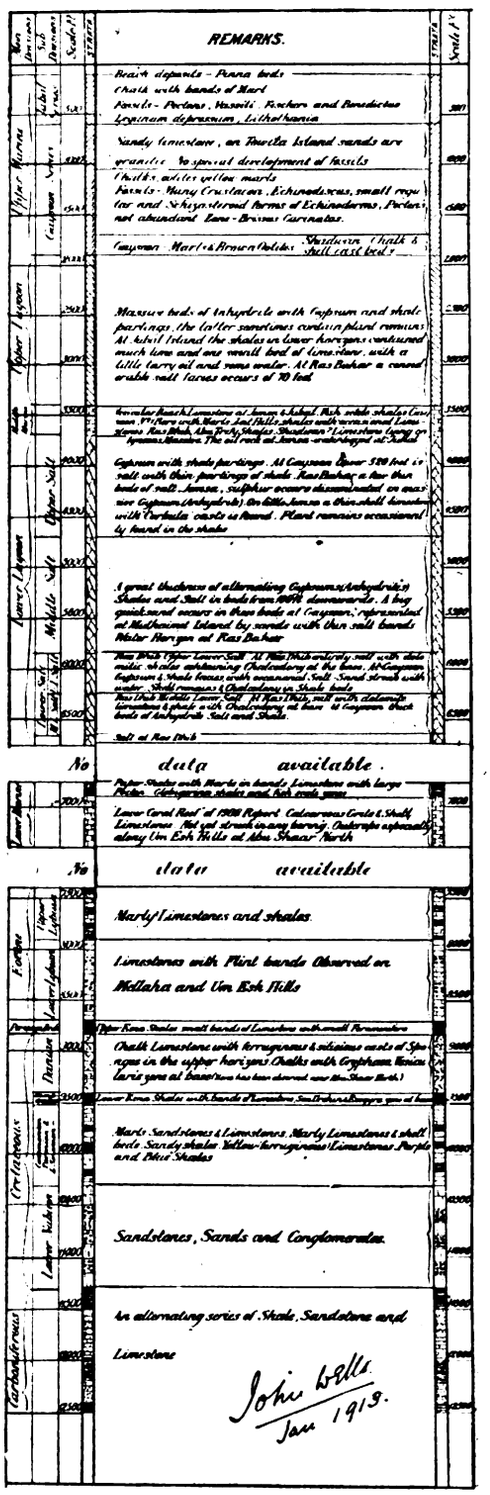
(*d*) The origin of petroleum in these various formations is a matter of everlasting amenities among the scientists. Thus in one field vast accumulation of marine organism presuppose the origin of the petroleum in the rocks or reservoirs ; others, again, hold to the theory of derivation from the flora in the formations, as for example in Burma, wherein it has been noted that in some areas lignite develops and no oil is found, and in others oil is found, but no coal or lignite.

In Egypt, and more particularly in the Gulf of Suez, we find a parallelism with every known field mentioned, viz. : 12,000 to 15,000 ft. of sedimentaries from early Cretaceous to recent. Here we find great beds of phosphate rock, remnants of the denizens of warm, shallow seas, in other formations considerable seams of carbonaceous matter, more especially in the middle Cretaceous ; further in the Eocene and Miocene times we find deeper sea circumstances with great quantities of diminutive organisms of the formanifera type. Finally, in this great thickness of deposits we have a normal variation in physical circumstances, some hard, some soft, porous or close-grained and impermeable, bending, folded, faulted, or resting more or less horizontal, providing conditions and circumstances similar to other fields alike both for the generation and retention or collection of the petroleum. Thus are we able to draw a comparison between Egypt and other well-known fields which is not only favourable but very encouraging for the future.

At the present time there is production at two points, viz. : Jemsa and Hurgada, both of which are drawn from beds of the Middle Marine (see stratigraphical chart), the exact age of which has not yet been determined. At Jemsa much has been said in regard to water in the wells, but oil and water are almost invariable constituents in a porous rock that has been subjected to undulation, the two separating under gravity. At Jemsa circumstances are not quite normal, and the water question is not generally understood. The reservoir rock at Jemsa is a beach deposit, laid down more particularly on a shore line on the eastern slope of an older plication or fold. To the eastward or sea side of the fold there is a fault—one of the main N. and S. series common to the structural development of the Gulf. Thus we have an unconformability on one side of the oil area and a fault on the other ; and, further, we have oil in a formation laid down in water and waterlogged before the oil ever entered therein. The reservoir rock itself has not only been subjected to plication and movement since it was deposited, but is also extraordinarily variable in porosity and thickness ; hence the variation not only in yield of the different wells, but also in their life. These conditions naturally tend to make production variable and uncertain, but do not seriously affect the value of the field. A great or small area may exist of this old beach deposit, which, however, can only be proved by drilling. Water there will be in every well sunk, which will sooner or later master the well. This, however, does not seriously affect the commercial value of this shallow field, but it does affect its useful life. Where circumstances are favourable, large wells will be obtained of short life on a big flow, followed by a continuance of lesser production more or less extended. Other wells, again, will yield smaller amounts for longer periods.

A study of the formations above and below this middle marine, including at least 3,000 ft. on each side, indicates nothing in their contents to account for the petroleum having its origin within them. Therefore we are forced to the conclusion that the oil of the middle Marine is by

THE STRATIGRAPHICAL FEATURES OF THE EGYPTIAN OILFIELDS.



Digitized by Google

migration along fault lines and unconformabilities in the deposition of the strata of the various eras; and, further, as the oil cannot have come from above, it must have come up from still older formations below.

It is probable, on the data now available, that extensions of the shallow field will be found by exploration with the drill at other points, even a considerable distance from Jemsa, but the future potentiality of oil in Egypt lies in the deeper horizons of the lower Marine, or possibly in rocks still lower. At Jemsa the lower Marine should be found at 2,750 to 3,000 ft., and at several other points at depths varying from 2,900 to 4,000 ft., well within the limits of economic drilling with modern machinery and appliances.

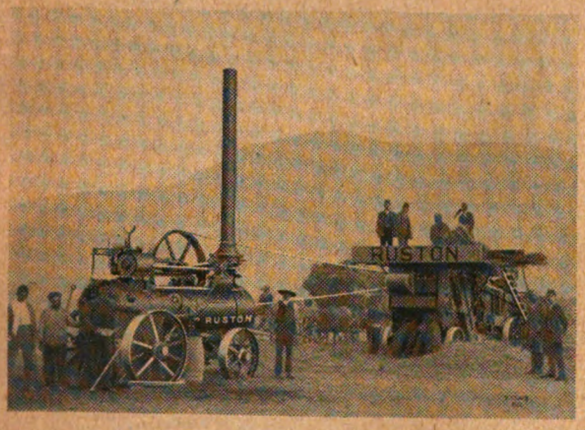
Until the deeper areas have been tested by the drill, the full potentialities of the Egyptian field will remain unknown; but, generally speaking, the prospects are so encouraging for a successful issue that there is little fear but that success will attend the efforts of the adventurers, whether represented by the State, private or public companies.

A good deal has been said from time to time concerning the excessive cost of drilling and the difficulties of the economic situation in regard to supplies and water. No doubt, during the pioneer stages there was room for the statements, but now the pioneering stage is to some extent past history, these difficulties are not likely to recur.

The cost of deep drilling will compare very favourably with some of the older fields, and will never be so high as in some parts of Russia and Galicia. In fact, with modern machinery and modern methods, holes of 3,000 to 4,000 ft. should not exceed £6,000 to £9,000, though the initial borings will be very much higher; even these should be completed at from £4 to £5 per foot. The climate is good all the year round, communication with the civilised world is easy, and the fields lie alongside one of the great highways of the world. Year by year the fuel requirements of Egypt and the Sudan will increase, and there is little doubt that if her oilfields are developed, there will be for many years to come a steadily growing production.

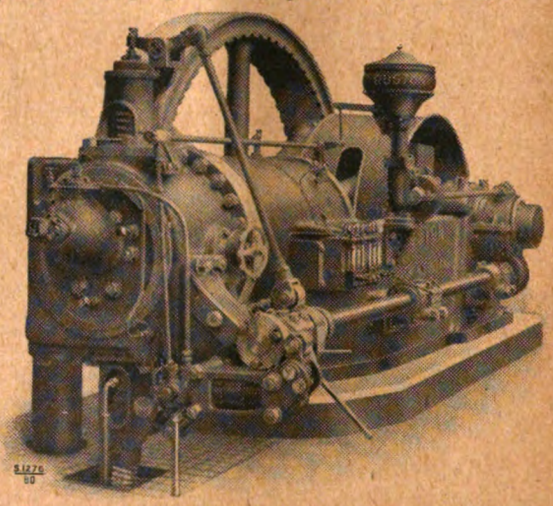
RUSTON, PROCTOR AND CO., LTD.

The well-known firm of Ruston, Proctor and Co., Ltd., Lincoln, are probably the largest suppliers of agricultural and industrial machinery to the Near East, and therefore a few particulars about their works and manufactures will be of interest to our readers. The works are situated at Lincoln, England, and occupy an area of over fifty acres and provide constant employment for an army of 5,200 men. Naturally, with works of this extent, the annual output is enormous, averaging 1,400 thrashing machines, straw presses, chaff cutters, elevators, etc.; 3,000 steam, gas, and oil engines, 1,300 boilers, 1,200 pumps, and a large number of corn-grinding mills, sugar cane mills, and miscellaneous machinery.



A Thrashing Scene in Turkey, with Ruston Portable Steam Engine and Ruston Thrashing Machine.

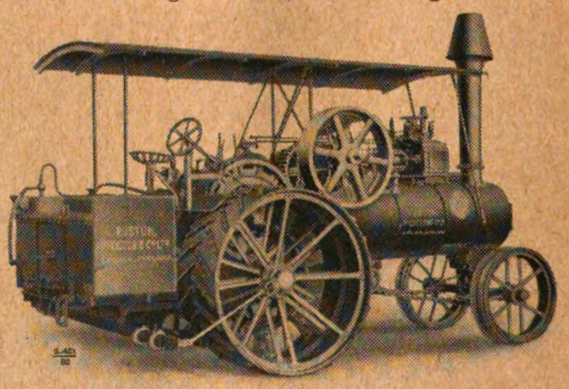
The firm is represented in the leading centres of trade in the Near East by first-class agents, and this, together with the firm's policy of sending out their experts to study the actual conditions, enables them to supply the most suitable type of machine for the particular requirements of the different countries. Thus, the type of thrashing machine sent out to Eastern countries is fitted with a bruising apparatus which chops all the short straw and cavings, and renders them into very fine fodder for cattle and horses. This apparatus can be supplied as part of the thrasher or as a separate machine. Further, a patent self-feeding device can be supplied, which, apart from reducing the number of accidents which have frequently occurred with the open type of feeder, enables the sheaves to be fed in a more regular manner, thus increasing the output. The Ruston portable steam engines for driving thrashing and similar machines are too well known to need much mention. The Ruston traction engines delivered to the Near East are giving full satisfaction. This class of engine has in late years been adopted for ploughing by direct traction, and has proved a perfect success in Asia Minor. Corn-grinding mills, both power and cattle driven, are supplied in large quantities, particularly in Egypt.



A Ruston "C.C." Crude Oil Engine.

Great progress has been made in Asia Minor, the Balkan States, Syria, and Egypt with the Ruston "complete combustion" crude oil engine, no other engine for working on crude and residual oils having been so successful. Since this engine was brought out, about four years ago, its success has been phenomenal, and it is generally admitted to be the most economical and reliable of its type, and the most suitable for these markets. Throughout the whole of the Near East there are large numbers of these engines driving electric lighting and pumping stations and ordinary industrial works.

Owing to the difficulty in these countries of obtaining anthracite and other imported fuel, there is a very restricted market for the ordinary suction gas plant, but the introduction of the suction gas producer, which can work continuously on wood refuse, bark, olive refuse from oil mills, rice husks, cotton pods, cocoanut husks and shells, and other waste materials, presents the matter in quite a new phase and is being welcomed in the East, where wood or olive refuse can be obtained at a very low cost. The Ruston "wood refuse" suction gas producer is one of the best known of this type, and has been proved to be a most simple and reliable plant, producing good clean gas without requiring constant attention or frequent shut-downs for cleaning. In fact, the cleaning of the outlet



A Ruston Steam Ploughing Engine.

pipes is performed by a patented arrangement while the plant is working, and the generator itself only requires cleaning after long periods of running.

Other manufactures of this firm that are largely imported by the Near Eastern countries are centrifugal pumps, fixed steam engines, steam boilers, traction engines, and road rollers. Ruston centrifugal pumps are very largely used in Egypt, a special type for low lifts being introduced for irrigation work. Mention should also be made of the Ruston steam excavators, as Ruston, Proctor and Co., Ltd., are now the largest makers of these machines in Europe.

WATER FILTRATION.

As practically all waters required for drinking purposes require filtration (and often chemical treatment) before they are safe and fit for human consumption, the provision of a reliable and economical filtration plant is a matter of vital importance to the health and wellbeing of every community. A system that is extensively used in England and many other countries on account of its great efficiency and economy is that of the Candy Filter Company, who supply mechanical filter plants (gravity and pressure) of the very latest type, and which are greatly in advance of any other kind of filter; they enable polluted, doubtful, or unsatisfactory supplies to be converted into waters that are not only perfectly safe, but bright, sparkling, and of the greatest palatability.

Fig. 1.

The great value of Candy Patent filters has been proved over and over again, and that eminent scientific authority, the Royal Sanitary Institute of Great Britain, has on three occasions awarded medals for Candy filters and filtering medium.

By means of their different types of filters and apparatus the Candy Filter Company are able to deal with waters from all sources and to render them fit for whatever purpose, whether for a public supply or for manufacturing or other purposes. Large or small volumes of water are treated with equal success, the cost of Candy filters ranging from £100 upwards, according to the quantity of water to be filtered. All kinds of impurities can be removed, and the absolute destruction of the B. Coli, Cholera Vibrio, and Bacillus Typhosus ensured. Thus waters can be rendered *safe against waterborne disease.*

The fact that amongst many other places such well known and important towns in England as Harrogate, Hastings, Torquay, Reading, Truro, Cowes (Isle of Wight), Tunbridge Wells, Newport (Mon.), Cardiff, etc., employ Candy filters in preference to all other methods of dealing with their water supplies clearly demonstrates the practical value of the Candy filter. This is additionally confirmed by their adoption by the English, Colonial, and Foreign Governments. Candy filters have been shipped to Australia, South Africa, the Malay States, Nigeria, China, Japan, South America, and many other parts of the world. Their adoption in the Near East by those having charge of water supplies would no doubt result in a diminution of the death rate, and also have a markedly beneficial result on the health of the community in general.

Fig. 2 shows a battery of Candy filters in course of erection in South America for purifying five million gallons of water daily. Fig. 1 illustrates a filter suitable for plantations, factories, estates, hotels, and institutions.

We understand that the Candy Filter Company, of 5, Westminster Palace Gardens, Victoria Street, London, will be glad (free of charge) to render every assistance to engineers and others in the Near East who are considering the question of improving public or private water supplies, and they would also be pleased to hear from firms or gentlemen of influence who are prepared to act as agents.

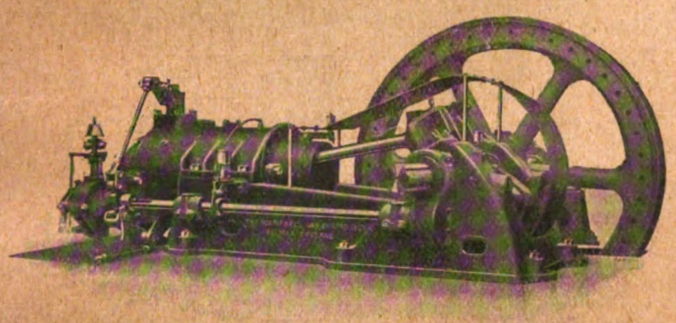
MESSRS. CAMPBELL'S OIL ENGINES.

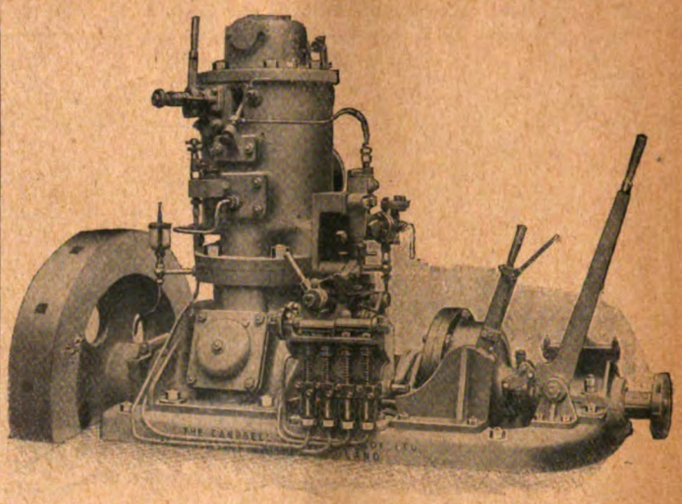
Not so very many years ago oil as a power fuel was practically unknown, yet to-day it is used in such great quantities that some doubts are already entertained as to whether the world's oil supply will be equal to the increasing demand. To the utilisation of oil for power purposes, however, we owe the remarkable progress in oil-engine construction which is still being made. There are now several types of such engines, which will run, economically, on crude oil, and some of the latest and best are undoubtedly those designed and constructed by the Campbell Gas Engine Company, Limited, of Halifax, England. Their "Campbell" high-compression oil engine for working with crude or residual petroleum is the outcome of more than thirty years' experience in the design and building of internal-combustion engines. A design which is very largely used is the horizontal type with one, two, three, and four cylinders in a range of powers from 7½ to 400 b.h.p. This engine works with practically any kind of fuel oil, such as is used in a Diesel engine, and with an average consumption varying from .5 lb. per b.h.p. per hour in an engine of 60 or



High-compression Oil Engine of 70 b.h.p.

70 b.h.p. in one cylinder to .65 lb. in a small engine of 7 or 10 b.h.p. This approaches very closely to the economy of the Diesel engine.

Some of the great advantages possessed by this type of engine are that there is no water injection used in the cylinder under any conditions; no heating lamp is required



Single-Cylinder Direct Reversible Marine Engine.

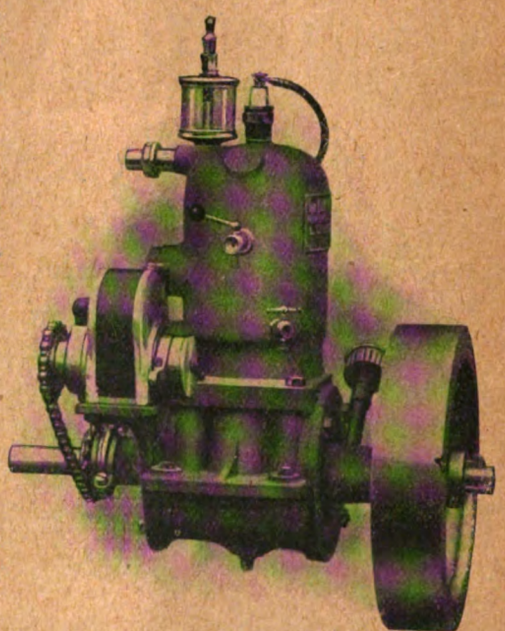
while the engine is working, whether without load or under any conditions of load. The engine will run light for as long as required without the use of the lamp, which is only required for a few minutes previous to starting for the preliminary heating of the vaporiser. Even this is unnecessary, as the firm has recently introduced a modification which enables the engine to be started up on benzine or kerosine, absolutely without the use of a heating lamp; that is to say, that the engine can be started up immediately from a perfectly cold state, and can be immediately turned over on to crude oil. This is a great advantage and brings the high-compression engine practically on to a level with the Diesel engine as regards general convenience. An engine of this design with two cylinders is illustrated in one of Messrs. Campbell's advertisements, on page 237.

A number of these engines have been supplied by the firm for working the boring and baling rigs in the oilfields at Baku, and for other industrial purposes in

"DAY" VALVELESS MOTORS

Are in **successful** use throughout the **entire world,** and are famous for their **Great Simplicity** (they have no valves, and only three working parts), **Smooth Running, Reliability,** and **Good Workmanship.**

There are many other Two-stroke Motors on the market, mostly American, and all **imitations of ours,** but the only **original** one is the **"DAY,"** and that is made by ourselves with the **best** of **British Labour** and **Material** throughout.



If you want the BEST, don't be put off with IMITATIONS, but

Insist on having a "DAY."

The Illustration shows one of our small **Marine Type** Motors, but we make them for all sorts of **Land Work** as well, for direct-coupled **Electric Lighting Sets, Pumping,** etc., etc.
Standard sizes from **2½** H.P. to **30** H.P.

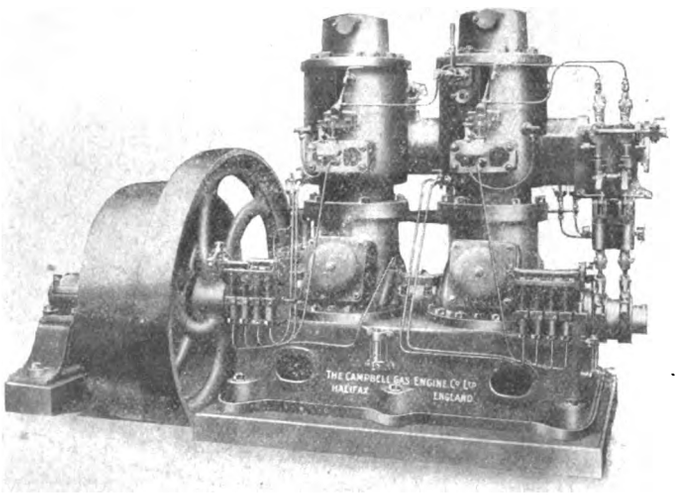
Russia and the neighbouring European countries. They have also supplied a number to India and the Far East.

Another type of this firm's engine, which is now being



Two-Cylinder Direct Reversible Engine for land use.

largely installed, principally for marine work and also to a considerable extent as a stationary land engine, is the vertical two-cycle engine. This type is of very simple design, and for marine work an improved direct reversible attachment is added which does away with the use of gear-boxes and other similar devices for changing the direction of rotation of the propeller. These engines are built from 5 to about 500 b.h.p. in a range of standard sizes, with one, two, and four cylinders. A single-cylinder engine of this design is illustrated on page 252.

The two-cycle engine is particularly well adapted for coupling direct to dynamos, owing to the comparatively high speed of rotation, and a further advantage is that it occupies a very small floor space.

The gas producers of the Campbell Engine Company are well known in the East, several of them working with rice husks, cotton seed, olive husks, and similar vegetable fuels.

Their gas engines are recognised as of the highest class, embodying all the modern improvements to ensure efficiency, durability, and simplicity, characteristics which are highly appreciated in the East, and are most essential for the success of that class of engine.

THE "DAY" MOTOR.

The "Day" Motor, being the original of the two-stroke valveless type, is one of the best known motors on the market. It is a well tried invention, for it has stood the severest test of all, that of time. It was invented and brought out by Mr. Day some twenty years ago, and it is used now in all parts of the world, giving every satisfaction for its simplicity, durability and efficiency. It is made by the Day Motor Co. (Ltd.), of Putney, London, where the firm's well-equipped works are at present fully employed in turning out motors for all parts.

Perhaps the most attractive feature of this motor is its extreme simplicity, for it has no cans, valves, or complications of any kind; indeed, the makers claim that it has only three essential moving working parts, viz., the piston, connecting rod, and crank shaft with its attached fly-wheel. It would seem difficult to design a successful motor on simpler lines than these.

We understand that a "Day" engine was recently selected by the British Government for permanent exhibition at the Science Museum, South Kensington, as representative of the two-stroke valveless type, and that others have been supplied to the L.C.C. and other provincial authorities for their educational establishments, so that it would seem Mr. Day's claim to be the originator of the two-stroke valveless system is well founded.

That this type of engine is coming more and more into use is pretty obvious, and THE NEAR EAST, where motors are in much demand, should prove a good field for such a simple and reliable motor.

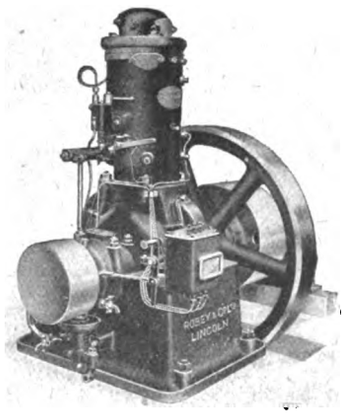
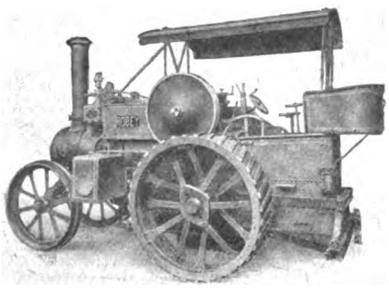
ROBEY AND COMPANY.

The well-known firm of Messrs. Robey and Co., Limited, of Lincoln, who have been established upwards of half a century, have attained an excellent reputation in the Near East, as elsewhere, for their manufactures, which are very diversified in their character. Originally commencing as manufacturers of agricultural machinery, while maintaining their interest in this direction they have extended the field of their operations and are now even better known as manufacturers of prime movers of all descriptions, pumping plants, etc. We illustrate below a new type of portable engine which they have introduced, and which has a circular firebox, special large firegrate for burning logs of wood, which is specially suitable for countries where coal is difficult to obtain as fuel. In addition, they are also manufacturing in considerable numbers a compound semi-portable engine, fitted with a superheater, which is meeting with a very large demand, particularly in Egypt, for irrigation purposes.

The illustration opposite represents one of their crude-oil engines, which is on the well-known semi-Diesel principle, and which they manufacture both on the portable and stationary types, the latter being made in sizes from 6 to 200 b.h.p., with single and multiple cylinders. A great feature of this engine is the very low fuel consumption, which ranges from .55 pints per b.h.p. per hour in the large sizes up to .60 in smaller sizes.





The third illustration represents their compound tractor, which is a replica of their well-known traction engines. There is no need to enlarge on the various purposes to which this neat little motor can be applied, as it is used in all parts of the world both for threshing, ploughing, tree-pulling, sawing, etc. This particular illustration shows an engine which has been shipped to Rhodesia for ploughing land for tobacco plantations, and it has given great satisfaction by the ease with which it pulls the ploughs; it is capable of pulling a five-furrow plough with the greatest of ease. On one day's work with native labour it ploughed thirteen acres of virgin land to a depth of 7 inches in ten hours.

In view of the large extension that is being given to road-making in the Near East, it is interesting to note that Messrs. Robey and Co. manufacture steam-rollers constructed both with single and compound cylinders and in sizes from six to sixteen tons. They are designed with the same attention to details as the firm's traction-engines, and every consideration has been paid to securing efficiency and economy in working combined with the utmost reliability. Details of construction will be forwarded to any persons interested, but the following special points may be noted here: — All the working parts are so arranged as to be within easy reach of the driver, and all levers controlling the engine are placed so that one man can drive and steer. The clutch gear is so arranged that two speeds cannot possibly be in gear at one time. They can readily be converted into traction-engines.

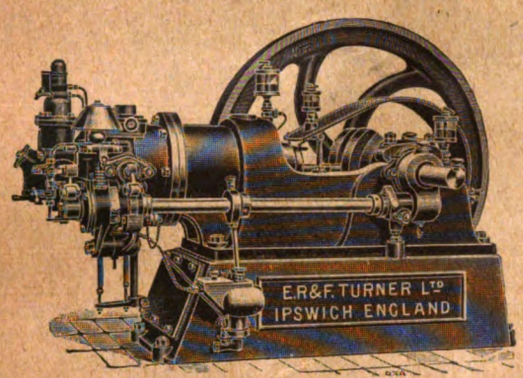
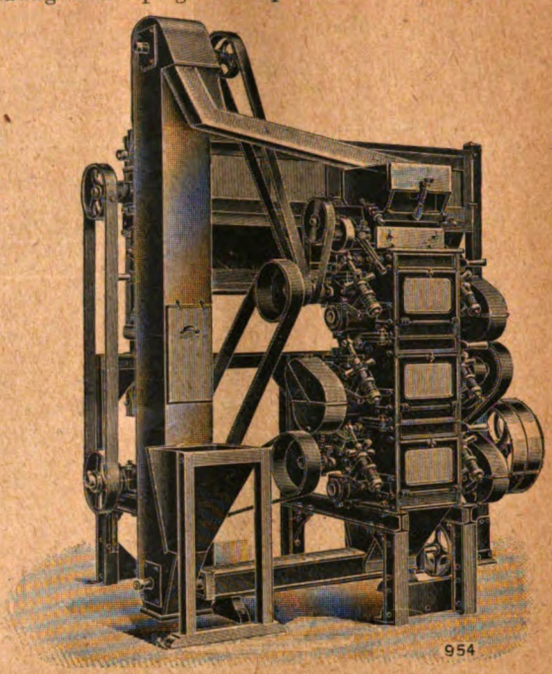
E. R. & F. TURNER, LTD.

We illustrate below a new type of horizontal oil engine recently introduced by the well-known firm of engine-builders, Messrs. E. R. and F. Turner, Limited, Ipswich (England). This engine is specially designed to meet a demand which exists in the Near East for a motor capable of burning either ordinary paraffin or kerosene, or when required crude or residual oils. We understand that the new Turner's engine, which is called the "C. R." model, is capable of burning nearly every kind of oil, and with the greatest possible economy. The engine works on the 4-cycle principle, having automatic hot-bulb ignition, with an improved method of injection by a new spraying device under pressure. Complete combustion of the heaviest types of oils



is by this means absolutely assured, and this is accomplished with a minimum of detailed parts, simplicity being one of the strong points of this engine.

Messrs. E. R. and F. Turner, Limited, are equally well known for the great range and variety of grain milling machinery which they manufacture, and their name for these specialities is well known throughout the Eastern markets. We understand that they are meeting an increasing demand for a small and simple roller mill plant, to come within the means of small millers who are at present using millstones. To suit this demand, Messrs. Turner are supplying in considerable numbers their new "Simplex" self-contained roller mill plant, as illustrated below. The plant consists of a series of three pairs of chilled iron rolls, with separating or scalping sieves placed after each pair. The



material passes from the rolls, after having the bran extracted, to be further treated in a dressing apparatus working with internal centrifugal beaters, which acts not only as a flour dresser, but as a cleaner of the bran. From this plant can be produced one, two, or even three grades of flour of excellent quality, and it is claimed that the "Simplex" will save from 30 to 50 per cent. of power for a given quantity of wheat treated, as compared with millstones, to say nothing of the enormous saving in maintenance. The "Simplex" entirely avoids the very serious drawback of millstones, namely, the constant delays and expense in re-dressing the grinding faces of the stones.

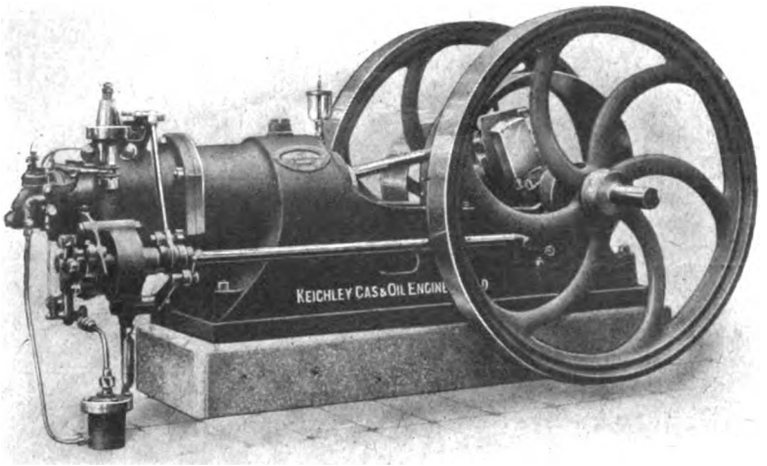
THE "IMPERIAL" ENGINES.

The Keighley Gas and Oil Engine Co., Limited, of the Imperial Works, Keighley, are makers of the now universally known "Imperial" Gas, Oil, and Spirit Engines. The company make three kinds of single-cylinder gas engines—namely, the "ordinary," "industrial," and "electric light" type. The first-named is intended for general work. The crankshaft is made long



enough to take the company's standard pulley at either end. The industrial type is fitted with a heavy flywheel and an extended crank to take a pulley between the flywheel and the outer bearing which is on the side of the engine opposite the valve gearing, and is suitable for use when a higher speed is required. The electric light pattern is designed to meet the requirements of electric lighting, for driving spinning and weaving plants, and for any other kind of work where a special degree of steady running is essential. Perhaps the best known engine put on the market by the firm is the "G.D.E." to "G.G.E." gas engine, in four sizes, for giving from 9½ to 19½ b.h.p. on town gas. These form part of a series of sixteen sizes of single-cylinder horizontal gas engines for electric lighting, varying from 2 up to 108 b.h.p.

One or two points may be noticed with regard to the Keighley Gas and Oil Company's gas engines generally. The cylinder breech end is fitted with a specially constructed removable liner; the crankshaft is forged solid of the best Siemens-Martin acid open-hearth steel, and runs in long adjustable bearings with a continuous ring lubricating system; whilst the speed is regulated by means of a high-speed centrifugal governor driven by special cut spiral gear wheels and working on the hit-and-miss principle.

The company's oil and spirit engines are as well know as their gas engines described above. A delightful, compact engine is the "Portable Spirit Engine," made in all sizes from 2 to 30 b.h.p., the larger size being built similar in design to the company's "Portable Oil Engines." The carburettor is of the vertical type, and consists mainly of two brass castings joined together at the centre, which enable the branches to be set at any angle. Dispensing with troublesome floats, this carburettor is very simple, there being only one central adjustment.

For agricultural purposes the Keighley Gas and Oil Engine Company has designed, at the request of those interested in the use of small power as an improvement on other engines, and for similar purposes, a 4 b.h.p. Vertical Spirit Engine, illustrated herewith. This engine is specially suitable to those small power users who require simple, reliable, and durable means for driving farm machinery, etc., such as that used for milling, crushing, churning, grinding, pumping, cream separators, sheep shearing machines, saw mills, lighting installations, and for any purpose requiring reliable economic power. The time and labour-saving benefits of a small engine such as that portrayed need no emphasising. The price, moreover, is such as to place the engine within reach of thousands of agriculturists.

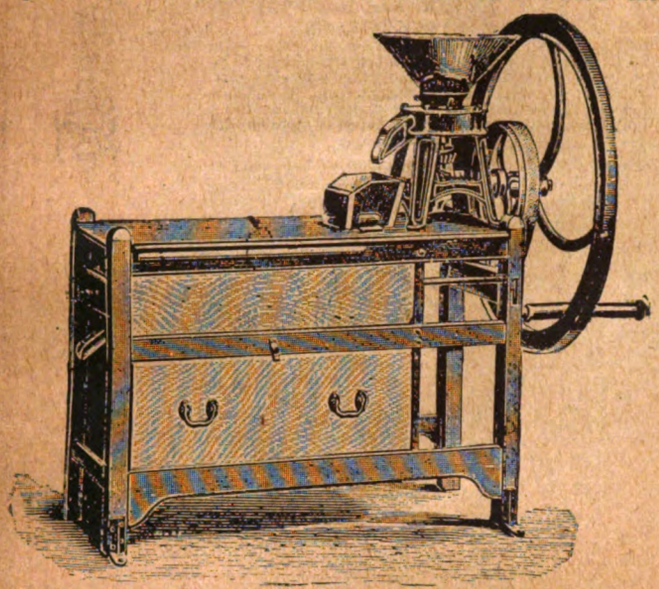
A HANDY FLOUR MILL.

Those who have lived for any length of time in rural districts of the Near East must have noticed that the great desideratum in most villages is the flour mill, the mill by which peasants or farmers can grind their corn whenever it is wanted. There are large agricultural districts containing a number of villages or farms which have to send their corn to be ground to a great distance, where a water or wind-mill of a native and archaic construction is working day and night to cope with the continuous arrival of loads. The peasants in numbers have often to remain in and about the



mill for days and nights together waiting for their turn to grind. Thus, besides the loss of time of men and animals, the fields are deprived of their services very often at an important time of the season. Messrs. A. R. Tattersall and Co., of 75, Mark Lane, London, E.C., are manufacturers of grinding mills which for efficiency, portability, and price are most suitable for the Near East. Their "Emigrant" flour mill, particularly, with flour dressers, which has been designed to meet the requirements of farmers, settlers, and others, will be found very useful for producing flour as Oriental peasants want it for domestic use. The mill is fixed on a flour-dressing machine, which makes four separations—flour, middlings, pollen, and bran. The price of the "Emigrant" mill, with or without the dressing machine, is really very reasonable, and within the means of the average farming Oriental peasant. Another type of Messrs. Tattersall's grinding mills, "The Premier," is also very useful, and is designed for driving with a two or three-horse gear, or can be fitted with a pulley to be driven by a small engine. The larger size of this mill can be supplied on a low frame and mounted on travelling carriage for easy transport, an arrangement which will appeal to farmers and peasant who during and after harvest will be glad of the services of a mill in the fields and in the village alternately.

J. SMITH HARGREAVES AND CO.

Of all the useful textile household articles required in the Near East towels are of great importance, and those of British manufacture have an undoubted preference. It is well known that this preference has often been taken advantage of by foreign manufacturers, who often place in the Eastern markets imitations of such articles. There are, however, British firms, whose goods are so well known throughout the Near East that such imitations do not affect them. The firm of Messrs. J. Smith Hargreaves and Co., Limited, of 11, Fountain Street, Manchester, is one of these. They have been trading with the Near East for about fourteen years, and their Turkish honeycomb and fancy towels, also their terry cloth, bath gowns, etc., and especially their well-known brand of "World-Wide" towels are appreciated in every household. Messrs. J. Smith Hargreaves and Co. are contractors to the Admiralty and the leading steamship companies. The success of the firm, and the popularity of their goods in the Eastern markets, may well be attributed to their system of trading there. They come into personal contact with their customers and make a particular study of their regular and new customers' requirements, a thoughtfulness highly appreciated by Eastern traders. At present a representative of the firm of Messrs. J. Smith Hargreaves and Co., Mr. D. Varbetian, is on a tour in the Near East for that purpose.

Every Penny Saved

on the cost of running machinery is a clear and increasing gain.

IMPERIAL Gas, Oil, & Petrol Engines

cost little to run, and are easily and quickly erected, being so extremely simple in design and construction.

Klinger's Steam Specialities

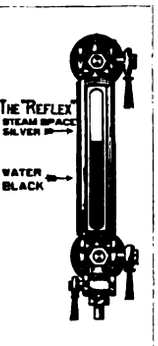
The ONE Packing for ALL Purposes

No matter how trying or how exceptional your conditions are, be they highest pressures or superheat, acids, oils or ammonia, we guarantee Klinger's Stuffing-Box Packing to keep your glands tight and your rods as smooth as glass, or return your money. It lasts ten times as long as other packings, so users say, and is ten times as easy to handle.

Get a trial supply and see how highly resilient the material is; note how ingenious its construction; test and prove for yourself its unique packing qualities. You will be surprised to see how well the old engine runs; how smooth and polished the rods get, and how long it lasts. Then after a three months' trial figure up what it is saving you: this will prove beyond a shadow of a doubt that Klinger's Packing is the cheapest.

"MONEY-BACK-IF-NOT-SATISFIED."

The Klinger Gauge



It safeguards your boilers against damage and protects your employees from injury. With it you can see at a glance whether the gauge is full, half-full, or empty.

WATER BLACK
STEAM SPACE SILVERY

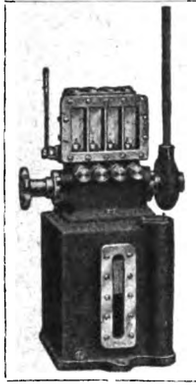
The Klinger Gauge will not burst, no matter how high the pressure or how fluctuating the temperature. It can be fitted to existing boiler mountings and requires no protector. Every Klinger Gauge is tested to over 500 lbs. steam pressure before leaving our works.

The complete pattern Klinger Gauge is supplied with

KLINGER COCKS,

which, by the aid of an ingenious device, enables engineers to repack the cocks whilst on the boiler.

Ask for Leaflet.



A Mechanical Lubricator for ALL Engines

The Klinger Oil Pump is made in various patterns to suit all types of engines—stationary, locomotive, marine, etc. It is of simple, reliable construction, there being no springs to break, no plungers to jam, or delicate mechanism to get out of order.

The Klinger Lubricator's parts are few, simple, strong, and sturdy—good for almost everlasting wear.

It has a see-at-a-glance sight feed, feeds two or more oils at one time and only feeds while engine is working. In use it actually effects a 50 per cent. save in the annual oil bill. Get rid of lubrication worries by installing

The Klinger Oil Pump

Ask for Leaflet.

"Klingerit"

Stands pre-eminent as the most reliable jointing material in the world. Wherever it has been used, whether on ocean liner or generating station, it has given truly remarkable service.

Once tried, "KLINGERIT" soon proves its exceptional jointing qualities. For tough jointing jobs use "KLINGERIT" and be sure you get the genuine, which has its name printed all over the sheet.

Supplied in sheets, stock sizes 60 in. by 40 in., in thicknesses 1-32 in., 1-16 in., 1-8 in.

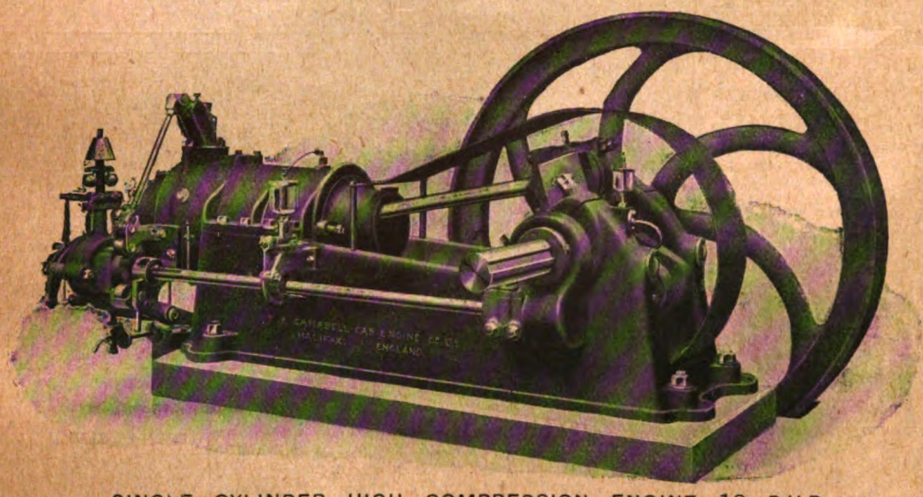
"CAMPBELL"
CRUDE-OIL ENGINES
HIGH COMPRESSION TYPE.



SINGLE CYLINDER HIGH COMPRESSION ENGINE—18 B.H.P.

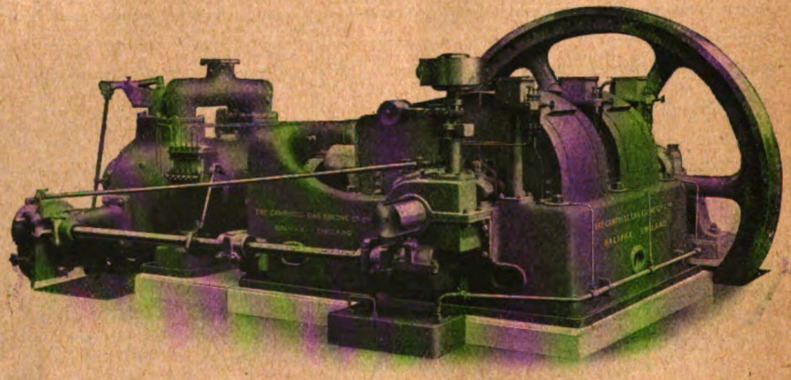
SINGLE CYLINDER ENGINES,
from 7¾ to 100 B.H.P.
— FOR —
Driving Factories, Electric Lighting and Power Plants, Pumping, Oil Baling, etc.

First-class Material and Workmanship throughout.

EASY TO ERECT.
EASY TO OPERATE.
MODERATE IN PRICE.

TWO, THREE, and FOUR CYLINDER ENGINES,
from 100 to 400 B.H.P.
— FOR —
Spinning, Weaving, Alternator driving, and all purposes requiring very regular turning.

Fitted with Forced Lubrication and Automatic Starting by Compressed Air.



TWIN CYLINDER HIGH COMPRESSION ENGINE—140 B.H.P.

N.B.—These Engines work successfully on any kind of Crude or Residual Petroleum used in a Diesel Engine, and the consumption is only 230 grammes (·5 lb.) to 270 grammes (·6 lb.) per brake H.P. per hour, according to size of Engine.

WATER INJECTION IS NOT USED UNDER ANY CONDITIONS.
THE HEATING LAMP IS NEVER REQUIRED WHILE RUNNING.
A SPECIALLY SKILLED ENGINE-DRIVER IS NOT NECESSARY.

CAN BE ARRANGED TO START FROM COLD STATE WITHOUT LAMP.

Complete Pumping Installations for Water Supply, Irrigation, etc.

JERUSALEM WATER SUPPLY.

(From Our Own Correspondent.)

Jerusalem, April 29.

There is a great deal of anxiety here over the scantiness of the past season's rainfall. Although an unusually heavy rainfall late in the season has recently occurred, yet the total rainfall for the whole season is only about 18 ins., which is 8 ins. below the mean annual rainfall for the last fifty years. The cisterns are far from full, and people are wondering how they will manage to get through the coming half-year of practical rainlessness.

The problem of the water supply of this city has always been a difficult one, and at times becomes acute. At one period—three millenniums or more ago—the spring known as the Virgin's Fountain, or, in Arabic, *'Ain Umm ed deraj*, from which a little stream then flowed down the Kedron Valley, was enough for the needs of the inhabitants. But after the Hebrew Monarchy was established it became necessary to supplement the supply by means of rain-filled cisterns. In the reign of King Hezekiah the waters of the spring—then called Gihon—were further economised by the construction of the famous Siloam Tunnel, which conducted them to a reservoir within the city walls (see II. Kings, xx, 20); the overflow was used, as it is to-day, to irrigate the "King's gardens" in the Kedron Valley. In the days of Herod the Great and during the Roman period works of increasing magnitude were undertaken for the supply of the greatly extended city. The chief of these was the Low Level Aqueduct, which brought water from four springs in a valley to the south of Bethlehem, where the three great reservoirs—now known as Solomon's Pools—were constructed to regulate and supplement the supply. A further southern extension of this aqueduct was made, possibly by Pontius Pilate, to the springs at El 'Arrûb, in a valley some 300 ft. higher than Jerusalem. Although El 'Arrûb is only thirteen miles south of Jerusalem in a direct line, the winding ruined aqueduct is nearly forty miles long. By means of these great works the city at the time of Christ must have had a plentiful supply of exceedingly good water; nevertheless, a second great system of aqueducts at a higher level was made a century and a-half later. Whereas the earlier aqueduct brought water into the city at the level of the Temple platform, this High Level Aqueduct conducted water in at the level of the present Jaffa Gate; it does not, however, seem to have lasted long. The Low Level Aqueduct, on the other hand, has survived in great part to the present day, and even in modern times has been repeatedly repaired; the section, thirteen miles long, from Solomon's Pools to Jerusalem, was in use even so recently as the German Emperor's visit.

A dozen years ago, after an attempt to patch matters up for a time by the temporary expedient of bringing water in tanks by train from Bettîr, the municipal authorities decided to make a new effort on more modern lines to bring spring water to the city, and for this purpose laid some eight miles of 4-in. iron pipes from the springs at Solomon's Pools. The pipes lie mostly on the surface, crossing hill and vale, but at one point two miles south of the city an ancient tunnel in the course of the old Low Level Aqueduct has been converted into an underground reservoir. From this water is taken by iron pipes to the Haram and also to a disused roadside fountain near the Birket-es-Sultan. At these two places water is still to be obtained at certain hours of the day, but in quantities entirely inadequate for the needs of the population.

The question of a more efficient supply has long been before the municipal authorities, and various inquiries have been made with respect to possible sources. The two likely sites are the old Roman springs in the Wady el 'Arrûb and the fine desert spring 'Ain Farah. That the former springs were once plentiful is proved by the very existence of the Roman aqueduct; but the quantity of water available here is now much reduced, largely, probably, on account of the destruction of trees and bushes over the catchment area. Indeed, a marked diminution in the springs has actually been observed since 1865, when the late Sir Charles Wilson surveyed this district in connection with a proposal made by Baroness Burdett-Coutts to restore the ancient aqueducts. This generous offer, by the way, fell through on account of the Turkish authorities making it a condition that they should themselves administer the funds. It is probable that much might still be done to increase the yield of these springs by improving the catchment area. The outstanding advantage of this source of water supply lies in its height above Jerusalem. A well-arranged aqueduct from here could supply the city by force of gravity alone.

'Ain Farah is nearly seven miles due north-east of Jerusalem at the head of the Wady Kelt, but lies quite 2,000 ft. below it. Very much pumping would be needed; and in a country where there is no native source of fuel—neither coal nor petroleum—this is a very serious consideration. Although this scheme seems to find the most favour with the promoters of the proposed waterworks, it is difficult to see how it can ever be a paying concern. The 'Arrûb waterworks would be more expensive perhaps in construction, but they would be far cheaper, if properly carried out, in upkeep. Whichever plan is followed, an efficient sewerage system must be constructed at the same time, as without means of carrying off the used water the insanitary condition of the city would only be increased. Fortunately, there are few cities of the same size with greater natural advantages—given an increased water supply—for an efficient drainage system.

IRRIGATION SCHEMES IN BULGARIA.

(From Our Special Correspondent.)

Sofia, June 3.

Irrigation schemes in Bulgaria are of more interest to British engineers and contracting firms than most of the railway projects in that country. The Haskovo-Portolagos line is perhaps the solitary exception, but then its construction will in all probability depend on the success or failure of the loan which is being negotiated. The irrigation works, on the other hand, are a big undertaking, for aiding in the construction of which no engineers or contractors can compare with the British.

The Bulgarian irrigation schemes are, roughly speaking, two in number—in Old Bulgaria, Valley of the Maritza, and in New Bulgaria, in the Xanthi district. Regarding the latter, plans have not been drawn up, but the matter is occupying the attention of the irrigation section of the Agricultural Department, and a commission is to proceed to the new territories shortly to study conditions; a credit is to be opened to that effect, and eventually something like £600,000 are to be spent in augmenting the productiveness of New Bulgaria, especially the tobacco-growing slopes of the southern Rhodopes.

Though the above scheme must not be lost sight of by British contracting firms, of more immediate interest are the projects for the irrigation of the Maritza Valley. These date from the days when Mr. Gennadieff was Minister of Agriculture, to whose insight in matters pertaining to agricultural development the country owes a decided debt of gratitude. Thanks to a conversation I had with him last week, and to the information placed at my disposal by Mr. Angeloff, the engineer in charge of the irrigation section, I am able to give the following details concerning the Maritza schemes. It is unnecessary for me to insist on the opportunities offered to British firms in connection with these works (sluices, etc.). It is true that the loan for their realisation has not yet formed the subject of conversations with financial groups, but it is bound to come, and *now* is the time to get in touch with the responsible authorities.

Digitized by Google

The elaboration of the schemes for irrigating the Maritza Valley is practically complete. They are two in number, the first dealing with the Maritza and its tributaries, the second with the Tunja River. Concerning the latter, likewise a tributary of the Maritza, but joining it beyond the Bulgarian frontier at Adrianople, the intention is to divert its waters from their normal course between Jamboli and the Turkish frontier, and to lead them westwards in the direction of Nova Zagora, with a view to watering the fertile plains between the latter and the Maritza. This project is still in its infancy, and provision for its realisation is not included in the following estimates. However, the work will not be a very expensive one, and the prospects for an increase in the productiveness of the plain are, I am told, a guarantee that the investment will be amply justified. It is calculated—and this applies to all projected irrigation works in Bulgaria—that the interest on the capital invested would be from 20 to 25 p.c. per annum, in the case of Xanthi even 27 p.c., on a par with the best paying irrigation investments in India. The system to be adopted as regards the distribution of water is that obtaining in India, which has been taken as the model to be pursued in Bulgaria rather than that in vogue in Italy. In the latter country the water is sold by the Government at so much a cubic metre to the landowner; in Bulgaria the land within the irrigation sphere pays so much per annum for its water, and the system has been found to work well in the districts already irrigated. These are already important, but, of course, on nothing like the scale to which they are to be developed, the reclamation area in the Maritza Valley amounting to about 1,500,000 decars (10 decars equalling 1 hectare).

The total cost of the Maritza scheme as it has been planned will be roughly £2,000,000. The following sums have already been devoted to canals in the first section: £20,000 in 1908; £60,000 in 1912 (owing to the war this sum was held over, but it has since been expended), and £52,000 are to be allotted in this year's budget. Moreover, there is a demand for an immediate extraordinary credit of from £200,000-£240,000 to be obtained by way of a loan from the Agricultural Bank, and to be refunded out of the irrigation loan of £2,000,000, which it is proposed to arrange.

The works proper are: the correction of the Maritza and some of its tributaries; the regularisation of the flow (barrages, reservoirs, and sluices); the correction and remodelling of the old Turkish canals; the construction of new canals.

There are three distinct sections: the Upper Maritza, from a point to the west of Tatar Pazarjik to the latter town; the Topolnitza basin, and the Lower Maritza. The first two are the most immediate projects, and will redeem 67,000 decars and 82,000 decars of land respectively. A barrage-reservoir, to cost £60,000, of a capacity 25,000,000 cubic metres, is to be built near the headwaters of the Topolnitza in the neighbourhood of Ishtiman. A further reservoir will be necessary on the Upper Maritza.

The Lower Maritza section comprises the area between Tatar Pazarjik and Philippopolis, and is by far the most important section, redeeming over 1,000,000 hectares. The rivers concerned are the Jelidere, Krishim, and Cepelu to the south, and the Ludajana and Strema to the north. The principal canal in the north will run from the Topolnitza eastwards to the Strema, and continue in a south-easterly direction to the Maritza. The Strema is to have a reservoir of a capacity of 50,000,000 cubic metres. In the south the principal canals will be one from the Jelidere eastwards to the Maritza; a second from the Krishim eastwards to the Cepelu, and a third from a point higher up on the same river, eastwards to the Maritza. The Krishim is to be endowed with a reservoir of a capacity of 110,000,000 cubic metres.

In conclusion I should like to chronicle the many compliments paid in Bulgaria to British irrigation engineering. Our work in India and Egypt is openly admired, as also our attempts to irrigate Mesopotamia. This ought to be a hopeful augury for our participation in the irrigation schemes now elaborating in Sofia.

THE PALESTINE EXPLORATION FUND.

The annual meeting of the Palestine Exploration Fund was held in the rooms of the Society of Antiquaries in Burlington House, Piccadilly, last Tuesday afternoon. The Earl of Crawford and Balcarres, F.S.A., took the chair, supported by Colonel Sir Charles Watson, K.C.M.G., the Chairman of the Committee, Mr. Walter Morrison, the Hon. Treasurer, and Mr. J. D. Crace, the Hon. Secretary. The following members of the Executive Committee were among others present:—Colonel Sir Henry Trotter, K.C.M.G., Colonel W. C. Hendley, R.E., Mr. D. G. Hogarth, Rev. Arthur Carr, and Captain Newcombe, R.E., and there was a large attendance of ladies and gentlemen interested in the work of the Society. After formal proceedings, an address was given by Dr. E. W. G. Masterman, the Hon. Secretary for Palestine, upon recent work of exploration in Palestine. He remarked that in spite of the very considerable light which exploration had thrown upon the condition of civilisation in Palestine in early times there was one period regarding which we badly needed further knowledge, and that was the time of the arrival of the Hebrews in Palestine and their first contact with the more cultured Philistines. All indications pointed to the problem of the Philistines as being the next most necessary work of the Society. All these years they had been excavating upon the borders of the Philistine country; now they would do well to boldly seek a site in the midst of that land, and the investigations of Messrs. Mackenzie and Newton indicated Ascalon as a site peculiarly suitable for the purpose. Such an excavation would need liberal and increased support over a period of some years, as if once begun it must necessarily be done thoroughly. The speaker then referred to the great survey just accomplished under the auspices of the society by Captain Newcombe, R.E., and his assistants, with the archæological co-operation of Messrs. Woolley and Lawrence, of the British Museum. It was a magnificent piece of work, and of great importance. Two main facts had come out: First, that the region in question south of Beersheba had never been the home of a settled population until Byzantine times; and, secondly, that the very considerable communities which established themselves in the latter period did so with great difficulty by the most elaborate arrangements for the storage of a scanty rainfall, and some at least of these places were mainly monastic establishments. They did not conclusively show that the climatic conditions there were necessarily different to those of to-day.

THE NEAR EAST.

THE NEAR EAST is on sale at all Bookstalls and Newsagents in the United Kingdom. Should any difficulty be experienced in obtaining the paper, readers will oblige by notifying the Manager. Abroad THE NEAR EAST may be obtained in:

PARIS. Librairie Hachette, 79, Boulevard Saint-Germain; Librairie Galignani, 224, Rue de Rivoli, and at Railway Bookstalls.
VIENNA. Goldschmiedt Brothers, Zeitungsbureau, Wollzeile, 11.
CONSTANTINOPLE. Economic Co-operative Society, Pera; Benjamin Rawe, British Oriental Bazaar; D. Marianopoulo, 280, Grande Rue de Pera; and The Nautical Bazaar, Galata.
SALONIKA. Librairie Francaise, Rue Sabri Pasha.
SMYRNA. Dem. Tzannou, Petite Rue de Rose, and F. S. McVittie.
BEYROUT. Sarrafian Brothers.
JERUSALEM. Palestine Educational Store, Jaffa Road.
CYPRUS. Cababe and Wilson, Nicosia.
CAIRO. Diemer and Company, Shepheard's Buildings; The British Library, Sharia Kasr-el-Nil; C.M.S. Bookstall, 15, Sharia Madabegh; and at Railway Bookstalls.
ALEXANDRIA. Librairie Schuler, Rue Cherif Pasha; Nacamulli and Company, 12, Rue Sesostris; Librairie Calebotta, Rue Cherif Pasha Librairie Cauro, Rue Cherif Pasha; The Eclectic Bookstall; F. Diemer, Cairo Station.
PORT SAID. Charles Evans, and on board vessels in the harbour
KHARTOUM. Sudan Stationery and Bookstore, and Victoria Bookstall
ATHENS. Eleftheroudakis and Barth, Place de la Constitution.
SOFIA. Librairie de la Cour.
BUCHAREST. Socec and Company, Calea Victoria
BELGRADE. La Librairie Internationale, 16, Rue Prince Michel.
NEW YORK. The International Bibliopole, 118, East 28th Street.

Readers in France who desire to secure THE NEAR EAST regularly are informed that any Newsagent in that country can obtain the paper for them through Messrs. Hachette, in Paris. In the same way any Newsagent in Belgium can readily obtain the paper from the Agence Dechenne, Bruxelles.

BUCHAREST	June 18..	25·41½—25·48½ lei.
CONSTANTINOPLE ..	June 18..	109½—110 pi.
SOFIA.....	June 15..	27·12—27·20 leva.
TEHERAN	June 17..	55½ krans

Devonshire Square,
London, E.C.

THE NEAR EAST is constantly inveighing against the interference of Foreign Offices in Finance as being bad for business, both from the British trader's point of view and from that of the smaller nations whose borrowings are thus supervised by highly interested diplomatists. The latest example of this form of finance is to be found in the Bulgarian Loan. According to advices from the Balkans, it is there believed that France was inimical to the loan because Russia had no particular fondness for the present Administration in Bulgaria. Germany, however, while having no particular desire to lend money west of the Ottoman frontier, took up the loan because the Tsar of All the Russias went to Roumania. Perhaps this is meant to be a hint to Bucharest that if the kingdom of the Lower Danube is seeking to escape from the orbit of the Alliance into that of the Entente, a make-weight may be found south of the Dobruja. In any case, I suspect that an armament order, as well as a railway contract, is annexed to the Bulgarian promise to pay, which doubtless is of the nature of a protocol—as befitting its augustly diplomatic character. I cannot help thinking that there is a lot of money waiting to be made by a British bank which will lend money in the Near East as a commercial proposition on approved security without the intervention of the Powers. I know that business men have the very lowest opinion of the diplomatic achievements of the United Foreign Offices of Europe, and they are hardly likely to welcome the establishment of an unwritten law that all Balkan loans must necessarily be viséd by Foreign Offices.

***

It is a curious commentary alike on the slowness of diplomatic procedure and the instability of the Ægean situation that the International Balkan Financial Commission which was appointed to settle the respective proportions of the Ottoman Debt which are to be assumed by the victors in the First Balkan War and was interrupted by the Second Balkan War, should now be menaced with another interruption owing to the possibility of the outbreak of a Third Balkan War. The members of the Commission met unofficially on Monday in Paris, and if peace is preserved they are expected to get to work this month. It will be remembered that the proportions of Turkish Debt to be taken over as at present proposed are as follows: By Greece, £T14,315,406; by Servia, £T4,451,473; by Bulgaria, £T4,075,590; by Albania, £T1,090,685; and by Montenegro £T151,040. Possibly some hope is cherished in Athens that another successful war against Turkey might enable the Hellenic Treasury to avoid taking over so serious a burden as that proposed by the International Balkan Financial Commission.

***

It is satisfactory to learn that Famagusta, which has hitherto been somewhat boycotted by trade, is, in future, to be a port of call for the vessels of the Pandeleon Line. This service may be expected to give a very considerable impetus to trade with the Syrian and Anatolian coasts, and it will also be very beneficial to the port of Famagusta itself, as well as to the Cyprus Government Railway, which for some time past has run from Famagusta through Nicosia to Morphou, and is now being extended to Evrychou among the north-western foothills of Troodos, whence a carriage road leads up to the summer camps. I see that a new Greek line is to begin a direct service with the Piræus, and this, coupled with the improved Khedivial arrangements will help to make Cyprus much more accessible both for trade and for visitors.

***

After the tedious period of blight, occasioned by the long wars in which the Porte has been engaged—wars which drained the provinces of money and, what English people sometimes fail to realize, of labour as well—there are abundant signs that commerce is about to emerge from her hibernation in Ottoman Asia. In Jerusalem, for example, considerable building works are being put in hand. The French are to erect a new Consulate General, the Greeks to build schools and renovate convents, the Italians to construct a church and hospital, and the Roumanians a cathedral. More than that, the railway, which is to connect Jerusalem with Afuleh Junction on the Damascus-Haifa line by way of Nablus, is due to arrive at the City of David in a few months. If the French build their railway from Rayak to Lydda on the Jaffa-Jerusalem line, there may be some opportunities for the merchant to benefit from a possible competition between these two rival trade-routes. I very much hope that the final mile or so of the Turkish line may be re-surveyed because, according to the present scheme, the railway will be laid far too close to Saint George's College, the Anglican church and headquarters just north of Jerusalem.

***

Last week I pointed out that if the Turks wished to rid the Anatolian coast of its Greek population—in itself a comprehensible policy, though probably unsound, economically—they should expropriate by legal enactment and pay compensation. A correspondent suggests that the existing process of violent expatriation is likely to affect the Ottoman Budget:—

"The Greek Rayahs of Pergamus, Chesme, Alatsata, Adramit have to a man deserted these towns, and the same thing applies to countless villages. I estimate that at least 50,000 have abandoned home and all their earthly possessions, fleeing before the refugees let loose from Macedonia apparently with orders to drive out the Christians and occupy their dwellings. At this rate the number will soon be 10,000 for this province, but no doubt you are aware that the same exodus is taking place all along the coasts of the Marmora and Black Sea."

"Meanwhile, crops are ripening, and there are no hands to take them in. Imports have ceased. What a gay time French investors will have if Djavid's budgetary estimates fall short of 30 per cent. or 40 per cent. during the next six months! An Englishman cannot realise what this will mean in a country whose population lives from hand to mouth."

My correspondent also anticipates as certain an outbreak of disease.

***

According to our Bucharest correspondent, the impression in that city is that, both on strategic and commercial grounds, the construction of a Danube bridge into Bulgaria is undesirable. It is thought that the advantages to be reaped from its existence would fall mainly to Bulgaria and Austria-Hungary, and that Roumania has but little to gain and more to lose.

***

The Khedive and Lord Kitchener, having made tours of the Egyptian provinces, it has, I note, now fallen to the Cabinet to do likewise, and on Friday the Regent and the Ministers went in state to the Dakahlia, where they visited the village of Kom-el-Nur. As a matter of fact, in doing this they obeyed the wish expressed during his recent tour by H.H. the Khedive, who was deeply impressed by what he saw there and desired his ministers to take an early opportunity of studying the conditions of the district. During all the discussion that has centred round the question of the introduction of some system of co-operative credit into Egypt, mention has frequently been made of the Kom-el-Nur Co-operative Syndicate. Although it was known that the syndicate had been very successful, few people were aware of the excellent work that has been silently carried out in this comparatively small village, which may well be taken as a model of what co-operation and self-help can achieve.

***

The Consular Report on the Trade of the Piræus (Cd. 7048-107) points out that the British merchant is still trying to make the local purchaser buy what he wants to sell and not what his customer wishes to acquire. The Consul suggests that a closer study of the colouring and designs admired locally on the part of the British producer is required—and that it is more than ever required now in view of foreign competition. I have so often met with the argument that "our trade with *x* is not worth the expense and trouble of making special arrangements to cater for the local market" that I almost to wonder whether anyone of our people has ever found his "trade with *x*" double and treble, because he has taken pains to supply what was wanted instead of offering his wares on the "take it or leave it" principle, which means, as far as I have seen in the Levant, that the native purchaser leaves the British merchant, whose foreign competitor takes the trade.

Constantinople Business Letter

(From Our Own Trade Correspondent.)

Constantinople, June 13.

Great Britain's Trade with Turkey.

According to the Board of Trade returns for the month of May, 1914, the total exchange of enumerated articles between the two countries amounted to £843,564, during May, 1914, as compared with £503,380 during the corresponding month in 1913, and £620,047 in 1912. This is a considerably better showing than even last month, the increase being particularly in the enumerated exports to Turkey.

The total enumerated imports from Turkey into the United Kingdom during the month of May, 1914, amounted to £121,376, and are in excess of the corresponding month in 1913 (£60,135), and 1912 (£101,877). The shipments of barley, which were nil in the month of May, 1913, amounted to £51,749 during the corresponding month in 1914, as compared with £45,561 in 1912. The shipments of other cereals were unimportant. Those of mohair amounted to £47,118, as compared with £30,776 during May, 1913, and £9,475 in 1912; the shipments of wool also amounted to £6,624 during May, 1914, as compared with £9,881 during the same month in 1913, and £16,999 in 1912; and those of raisins to £8,713, as compared with £19,478 in 1913 and £186 in 1912.

As regards the enumerated exports to Turkey during the month of May, 1914, these were considerably above the average, and were in excess of the previous month. They amounted to £722,188, as compared with £443,245 during May, 1913, and £518,170 in 1912. Most of the enumerated exports show very marked increases. The shipments of cotton piece goods amounted to £573,472, as compared with £366,564 during May, 1913, and £391,533 during the corresponding month in 1912; those of cotton yarns were £44,052, as compared with £33,210 in 1913, and £53,241 when the Italian war kept Italian yarns off this market. The shipments of coal amounted to £25,013 during May, 1914, as compared with £9,375 during the same month of 1913, and £30,407 in 1912. The shipments of woollen tissues amounted to £45,583 during the month of May, 1914, as compared with £16,889 during the corresponding month in 1913, and £21,093 in 1912; those of worsted tissues amounted to £13,305, as compared with £7,909, during the month of May, 1913, and £9,665 in 1912. The shipments of wrought copper amounted to £12,520, as compared with £2,479 during the month of May, 1913, and £5,164 in 1912; those of tin to £4,562, as compared with £4,206 in 1913, and £4,605 in 1912. The shipments of bags and sacks amounted to £3,681 during the month of May, 1914, as compared with £2,613 during the corresponding month in 1913, and £2,462 in 1912.

A survey of the total enumerated exchanges during the first five months of the present year, compared with the same period of the two preceding years, gives the following very satisfactory results:—1914, £3,618,425; 1913, £2,696,750; 1912, £3,245,311. During this period all the enumerated exports to Turkey show increases as compared with 1913, and in many cases as compared with 1912, the totals being, £2,938,672 for 1914, as compared with £2,022,524 during the corresponding period in 1913, and £2,375,056 in 1912. The total exports of cotton piece goods during the first five months ended May, 1914, amount to £2,229,448, as compared with £1,662,277 during the corresponding period in 1913, and £1,739,750. The shipments of cotton piece goods, which represent over 75 per cent. of the enumerated exports, are to date almost identical with those during the same period of 1911, the record year. The shipments of cotton yarns are in excess of the previous year, but are less than the record for 1912, when Italian goods were kept off the market owir to the Italo-Turkish war, the totals being £202,753 in 1914, £170,441 in 1913, and £249,098 in 1912. The shipments of coal amount to £188,703 to May, 1914, as compared with £49,032 during the same period of 1913, and £97,002 in 1912, when coal was contraband of war. The shipments of woollen and worsted tissues to date during 1914 amount to £223,450, as compared with £99,721 during the same period of 1913, and £205,331 in 1912. The shipments of wroug copper to date amount to £46,587, as compared with £12,253 in 1913, and £51,737 in 1912; those of tin to £27,723, as compared with £16,810 in 1913, and £17,908 in 1912. The shipments of bags and sacks to date amount to £20,008, as compared with £11,990 in 1913, and £14,230.

The total enumerated imports into Great Britain from Turkey during the first five months of 1914 are £679,753, as compared with £674,226 during the same period in 1913, and £870,255 in 1912. This is not an unsatisfactory showing when it is remembered that the year 1912 was a record year for Turkey's exports to Great Britain since 1897, which was the nearest approach to it. The shipments of barley are still behind those of last year, and more so those of the year 1912, the figures to May, 1914, being £232,932, against £254,026 in 1913, and £512,976 in 1912 the total shipments of wheat to date amount to a paltry £4,792 for 1914, as compared with £73,984 in 1912, while those of oats are £21,804 in 1914, as compared with £15,198 in 1912. On the other hand the shipments mohair for the period ended May, 1914, amount to £245,506, as compared with £249,062 in 1913, and £143,355 in 1912; those of raisins amount to £114,002 in 1914, as compared with £82,111 in 1913, and £32,107 1912. The shipments of wool, of which the quantity consumed in this country is increasing, amount to £60,199 during 1914, as compared with £87,941 in 1913, and £84,680 in 1912.

TRADE CONDITIONS IN ROUMANIA.

(By Our Bucharest Correspondent.)

The general commercial situation in this country can be taken to be most satisfactory. For one thing, it is certain that the effects of the financial crisis caused by the political occurrences of last autumn have entirely disappeared. In reviewing this difficult financial period a distinction must be drawn between the trade of Muntenia, Oltenia, and the Dobruja on the one hand, and Moldavia on the other. Whilst business in the three former provinces maintained its regular course, the crisis in Moldavia occasioned great losses abroad. Although there is much money in the country, a marked reserve in purchases is still to be discerned, which may be attributed, perhaps, to the still obscure political atmosphere in the Balkans, as well as to the lately noticeable agitation against Austro-Hungary.

TRADE OUTLOOK IN ADRIANOPLE DISTRICT.

According to a report from the British Consul at Adrianople, published in the *Board of Trade Journal*, it appears that the Adrianople district as a whole is only slowly recovering from the effects of the war, and a general feeling of uneasiness prevails, coupled with a belief, the origin of which it is difficult to trace, that the political future of the vilayet is not yet assured. This feeling exists among all classes and all nationalities outside the Government officials and the army, and pessimistic views are expressed everywhere. The Turkish population, who have undoubtedly been the worst sufferers from the war, appear dazed by their misfortunes, and the local officials experience much difficulty in rousing them from the apathy into which they have sunk. Their apprehension has been so marked that numbers of them have refused to proceed with the winter sowings lest they should be unable to reap the result of their labours. Happily, however, with the approach of spring this feeling seems to be vanishing, and there is every reason to believe that the next quarter will witness a marked return of confidence among the Turkish rural population.

The commercial classes—Greeks, Jews, and Armenians—are naturally suffering from the existing commercial depression. The prosperity of the town depends entirely on the state of the surrounding agricultural districts, which have, of course, produced practically nothing during the past year. Moreover, the Treaty of Constantinople has deprived Adrianople of the important agricultural districts of Kossukavak, Ortakeui, Soufli, and Mustapha Pasha, whose commerce has hitherto centred in that town. The commercial outlook is considered so unfavourable that certain of the smaller capitalists have already migrated elsewhere. Their number would be larger but for the fact that the majority of them have their capital locked up in advances made to agriculturists, and they are unable to realise it until agricultural conditions improve. A satisfactory feature of the situation is that the Turkish peasant does not repudiate responsibility for loans made to him before the war, but accepts it and will undoubtedly discharge his indebtedness when circumstances permit him to do so.

The distribution of seeds, ploughs, and horses to Moslem villagers by the local authorities has enabled a certain amount of winter sowing to be carried out. It seems, however, certain that much of the seed distributed has not been sown for various reasons, the chief of which is the apprehensiveness which has existed among the rural population as to a possible renewal of hostilities. A considerable divergence of opinion exists as to the actual extent of the land on which grain has been sown. The official view is that this amounts to one-third of that of a normal year, while other calculations place it at one-tenth of the usual area. H.M. Consul, however, considers that one-seventh probably represents the correct figure, for while certain districts already show signs of a fair crop, others, and in particular those bordering on the frontier, have hardly been sown at all. Spring sowings will be of a more extensive nature, the Government having imported a large quantity of barley seeds for distribution to the peasants, in whom, as already stated, a return of confidence is noticeable.

BAKU OILFIELDS STRIKE.

(From Our Own Correspondent.)

Odessa, June 14.

A Baku despatch of yesterday's date says there are 19,000 men on strike, and that the revolt threatens to extend. The police-master has been instructed from St. Petersburg to confine himself strictly to the preservation of order and under no circumstances to display, directly or indirectly, any partiality between employers and employed. The strikers' demands are of an economic nature, and are not unreasonable.

A Tiflis journal alleges that cheap Persian labour has for several years past been unfairly exploited by the Baku oil companies, and therein probably lies the root cause of the renewed trouble.

Servian Trade Opportunities.

Openings for British Exporters.—II.

(From Our Special Correspondent.)

British firms desiring further information concerning paragraphs marked (A), *please to communicate with the Manager*, The Near East, *Devonshire Square, E.C.*

Belgrade, May 22.

Trade Terms.

The preference for the cash as against the credit system is the great drawback of trade between England and Servia, and my personal opinion is that we are inclined to be too exacting. I know of a firm that went so far as not only to exact cash payment before the goods were shipped, but also to insist that a credit account should be opened at a London bank *before the order was given*. Such a firm had better leave the Near East market out of their sphere entirely. On the other hand, there are British firms—sound, go-ahead firms—which do give a long credit, and do not regret it. Admittedly, all firms cannot do so, but there is in every path of life a formula of compromise, and it can be found. One-third with the order, for instance, and two-thirds after three or four months are workable terms; for small orders, many of the agents prefer cash payment, enabling them to sell at their own price, but in the case of big orders, it cannot be demanded of them. The Austrian and Italian firms give the longest credit, but I do not for a moment think it necessary or advisable that we should do likewise. Reasonable offers to a good agent will never be refused, but unreasonable ones . . . In the case of agricultural machinery, large motors, etc., the terms will have to be granted by the agent, and, roughly speaking, two years (that is, two crops) and 6 per cent. interest per annum, is paid; arrears are charged at the same rate.

Owing to the fact that the purchases by the peasants are made in the latter half of the year only, the agent must be able to supply quickly. This must be borne in mind by the British firms. Moreover, he must have (in the case of machinery) *a sample in stock* which he can show, and even demonstrate the working of. A catalogue (never mind what language it is written in) is worthless. A British flour mill factory, working at prices comparing favourably with German prices, refused to agree to special terms for the supply of a small mill for demonstration purposes; a Continental firm did, and controls the market to-day. Needless to say, the small initial outlay has since been many times recovered.

There is a general opinion at home that we cannot compete with Continental prices. The opinion of the agents in Belgrade, the majority of whom I have met, is, on the other hand, quite contradictory. "British prices for most articles compare favourably with Continental articles," they say; "but the terms are impossible." In other words, we have never seriously worked the market. Those who have (I could give you their names), and who have given reasonable credit when justified, are doing well.

Turning to Government contracts, one finds the same hesitation among British firms. If there is one risk in a thousand in dealings with private firms, there is none in dealing with the Government. At the present moment the latter is a big purchaser of railway and building material; the terms vary according to the conditions of supply, but they are sound, and offers from England, through a well-connected agent, would have the most favourable consideration, regardless of the fact that foreign firms would have the powerful, ingenious, often Machiavellian support of their Consulates and Legations. But if no attempt is made now, the opportunity will have gone.

The creation of an Anglo-Servian commercial bank, acting as a link between the credit and cash systems, would be the best solution of the problem, and would ensure our trade. Well administered and thoroughly competent, it would be a paying concern, and Servian capital would participate. (A.)

Trade Opportunities (A).

The demand at present, with the exception of cotton goods and yarns, to be treated on another occasion, is about as follows (incidentally, I cannot refrain from alluding to several British triumphs in the Servian market, due largely to the enterprise of the firms in question. They include Colman—whose starch, blue, and "Savora" are doing exceedingly well—Twyfords, Limited, of Stoke-on-Trent, Ruston Proctor, of Lincoln, Marshall and Sons, of Gainsborough, Robeys, of Lincoln, etc.:—

Government Supplies.

These are for railway and building material. A credit for 2,000,000 frs. has been opened for rails, and 8,000,000 for rolling stock. British firms stand a very good chance in the case of rails, and the deal could be negotiated through a bank. The rolling stock will most likely go to Germany.

Buildings include new Ministries, barracks, and other Government buildings, a new station at Belgrade, and harbour works at Prahova—most probably also at Salonika. Warehouses are also necessary in Belgrade. The bridge over the Danube at Prahova is now being discussed by the Serbo-Roumanian Commission.

The ironwork and fittings for these buildings must all come from abroad. Firms like Maples or Waring and Gillow stand a good chance for furniture, as does the Shannon for office furniture. A credit of 1,000,000 frs. is to be voted for furnishing the new Royal palace. I understand from the architect, M. Tittelbach, that Empire and Louis styles will be required. So far offers have been received from one German and one Austrian firm, but were an English firm to compete it would certainly be welcomed. Hanging lamps (lustres) will also be in request, and doubtless some cutlery and silver plate, etc.

The Servian Steamship Company is to increase its material—steamers, tugs, and barges. The Government intends subsidising a steamship line (for cattle transport) in the Mediterranean, with a port at Salonika, and calling at Alexandria, Malta, Sicily, and the Adriatic ports. Vessels will be necessary, or some arrangement (possibly) with an existing line. An Italian offer was refused for political reasons, but this would not apply to England.

Finally, there is a great demand for military supplies (exclusively of cannons, etc, which will have to be bought, apparently in France), including tents, leather goods, harness, awnings, lorries, etc.

General Supplies.

All building material (there is an extraordinary building activity in Belgrade at the present moment, and in a few years' time the city will no longer be recognizable), furniture, and office furniture, iron bars, beams, and hoops, electrical fittings, telephones, sanitary arrangements, refrigerators, and electric fans.

Iron and iron goods of all sorts and descriptions (a British firm sending out a man to study the requirements locally, the kind of iron in demand, and the objects for which it is intended, would do a big business), Sheffield cutlery (this needs introducing), tools, etc.

Machinery, low-power motors (for crude oil only, the refined being too expensive), agricultural machinery, rollers and lorries, small weaving looms (New Servia), flour mills, typewriters, also motor-'buses (a company has been formed for running 'buses between Veles and Monastir; the concession will be extended to Ochrida and Struga, and most likely to other places as yet unconnected by rail. All 'buses will have to be bought abroad).

Other articles:—Soap (Lifebuoy, if introduced, would sell well), perfumery, cheap sweets (rocks, caramels, etc.), shop fittings, packing paper, string, and rope, paints and varnish, typewriting and notepaper, pens (Perry and Co. visit the market regularly, as do Raphael Tuck and Co., for their cards, etc.), leather goods.

Reference may be here made to the Government's railway programme, published in The Near East of May 22. All the material will have to be imported, and I should advise British firms to get in touch with the concessionaires as soon as possible.

The building of hotels by a Franco-Serb company, which reserves the right to buy the material and fittings in the open market, and *not* necessarily in France, is another opportunity too good to be missed.

In conclusion, I wish again to emphasise the erroneous opinion held in England concerning the Servian market. There are opportunities to do business, and good business, and we need fear no rival. Our prices are favourable, our goods the best, and Servia is more than willing to increase her trade, both her exports and her imports, with us, to the mutual benefit of both countries.

The profitable investment of British capital in Servia is a matter to which I shall refer on another occasion (A).

BRITISH TRADE WITH SERVIA.

A Proposed Exhibition.

(*To the Editor of* The Near East.)

Sir,—We have read with much interest in your issue of June 5 what your Special Correspondent writes about Servian trade opportunities, and beg to say that the statements made therein regarding the difficulty of obtaining selling agencies from British manufacturers are correct and as we have experienced ourselves; we have also had occasion to see that Continental manufacturers have sold goods here which British manufacturers could have furnished at lower prices.

In order to increase British trade in Servia we would suggest the creation of a permanent exhibition of English goods, to be visited and inspected by Servian customers only, who would be thus enabled to examine and compare the qualities and prices of the English goods with those of the competing continental countries. Foreign manufacturers or representatives of foreign manufacturers would not be allowed to visit the exhibition, but only direct customers.

We think that it would be possible in this way to lay the foundations of a useful project for fostering good business relations between the British manufacturer and the Servian wholesale importer. We would be ready to open up and carry on this exhibition. Our long experience in this market would certainly enable us to give the necessary information regarding the requirements of the Servian market, the standing and reputation of the customers, etc., etc.

It would be desirable if your readers would express their opinions about this matter in your esteemed columns, and thus enable us to realise eventually the plan in question in a way profitable to both countries.—Yours, etc.,

Fuchs Bros. and Co.

Belgrade, June 10, 1914.

AUSTRO-SERVIAN TREATY.

According to the Vienna correspondent of *The Economist*, writing under under date June 9, the Treaty of Commerce which is about to be renewed between Servia and Austria-Hungary should provide conditions which will give Austria a good market for her produce. But, of course, if the cattle duties and the partial prohibition of the import of Servian cattle are upheld, Servia will retaliate, and will look to some other foreign Power for the industrial imports which it needs. Both Germany and England are already busily engaged in winning the Servian market for themselves.

Near East Markets.

SPECIAL REPORTS.

Odessa. June 14.

The crop prospects in the Taurida, the Northern Caucasus and South-eastern Russia are encouraging, and in the Southern Governments they are, on the whole, good and promising, but from several districts comes a cry for more rain.

The tone of our market remains firm, but the amount of business doing is comparatively very small owing, chiefly, to the continued diminution of spot stocks, which to-day are reduced to 250,000 poods of wheat, 15,000 poods of rye, 120,000 poods of barley and 100,000 poods of maize; the arrivals from the interior are mere driblets. Barley continues to command the chief attention.

Jaffa. June 7.

The following figures show the exports of oranges from Jaffa for the season 1913-14 :—

Destination.	Cases.	Value. £
Liverpool	917,481	183,500
Manchester	4,400	1,000
London	4,626	1,080
Rest of England	3,361	845
Marseilles	3,412	860
Hamburg	9,487	1,900
Trieste	58,492	11,700
Odessa	148,409	29,700
Egypt	130,301	32,580
Turkey	233,863	58,495
Holland	19,405	3,995
Total	1,533,237	£325,655

There is a diminution of about 30,000 cases, due to the fact that a large part of the oranges were somewhat small and were packed in boxes containing 250-60 instead of boxes of one gross.

Sofia. June 14.

According to official information received by the Ministry of Agriculture here the supplies of wheat on the Hungarian market are exhausted, and the prospects of this year's crop are bad. In the event of a deficiency of food stuffs in Hungary supplies are usually drawn from Roumania, but Roumania happens to have no surplus to dispose of, and the outlook for her crops this year is not promising. Therefore, Bulgaria, with her great stores of food in reserve and the prospect of an abundant harvest this year will be the best market in which Hungary can purchase grain. It may be expected that the prices of Bulgarian wheats and flours will in consequence have an upward tendency.

Bucharest. June 14.

During the last fortnight rain has fallen continually all over the country, and in many districts the country is flooded and great damage to the standing crops has been done. So much so, indeed, that now it is reckoned that the wheat crop will be quite below the average, instead of being, as was expected a week or two ago, much above it.

The following are extracts from the weekly bulletins received at the London offices of the Imperial Ottoman Bank from its correspondent in the Near East :—

Beyrout. June 3.

The market has improved during the second half of May. Imports and exports are more active; and the arrivals of English manufactured goods, sugar, coffee, and hardware are worthy of note.

The cereal crop this year is reported to be abundant.

The prices of sugar and coffee have an upward tendency.

PERSIAN FRUIT.

The cold and snow that occurred in the month of April are reported to have done much damage to the fruit in North Persia. In the province of Azerbaijan nearly the whole harvest of almonds, plums, grapes, and other fruits was destroyed by the cold snap. Large quantities of these are usually exported into neighbouring countries, but prices this year will stiffen considerably as a consequence of the trouble.

According to the *Handelsmuseum* the Belgrade branch of the Prager Kreditbank is undertaking the erection in Belgrade of a factory for the production of chemicals and cosmetics.

RUSSIAN SUGAR.

(By Our Odessa Correspondent.)

In a recent reference, in the Duma, to the establishment of a direct line of fast steamers between Odessa and London, M. Timasheff, Minister of Trade and Industry, expressed the hope that the new service would be the means of reviving the export of Russian sugar to the United Kingdom, and, generally of making the British market more readily accessible to Russian products. In 1911 the exports of Russian sugar totalled 27,694,538 poods, and of that amount 12,690,795 poods went to the United Kingdom. Since then this particular trade has dwindled to a vanishing point, whilst the surplus production of Russian sugar over home consumption requirements steadily increases. The area this year under sugar-beet cultivation, chiefly in South-western Russia, is 1,900,000 acres, showing an increase of 400,000 acres, as compared with the beet acreage in 1912. Sugar exported from Odessa in Russian bottoms enjoys the privilege of a specially reduced railway tariff from the interior and the advantage of very low freight rates by the subsidised new steamship line between this port and London and Hull. M. Timasheff's idea appears to be that Russia is in a position to attain a similar prominence as a sugar grower and exporter to that she commands in her grain exports to Western Europe.

SERVIAN PLUM CROP.

The U.S. Consul at Belgrade reports:—According to official information, the plum crop for 1914 promises to be exceptionally good, the best for several years. The actual producing area according to the latest figures available—for the year 1911—was 346,000 acres, while in 1906 the crop acreage was 326,000. There is no marked change from year to year in the area in plum orchards.

The exportations of plum products for the year 1911 were: Crushed prunes, 73,000,000 lbs.; plum jelly, 11,400,000 lbs.; fresh prunes, 810,000 lbs.; slivovitz (brandy), 26,000 quarts. All these figures show a falling off from the average for the five preceding years.

OPIUM MARKET.

Messrs. Barker Brothers, Smyrna, report as follows for the week ending June 5 :—This week's sales amount to 39 cases of Carahissar, druggist's qualities, at 14s. to 16s., as to quality. Large buyers would have operated to some considerable extent had our sellers been disposed to accept slightly lower terms. New opium in the interior has been selling this week at 14s. to 15s., and the morphia results, as far as our analysis on some samples we have received show, renders from 8 per cent. to 10 per cent. This is poorer by at least 1 per cent. on similar samples tested last year at even dates. We think, however, that the crop in the upper districts is richer in morphia this year. From this week we commence the first arrivals of new crop, which amount to 25 cases against 7 at same date last year.

Messrs. Barker Bros., Smyrna, report as follows for week ended June 12: The sales this week on our market amount to 151 cases at 14s. 9d. to 16s. 3d., half of which are for the States. We are, however, in a position to state that neither the Continental nor the London markets have paid or will pay now above figures for opium equalling what changed hands this week on this market. The Americans may or they may not have paid the full prices, but with London and the Continent shippers must be losing heavily, and in some cases we learn that engagements have not been fulfilled, and shippers are offering cash compensation instead. The arrivals are 67 cases against 36 at same date last year.

H.M. Consul at Aleppo (Mr. R. A. Fontana) reports that the prospects for the 1914 harvest in the Aleppo Vilayet are, on the whole, very good. Wheat and barley promise to be abundant, and a satisfactory yield of cotton is expected.

PRODUCE REPORT.

Sugar.

London, June 18.

The Beet market has been quiet this week with little doing; July 9s. 5¾d., Aug. 9s. 7¾d., Sept. 9s. 7¾d., Oct.-Dec. 9s. 7d. to 9s. 7¼d., and May 9s. 11d. f.o.b. Hamburg. The Austro-Hungarian production for May has been reported, 6,900 tons against 11,200 tons last year; and stock 541,600 tons against 546,800 tons last year. The French production for May was 450 tons against 970 tons last year, and stocks 297,204 tons against 354,690 tons last year. The German production for May was 14,300 tons against 10,400 tons last year, and stock 1,011,900 tons against 901,000 tons last year.

The Refined sugar market is steady, with fair business passing at late rates. First marks, foreign granulated, ready sold at 11s. 7½d., July-Aug. 11s. 9d., and Oct.-Dec. 11s. 8½d. f.o.b. Hamburg.

Coffee.

There was only a moderate demand at auctions this week, but prices were steady. Costa Rica low mid. to mid. sold at 71s. to 77s., and bold 77s. to 88s. East India, small, 65s. to 66s.; low mid. to mid., 69s. to 72s. 6d.; and bold, 74s. to 80s. The speculative market has been dull and lower, July 43s. 4½d., Sept. 44s. 3d., and March 45s. 10½d.

Seeds.

Linseed is fully steady, but inactive, London-Calcutta spot and afloat and June-July quoted 51s.; July-Aug. was sold 51s. 4½d., Aug.-Sept. quoted 52s., and Sept.-Oct. 52s. 6d. Rapeseed is quiet but steady, brown Cawnpore is quoted June-July 50s. 9d. Cotton seed is very firm: London-Egyptian, July, is quoted £8 8s. 9d., Aug. £8 10s., and Nov.-Jan. £8 11s. 3d. per ton. The market for Canary seed remains quiet. Some speculative transactions are reported in Dutch and Turkish for forward shipment. Haricot beans exhibit little variation.

Oils.

The market has been very quiet, with little doing, on Linseed spot pipes landed at 25s. 10½d. and barrels 26s. 1½d. Rape oil ordinary brown naked is quoted 30s., and refined casks 31s. 9d. Cotton oil, crude, spot sells 29s., refined sweet 32s. 9d. to 34s. as to make, and ordinary pale 29s. Roumanian and Russian petroleum is quoted 7d. per gallon. American 7¼d. and water white 8¼d. per gallon.

Oilcakes.

Linseed Cakes.—Owing to the recent rains which produced an abundance of natural foodstuffs, the market has shown very little activity, and values are not so strong. London made sells quietly £7 15s. to £7 17s. 6d. East India seed prices are quoted at £7 13s. 9d. to £7 15s. for arrival. Fine quality Russian £7 12s. 6d. Cotton Cakes.—Egyptian is still scarce on spot, arrivals being mostly sold ahead, and the tendency of the market is distinctly firmer. £4 11s. 3d. ex ship is quoted for May-July shipment, and £4 12s. 6d. for July, with English makes firmly held up at £4 16s. 3d. to £4 17s. 6d., and Bombay at £4. Decorticated cotton cakes and meal move off steadily at £7 13s. 9d. to £7 15s. ex dock.

Locust beans are getting into small compass, and values tend dearer at £6 5s. for whole and £6 15s. for kibbled.

Corn.

Wheat.—The cargo market is steady, although there is an absence of demand. South Russian, on sample, May-June (old style) is quoted 35s. to 36s. 9d. Choice white Kurrachee, June, is offered 37s. 10½d. Barley is quiet. South Russian Sept.-Oct. offered at 22s. 6d. Maize is firm, but quiet. Danubian-Bulgarian, June (old style), is quoted 24s. 7½d. Oats are also quiet and unchanged.

EGYPTIAN COTTON MARKET.

(From Our Own Correspondent.)

Alexandria, June 12.

Prices have fallen steadily during the week, despite the resistance of the American markets. Bulls are discouraged and bears need not be very aggressive to make prices fall. The lack of demand for cotton for delivery in November constitutes another bearish factor. Speculation is very inactive in view of the ruling markets.

Reports regarding the coming crop are most encouraging. The weather is very favourable, and the cotton worm has only made its appearance at a few isolated points, without doing any damage. As to the water supply, it is abundant everywhere, and, thanks to the Assuan Dam, we may look forward with confidence to gathering the new crop without any lack of water.

Exports have already exceeded those of last year, the total so far amounting to 883,378 bales for 1913-14, as against 877,039 bales in 1912-13. If they continue on the same scale our stock will fall to the same level as that of last year.

Messrs. Davies, Benachi and Co., of Liverpool, have received the following telegram from Alexandria, dated Wednesday :—

Market quiet. July, 17⅛, November, 18⅜. Exchange, three months' date, 96¼.

Steamers Sailed.

June 5.—"Tudor Prince," Manchester. June 10.—"Meroe."

LIVERPOOL REPORT.

Messrs. Reynolds and Gibson telegraph :—With the exception of one or two days, the demand for Egyptian spot this week has been fair, and the business put through shows some improvement on recent weeks. The sales chiefly comprise medium grades of Nubari, Sakellarides, and Afifi cotton, while quite a fair quantity of Tokar and Sudan grown cotton has changed hands. Upper Egyptian, with the exception of lower grades and the top qualities, Nubari, Joannovitch, and Sakellarides, has been in very limited request, and holders seem inclined to take easier prices. Quotations for Afifi are reduced 20 points, with the exception of fine and extra fine, which are only 15 points lower. Uppers are reduced 20 points, except fine and extra fine, which are reduced 25 points. Nubari and Sakellarides, all grades, are reduced 10 points. Joannovitch is 15 points lower, except fine and extra fine, which are reduced 10 points. Estimated sales, 2,600 bales.

MANCHESTER MARKET.

(From Our Own Correspondent.)

Manchester, June 17.

There have been no signs of increased activity in the market during the past week, and the turnover in yarn and cloth has not been equal to the production of the machinery. In view of the state of affairs, the position of spinners and manufacturers is getting worse, and the prices ruling are becoming very unremunerative. Operators seem quite determined to resist the prices ruling at the moment, and Manchester undoubtedly is anticipating a fall in values before very long. The Egyptian cotton crop is understood to be doing fairly well, although it is rather early for anything definite to be said. Some recent advices from the American cotton belt have been rather better, but the article continues to be strongly held. In piece goods for the Near Eastern outlets a dragging demand has been experienced, and, owing to the fear of further complications in that part of the world, there has been a disposition to restrict purchases to sorting up lots. Rather poor advices continue to be received from Egypt. Comparatively speaking, India continues to do very little in either shirtings or light fabrics, although a few more bids have been mentioned during the last few days for Calcutta. Some leading shippers are not receiving very encouraging news of the monsoon, and it is feared that the rains this season will be rather weak. With regard to the China market, letters and telegrams from Shanghai are a little brighter, but when business is attempted buyers and sellers seem quite unable to get to close quarters for lots of any magnitude. Not many fresh contracts of weight have been arranged in home trade cloths. Loud complaints have been met with from Burnley manufacturers. Order lists are running down in Blackburn and district. Certain styles in shirtings are still well sold. American yarns for home consumption have been somewhat irregular in price when tested and a slow demand has been experienced. On the whole, wefts continue to attract rather more attention than twists. Some fair offers have been about in bundles for India. Bolton spinnings have been firm in quotation, without much activity in the way of fresh business.

THE TRADE OF LINGAH.

According to the British Vice-Consul's recently issued report on the trade of Lingah for March, 1912, to March, 1913, despite considerable disorder in the interior, particularly in the Lar district, where robbers abound, the trade of that port for the year under review showed a marked increase in imports and exports. In regard to imports this is attributable to a generally flourishing condition of the coastal districts and a good pearling season. The increase of exports is of more interest, being largely due to a revival of the caravan trade between Lar and Lingah, carrying products of the country, which shows some improvement in the state of the road. These caravans are able to travel south in comparative safety, because robbers have little use for the goods carried, but the caravans invariably return empty, and very few of them risk taking back piece-goods, sugar, and other coveted merchandise to Lar. The northern districts are capable of assimilating a considerable quantity of, principally, piece-goods, sugar and kerosene oil, if it were possible to forward these to Lar with any degree of safety. During the year prices of sugar and kerosene oil at Lar were 100 per cent. more than the bazaar rates at Lingah.

As at Bahrein, pearls are the chief staple, and, in addition to the catch by the Lingah pearling fleet, pearls are brought here from the Shib Kuh and the Arab coast for sale. The past season was a good one, inasmuch as the catch was above the average. A few Arab pearl merchants managed to dispose of large parcels in Bombay early in the season (September, 1912), after which the market became stagnant, owing to the Balkan war, and the majority were unable to dispose of their parcels for cash even at a great loss.

The Cairo season weekly, *The Sphinx*, has changed hands, having been acquired by Mr. Max Fischer, formerly proprietor of the *Egyptian Mail*, and managing director of the Société Orientale de Publicité.

SUDAN MARKET REPORT.

The following are extracts from the monthly report for April of the Central Economic Board of the Sudan Government :—

Gum.—During April 2,102,952 kilos of gum, valued at £49,553, were exported via Port Sudan. According to a Kordofan Province report for April gum was not coming into the market quite so freely the latter part of this month. 35,204 kantars were sold in the market during the month as against 39,962 kantars during March this year and 39,684 during April last year. The total amount of gum brought in for the season to the end of April is still 12,000 kantars more than that of last season. An Upper Nile Province report for April states that during the month the following quantities of gum were shipped to the north from Renk :—Hashab, 750 kantars of 110 rottles (49 kilos); talh, 580 kantars of 110 rottles (49 kilos). In this connection the traffic on the Renk-Gule road has very much increased this year. A Sennar Province report states that during March the price offered for hashab gum was much lower than that of February, as there was no competition amongst agents of the northern merchants. During April the quantity and price of talh remained steady. The amount of hashab was less as local freight rates enabled pickers to get better prices at Kosti. According to a Kassala Province report, 2,382 kantars of 110 rottles (49 kilos) hashab and 202 kantars talh were exported from Gedaref during March, and 2,758 kantars hashab and 502 kantars talh were imported. The exports from Mafaza were 2,110 kantars of 110 rottles (49 kilos) hashab and 489 kantars talh. One thousand nine hundred and eighty-four kantars hashab and 193 kantars talh were imported.

A Nuba Mountain Province report states that over 2,000 kantars of gum were exported from this province via Rahad and Um Ruaba in March. This is the first occasion on which gum going north to the railway has been credited to this province.

Cotton.—A report from the Red Sea Province for March says that the sale of cotton started slowly owing to low prices offered, only one merchant from Suakin having come. A second buyer arrived later. Up to the end of March 110 kantars of 315 rottles were sold and ready for export.

According to a Berber Province report for April, a good deal of the 90 feddans of cotton sown at Darmali was already showing on April 10. This is half the area to be sown, so that sowing is even earlier this year than last. At Zeidah the total amount of cotton picked up to April 23 was over 7,300 kantars; the yield will probably total 8,000. Much work is being done, under supervision, in improving canals on native-owned land.

Grain.—Dura.—It is reported from Khartoum Province that during March, as was expected, the issue of the Indian dura was successful in keeping down the market price. During April large consignments of Indian dura arrived, and though the market prices did not fall, it is probable that this expedient has been the means of preventing a distressing rise.

Wheat.—A report for April from the Berber Province states that in general the wheat in Berber district was to some extent showing the effect of drought. In a year of low Nile, when sowing should have been early, it was, if anything, later than usual. News has been received that some promising rain cultivation at Wad El Dib in the Atbai was entirely destroyed by locusts at the beginning of March. A Halfa Province report for the same month states that the winter wheat crop has now been reaped throughout the province. Reports from the districts indicate that it is fair to moderate.

EXHIBITION IN BELGRADE.

Our Bucharest correspondent states :—It is proposed to hold in 1916 or 1917 an agricultural, industrial, and art exhibition in Belgrade, the contributions to which, from all parts of Servia, will show the state and progress of the country. The Belgrade Municipality will take an active part, and will see to the providing of efficient accommodation for visitors coming from abroad.

ANGLO-PERSIAN OIL.

Debate in the Commons.

On Wednesday the House of Commons discussed the resolution authorising the Admiralty to invest £2,200,000 in the Anglo-Persian Oil Company.

Mr. Churchill said they were concerned solely with the best means of securing at a reasonable price an abundant and sure supply of oil for vessels which have already been built or begun. He wished to state at the outset that they did not intend to make themselves wholly dependent on this Anglo-Persian oil supply, or upon the oil supply from any particular quarter. They would continue to depend upon coal as the main motive power of the fleet for many years to come, and they would continue to purchase large supplies of oil from all parts of the world. As to the military argument, there never had been and there never would be any shortage of oil for the British Government in peace or war provided they did not mind how much they paid for it, and provided they retained the power to protect it in transit. The supply of oil in peace depended upon price, in war it depended upon price plus force. There were two routes for the oil, one via the Suez Canal and the other round the Cape. The Cape route would probably first be used, because the present disposition of the Fleet made it easier to protect the trade on that route.

In the last year or two the Government had experienced in common with private consumers a long, steady squeeze by the oil trusts all over the world, until now they were paying double what they began by paying. For many years it had been the policy of the Foreign Office, the Admiralty, and the Indian Government to preserve the independent oil interests on the Persian oilfield, to help it to develop, and, above all, to prevent it being swallowed by a trust. Ever since the days of Lord Selborne and Mr. Pretyman at the Admiralty, the Admiralty had looked to Persia as a promising source for naval oil fuel. The hon. member for Chelmsford had displayed remarkable foresight in inducing Lord Strathcona to become chairman of the Anglo-Persian Oil Company, and thus to secure its commercial independence and British character.

Under the agreement the money we paid would give us control—so far as Admiralty interests required it—of the Anglo-Persian Company and its concessions. The two millions to be advanced would be used in the actual development of the oil supply, and over the whole of these enormous oil regions they obtained the power to regulate the development according to naval and national interests and to conserve and safeguard the supply of the existing wells pending further development. Coupled with the agreement was a supply contract which was secret, but he could tell the House that the quantities of oil drawn from this source would embrace less than half of our total requirements of oil, and the prices would be fixed by a sliding scale in relation to profits. It would not be necessary to borrow. The Government believed that this investment of State funds—although there was a speculative element in it—was a prudent, thrifty, and profitable measure in itself, but the proposition was reinforced by naval interests of the highest order.

The critics of this scheme had urged that competition by a Government in the oil market would tend to lower prices and interfere with the oil trusts, and they also urged that it would be more patriotic for the Government to develop an oilfield within the British Empire. He did not wish to make any attack upon the Shell or the Royal Dutch Company. They had combined gigantic oil properties all over the world, and it was their policy to acquire control of the sources and means of supply, and then to regulate production and the market price. They had long looked towards the Persian field, and if this Bill were to fail there was no doubt than an amalgamation or merger of the Anglo-Persian with the Shell Company would probably take place. It was for Parliament to balance the moderate element of fair commercial risk which is inseparable from business enterprise of all kinds against the certainty of over-charge which follows on monopoly. It was for Parliament to balance the trouble and mental exertion unquestionably required from its members in the process of securing an independent oil supply against the exploitation of which the taxpayer would otherwise be the victim.

Mr. George Lloyd, Mr. Ramsay Macdonald, Mr. Gretton, and Mr. Ponsonby then criticised the scheme on strategical and political grounds.

Sir Edward Grey denied that general foreign policy had anything to do with this question, and he deprecated its being raised on this agreement. He did not think that if the worst came to the worst the task of protecting the 150 miles of pipe line would be so serious as had been represented. At the worst it would require only about two brigades of troops. Some members had asked whether the Russian Government's attention had been called to this prospect. It had never been discussed with the Russian Government. This particular concession was made before the Anglo-Russian Treaty was arranged, and the present contract did not alter the concession in any way.

Mr. Pretyman approved of the contract, but complained that the Government had neglected this matter until the last year or two, and now had to act in a hurry.

The discussion was continued by Mr. Dillon, Sir A. Spicer, Sir F. Flannery, Mr. T. E. Harvey, Lord C. Beresford, and Mr. Morrell.

Mr. Samuel Samuel complained of the unjustifiable attack that had been made by the First Lord on his company and on his brother, Sir Marcus Samuel. He claimed that his brother had rendered the greatest service to the Admiralty and to the country in the introduction of liquid fuel for use in marine engines. Yet the Government had always displayed hostility to them. The company had gone in for the development of liquid fuel because they knew it would be necessary for the Navy, and at the time of the Japanese-Chinese war they called the attention of the Admiralty to its possibilities long before the Admiralty contemplated its adoption for British ships. There was no such thing as a monopoly in the oil trade, and the Admiralty had been grossly deceived into adopting the present course. They were probably unaware of the Anglo-Egyptian Oil Company, in which the Egyptian Government were interested, a thoroughly British company, which could supply the oil required, and there were also companies in Trinidad and Roumania who would be glad to tender to the Government.

Mr. W. Rutherford, Mr. G. Parker, Mr. Godfrey Collins, Sir J. D. Rees, Mr. Edgar Jones and Mr. W. Guinness having spoken, the Committee divided, and there were :—

For the resolution	254
Against	18
Majority for	236

The announcement of the figures was received with cheers and laughter.

GERMAN ENTERPRISE IN TABRIZ.

(By "Mirza Firooz Khan.")

Good work is being done by the German rug factory which is situated in Shah-Nov (new city), the newest suburb of Tabriz (which has long and wide avenues, new shops, coffee-houses, gardens, etc.). The works cover an extensive piece of ground, and the factory whistle blows at 6.30 a.m. and at 5.30 p.m. Visitors are not allowed to enter the factory for fear of the discovery of the secrets of dyeing, etc. Dyeing and other important processes are carried out by well-paid Germans, while the unskilled part of the work devolves upon the natives.

When the factory was opened quite a ceremony was observed. Shuja-ed-Dowleh, the Consuls, the European residents, and leading natives were invited to be present, speeches were made, and coffee was served, with music, etc. Recently some of the directors of this factory came from Berlin to see it. They were pleased with it, and increased its capital from two and a-half million marks to five and a-half million marks. Hereafter it was decided to manufacture, besides rugs, calico of all kinds and colours, the cotton supply coming from Khorasan and Caucasia. The factory has branches also in Sultanabad, Shiraz, Kerman, and Hamadan.

Shipping Intelligence.

BLACK SEA FREIGHTS.

(From Our Own Correspondent.)

Odessa, June 14.

To-day there is not a British bottom in the port of Odessa. That fact, in itself, mutely proclaims the utter depression of our market. Grain cargo is becoming scarcer, and in putting up the prices of the remnant stocks shippers are making business still more difficult. In the early part of the week a couple of boats, after much and costly delay, managed to complete on the Hamburg berth at, nominally, 6s., but one half the parcels were taken at 5s. 6d. and 5s. 9d., and even at the latter rates there is to-day scarcely any cargo obtainable. The last boat on the Rotterdam berth was loaded at 5s. 3d. and 5s. 6d. The marvel is that British owners continue to send out tonnage in ballast for such freight rates, and always at the risk of demurrage.

At Nicolaieff the same stagnation obtains, and merchants have the utmost difficulty in fulfilling previously made contracts. Unless there be an early arrival of grain in the Bug port from some part of the hinterland, business must come to an absolute standstill pending the new crop. At Kherson there is a very slight demand for Hamburg and the Weser at 6s. 6d., but a couple of boats will meet all requirements of the Dnieper port for the next fortnight or three weeks.

Novorossisk continues to transact a small and steady business at 6s. 3d. Antwerp, 6s. 6d. Weser, and 6s. 9d. Hamburg, whilst a very prompt boat has secured two-thirds of her cargo at 6s. for Rotterdam. At Theodosia there is nothing doing.

SHIPPING STOPPED AT SMYRNA.

A Reuter's telegram from Smyrna states that by Government order no steamer will be allowed to enter or leave the Gulf of Smyrna until further notice.

The keel-laying of the new Turkish Dreadnought "Fatih" was performed by Lady Caillard, wife of Sir Vincent Caillard, a director of Vickers, Limited, at Barrow on Thursday last week. Lady Caillard, by means of an automatic riveting machine, riveted two of the plates of the keel, which was afterwards placed in position on the blocks. The vessel is to be larger than the "Reshadieh" now finishing at the Barrow yard. Her length will be 525 feet, her displacement 23,000 tons, and her speed 21 knots.

The new twin screw steamer "City of Exeter," the largest passenger steamer yet built for the Ellerman Lines, Limited, completed her trial test satisfactorily at Belfast last week, and will sail on her maiden voyage for India on the 29th inst.

NEWS FROM ALL SOURCES.

On Thursday of last week, before Mr. Robert Wallace, K.C., at the London Sessions, John Highwater, who had practised as an eye specialist, under the style of "Dr. Percival," pleaded guilty to having obtained £1 1s. by false pretences from an Egyptian named Butrus Ghobrial. Mr. Wallace, K.C., bound over the defendant, and said if he offended again he would be sentenced to nine months' imprisonment for this offence.

The U.S. Consul-General at Athens reports that the Greek Government has signed a contract with the Standard Oil Company, of New York, for 90,000 cases of petroleum for general uses, and 3,000 cases of higher test for use in lighthouses. The above quantity represents about a half-year's supply. The general expectation was that the order would be placed in Roumania.

Mrs. Hungerford Pollen, in a lecture on "Ancient Lace" at the Victoria and Albert Museum last week, said that examples found in Egyptian tombs were similar in character to Italian lace of the fourteenth century, and work of this kind was produced in Italy to the present day. No doubt the art of lace-making came from the East, and Persia gave to Venice her pre-eminence in lace design.

According to the *Nachrichten für Handel und Industrie*, Berlin, there is a good outlet for second-hand clothes in the region of Trebizond (Asiatic Turkey). The importation of these garments represent annually the value of about 115,000 frs., of which 80,000 frs. worth come from France, and 15,000 frs. from the United States. The balance is divided between Germany, Great Britain, and Austria.

It is reported in Cardiff coal trade circles that both Turkey and Greece are in the market for considerable supplies of coal. During the past week Turkish agents have inquired for about 100,000 tons, and Greece is understood to be seeking equally large supplies for prompt delivery.

The Ottoman Post Office is preparing to open a telephone line between the port of Hodeidah and Sanaa in the Yemen.

According to *Le Journal des Balkans*, no less than £109,000 have been collected by voluntary contributions for the Roumanian Fleet.

Our Belgrade correspondent informs us that an application has been made to the Servian Minister of Commerce for a concession to erect and work important paper mills, and the concessionaires have for this purpose deposited a caution-guarantee of 100,000 francs.

The plans and estimates for the erection of waterworks at Monastir (New Servia) having been sanctioned, the construction of the works will be commenced in July or August next.

The Servian Minister for War has sought and obtained a credit for one million francs for the purchase of military clothing. The orders will probably be placed with local cloth factories.

Our Belgrade correspondent states that a wireless telegraph station is to be erected over the Belgrade University buildings. In connection with this there will be a receiver for obtaining the exact middle European time.

Engineering Notes.

Our Engineering Supplement.

The attention of engineers, machinery users, merchants, and the trading classes generally in the Near East, as well as engineer-manufacturers, shippers, and export merchants in the United Kingdom, is drawn to the Engineering Supplement which we publish this week. For the buyers the illustrated and displayed advertisements form a guide enabling them to approach directly the manufacturer, while the descriptive illustrated articles on engines, machinery and implements afford them technical and other information which it is difficult to obtain by ordinary correspondence. On the other hand, British manufacturers will find a great variety of information derived from the well-informed representatives of the journal on the spot. The needs of the divers markets in the Near East, the class of machinery that is suitable and wanted in each particular country or district, and the economic conditions and customs of each country with regard to engineering and machinery matters, are dealt with in detail, and a variety of valuable information not readily accessible elsewhere is provided.

British Enterprise in Servia.

Our Belgrade correspondent writes (June 14):—British firms are beginning to take an active interest in Servian enterprises. Lately the Railway and Works Company, of London, came to an agreement with the Servian Government for the tracing and planning of the Prilip-Shtip-Kotchané railway line, a distance of about 140 kilometres, for which the company will be paid at the rate of 700 francs per kilometre, and will obtain the contract for the entire construction of the line, providing the company's estimate for the construction is approved of.

Four days ago three directors of the Balkan Agency of London arrived here with the object of submitting to the Government a project for irrigating valuable tracts of land, and to-morrow Mr. Chedo Mijatovitch, former Servian Minister in London, will return to Belgrade with the object of making important financial proposals on behalf of a British group.

Servian Iron Industry.

Our Belgrade correspondent informs us that an application has been made by a Servian engineer to erect an iron foundry at Belgrade, and the permission will probably be accorded. Iron ore has been found in abundance in Servia, but the difficulty hitherto has been the question of conveyance. Now, however, as railways are being constructed which will traverse Servia in all directions, they will benefit not only the iron industry, but will tend greatly to increase the working of antimony and copper mines, which are already in a flourishing state.

Beyrout Railway Projects.

Apropos of his article upon Railways in Syria, which will be found on page 224, we have received the following note from our Beyrout Correspondent, too late to embody the information in the article:—The present narrow gauge suburban line, known as the Tramways Libanais, between Beyrout and Ma'ameltein, on the Libanese coast, is 21 kilometres 700 metres long. The extension from Ma'ameltein to Jebeil (old Byblos), which is under construction, and the works of which are proceeding very slowly—possibly for certain reasons not unconnected with the projected scheme outlined in the article—is to be about 16 kilometres. The further distance from Jebeil to Tripoli is about 45 kilometres 500 metres, making in all about 83 kilometres between Beyrout and Tripoli. At the present rate of construction, the Ma'ameltein-Jebeil extension may not be finished for another eight months.

A Varna Shipyard.

Our Sofia correspondent informs us that on June 10 the Bulgarian Government had under consideration proposals put forward by a Belgian company for the construction of a shipyard and repairing slip at the port of Varna. The Minister of Commerce pointed out the advantages of having such a yard, capable of effecting repairs to any damaged vessels on the spot instead of having to send them abroad for overhauling and reparation, and the Council decided to grant the concession asked for by the Belgian company. While congratulating Bulgaria in having such a yard at the Black Sea port, where it will certainly prove extremely valuable, we should naturally have been glad to see the contract given to a British firm.

An Embarrassing Rail Trouble.

Since the introduction of electric traction on railways and tramways in the East, people have, as elsewhere, nothing but praise for the system and its superiority over all others known there. But municipal and other authorities who are responsible for the maintenance of the lines have observed that the life of the rails is considerably shorter than before the use of electricity. The blame was thrown on the railmakers, and, by some, on the climate. The corrugation of rails and tramways, in the meantime, has become so serious that all kinds of remedies have been suggested and adopted, but with more or less unsatisfactory results. It may be a consolation to such embarrassed authorities to know that so far climatic conditions have nothing to do with the trouble. It is general, and is a serious problem engaging the attention in engineering and other quarters. The view of experts is that the rail-steel now used is not hard enough for its work, and that possibly modern methods of steel and rail making are at fault in that direction—which view coincides with that expressed by engineers in the East. The use of wheels of small diameter is also considered severe on the rails; but the conditions of tramway working make alterations in this respect almost impossible. It is therefore necessary to find a material which would not yield to the wheel actions, which are the immediate cause of corrugation, and it is believed that rails with a high proportion of carbon are essential to resist corrugation, as well as ordinary wear.

Roadmaking in Trebizond.

A recent Consular report states that some progress was made during 1913 by the French company engaged in repairing the Trebizond-Erzeroum road. It is not known when the work will be finished, but it is believed that there will be some speeding-up in 1914. The road has been completed and handed over to the authorities as far as Jevizlik (about eighteen miles), and another stretch from there on to Hamsikeui is nearly finished. The existing road over the Kop Pass has been temporarily repaired until such time as the new road, which is to pass at a lower altitude and will be freer from snow, can be made. When the work is completed the total distance from Trebizond to Erzeroum will be lessened by some nine miles. Some work was also carried out by the same company on the Kerasund-Kara Hissar road, while during 1914 operations will be begun on the first section, thirty-one miles in length, of the Rizeh-Ispir-Erzeroum road. The Turkish authorities also carried out some road works independently of the French company. A beginning has been made with the stretch of road from the centre of the town of Trebizond to the beginning of the Erzeroum road at Deirmen Dereh, which has hitherto at times been almost impassable; the repair of the Platana road was begun and should be finished by the middle of 1914, and a good road has been made to Souyouk Sou, the local summer resort. Other roads have been begun, under a system by which the population supplies the labour and the authorities the tools and technical assistance, between Kerasund and Pir Aziz and between Ordou and Abdal, while the continuation of the road to Surmeneh, which has hitherto stopped short at Yomura, ten miles from Trebizond, has been begun. Ultimately it is intended to build a continuous road parallel with the sea to link up the various small coast towns.

Nile Delta Drainage.

We are informed that the task of draining the low-lying lands of the Egyptian Delta that drain into Lake Mareotis has been entrusted to the Humphrey Pump Company by the Egyptian Government. Eighteen pumps, each capable of delivering 100,000,000 gallons per day, are to be installed.

TENDERS INVITED.

EGYPT.

[*The London agent of the Egyptian Government is Sir A. L. Webb, K.C.M.G., Queen Anne's Chambers, Westminster, S.W., at whose office particulars of tenders marked (L) are to be obtained.*]

Photographic Material.—Tenders are invited at the Ministry of the Interior, Cairo, for the supply of photographic material required by the Ministry for one year, commencing July 15, 1914. July 1.

Sacks for Cotton Seed.—Tenders are invited by the Administration of State Domains, Cairo, for the supply of 4,000 sacks for cotton seed. June 14.

Tools.—Tenders are invited by the Egyptian War Office for the supply of tools. July 6. (L.)

Electric Material.—Tenders are invited by the States Domains Administration for the supply and installation at Sakha of electrical material, such as motor, lamps, transmission, etc. June 28.

Steel Girder Bridges.—Tenders are invited by the Inspector of Irrigation, Zifta Circle, Mansûra, for the supply and erection of fifteen steel girder bridges across the Baglia Drain. Approximate cost £E2,000. July 1.

Agendas.—Tenders are invited by the Ministry of Finance for the supply of agendas necessary for Government Administrations for the year 1915. August 1.

Bristol Board.—Tenders are invited by the Ministry of Finance for the supply of Bristol board required by the Printing Department during the year 1914. July 20.

Extension of Electrical Plant.—Tenders are invited by the Electrical Service, Ministry of Public Works, Cairo, for the supply and erection at Khanka Lunatic Asylum of one 65-h.p. crude oil engine; one double current dynamo of 40 kw. and accessories; two centrifugal pumps and accessories. June 30.

ROUMANIA.

Passenger Carriages.—Tenders are invited by the Roumanian State Railways authorities for the supply of fifty-two passenger carriages, four bogies, fitted with Westinghouse brakes, hand brakes, and electric light, etc. July 3.

RECENT ADJUDICATIONS.

Amongst the recent adjudications at the Egyptian Ministry of Education (Department of Technical, Industrial, and Commercial Education) we notice the following:—

Pupils' Clothing.—Messrs. J. Compton and Sons, Cairo, £E405.

Raw Materials, etc.—Mr. F. Ratcliffe, Cairo, £E8,663; Messrs. Thos. Cook and Son (Egypt), Cairo, £E337.

At the Ministry of Finance, Survey Department:—

Weights.—Messrs. T. W. Peterson and Co., Limited: 10,000 2 rotls weights, 10,000 1 rotl weights, 10,000 ½ rotl weights, 10,000 ¼ rotl weights, 2,000 1 oke weights, 2,000 ½ oke weights, 2,000 ¼ oke weights, 2,000 ⅛ oke weights, at a total cost of £E478,350. Mr. S. Petsaly: 10,000 2 rotl weights, 10,000 1 rotl weights, 10,000 ½ rotl weights, 10,000 ¼ rotl weights, at a total cost of £E379,200.

THE CAIRO MOTOR CO., Ltd.
The Largest Motor Depot in the Near East.
SUPPLIERS OF
Motor Cars, Cycles, Launches, Marine Sets, Evinrude Motor Attachments, Dunlop Tyres & all Motor Accessories.
Head Office: RUE SOLIMAN PASHA, CAIRO, EGYPT.
Also at ALEXANDRIA and LONDON.

All Banking and Stock Exchange Operations undertaken. Special Service for Debt Collection Transfers, Letters of Credit, etc.

FAVOURABLE SITUATION.—IMMINGHAM DOCK is geographically the most central port for the Continent, and is in direct rail communication with all parts of Industrial England.

ALWAYS ACCESSIBLE.—IMMINGHAM DOCK has a storm-protected harbour and deep water channel and entrance lock, enabling the largest ships to enter or leave **at any state of the tide;** 48 feet H.W.O.S.T., 27½ feet L.W.O.S.T.

LOW DOCK CHARGES.—IMMINGHAM DOCK charges are more favourable than at any competitive port—no waiting—quick and cheap transhipment between ship and rail.

UNIQUE OPPORTUNITY FOR NEW WORKS.—IMMINGHAM DOCK is adjacent to numerous valuable sites for new works and factories, which are in close proximity to coal and ironstone fields, and its many commercial advantages tend to minimise the cost of production.

TIMBER.—The large Timber Pond with deep water berths has accommodation for all descriptions of Timber.

There is a Timber Quay for Deals, Battens and Boards, Mining Timber, Pit Props, etc., with Sorting Ground and Timber Yards adjacent.

Ships can discharge direct from Hold to Truck Sorting Ground.

S.S. "Noreg" discharged a cargo of 1,404 loads of Pit Props in 17 working hours.

IRON ORE.—Ships discharge at Mineral Quay, with quick-working cranes and three sets of running roads alongside quay.

S.S. "Porjus" discharged a cargo of 4,427 tons Iron Ore in 43 working hours.

GENERAL.—Iron, Wood Pulp, and General Merchandise can be expeditiously handled by the latest type of cranes. Lifting capacity from 30 cwt. to 50 tons.

Sidings run alongside every berth, and spacious Transit Sheds and Bonded Stores are provided for dealing with traffic requiring storage accommodation.

The Ship Chandlery and Provision Department supplies Cabin, Deck, Ship, and Engine Room Stores of all kinds, and of best quality, at lowest prices.

DOCK DIMENSIONS.

Dock Estate....	1,000 acres.	Depth of water on sill H.W.O.S.T. ..	48 ft.

COMPANY MEETINGS.

ANGLO-PERSIAN OIL CO., LIMITED.

An extraordinary general meeting of the Anglo-Persian Oil Company (Limited) was held on Monday at Winchester House, Old Broad Street, Mr. C. W. Wallace, the chairman presiding.

The Secretary (Mr. F. Macindoe) having read the notice convening the meeting,

The Chairman said :—Gentlemen, the only actual business that I have to lay before you to-day is that of the confirmation of one of the resolutions which were passed by you without a dissentient voice at our last meeting a fortnight ago, and inasmuch as since then we have read with satisfaction that the Press generally—at all events the generality of the independent and responsible journals—has expressed warm approval of the arrangements entered into between His Majesty's Government and this company, I find myself in the happy position of having to add little or nothing to what I said when we last met.

The one and only criticism which I have met with from, or emanating from, our own shareholders has been that, inasmuch as we have already proved vast stores of oil in our territories, we have allowed the Government to come into the concern on far too favourable terms. The shareholder—a very large shareholder—who brought this against us urged that we should have given the existing shareholders the option of taking up at par the additional capital required and then, as untrammelled sellers, have got the extremest farthing per ton for our products, and for any portion of it sold to the Admiralty, to have kept all the profit on it for our shareholders. I do not think that this criticism will appeal to many or any of you who heard what I said at the last meeting, but I take this opportunity of repeating it to you—if I did not make it clear when I last addressed you—that the consideration that we got for allowing the Government to acquire a large interest on favourable terms—that is, at par—is the securing of a substantial contract extending over a period of years at a remunerative price. I am not permitted to give you any further details of this contract, as I told you before, but I will repeat that in the unanimous opinion of your directors, who have studied the question in all its bearings on your behalf for many months, the consideration is a good and valuable one. As a separate matter I feel sure also that none of you will find any great difficulty in appreciating that it is by no means a disadvantage to have the Government of Great Britain associated with the company as it now will be.

But during the last fortnight you will have seen quite a different class of criticisms disseminated—criticisms framed to endeavour to persuade the public that the Government has made a very bad bargain. So far as these criticisms have come to my notice they have been largely based upon misstatements of facts, and they have emanated either openly or under the cover of "inspired" articles in one or two journals, from interested parties who are disappointed to find a substantial portion of the oil fuel requirements of the British Navy satisfied otherwise than by themselves, and also by the Admiralty being placed by its part ownership of these vast supplies of petroleum of ours in a position of practical immunity against squeezing by foreign-controlled rings and combines. It would have been surprising indeed if we had heard no cries of pain from such parties, and if we had not found them endeavouring, by pleadings that are very special and by arguments incapable of impressing the well-informed, to raise a suspicion in the minds of the public that the Government had been cozened into making a bad bargain in entering into this arrangement with us. But, gentlemen, the lamentations of the spokesman of these foreign monopolies are the best possible justification, I submit, that the Government could have for the action which they have now taken, and also prove up to the hilt the wisdom of the policy which the Government of India have followed for the past ten to twelve years in regard to the Burma oil industry. And nothing that has been said by or on behalf of these people that I have seen can raise the slightest doubt in well-informed minds as to the benefits to be derived from these agreements by both parties.

Now it is obvious, gentlemen, that both these sets of critics cannot be correct in their arguments. According to these, if we have made a bad bargain for our shareholders the Government must have made a good bargain, and if the Government have made a bad bargain, then our shareholders must have made a good one. The fact is, however, that the arrangement, as every first-class arrangement should be, will be one of benefit and advantage to both parties to it. In consideration of allowing the Government to acquire a small fraction over one-half in our share capital on favourable terms—namely, for the purpose of carrying out the developments which are now justified by the further information acquired as to the vast potentialities of our properties—we obtain a secure contract, extending over a period of years, at a remunerative price, without having to incur the expense of establishing a vast selling organisation, or of having to wrestle for a share of trade with foreign-controlled selling monopolies. The Navy, on the other hand, which does not (as these interested critics assert) give us a subsidy or unfair preferential support, but which makes an investment on the same conditions as any other investor, concurrently puts itself, as I have said, to a large extent in a position of advantage against the said rings and combines.

We feel so sure that you are able to appreciate the true state of the case that, without further remark, I will now propose the resolution that we have met to-day to consider and to confirm, if you agree with us, namely, "That the resolution for altering the articles of association passed at the general meeting held on May 29 last, be, and the same is hereby, confirmed as a special resolution."

Mr. C. Greenaway seconded the resolution.

Mr. Garnet-Mann asked whether the company now became a State-controlled concern.

The Chairman: No, sir. The State has appointed two directors on the board of this company with special powers of veto in certain directions, but those directions are purely affairs of State, such as complications with foreign Powers or the exploitation of new territories. With regard to general control, the commercial part of the company remains entirely in the hands of the present directors with the State directors as advisers.

The resolution was unanimously carried, and the proceedings then terminated.

LAND BANK OF EGYPT.

The report of the directors of the Land Bank of Egypt, presented at the meeting held on May 12, states that during the year 184 mortgage loans were granted, for an aggregate amount of £E638,864. The total amount of loans outstanding at the same date amounted to £E3,736,143. This figure would have been higher were it not that the Land Bank, in common with other Egyptian companies, suffered from the financial stringency on the European markets, and the resulting restricted credit. No public issue of debentures was possible under advantageous conditions during the year, and the directors had to exercise extreme caution in the matter of loans, being frequently compelled to reject interesting proposals. To meet the requirements of its best clients, however, the company made a special issue of debentures, which figures in the balance-sheet under the headings, "Obligations 4eme Série" and "Crédit amortissable à longue terme." Of this advance there remains a sum of £E50,000 still available. The state of the money market had naturally its effect on the company's sales of land. At the present time the company's property consists of two urban estates, representing £E18,000, and twenty-two rural estates, representing £E125,000. Repayments during the year continued to be satisfactory, amounting in all to £E405,000. The amount of arrears, which stood at £E265,000 at March 31, 1913, was reduced to £E211,000 at October 31. The balance outstanding at March 31, namely, £E269,631.580, is practically the same as last year. In spite of various unfavourable circumstances, there was a balance available for distribution of £E127,735, showing an increase of £E3,100. A dividend of 8s. has been declared on the ordinary shares, and of £2 10s. on the founders' shares, the sum of £E2,229 being carried forward to the next balance-sheet.

BALANCE SHEET as at March 31, 1914.

Wed., July 8	Thurs., July 9	Fri., July 10

LONDON, June 18.

The stock markets are distinctly better in tone. Very few people in London take any notice of the Greek and Turkish trouble, and still less appear to be interested in Albania. The successful début made by the new French Ministry has given a fillip to the markets. It was sadly needed. There are no buyers about, but some of the bears have repurchased. That is as high as anyone can put it. The new issues are going very badly indeed. The Canadian loan and the Russian Railway loan were complete failures. The Investment Registry has been asking for money for a shipping company, which appears to be a relief fund for Brazil Traction. The City of Perm wants a small sum, and the Port of London offers a million 4 per cent. stock at 96. This is a good security. The Indian Government asked for tenders for 500 lakhs of rupees. It will be interesting to see how this goes.

Money Plentiful.

Money is very plentiful. Paris is obtaining all the gold she needs from New York, and the African gold is therefore available for our own Bank of England. Rates continue low, and are not likely to go up, for the end of the half-year settlement presents no difficulties either in London or in Berlin. Everything has been arranged for.

Internationals Firmer.

The Foreign market is firmer, and a small rise seems probable. The French loan should be out shortly, and if it is a great success, as seems probable, this will increase confidence all round. Bulgarian 4½ per cent. are 82. Egyptian Unified continue a steady market. A good deal of business has been done at 99¼, whilst Egyptian preferred have been done at 88, and the inscribed at 83. Greeks have all weakened, and the Fours are down as low as 51½. Turkish continue steady at 82, in spite of the fact that some people consider a war to be certain.

Rails Harder.

The Home Railway market is a shade harder. Great Western continues to add to its traffic increases and there seems little doubt that it will be able to maintain last year's dividend. Great Eastern also look attractive at their present very low price, but there are no buyers anywhere. The American market is dull. None of the railways are doing well, and in spite of immense economies a good many of the roads will be unable to maintain their dividends.

Rubber and Oil.

The Rubber market remains hard at 2s. 4½d., but future deliveries are being offered at 2s. The Lankat report was excellent; 17½ per cent. dividend is paid and the crop for the current year seems to guarantee at least a maintenance of the dividend. Oil shares have shown very little signs of life.

The collapse in Spies seems to have knocked the bottom out of the Oil market. The Egyptian settlement went off quite easily. All those who desired to borrow money on their shares found no difficulty, but in spite of this the price has weakened, and is now only a shade over par. The output for the week is quite good, but speculation has entirely died out.

Mines Idle.

Mining shares are hardly mentioned. Paris has been picking up a few Kaffirs. Russians have been fairly active. There has been a certain amount of buying both of Russo-Asiatics and Tanalyks, but Russian Mining remain at 1½.

Egyptians Dull.

In the Egyptian market business has been quite as dull as in any other section of the House. National Banks have been dealt in at 14¼. Agricultural Banks have been rather weak: business has been registered at 4 25-32. The Deferred have also been purchased at 260. Land Banks have been bought by Paris, and the price is 6⅜. The deferred are nominally 40. The company's balance sheet appears on another page. Bank of Abyssinia are 5s. A small business has been done in Delta Light Railway preferreds at 8½. There have been some inquiries for Delta Lands, the bulk of the trade having been done at 8s. 3d. Beheras have been dull at 8⅞, and the preference remain at 4½. Union Foncière are called 22s. 6d. Alexandria Water are now 12½ ex dividend. Aboukir Lands are a shade harder at 21s. 6d. United Lands have hardly been mentioned. The price remains at 1s. 9d. Sidi Salem are 5s., and Trusts are also 5s. Salt and Sodas have been dealt in at 14s. 9d. There is very little business in New Egyptians, which remain at 10s. 3d. Markets are 23s. Khedivial Mail preferreds are called 3¾, and the ordinary 10s. Daira Sanieh remain at 3s. nominal. Altogether it has been a dull week in the Egyptian market.

COMPANY NOTES.

Anglo-Roumanian Petroleum.

The report of the Anglo-Roumanian Petroleum Company, Limited, to be submitted to the meeting on the 23rd inst., states that the gross profit for the year to December 31 amounted to £26,046, and, deducting the expenses payable in London, there remains £22,670. After making the usual allowances for depreciation, providing £915 for debenture interest, and writing off the balance of preliminary expenses account, £4,875, the net profit for the year amounts to £11,243, which sum, with the balance of £8,729 brought forward, makes a total of £19,973 standing to the credit of profit and loss account. Of this amount the board propose to place £8,500 to reserve account, to pay a dividend of 5 per cent., which will absorb £7,500, and to carry forward £3,973. Owing to the satisfactory financial position of the company, the directors found it unnecessary to call up the debentures in full. The production of crude oil for the year under review was 12,973 tons, which is slightly in excess of that for 1912. The Balkan war greatly interfered with the company's work, and the development programme was entirely suspended for a considerable time in consequence of the shortage of labour and complete lack of transport facilities, owing to the Roumanian mobilisation. The policy of the board, in deciding to drill to the deeper oil source in Bordeni, has been amply justified. Well No. 28 came into production in October last at 408 metres, and to May 31 has given over 7,400 tons from this source. Wells Nos. 17 and 24 are also down to the same oil source, and have commenced to produce. The well at Gropi is now at 470 metres, but drilling has been delayed owing to a casing accident. This, however, should shortly be overcome, and deepening resumed. In the Runcu district, well No. 1 has reached a depth of 202 metres. The market prices for crude oil during the year kept very firm, with consequent benefit to the company.

Commercial and Agency of Egypt.

In the Chancery Division on Tuesday Mr. Justice Astbury confirmed the reduction of capital of the the Commercial and Agency Company of Egypt, Limited, by writing off capital lost or unrepresented by available assets. Mr. Gordon Browne, for the company, said the loss consisted entirely of a debit balance on the profit and loss account. The company had been carried on unsuccessfully for a considerable time, and now there had been a change of management, and the company wanted to write off the old loss. The company was formed in 1908, and its capital was £75,000, in 75,000 £1 shares. The shareholders, who were all resident in Egypt, had consented to the reduction. The evidence of the chairman of the company showed that the business of the company had, since January 1, 1908, been carried on at a loss, and the debit balance as at June 30, 1913, amounted to £28,250.

ALEXANDRIA NOTES.

(FROM OUR OWN CORRESPONDENT.)

ALEXANDRIA, June 12.

Share Market.

The holidays (fêtes de Pentecôte) have taken up two days of the week under review, which has otherwise been like its predecessors, with very little business doing. The cotton campaign being practically over, a lot of money has found its way back here from the interior. But this easing off has not reacted on our share market, owing to the apathy of the London and Paris markets and the indifference displayed by our speculators and capitalists. However, a marked looking up in Agricultural Bank shares has to be recorded, several thousand having changed hands. A strong demand for Credit Foncier Egyptien is also reported.

Union Fonciere d'Egypte.

The Bank of Athens has just handed over to this company some 2,800 feddans at Segaieh and El Warak (Gharbia) to be managed by them and sold to the fellaheen on easy terms of payment. These 2,800 feddans originally belonged to Mr. E. Karam and have been improved by the Bank of Athens. But as agricultural enterprise does not enter into the list of a bank's proper functions the management of these lands has been made over to the Union Foncière, which will receive a share of the profits.

Credit Hypothecaire Agricole et Urbain d'Egypte.

This company has ceased to make advances on mortgage, and is liquidating its old business. The Banque de Reports de Fonds Publics et de Dépôts, of Antwerp, has acquired the 11,200 debentures (500 francs each) issued by the Credit Hypothecaire.

Crown Brewery of Alexandria.

In consideration of its amalgamation with the Anglo-Egyptian Ice Co., the Crown Brewery has raised its capital to 1,500,000 francs, in 15,000 shares of 100 francs each. Although the sales of beer in 1913 amounted to 25,195 hectolitres—practically just the same figure as that for the previous year (25,159 hectolitres)—the profits only amounted to £E5,810, or £1,000 less. This decrease is due to the reduction in price that had to be made to compete with a rivalry as active as it was thoughtless. The company has thus been enabled to keep its good clients and to secure new ones. For the current year the company can already reckon on an increase of sales, which will compensate it for the sacrifices it has had to make in order to hold its own. In spite of the reduction in profits, the company has written off £E2,080, and has distributed a dividend of 8 francs on the capital shares and of 3 francs on the jouissance shares.

Societe des Presses Libres.

Mr. E. Piha having resigned his seat on the board of directors of this company, Mr. C. D. Strologo has been elected to replace him.

Societe d'Irrigation de Baliana.

By reason of the low Nile, the company has been able to irrigate more than 9,000 feddans in Upper Egypt, which has led to an unprecedented profit. The profits amount to £E28,427, an increase of £E13,778 on the preceding year. The company after providing for large amortisations is paying a dividend of 10 per cent.

New Companies.

Under the style of Wilhelm Vrapp, and with a capital of £E5,000, a company has been established for the purpose of carrying on business as exporters. Another new company is C. Chaniolis et frères, which has its headquarters in Alexandria, and will carry on business as dealers in Colonial produce. The properties of the firm of Georges Loutfallah Sursack, of Alexandria and Tantah, are to be sold by auction by order of the Mixed Tribunal of Alexandria.

THE ALEXANDRIA WATER COMPANY, LTD.

PAYMENT OF DIVIDEND.

Notice is hereby given that a DIVIDEND of EIGHT SHILLINGS and NINE PENCE per £5 Share on Coupon No. 51 is PAYABLE on and after June 15th, 1914, at Messrs. Barclay and Company, Ltd., 1, Pall-Mall East, London, S.W., and 54, Lombard Street, London, E.C., or at the Anglo-Egyptian Bank, Ltd. Alexandria, Egypt.

By order of the Board,
H. R. C. BRAGDEN,
Alexandria, Egypt, 30th May, 1914. Manager.

Digitized by Google

COMPANY RESULTS, &c.

ALEXANDRIA WATER.—Coupon No. 51 is payable from June 15 at Barclay and Co., 1, Pall Mall East, S.W., and 54, Lombard Street, E.C.

ANGLO-EGYPTIAN OILFIELDS.—Production of oil at Gemsah for week, 2,755 tons (last week 3,511 tons), and at Hurgada 134 tons (last week 194 tons).

ANGLO-OTTOMAN TOBACCO.—The directors have declared a dividend of 15 per cent. per annum, less tax, on the Six per Cent. Cumulative Preference and Participating shares, and a dividend of 22 per cent. per annum, less tax, on the Ordinary shares for the year ended March 31 last.

ANGLO-ROUMANIAN PETROLEUM.—The board have decided to recommend a dividend of 5 per cent. for the year 1913. The transfer books of the company are closed from the 15th to 23rd inst., both days inclusive, for the preparation of dividend warrants, payable 24th inst.

BANQUE DE CREDIT, SOFIA.—The dividend is 5 per cent., as for preceding period. A branch is shortly to be opened at Bourgas, Black Sea.

CONCORDIA, BUCHAREST.—The net profit for 1913 amounted to 668,812 lei, as compared with 667,283 lei in 1912. The dividend is 5 per cent., as for the former year.

EGYPTIAN DELTA LIGHT RAILWAYS.—Receipts for eleven days ended May 31 amounted to £E7,097, a decrease of £E471 over the corresponding period of last year.

EGYPTIAN SALT AND SODA.—First Mortgage Debenture Coupon No. 24, due June 30, will be paid on and after that date by the National Bank of Egypt, 3 and 4, Lothbury, E.C.

COOK'S NILE STEAMERS AND DAHABEAHS.

THOS. COOK & SON have unequalled facilities for Travellers visiting Egypt, now the premier Winter Resort of the World. Their fleet of **Fourteen Large Passenger Steamers** consists of the finest vessels on the Nile, specially built, luxuriously appointed throughout, and fitted with every modern convenience.

TOURIST SERVICE.—These large and handsomely-fitted Steel Steamers sail once a week from **Cairo** to **Assuan**, and twice a week from **Assiut** to **Assuan**, the sailings from **Cairo** beginning in November, and from **Assiut** in January.

EXPRESS SERVICE.—The Express Steamers also leave **Cairo** twice a week, the Friday departures commencing in November, and the Monday departures in December.

There is thus a Service of **Five Cook's Steamers per week** ascending the Nile to the **First Cataract** during the Season—three from **Cairo** and two from **Assiut**—calling at all points of interest on the Nile, in connection with which complete arrangements for sightseeing and excursions are made, enabling Travellers to visit, to the best advantage, all the famous

PYRAMIDS, TEMPLES, TOMBS, RUINED CITIES, etc.

SECOND CATARACT SERVICE.—In connection with the above Services there is also a Service twice weekly by First-class Steamer from the **First** to the **Second Cataract**, with through bookings to **Khartoum, the Sudan, and Uganda.**

PRIVATE STEAMERS AND DAHABEAHS. — **Thos. Cook & Son** have several small Steamers for charter at moderate rates, specially adapted to the requirements of Families, Private Parties, Sporting Parties, etc., accommodating from eight to sixteen passengers, with competent crews, and thoroughly equipped. Also a large Fleet of First-class Sailing Dahabeahs, the best on the Nile.

NOTES OF THE WEEK.

The lapse of a week has brought no actual aggravation of the tension between Greece and Turkey. But while delay removes the danger of a sudden explosion under the influence of the reports of the persecutions in Asia Minor, the situation has undergone no radical improvement. It is probable that the Porte is not a whit more anxious than the Greek Government to be committed to further hostilities; but there are forces at work which the Cabinet in Constantinople does not seem able to control. The persecutions suffered by the Greeks in Asia Minor recall the process of "Ottomanization" which the Young Turks introduced with such confidence a few years ago in their European provinces. That policy was the immediate cause of the first Balkan War, and led to the elimination of Ottoman power from Macedonia. The Young Turks, unable to profit by experience, appear to have transferred with a perfectly light heart their Macedonian policy to Asia Minor. The process of "Ottomanization," however, developed in a different and unexpected manner. Instead of offering the stubborn resistance that the people of Macedonia had offered, the Greeks of Asia Minor fled at the first sign of trouble, abandoning their property or selling it at panic prices. The success of the policy was entirely to the liking of the local Turks, who carried their advantage to extremes. The system rapidly degenerated into wholesale persecution, and the Porte was compelled to intervene. With what results it is too early to decide; for, unfortunately, it is possible that the oppression in Asia Minor should cease, the Porte even offer amends and the Greek Government profess satisfaction, without any real improvement taking place in Greco-Turkish relations. For what the Turkish Cabinet does to-day, the Young Turks may undo to-morrow, and each fresh application of the goad to the racial antagonism between the two countries brings an open breach appreciably nearer.

The Porte's reply to the Greek Note of June 12 was received in Athens on June 18. It was at best a temporizing document, couched in terms which, while not provocative, were calculated to give no satisfaction to Greece. The Turk's case is that the unfortunate incidents in Asia Minor were caused by the forced emigration of 200,000 destitute Mussulmans from Macedonia; but they claim to have put an end to the persecution of Greeks. The Note concluded by expressing the hope that nothing further would occur to disturb tranquillity in Asia Minor, and that the Greek Government for its part would take effective measures to assure peace in Macedonia so that the good relations between the two States might not be affected. Before the Greek Government had time to decide that such a reply was unsatisfactory to the point of exasperation the Porte presented a supplementary Note, which dealt with the Greek demand for an indemnity and the reinstatement of Greek emigrants. It proposed an exchange of properties between the Turkish emigrants from Greek Macedonia and the Greek refugees from Asia Minor. Although the Greek reply to this suggestion is not expected to be delivered for a few days, it is believed that the Government will accept the proposal on the condition that the exchange shall be effected voluntarily by the refugees concerned and not under compulsion. Other steps taken by Turkey display a conciliatory attitude. The Greek Government has been assured that the authorities in the districts where the excesses occurred will be punished and the culprits brought to book. At the same time the foreign Embassies in Constantinople have been invited to attach representatives to the suite of Talaat Bey in order to satisfy themselves as to the sincerity of the measures taken to restore order.

Greco-Turkish relations have a long way to travel before the situation in the Near East assumes a satisfactory aspect. The ostensibly correct attitude adopted by the two Governments towards one another since the Peace of Athens has found no response among the two peoples, and the recent events in Asia Minor have emphasized the makeshift nature of that treaty. In Turkey the desire to try conclusions with Greece single-handed has never been abandoned outside Government circles, with the result that in Greece the conviction is gaining ground that a fresh trial of strength is necessary before normal relations between the two countries can be established. The danger of the present crisis lies in the fact that Greece may decide that a better *casus belli* than the Turkish persecutions of Greeks in Asia Minor may be hard to find. An important factor is the relative strength of the two navies. With the prospect of notable additions being made to the Turkish fleet in the immediate future, Greece's case for not postponing action was strong. But now that the United States have agreed to the sale of the two battleships "Idaho" and "Mississippi" to Greece the balance of power has

Digitized by Google

been restored largely, if not altogether, in Greece's favour, and the necessity for immediate action against Turkey is removed. There remains, however, the question of the islands of Chios and Mytilene. Statesmanship would prompt Turkey to "cut her losses" and to settle down to the development of the resources still at her command. If the future reveals an opportunity of recovering some of the lost ground, the Empire will be in a better position to maintain and consolidate any territory then gained. The utmost that the Porte seems able to do now is to keep open the old sores and to penalise Turkey's future without the least prospect of being able to strengthen her present position. Both Governments will be well advised to work hard to discover a *modus vivendi*. The establishment of cordial relations cannot be looked for, but the two countries might be brought to believe in a policy of "live and let live" as being to the interest of each.

An interesting episode during the past week has been the notification addressed to the Porte that Servia would be unable to remain on friendly terms with Turkey in the event of a Greco-Turkish conflict. Inasmuch as hostilities would almost certainly be confined to naval operations, Servian support for Greece would be more moral than practical, and the message need not have impressed the Porte overmuch. On the other hand, it reveals the scope of the alliance between Servia and Greece and establishes a factor of importance in the general situation in the Near East.

The situation in Albania defies analysis, because it is not known what degree of trustworthiness attaches to the different reports that emanate from that country. After the defeat of the insurgents who attacked Durazzo last week negotiations were opened with them by a Moslem deputation from the town. The insurgents are stated to have demanded exemption from military service and taxes for ten years as the price of their recognition of Prince William and the Albanian flag. In any case they required a three days' truce to discuss the subject with their friends. A two days' truce was granted, and, in spite of an exchange of firing which lasted for half an hour, has been prolonged. Hope does not seem to have been abandoned in Durazzo that the insurgents will ultimately submit to Prince William. It is reported that the Kaimakan of Shiak, who was wounded and captured by the loyal forces, is endeavouring to induce his followers to the number of 1,500 to make their submission. He is also responsible for the statement that the insurgents only number 5,500, while nearly half of them, including many Christians, have joined under compulsion. If this should prove to be the case the immediate outlook for the beleaguered capital would be brighter. But within the walls of Durazzo intrigue and conspiracy appear to be rife, and Prince William must be sometimes at a loss to know whom he can trust and where he can look next for practical support. Unless the siege is quickly raised, it is feared that an epidemic may break out in the town owing to the shortage of water and the defective sanitary conditions.

In the meantime the news from other parts of Albania is of the gloomiest. All the three forces which were supposed to be converging on the small rebel force outside Durazzo appear to have been defeated in the course of their advance. The last to fail was Prenk Bib Doda, who had been reported as being within four hours of Durazzo, and whose advance had been carried out so thoroughly that the insurgents had protested against the wholesale destruction in which he was said to be indulging. Prenk Bib Doda was taken prisoner, but released on parole by the insurgents, who have captured Elbasan and are marching on Valona. If Prince William could rely upon any force, or even if the insurgents themselves could lay claim to organization and a definite purpose, the situation in Albania would not seem so hopeless. But while the so-called Albanian Government remains shut up in the capital, the rest of the country seems given over to marauding bands, acting on no concerted plan beyond that of attacking everything they come across. Every day must increase the regret felt that Great Britain, having lent her name to the creation of the new Albanian State and the appointment of Prince William as Mpret, is content to remain an impassive spectator both of Italian and Austro-Hungarian intrigue and of the Albanian Government's helplessness.

King Peter of Servia, whose health has been far from satisfactory for some time, has found it necessary to hand over the reins of Government to the Crown Prince Alexander while undergoing a course of treatment for his illness. The proclamation announcing this decision limits the delegation of the Royal power to the period of the King's ill-health. Owing to this proviso, it is hoped that the question of the succession will not be raised. The Balkan correspondent of *The Times* points out that Prince George, King Peter's elder son, who resigned his rights to the throne in 1908, has a considerable following in the army, and that a formal abdication on the part of his Servian Majesty at this juncture might well lead to a collision between rival military factions.

The negotiations for a Bulgarian loan are understood to be nearing a successful conclusion. A director of the Disconto-Gesellschaft has reached Sofia with the contract for the loan, which will be submitted to the Minister of Finance and to the Cabinet. At the eleventh hour fresh loan proposals from French and Anglo-French sources have been made to the Bulgarian Government, but although the terms would be more gratifying to Bulgarian *amour propre*, it is supposed that both offers will be regarded as having arrived too late for the Government's consideration.

For the moment interest in the British Government's acquisition of shares in the Anglo-Persian Oil Company centres mainly in the business aspect of the transaction from the British point of view. The announcement that Chiasurkh, the site of one of the two proved oilfields of the company, has been allotted to Turkey by the Boundary Commission introduces a possible complication for the company and the Government's interests, but does not affect the question as far as the Persian Government is concerned. While Persia stands to gain from the development of her resources, the Government must be anxious to obtain the assurance that this extension or intensification of British interests in the neutral sphere will not provoke reprisals by Russia at Persia's expense. We could have wished that the reconsideration of the terms of the Anglo-Russian Convention of 1907, on the lines already indicated in these columns, had preceded the notification of the Government's arrangement with the Anglo-Persian Oil Company. We have good reason for securing recognition of our interests in the neutral zone, but our obligations to Persia require that we should not give Russia an excuse for any further tightening of her hold on that country, the territorial integrity of which she is pledged to respect. Already, according to an estimate of the Persian Treasury, one-third of the land and resources of the province of Azerbaijan has passed under Russian control. The establishment of a Court of Appeal at Urumiah, with the Russian Consul as a member, is another indication that Russia requires but little incentive to abandon the fiction that her actions in Persia are inspired by a desire to promote Persian interests. If she can persuade herself that Great Britain has entered upon a policy of helping herself in Persia, we may expect very rapid developments in Azerbaijan.

CONSTANTINOPLE LETTER.

(From Our Own Correspondent.)

Constantinople, June 20.

The Ægean Crisis.

At this critical moment in the history of the relations between Greece and Turkey it may be well to sum up the attitude taken by the respective Governments of these countries, in their recent correspondence, in the form of a dialogue between Kyrios Miltiades and Mehmed Effendi, and to let the readers of The Near East form their opinion as to the merits and demerits of the arguments employed by each.

A Dialogue of Discord.

Kyrios Miltiades: The Hellenic Government has taken the step of calling the attention of the Sublime Porte to the lamentable condition of the Greek population in Turkey which is suffering from every imaginable species of persecution (here several lines of rhetoric may be omitted) not because it desires to interfere in the internal affairs of another state, but because the influx of poverty stricken Greek emigrants from Turkey imposes a severe burden upon our finances. 100,000 fugitives cannot be housed, fed, and provided for without serious expenditure, and if this anti-Greek movement continues we shall soon have 200,000 on our hands. We cannot indefinitely bear this strain; moreover, we have certain violations of the Treaty of Athens to complain of, and must demand compensation on behalf of certain Hellenic subjects who have suffered from violence or from pillage.

Mehmed Effendi: I am ready to reply to your arguments, on the assumption, of course, that you do not wish to interfere in our internal affairs, and I would first begin by reminding you that 250,000 martyrised Moslems (here follows more rhetoric which may be omitted) have entered Turkey from Macedonia in the last six months. During the process of planting these unfortunate people on the soil, there have certainly been incidents of a disagreeable nature which the Imperial Government is the first to regret, and I doubt not that, though stories of the sufferings of the Greeks in Turkey have been much exaggerated, certain cases of injustice or violence have occurred. Our distinguished Minister of Interior may be trusted to make a speedy end of the anti-Greek movement in Anatolia as he has done in Thrace. Had these 250,000 Moslems remained in your country there would have been no trouble with our Greeks.

Kyrios Miltiades: Let me point out, Effendim, that we have statistics to prove that of these Moslems a minority only have left Greek territory. Let me also point out that in your treaties with Greece and Servia you successfully urged that Moslems resident in the conquered territories should have three years in which to choose between remaining as Greek or Servian subjects and leaving their old homes and settling in Turkey as Ottoman subjects. This was granted, and many of these martyrs are simply exercising their right of option. Again, what of Bosnia? Though under a just and clement Government, many thousands of perhaps foolish Moslems have been emigrating to Turkey in the past few years because they prefer possible poverty under the Crescent to opulence under the Cross. In their case the martyrdom is self-inflicted. Again, what of your "recruiting agents" who are trying to attract Moslem immigrants?

Mehmed Effendi: Your recruiting agents have also been active enough. And even if I grant what you say to be partly true, I cannot believe that so many Moslems would have left your country in so short a time had they been happy there. I will not discuss all the stories the newspapers tell, but there is no smoke without fire.

Kyrios Miltiades: Well, I agree if that is to apply to the Greek emigration from Turkey. Fishermen, casual labourers, and the like leave their homes for small cause, but when Greek farmers and men of substance go, leaving all their property behind, I am inclined to doubt the voluntary nature of their exodus. And what of the violations of the Treaty?

Mehmed Effendi: If there have been violations, remember that your people in Turkey do not always show the tact and good taste that should mark the conduct of residents in a strange country, and that our subordinate officials are, after all, human.

Kyrios Miltiades: Yes, but to bring Hellenic subjects before the court-martial and inflict heavy sentences on them after trial and in camerâ and without counsel is abominable; moreover, your Press and your politicians by their constant abuse of the Hellene and their threats as regards Macedonia and the islands do not render my hot-blooded compatriots any more inclined to be tactful and obliging.

Mehmed Effendi: What about your Pan-Hellenic propagandists? Are they not active enough in working on the sentiment of our Greeks, in persuading the latter to subscribe for naval armaments that may be used against us, in promoting desertion, even in influencing the Patriarchate itself? And to return to the question of emigration: we found, to put it plainly, that the Greeks were not a trustworthy element. Who can blame us? Who can accuse us of cruelty if we decide, as we have decided, to colonise certain strategical areas in Thrace and Anatolia with Moslems on whom we can rely? Can you, who are ousting the Bulgars as fast as you can, reproach us with taking similar precautions?

Bulgaria the Buffer.

As neither the European Concert, nor Roumania, nor the two most interested States have yet found a formula which will settle the question of the islands in a manner calculated to avert future crises similar to that through which Turkey is now passing, it will be wise to leave Miltiades and Mehmed to find it out for themselves, and perhaps—if they succeed in squaring the circle—to acquaint the readers of The Near East with their discovery. Meanwhile the situation, though slightly improved in the last twenty-four hours, is very unsatisfactory. The Servian warning that she will side with Greece is all to the good, as it prevents the Turkish extremists from entertaining ideas of an invasion of Macedonia with Bulgarian aid. The Bulgars, moreover, seem indisposed to move, and will oppose any attempt to enter Western Thrace on the part of either belligerent should war break out; and, failing an attempt to pass into Thrace or Macedonia, as the case may be, by the coast road that links Drama and Dedeagatch, it is very hard to see how either of the combatants could possibly reach the other on land, while on sea the Turks seem condemned to the defensive. This being so, it is hard to believe that extremist Turks who long for an occasion of expelling the Greek element from the Ottoman Empire and Greek extremists who have the Pan-Hellenic propaganda on the brain and long to attack Turkey before the Dreadnoughts arrive will be permitted by moderate statesmen on each side to bring about a ruinous and stupid war, in which Moslems in Macedonia and Greeks in Anatolia will suffer terribly and Hellene and Turk will merely race one another in the National Bankruptcy Stakes.

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Cairo, June 18.

The Senussi Mission.

The visit of Es Seyyid Idris es Senussi, the cousin of the Grand Sheikh, which has aroused some comment in certain circles, came to an end on Sunday, when the Khedive's guest proceeded by special train from Alexandria to Port Said, where he embarked for Haifa en route for Medina. Es Seyyid Idris is, therefore, carrying out what was said to be the object of his journey from Tripoli—a pilgrimage to the tomb of the Prophet. Nevertheless, well-informed native circles affirm that he is also entrusted with a political mission, and that he will eventually pay a visit to Constantinople. It is believed that pourparlers between Italy and the Senussi have reached an advanced stage, and that a final agreement will be arrived at whereby the Grand Sheikh will be accorded complete autonomy within his present sphere of influence, with full liberty to levy taxes, subject to the payment of an annual tribute, and with freedom to trade except in arms, ammunition, and slaves. In other words, the Senussi will acquire towards Italy in Tripoli a position similar to that accorded by the Sudan Government to Ali Dinar, the powerful Sultan of Darfur, with this slight difference, that the Grand Sheikh is to be given the title of Governor-General, with a handsome allowance from Rome. It is also affirmed that Es Seyyid Idris's mission includes that of persuading the Sultan to withdraw his religious representative from Tripoli and appoint the Grand Sheikh to that post. From what can be gathered, the Porte is not averse from this proposition, though assistance is still being afforded the Senussi secretly from Stamboul. A war with Greece would for obvious reasons, however, prompt the Ottoman Government to delay as much as possible its approval to any arrangement that would place Italy in fuller possession of the conquered province. Italy on its side is prepared to make the fullest concessions, no matter what the cost may be, as she is convinced of the great advantages that will eventually accrue to her from every standpoint, if she can only get this powerful sect under her control, so to speak.

Influence of Es Seyyid Idris.

Various facts have led observant and well-informed natives to come to the conclusion that Es Seyyid Idris is combining political business with the pleasure of fulfilling his religious duties. He is admittedly the only member of the Senussi family who is friendly with the present Grand Sheikh. As the son of the latter's saintly and celebrated uncle, he is much revered, and by those who have had close dealings with the sect, it is alleged that he enjoys even greater prestige than his august cousin. To whom, then, could the Grand Sheikh entrust such a mission with greater confidence and with less fear of recriminations from his adherents than to Es Seyyid Idris, whose association with any settlement would commend it to the tribes concerned? Moreover, substantial confirmation of the statements that local efforts were being made to bring about an arrangement between Italy and the Senussi has been afforded by the circumstances surrounding Es Seyyid Idris's arrival, departure, and sojourn, and by the fact that *El Moayed*, the vernacular organ which has been most outspoken in its antagonism to Italy and all things Italian ever since the outbreak of the Tripolitan War, has suddenly veered round, and has published a series of articles that are certainly eloquent of what is going on behind the scenes. These features, as also the coincidence of the occurrence of other incidents, lead one to give credence to the native theory. The change in attitude of *El Moayed* is of itself highly interesting, and the near future will show whether the deductions made are correct or whether other no less important factors are at work.

The Legislative Assembly.

The Legislative Assembly cannot be accused of slackness after its labours of this week. In its four sittings it has disposed of most of the work that lay before it. First of all, the Bill creating higher commercial schools was dealt with, and, with one or two amendments, accepted by the Minister of Education, was passed. Next the Assembly approved of the Bill laying down the manner in which the cotton-sticks and immature bolls are to be treated, so as to hinder the propagation of the pink boll-worm, which threatens to do such damage to the cotton crop. The delegates, most of whom are themselves landowners, raised no opposition whatever to this measure. This business was disposed of in one sitting.

The Agricultural Syndicate Bill, which, contrary to expectation, was not postponed until next session, took up the other three sittings. As was anticipated, the Bill gave rise to a very interesting and at times heated discussion, which centred round the clauses regulating the creation and dissolution of the syndicates, the liability of members of syndicates, and the manner in which loans may be contracted. The Assembly, by thirty to twenty-one, voted that the consent of the Ministry of Finance to the creation of a syndicate was unnecessary. The question of the liability of members gave Saad Pasha Zaghlul an opportunity to attack the Five Feddan Law, and on the point of making members owning five feddans or less equally liable with their large land-owning fellows for the engagements contracted by their syndicate, to which the Government objected, the Assembly expressed its approval by thirty-two votes against sixteen. Thanks to the brilliant defence made by the Minister of Agriculture, who was supported by the Prime Minister, the Government won all the other points in dispute, including that of the dissolution of syndicates. The committee led by Saad Pasha wished this faculty to be left to the law courts, and the elected Vice-President made a most eloquent speech on the question, but the House approved by a majority of seven the proposition submitted by Hussein Pasha Wassif, the newly elected member for Boulak, giving the Council of Ministers power to dissolve any syndicate which concerns itself with politics. Substantially this is what the Government had proposed in its project.

It is interesting to note that the President was unable to attend the above-mentioned four sittings owing to the illness of Mme. Mayloum, who is in Alexandria. His place was taken by Said Pasha Zulfikar, the nominated—and consequently the senior—Vice-President. The recent debate on the vexed question of the Acting-Presidency, albeit it gave rise to such regrettable incidents, has therefore had its justification at this early date, though it is permissible to assume that if the point had not been decided, Mayloum Pasha would have sacrificed his personal feelings to his duty, as it would never have done for a debate of this nature to have taken place at such a juncture.

The Ottoman Commissariat.

The fact that the Government is about to undertake at its expense certain repairs to the house occupied by the Ottoman Commissariat has prompted *El Watan* to ask what is the good of there being an Ottoman High Commissioner in Egypt, and to make some very pointed remarks as to the rôle played by the Commissariat in the political affairs of this country. The Coptic organ is quite justified in what it says. The Ottoman High Commissioner has absolutely no status in this country, and is not recognized officially as the representative of the Porte. As Lord Milner says, the post is an anomaly. In the past the Ottoman Commissariat has been the connecting link for the intrigues that were carried on between the Porte and the Cairo malcontents, and has at times acted as the fan which has kept aflame the fire of Nationalism. There is every reason to regard it as equally dangerous to-day, and the abolition of this anomalous post would assuredly remove a factor which has a disturbing effect and is a source of much annoyance and trouble to many peace-loving natives.

PORT SAID NOTES.

(From Our Own Correspondent.)

Port Said, June 15.

A proposal has recently been submitted to the Port Said municipality by one of our leading merchants for the erection, at his expense, of a theatre and aquarium on the site of the Municipal Gardens, near the Casino Palace Hotel. Under the proposed scheme the ground would be leased for a long term of years. The theatre would come under the control of the lessee, and the aquarium would be stocked and maintained by the municipality, who would share profits with their tenant.

There is much to be said in favour of the proposal, as by its successful achievement a pressing need of the town would be satisfied. Our only source of diversion at present, other than private entertainments, is the cinema theatres, of which we have three, located in stuffy, ramshackle buildings of ancient design. Occasional travelling theatrical companies stay for a few nights *en passant*, but most have, unfortunately, met with a very small measure of success, owing chiefly to the unsuitable nature of the buildings, the lighting, ventilation, and acoustic properties of which leave much to be desired.

The scheme, however, has met with considerable opposition in various quarters, the main point at issue being the site chosen for the theatre. It is generally felt by all classes of the community that to surrender the Municipal Gardens, practically the only open cultivated spot in the town, would constitute a sacrifice few are willing to contemplate. Moreover, the municipality would, under the proposed measure, be saddled with the cost of upkeep of the buildings—not a small charge on its slender resources. It is considered that, although the ultimate accomplishment of the project would in many ways confer considerable benefit on the inhabitants of the town, another locality might be chosen from among the many vacant sites at the council's disposal.

It is to be hoped that the proposal will not be allowed, by conflict of opinion on this point, to fall through, as our growing population is greatly in need of a healthy means of diversion for its leisure evenings, and the town would be rendered still more attractive to the summer visitor.

LETTER FROM SMYRNA.

(From Our Own Correspondent.)

Smyrna, June 16.

Talaat Bey's Visit.

Talaat Bey, Minister of the Interior, has arrived in Smyrna to try and improve the serious situation caused by the boycott and anti-Greek movements. He is probably the only man in the Turkish Government who can do anything in this direction, and it is hoped that his visit will have good results.

Talaat Bey's presence was urgently required. At Edremid, Aivali, Soma, Chesmé, Vourla, and at all the villages in the vilayet, the Greeks were living in a constant state of anxiety. Thousands of Greeks had packed up a few of their belongings and crossed over to Mytilene, Chios, and Samos, and many more were waiting for steamers and sailing ships to take them away.

It is well known that Talaat Bey is strongly opposed to the chauvinistic policy of Enver Pasha, Djemal Pasha (Minister of Marine), and Rahmi Bey (Vali of Smyrna), and his visit is said to have had a beneficial effect and to have caused many of the intending emigrants to return to their homes. From Dikili Talaat Bey telegraphed to Constantinople that he had found 3,000 Greeks waiting to embark, but on his personal assurance that full security would be afforded them they returned to their villages. At Vourla and Chesmé, however, matters are even worse, and all business is at a standstill.

To an outsider it is impossible to understand what Turkey hopes to gain by carrying on this extreme campaign of boycott and persecution. The Turkish papers assert that the Greeks are carrying on a similar campaign in Macedonia, and certainly thousands of Moslems are coming over to Turkey-in-Asia from Salonika, but the Turkish Ambassador in Athens, on his recent tour through Greek Macedonia, does not seem to have been unfavourably impressed by Greek methods there. Even if the Greeks were forcing the Turks in Macedonia to emigrate, a policy of retaliation on the part of the Turks at present is not a wise one. The Greeks in Asia Minor are numerous; they are hard-working, and cultivate the land. The tithes they pay to the Government are important, and it will be many years before the incoming refugees are able, if ever, to take their place. The country is consequently bound to suffer, and the bad feeling between Turks and Greeks will grow stronger.

The Seidikeui Murder.

The village of Seidikeui, situated some ten miles from Smyrna, and forming the centre of an important tobacco and vine district, has once more come into unpleasant notoriety.

Its energetic *mudir*, or mayor, Ahmed Mukhtar Bey, returning home from his office at the Konak, was fired on by a Greek, and shot twice in the feet. An operation at the Turkish Hospital was unsuccessful, and this promising official succumbed to his wounds. Mukhtar Bey was a nephew of the late Kiamil Pasha, and although imbued with the same feeling regarding his Greek neighbours as most of the Turks, governed his district fairly and with justice. He was an excellent shot and good swordsman, and offered to take the place of Pierre Loti when the latter was challenged by a Bulgarian officer. His assassination has given the Vali of Smyrna an excuse to carry on his anti-Greek policy even more thoroughly than before and to make matters more unpleasant than ever for the Greeks in his vilayet. The murder is being made out by him to be a purely political one, although there does not actually appear to be any good proof of its being so, and the protests of two Greek newspapers against the theory of political murder resulted in the arrest of the editors and their being brought before the court-martial. If it had been the intention of the Greeks to murder anyone for political reasons, they surely would have selected as their victim a member of the present Union and Progress Party, and not a side-tracked relative of that party's late most-feared enemy, Kiamil Pasha.

The incident is an unfortunate one, taking place as it did at a period when the relations between the Greeks and the Turks are so strained, and the probable effect will be the expansion of the boycott movement in Anatolia against all Christians. The situation, in fact, is at present anything but reassuring.

The present Governor, instead of using his great influence and devoting his undoubted abilities and energy to improving the welfare of the large population under his jurisdiction, seems to be intent on stirring up the Moslem population against the Christian element. The local Turkish Press is inspired by him, and publishes regularly concocted stories of Greek aggressions. If this state of affairs continues, the fate of this district may be the same as that of Salonika.

INSULT TO GREEK FLAG.

The strained relations existing in Alexandria between Moslems and Greeks have resulted in insults to the Greek flag on the part of the former. It appears that at about seven o'clock in the morning of June 16 some native dockers boarded the Greek s.s. "Constantine," which had a cargo of fruit, and asked for work in unloading. This was refused, and at the same moment the sailors hoisted the Greek flag. The sight of the flag infuriated the dockers, who hauled it down, tore it up, and burnt it at the stern. Full reparation was made later in the day, when a superior officer of the coastguards, in full uniform, accompanied by another officer, called upon the Greek Consul-General, Mr. Paraskevopoulo, and accompanied him to the harbour. The officer then raised the Greek flag at the stern of the "Constantine," while the coastguards fired a salute. The five dockers were handed over for trial by the Native Tribunals. In connection with the same accident a native policeman was maltreated by a Greek sailor for refusing to arrest the natives because he had not seen them tear down the flag. The Greek Consul has had the sailor arrested. A similar incident had happened not many days before.

LETTER FROM ATHENS.

(From Our Own Correspondent.)

Athens, June 20.

The Ægean Crisis.

I may say that the Greco-Turkish crisis which has arisen so suddenly in consequence of the treatment of resident Greeks in Asia Minor, although causing intense indignation in this country, has been, on the whole, received with a certain satisfaction as affording Greece a heaven-sent opportunity to anticipate a Turkish aggression, and at the same time to settle the numerous questions which are still left over from the last war. During the last few days public opinion, more particularly the Opposition Press, has been clamouring for immediate hostilities against the Porte, in order that the outbreak of war should prevent the reinforcement of the Ottoman Fleet by those Dreadnoughts which are at present on order. For some days after the delivery of the first Note an outbreak of war was considered to be inevitable, and everybody was of the opinion that it was a necessary evil.

At the moment of writing, however, the situation has grown slightly better, in view, it is believed, of the activities of France and Russia in Constantinople. Both Powers have considerable interests in each of the countries which would be affected by war. In spite of this, the Hellenic Fleet, under Admiral Koundouriotis, is pressing forward its preparations for active service. The scheme of attack, which is reported to be highly effective, is entirely unknown to the public. In any case, it is certain that Greece has no intention of attacking Turkey by land, which could only be done by violating Bulgarian neutrality; but fears are entertained that the Turks may not be deterred by such considerations. So far as I can see, any operations directed against Smyrna or the Dardanelles must depend to a certain extent upon the attitude of the Powers. However that may be, it is obvious that in any forthcoming war with Turkey "our future lies upon the water."

The Budget for 1914.

The Budget for 1914, which was laid upon the table of the House last week, estimates the revenue at 224,000,000 drs. (£8,960,000), and the expenditure at 220,000,000 drs. (£8,800,000)—that is to say, very nearly twice the figure with which the Treasury of this country had to deal before its recent aggrandisement. Of this sum 9,000,000 drs. are expected to be raised from Crete, 66,000,000 drs. from Macedonia and Epires, and 10,500,000 drs. from the Ægean Islands.

Expenses of the Army and Navy.

The Army Estimates are put down at 37,000,000 drs., and the peace footing of that force is established at 60,000 men. There will be five army corps, made up of fourteen divisions; there will be fifty-seven batteries of field artillery and forty-two batteries of mountain guns. The cavalry, which of late years was composed of twelve ill-mounted squadrons, will in future have thirty-six squadrons, with 15,000 horses. As explained by Mr. Venizelos in the course of debate, arrangements have been made to put 500,000 men in the field in case of war, but these arrangements are not expected to bear fruit immediately. When they come to be in full working order the annual expense of the army will be 52,000,000 drs. In addition to the above, the extraordinary estimates, which will be devoted to the purchase of stores and the renewal of equipments, amount to 120,000,000 drs., of which 87,000,000 drs. will be spent this year. Of these, 24,000,000 drs. will be forthcoming from the special funds for national defence, and the rest will be supplied by the Treasury.

The Ministry of Marine is put down for ordinary estimates of 22,000,000 drs.—about three times the former amount—and for 67,000,000 drs. of extraordinary estimates. The latter figure includes the payments which will have to be made this year for the ships now under construction in Germany. The total of the extraordinary Naval Estimates amounts to 164,000,000 drs., but this does not provide for the proposed purchase of two Dreadnoughts and several smaller vessels.

Extraordinary Expenses.

Of the sum provided in the extraordinary estimates 185,000,000 drs. are divided between the army and the fleet, as detailed above, and various public works; 7,500,000 drs. are set aside for the refugees. Beyond this, 180,000,000 drs. are allotted to the partial redemption of the floating liabilities incurred by the Government during the war, which amount in all to 219,000,000 drs. No less than 106,000,000 drs. are required to balance the deficit of the 1913 Budget. All this makes away with 470 millions, which will be met out of the £20,000,000 loan.

Future Needs.

Thus there remains of this loan the sum of only 30,000,000 drs., which is completely inadequate for the claims which still have to be met. For example, the 60,000,000 drs. will have to be found next year for the second Dreadnought of the Lorraine type now on order in France—105,000,000 drs. in all for the army and the fleet—and more than 100,000,000 drs. will be required in the near future for the construction of the folowing railway lines which are projected:—Kalambaka-Sorovitz (Sorovitchevo), which will link up the Thessalian Railway with the Monastir line (98 miles), Kalambaka-Janina (61 miles), Salonika-Anghista (81 miles), Kozani-Veria (19 miles), Tripolitza-Sparta (31 miles), and some widening of gauge in Thessaly.

To meet all these expenses, of which a considerable sum can be considered productive expenditure, the Minister of Finance considers that it will be necessary to raise a further loan of £16,000,000,000, which will be amply guaranteed by the same revenues which have been already allocated to the service of the £20,000,000 loan. The interest on the national debt, which already amounts to 2,800,000 drs. a year, will be nearly 4,000,000 drs. per annum after the conclusion of this further loan, and will itself amount to £80,000,000. Such figures would be appalling if it were not that the revenue both in old Greece and in the new territories shows a steady increase, which enables us to view the economic future of the country with equanimity.

NOTES FROM CYPRUS.

(From Our Own Correspondent.)

Cyprus, June 5.

The weather has been most unusual, and in this respect, as not infrequently happens, has taken its mood from Europe. A prolonged spring, with few really hot days and many grey ones, led up to a sudden burst of heat last week. No sooner had linen suits replaced cloth ones than the temperature underwent a complete change, and became cold and blustering. During the last twelve hours rain has fallen in many parts, and at the time of writing a thunderstorm is in progress in the plains. Meanwhile, threshing operations "à l'Arannah" are in full swing. The corn crops are likely to be moderate to good. A troublesome insect which last year caused much damage to the carob trees is again attacking it, and definite measures are being worked out for combating it.

Cyprus Turf Club.

A meeting was held last Saturday at the English Club, Nicosia, when it was decided to have a Race Meeting at Nicosia in November next. It was also agreed that steps should be taken for the formation of a Turf Club, whose functions would, presumably, correspond to those of the Jockey Club at home, and in whose hands would rest the framing and enforcing of racing rules and regulations in the island.

Sericulture in the Island.

Efforts are being made to improve and develop the sericultural industry in the island. There are now two silkworm rearing stations under the control of the Agricultural Department, and the production and distribution of healthy eggs of good quality is being aimed at. A more direct and effective control by the Department of the private rearing establishments and the enforcing of the existing law should go far to place this valuable industry on a more satisfactory footing. The island is well adapted for it, and the mulberry tree thrives well, so that with wise direction on the part of the authorities this work should be considerably extended.

ROUMANIAN LETTER.

(From Our Own Correspondent.)

Bucharest, June 20.

The Constantza Meeting.

The Tsar has come and gone. The reception given to the Russian Imperial Family was all that could have been wished. Roumanian and Russian Decorations were showered right and left with a lavish hand. But whether the meeting had the political and matrimonial importance attributed to it yet remains to be seen. No further announcement has been made with regard to the proposed marriage of Prince Carol with one of the Grand Duchesses, but a further visit of Prince Ferdinand with his son to the Russian Court later in the year is spoken of.

The local Press has printed columns on the Tsar's visit, but not a word about an agreement between this country and Russia. The cordiality of the speeches was significant enough, and has drawn strong remarks from the Austro-Hungarian Press, which warns Roumania against the friendship of Russia, reference being made in nearly every case to 1877 and Bessarabia.

In the exchange of "honours" the greatest was the Honorary Colonelcy of the 5th Red Hussars which was conferred upon the Tsar by King Carol. This regiment, which, by the way, was the first Roumanian force to enter Silistria, being in garrison at Dobritch (or as the Roumanians now call it, having reverted to its older Turkish name, Bazarjik), was drawn to Constantza to form a guard of honour.

King Carol at Bazarjik.

On Tuesday King Carol and Prince Ferdinand visited Bazarjik by motor, being enthusiastically received, especially by the Roumanian and Moslem population.

Result of Elections.

The elections for the Constituent Assembly are now over, and have produced the following results:—

For the Chamber—	For the Senate—
143 Liberals	80 Liberals
2 Dissentient Liberals	22 Conservatives
21 Conservatives	13 Conservative-Democrats
18 Conservative Democrats	2 Dissentient Liberals
2 Nationalists	
2 Independents	117 Members
188 Members	

Second Advent Propaganda.

A curious occurrence is reported from Rinced, where a sergeant has been degraded and sentenced to a term of imprisonment for preaching Second Advent propaganda in his regiment. One of the leading tenets of the sect is opposition to war and the use of arms.

Time's Revenges.

It is a remarkable fact that the Mayor of Jassy, who was presented to the Tsar at Constantza, was formerly a resident in Bessarabia, and was condemned to twenty years in Siberia for revolutionary tendencies. He escaped, however, and settled in Jassy, where he has attained his present position.

THE CROWN OF SERVIA.

Owing to the necessity for his taking a course of mineral baths at Vrania the King of Servia has temporarily withdrawn from political life, and has entrusted the Crown Prince Alexander with the Regency. It will be remembered that the Crown Prince of Montenegro is also acting as Regent on behalf of his father.

Simultaneously with the announcement of the establishment of a Regency in Servia comes the news of the dissolution of the Skupshtina, which has been expected for some time past. The elections for its successor will be held in August.

A Concordat has just been signed between the Vatican and Servia by the Cardinal Secretary and Dr. Vesnitch, the Servian Minister in Paris, who was in charge of the negotiations in Rome.

NOTES FROM BULGARIA.

(From Our Own Correspondent.)

Sofia, June 21.

King Ferdinand in Servia.

Last Wednesday while King Ferdinand was travelling in the Orient express on his way back to Sofia he traversed Servian territory for the first time since the war, and, although his Majesty had preserved the strictest incognito, an unpleasant incident was provoked by a headstrong and ill-mannered inferior official in the Servian railway administration. The guard of the train forced his way into the Royal carriage "because he had learned that his Majesty was travelling with the train, and he wished to assure himself of the fact." The zealous official even stopped the train between Pirot and Soukovo in order to carry out his discourteous verification, nor would he permit it to proceed until he had been very vigorously remonstrated with by members of the King's suite. Next day Dr. Radoslavoff, the Prime Minister, called at the Servian Legation here and drew attention to this incident, and received the Servian Minister's assurances that his Government deeply regretted the gross discourtesy. It is stated that the official in question is in the habit of making use of his "little brief authority" to harass and annoy all Bulgarians travelling through Servian territory.

Relations with Greece.

Yesterday the Bulgarian Government telegraphed to Athens that it was sending Mr. Passaroff, the new Bulgarian Minister, to Athens, and asking that the Greek Government should also send its Minister immediately, in order that both Ministers should take possession of their posts simultaneously. Before leaving Mr. Passaroff had audience with the King, and he received his final instructions from the Prime Minister.

When asked whether he did not consider Athens as being a very difficult post at present for a Bulgarian diplomatist, Mr. Passaroff replied that he was pleased at the prospect of going to the Hellenic capital, and had every confidence that he would be able to improve the relations between the two countries and gradually settle all pending questions. Mr. Passaroff relies greatly on being assisted in this task by the tact and proved statesmanship of Mr. Venizelos and Dr. Streit, the Hellenic Minister for Foreign Affairs.

The Outlook (June 20) has an interesting article on "French Faction and Greek Militancy," in which the situation in the Ægean is clearly analysed, though with an unmistakable bias. We quote below:—

"A great impetus," says *The Times*, "was given to the propaganda in favour of a preventive war by the fact that with her new Dreadnoughts Turkey would soon be temporary mistress of the Ægean." That point may accordingly be taken for granted for the future. The Greeks believe that it is their interest to strike quickly, and the manufacture of a pretext cannot be an insuperable difficulty for the ingenious politicians of Athens. What better excuse than the alleged misconduct of Moslem refugees in Greek districts? But there need be no Moslem refugees full of wrongs and exasperation if the Greek Government did not drive them in beggary from their native homes. The injuries, true or false, inflicted by ruined Muhamadans upon Greeks in Thrace or Asia Minor could not have occurred if the Greek Government had prevented the ruin of those 300,000 Muhamadans instead of expelling them from their houses and farms in Macedonia.

ODESSA LETTER.

(From Our Own Correspondent.)

Odessa, June 21.

United States Intervention in Albania.

From Athens comes the somewhat curious statement that the United States Minister to Greece, Mr. Williams, recently undertook a journey to Northern Epirus in order to study the situation there, and from Epirus he proceeded to Albania. Previous to his departure from Athens, according to the *Hellas*, Mr. Williams informed, by means of a circular letter, the other diplomatic representatives in the Greek capital that he was proceeding to Albania with the object of tendering the services of the United States to the distracted authorities there as arbitrator in the cause of pacification and consolidation of the newly constituted kingdom. The Great Powers, says one of the Russian journals, will probably shrug their shoulders at the mission of Mr. Williams, and further remarks that the capacity for arbitration displayed by the Government of Washington in Mexico is not such as to recommend it for the same office in turbulent Albania. Mr. Williams' mission is probably more officious than official, if it be not undertaken, indeed, without any mandate whatever from Washington.

The Constantza Meeting.

The southern Press describes the meeting of the Tsar and King Carol of Roumania as the most important and far-reaching political event of recent years. That it is regarded as a distinct rebuff in the Wilhelmstrasse and at the Ballplatz goes without saying. On the eve of the meeting the *Tageszeitung* and the *Berliner Tageblatt* both affirmed, without qualification, that a *rapprochement* between Russia and Roumania would be the conversion of the latter into a mere subservient satrapy of the great Northern Power, and would compel both Germany and Austria-Hungary to revise their joint policy in South-Eastern Europe and in certain directions in the Near East. If the South-Russian Press be as correctly informed as it professes to be, the result of the Constantza meeting will be something more binding than a mere friendly *rapprochement* between this country and Roumania; that has existed for some time past, since the date of the Peace of Bucharest, in fact, and the two monarchs and their Foreign Ministers did not meet the other day for the sole purpose of confirming a friendly understanding which was already in existence.

The chaotic condition of Albania was admittedly discussed at Constantza, but with what result has not transpired. One of the leading southern organs makes itself responsible for the emphatic statement that King Carol will not under any circumstances consent to the employment of Roumanian troops for the pacification of Albania, and it is just as unlikely that he would allow them to form a contingent of an international force should the latter course be decided upon. King Carol has, says this journal, no desire further to exasperate the Dual Monarchy, which bitterly resents the attitude lately assumed by Roumania.

The Odessa Visit.

During the visit of the Tsar and the Imperial Family to Odessa it was noticed with much satisfaction that the Cesarevitch was happily enjoying more robust health. He looks well, albeit somewhat pale for a boy of his age, and has dispensed with the aid of his Cossack attendant. He walks freely, but with a slight limp with the left leg; the former rigidity of the left knee has disappeared, and it is said that the Court physicians are perfectly satisfied with the Prince's steady progress towards normal health and strength.

The Hellenic Reservists.

The whole of the Greek reservists in South Russia and the Caucasus have been recalled to the colours. They number altogether about 3,000. At the Hellenic Consulate-General in this city some 700 reservists have registered during the week, and others are daily enrolling their names and the numbers of their regiments and taking the shortest route homewards.

NEWS FROM ISPAHAN.

(From An Occasional Correspondent.)

Ispahan, May 20.

News has been received at Ispahan of the continued depredations of that picturesque bandit Reza Khan Joozani. He is credited with the looting of several caravans, one with a valuable consignment of indigo. Other caravans are held up at Bistagoon, afraid to venture on to Ispahan. The activity of Reza Khan may lead to the closing of the Ahwaz-Ispahan road, though it is hoped that the Samsam-es-Saltaneh may be able to cope with the difficulty. A force of Bakhtiaris is said to be at the heels of the raiders, who are believed to be in retreat, whilst another report mentions that the Bakhtiaris are themselves having a good time in robbing the inhabitants. Both reports may be true, and are typical of the time.

The Russians are active in Ispahan. Not only are they utilising to the full the opportunities of control which their possession as agents of the Zil-es-Sultan's properties give them, but they are going so far as to offer protection to bazaar merchants and mullahs. This is interference with Persian sovereign rights indeed, and great uneasiness is caused thereby in certain quarters.

Reza Khan is headman of one of the Zil's villages, and apparently expects immunity for his misdeeds. It is a curious state of affairs when we see Russian protection extended to a considerable section of the population of the Ispahan district.

Intrigues are on foot for the displacement of the Samsam-es-Saltaneh. Whence these intrigues emanate we can only guess; perhaps inter-tribal jealousies may be partially responsible for them, but, in view of the abnormal interest of Russia in Ispahan affairs at the present time, all sorts of rumours are heard and believed.

THE MUSKAT ARMS TRAFFIC.

The text of an exchange of notes [Cd. 7361] between his Majesty's Government and the Government of the French Republic respecting the trade in arms and ammunition at Muskat was issued on the 9th inst. by the Foreign Office. It is set forth that the British Government will use their influence with the Sultan of Muskat to insure that French nationals in the Sultanate will, as regards the trade in arms and ammunition, receive in all respects the same treatment as British subjects and protected persons. In a note to Sir F. Bertie, Sir Edward Grey reports that on February 4 the French Ambassador made verbally a declaration of which the translation runs:—"The French Government will not decline to examine any new Regulation dealing with the arms trade at Muskat, even though such Regulation may involve Customs measures in territorial waters, on the express condition that the exterritorial rights of French citizens at Muskat and the jurisdiction of French Consuls shall be respected. The French Government could not concur in a procedure involving the right of search."

THE NEAR EAST.

THE NEAR EAST is on sale at all Bookstalls and Newsagents in the United Kingdom. Should any difficulty be experienced in obtaining the paper, readers will oblige by notifying the Manager. Abroad THE NEAR EAST may be obtained in:

PARIS. Librairie Hachette, 79, Boulevard Saint-Germain; Librairie Galignani, 224, Rue de Rivoli, and at Railway Bookstalls.
VIENNA. Goldschmiedt Brothers, Zeitungsbureau, Wollzeile, 11.
CONSTANTINOPLE. Economic Co-operative Society, Pera; Benjamin Rawe, British Oriental Bazaar; D. Marianopoulo, 280, Grande Rue de Pera; and The Nautical Bazaar, Galata.
SALONIKA. Librairie Francaise, Rue Sabri Pasha.
SMYRNA. Dem. Tzannou, Petite Rue de Rose, and F. S. McVittie.
BEYROUT. Sarrafian Brothers.
JERUSALEM. Palestine Educational Store, Jaffa Road.
CYPRUS. Cababe and Wilson, Nicosia.
CAIRO. Diemer and Company, Shepheard's Buildings; The British Library, Sharia Kasr-el-Nil; C.M.S. Bookstall, 15, Sharia Madabegh; and at Railway Bookstalls.
ALEXANDRIA. Librairie Schuler, Rue Cherif Pasha; Nacamulli and Company, 12, Rue Sesostris; Librairie Calebotta, Rue Cherif Pasha Librairie Cauro, Rue Cherif Pasha; The Eclectic Bookstall; F. Diemer, Cairo Station.
PORT SAID. Charles Evans, and on board vessels in the harbour.
KHARTOUM. Sudan Stationery and Bookstore, and Victoria Bookstall
ATHENS. Eleftheroudakis and Barth, Place de la Constitution.

NOTES FROM JERUSALEM.

(From an Occasional Correspondent.)

Jerusalem, May 30.

Recruiting Difficulties.

On May 30 the Government again took a number of recruits from the district of Jerusalem, sending them the same day to Nablous. Their eventual destination is said to be the Yemen, where trouble is again rife. There is strong and widespread discontent at the way in which men are being taken just at the gathering in of the harvest, and the freedom with which the people everywhere express their feelings and censure the Government shows how desperate they are becoming under the present state of affairs. The general feeling is in favour of the Arab insurgents in Yemen and against the Turkish Government, and many of the recruits have said openly: "The Turkish Government may send us to the Yemen, and they may tell us to shoot, but if we do shoot it will be the Turkish officers, not the Arabs, who are our kin." This is, in fact, what happened some years ago, but the matter was hushed up. Last week the Sheikh of a small Moslem village north of Jerusalem was notified by the Government that he was to call and send in for military service twelve of the young men of his village, whose names were given him; as the picturesque wording of the order has it, "You are to beat the drum and call the young men of the village for service." The Sheikh accordingly assembled four or five small boys with empty kerosene tins, and sent them up to the highest place above the village, with instructions to beat upon the tins all day. He then sent word to the Government at Jerusalem: "I have beaten the drum all day, from sunrise to sunset, but as eleven of the young men you have called are in America, and the twelfth is in Jericho, they could not hear the drum, and therefore they have not come!" Jerusalem is enjoying the jest; but it shows how weak and how greatly despised the Government is that such open flouting of it by a mere hamlet is possible, and it dare not resent the affront. On May 30 the local authorities also commandeered forty camels from the fellahin to carry loads of gunpowder and cartridges to Nablous and perhaps further. Everyone believes they are intended for the Yemen, and that matters there are far more serious than the Government will admit.

An Execution at Jerusalem.

June 12.

On June 10 a Moslem from Egypt was hanged in public at Jerusalem, outside the Damascus Gate. The day before, the town crier was sent round to announce the execution to take place on the morrow, and the time and place. Thanks to this timely notice, a large crowd assembled in the dawn next day, and the accounts of the execution, though not all agreeing in some points, all tend to show that it was most disgracefully carried out. The man was not hanged with rope, but with an iron chain, or, as some say, with wire; there was apparently no drop-kick, and he was slung up off the ground and died of slow strangulation. It is said that he took half an hour to die, and a spectator testifies to the dreadful expression on the unfortunate man's face. The man was a savage and a notorious murderer, and had been in prison for two years. His last crime was the murder, under very brutal circumstances, of the head of the Armenian Convent at Jaffa. The whole place has been greatly upset by this execution, Christians by the horrible way in which it was carried out and Moslems because the man was a Moslem. "It is a black day for us, for a Moslem has been killed for killing a Christian!" This was the comment of a Moslem who has lived for years with Christians and is really fond of them. It is reported that two more criminals are to be publicly hanged within the next few days, outside either the Damascus Gate or the Jaffa Gate. We can only hope that public opinion will be strong enough to prevent a repetition of the ghastly callousness of the first execution. Old residents recall the last public execution in Jerusalem, some fifty years ago, when a man was beheaded outside the Jaffa Gate.

The Egypt Exploration Fund's Exhibition of Antiquities and Papyri discovered at Oxyrhynchus and Antinoë will be held in one of the rooms of the Society of Antiquaries at Burlington House from July 13 to 28. Professor Naville and others will lecture during the course of the exhibition.

LETTERS TO THE EDITOR.

The columns of The Near East *are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of* The Near East.

Letters intended for publication MUST be accompanied by the writer's full name and address, not necessarily for publication, but as an evidence of good faith. They should be worded as briefly as possible and must be written on one side of the paper only.

THE FOUNDATION OF THE BALKAN ALLIANCE.

To the Editor of The Near East.

Sir,—In his review of Colonel Rankin's "Inner History of the Balkan Wars" your critic describes the writer of the book as having been led into error regarding the real authorship of the Balkan Alliance. The full history of that epoch-making compact has yet to be written, but when all is known, the honour of its inception will unquestionably rest with Mr. Venizelos. Owing to the profound secrecy maintained up to the last moment with regard to the Greco-Bulgarian negotiations, not only the world at large but even the Cabinet Ministers in Athens and Sofia—with the exception of the two Prime Ministers—were excluded from all knowledge of what was taking place. The Greek proposals, made in writing and embodied in two distinct clauses, were despatched in the spring of 1911, and were known only to King George, Mr. Venizelos, King Ferdinand, Mr. Gueshoff, and Mr. Bourchier, who transmitted them to Sofia. A similar secrecy was not maintained with regard to the Serbo-Bulgarian negotiations at Belgrade, which were conducted under the auspices of the Russian Minister, Mr. Hartwig; the object of these negotiations was not an alliance of all the Balkan States for the liberation of Macedonia, but a combination of the three Slavonic States directed against Austria-Hungary; it was not till a much later stage that Russia and the Belgrade negotiators were made aware of the larger scheme, into which the Russian project was eventually merged. To conclude that "serious" negotiations between Bulgaria and Greece did not exist until after the signature of the Serbo-Bulgarian Treaty, is to fall into the fallacy *post hoc, ergo propter hoc;* the proposals of Mr. Venizelos, by far the first in point of time, were seriously made and seriously considered from the outset, but Mr. Gueshoff waited to make sure of Servia before finally clinching the arrangement with Greece. How can we suppose that Mr. Bourchier, who was himself the medium of communication between the two Prime Ministers during the earlier period of the negotiations, could have been under any misapprehension as to their views and the parts which they respectively played?

The subsidies given by Bulgaria to Montenegro, which were considerably larger than your critic supposes, were at first accorded in connection with the Belgrade scheme. King Nicholas continued to receive them up to the moment when he turned his arms against Bulgaria.—Your obedient servant,

June 24. Makedonski.

"ROUMANIA TO THE RESCUE."

To the Editor of The Near East.

Sir,—I am only one amongst the many of your readers who, I am sure, congratulate Mr. A. L. Kennedy on his masterly and practical letter in your issue of June 19. I also would join with Mr. Kennedy in congratulating The Near East on its work "in sympathetically interpreting Balkan aspirations to the British public."

To enlarge upon your correspondent's letter would be a work of supererogation.

But I venture to express an opinion on one or two points. I quite agree that, owing to the regrettable manner in which everything in this country is made subservient to party politics, the "man in the street" is prone to think or care nothing about foreign or Imperialistic matters. At the same time, all classes take an interest in Balkan matters, both as regards the aspirations of the countries concerned and in the general political problems involved, if the matter is put clearly before them. Owing to "atrocity-mongering" by a certain influential section of the Press and the inevitable recriminations, the British public has formed an entirely erroneous opinion about the Balkan States, and is inclined, without distinction, to condemn all. It is very difficult to eradicate these ideas. But those who have at heart the welfare of the Balkan States and realise their great future importance in political history must work hard to state facts

WHITE HORSE WHISKY.

Digitized by Google

fairly and avoid sentimentality, so that the public may consider the Balkan problems both fairly and sympathetically. So far from being justified in criticising, we have got much to learn from certain of the Balkan States. The idealism, combined with personal self-sacrifice and bravery, which is characteristic of the Bulgarian is, alas! sadly lacking in the average Englishman of to-day.—I am, Sir, yours, etc.,

G. W. C. Hollist, M.R.C.S., etc.

Riseley Lodge, Maidenhead,
June 23, 1914.

THE GOVERNMENT OF TURKEY.

To the Editor of The Near East.

Sir,—Your correspondent, "Pro-Turk, but Anti-Government," will forgive me, perhaps, if I say that, as he does not give his name, his address, or the date of his letter, his precise standpoint is not quite as clear as it might be, as one does not know (*a*) his nationality; (*b*) whether by "pro-Turk" he means in favour of the Turkish race or merely in favour of Turkey as a geographical entity with *all* its races (one might assume this from his lack of a good word for any Turk, except a certain nameless Hodja who is brought in to try to prove the hopeless attitude of the people—and his praise of the rayah); and (*c*) where he himself resides, as, according to him, to live in Constantinople and to know anything about Turkey are mutually exclusive conditions.

With regard to the latter point, and if your readers will pardon me for venturing to write from Constantinople after your correspondent's remarks, I would merely say that one might as well say that a man who knows Paris only does not know France as a whole, or the same thing about a Cockney Londoner. I grant this, *but in a strictly limited sense*. If one lives all one's life in any one spot one's appreciation of facts and circumstances in other places must necessarily suffer. Going back to my example of Paris, too, it is certain that one could not take the general method of life and amusements of certain advanced sections of that city as representing those of the whole French nation—nothing would be more unjust. But to imply, as your correspondent does, that any favourable opinion formed of the Turkish race, as against the native Christians, in Constantinople would be at once proved wrong and absolutely reversed by an equally close knowledge of those same elements in the provinces is really hardly reasonable. Having myself had certain good opportunities of judging of the characteristics of the various races of the Empire in the provinces as well as in Constantinople, and that under no sort of official patronage or control such as your correspondent is so strong against, I for one venture to assert that, to say the least of it, the Turkish race has not to fear comparison with any as to either patriotism, honesty, and practical religion or desire to progress. It is only hampered as to the latter by the heritage of the Hamidian *régime* and the load of misfortunes and economic woes resulting from the wars and other calamities which have fallen upon the country since the Constitution.

With regard to charges of corruption, such as your correspondent makes—directly against the authorities of the vilayet of Aidin, indirectly against Talaat and Djavid Beys—in connection with the locust campaign, I can only say that, were the irregularities by the former such as stated then no one would be more pleased to have them brought to their attention in order to take the necessary steps to punish those responsible than the two Ministers in question, who have both worked tooth and nail for the Empire's progress and prosperity. The accusations against the Ministers themselves are a little bit too bad. The method of argument seems to be that (1) it is stated that in certain portions of the vilayet of Aidin the local authorities have committed irregularities; (2) therefore, Talaat Bey and Djavid Bey both not only knew of these irregularities, but approved of them. This kind of argument would not even pass muster in modern British politics, and we have seen some pretty weak arguments in the latter of late years.

It is, unfortunately, the case that in politics everything is not always perfect; abuses occur sometimes, and, also unfortunately, they cannot always be remedied at once. But this is true of *all* countries, and it is grossly unfair that Turkey should so often be the butt of anonymous correspondents, who single her out for attack, but scrupulously ignore the many equally flagrant abuses that occur in other Balkan States, not to mention England, France, Russia, etc. (especially Russia). Fair play is what Turkey and her friends desire—fair play, and time to work out her regeneration undisturbed by the Great Powers; instead of which she has been, and she is, subjected to every kind of pressure and interference from all sides, and, to make it worse, there is a regularly organised conspiracy of silence in the greater part of the world's Press, so that it is practically impossible to get anything published in favour of Turkey, although all kinds of Greek and other falsehoods about Turkey and the Mohammedan races abound and are published with gusto. The old saw of "Give a dog a bad name" was never better exemplified than in the case of the Turks. Another proverb that Turkey's enemies seem to have taken to heart is that about "If you only throw enough mud some of it will stick."

Your correspondent ends up by saying: "Those who uphold the present Government in the European Press are doing the worst possible service to Turkey." He then signs himself "Pro-Turk but Anti-Government." One does not get much chance of "upholding" the present Government in the European Press; but let that pass.

I merely say that no one who writes such a letter as that of your correspondent is entitled to use the expression "Pro-Turk" in connection with himself.—I am, Sir, yours, etc.,

Arthur P. Tully.

Constantinople, June 17, 1914.

THE ÆGEAN ISLANDS.

To the Editor of The Near East.

Sir,—The speech from the Throne at the recent opening of the Turkish Parliament shows the real attitude of Turkey at the question of the Ægean Islands. It appears, to my great surprise, that, while His Imperial Majesty is fully aware of the strategical importance of the Islands of Chios and Mytilene, he lays no stress on the possession of the islands of Samothrace, Lemnos, Nikaria, and Samos, which are clearly as important as the above two islands. I do not know how His Majesty's Government is settling these matters with the Greeks, but it will cause great regret to the well-wishers of Turkey to hear of the Greeks keeping the "keys of the Dardanelles" and the "stepping-stones of Asia Minor," even with the consent of Turkey.

There is also a rumour that Turkey wishes to exchange the entire Dodekanese for Chios and Mytilene; as it is not an official statement I cannot discuss it, but if there is truth in this rumour I am at a loss to understand why the possession of Rhodes and the Sporades (the Dodekanese) by the Greeks is not equally menacing to Asia Minor, and a stepping-off point for Greece in Asia. The fact is that, except for Thasos and one or two far-off islands like Karpathos and Astropalia, no island can be separated from Turkey without a real danger to her empire. Settle as they like, but the Turks will soon learn the importance of their possessions in the Ægean.—Yours faithfully,

Ahn Ed Reffi.

The Moslem Lodge, Meerut, U.P. India,
May 25, 1914.

NEAR EAST IN PARLIAMENT.

HOUSE OF COMMONS.

Armenian Reform. June 18.

In reply to Mr. Noel Buxton, Mr. Acland said: The Turkish Government have, on the recommendation of the Powers, selected Mr. Westenenk, of the Dutch East India Service, and Major Hof, of the Norwegian Army, to be Inspectors-General of the Eastern Vilayets under the new reform scheme. I understand that these gentlemen will enter on their duties on July 5. The proposed scheme has been elaborated by the Ambassadors of the Powers in conjunction with the Porte, and as such it will naturally receive the support of his Majesty's Government.

Greek Migration from Turkey.

In reply to a further question put by Mr. Noel Buxton, Mr. Acland said: I learn that as a result of boycotting and persecution, many Ottoman Greeks are leaving Turkish territory. His Majesty's Ambassador in Constantinople has spoken unofficially to the Porte on this subject, and I believe other Ambassadors have done the same. His Majesty's Minister in Athens has taken like action in regard to the treatment of Moslems in the new Greek territories, respecting which there are similar complaints, and from which many Mussulman refugees have gone to Turkey.

Rights of Minorities in the Near East.

In reply to Mr. Noel Buxton, Sir Edward Grey stated that he had received reports on the general question of civil and religious liberty in the territories lately acquired by Bulgaria, Greece, and Servia which he had not yet had time to consider in detail. His Majesty's Government proposed to recognise the annexations subject to certain assurances with respect to the rights of minorities from the Governments concerned. He hoped to receive these assurances in due course, and it would seem just that the Governments should have opportunities to make them effective before reports were made public.

British Interests in Mesopotamia.

Mr. G. A. Lloyd requested Sir Edward Grey to lay papers regarding the new agreements relative to British and other interests in Mesopotamia and the Persian Gulf, so that the House might have an opportunity of discussing them before these agreements were finally concluded.

Sir Edward Grey: I cannot lay papers until all the negotiations are concluded, as they are all interdependent. Some have been signed, but it has been agreed that they should not become operative pending the conclusion of others, which I hope will very soon take place. I shall then lay all the agreements, together with a covering despatch reviewing the course of negotiations and the settlement which is reached. There is no reason to depart from the usual practice of concluding the negotiations before papers are laid. The general lines on which the negotiations are proceeding were stated in debate last year, and they have been adhered to.

Montenegro and Albanians.

Mr. Aubrey Herbert asked the Secretary for Foreign Affairs whether he had received a petition from the chiefs of Plava, Gussinje, and Vuthai; whether he had received other petitions from the chieftains of Northern Albania complaining of the excesses of regular Montenegrin troops; whether some of these Montenegrin murders of defenceless people were perpetrated in public; and if he had any information as to what happened at the villages of Qerin and Martinovitch.

Sir Edward Grey: I have received through the British Delegate on the International Commission of Control in Albania a petition addressed to the Commission by the representatives of a number of villages in Northern Albania respecting their inclusion in Montenegro. The reply to the remaining parts of the question is in the negative.

Greece and Turkey. June 22.

Sir Mark Sykes asked the Secretary for Foreign Affairs, in the event of war breaking out between Greece and Turkey, what steps

Digitized by Google

he intended taking to protect British shipping in the East Mediterranean from the dangers to which it would be liable from floating, contact, and drifting mines in harbours and straits.

Mr. Acland: I can only say we shall exercise what influence we can to prevent war breaking out, and, if it does break out, to secure that the harbours and straits are not closed to merchant shipping.

Mr. Aubrey Herbert asked the Secretary for Foreign Affairs whether he had information with regard to 4,000 Mussulmans who were reported to be surrounded in Argyrokastro by the forces of the provisional Government of Epirus, and if he would make representations to the Hellenic Government to use its influence to prevent the perpetration of outrages.

Mr. Acland: I received such a report by telegraph from an unofficial source on the 12th inst., but I am not in a position to verify its accuracy. I understand that my informant, who is a United States citizen, is now in Northern Epirus in company with the United States Minister to Greece, who will doubtless make the representations the hon. member suggests should they appear called for.

Anglo-Persian Oil Contract.

Mr. Dillon asked the First Lord of the Admiralty whether the Indian Government had been consulted on the proposed purchase of a controlling share in the Anglo-Persian Oil Company, and, if it had, whether he would lay upon the table of the House a statement of the views of the Government of India.

Mr. Churchill: The answer to the first part of the question is in the affirmative. In addition to communications that passed between the Departments in London, Admiral Slade was placed in full consultation with political officers on the spot, and on his return from Persia he proceeded to Delhi, and conferences took place with officers of the Indian Government appointed by the Viceroy under instructions from the Secretary of State. In reply to the second part of the question, it is not proposed to lay papers on the subject.

Trans-Persian Railway. June 23.

Sir J. D. Rees asked the Foreign Secretary whether the Trans-Persian Railway scheme provided for going down to the Persian Gulf at or near Bunder Abbas.

Sir E. Grey: The option for the Trans-Persian Railway will provide for a line starting in North Persia and laid down to the coast, ending at or near the sea.

Russians in Persia.

Sir George Scott Robertson asked the Foreign Secretary whether he had received any official information of the statement made by M. Sazonoff to the effect that order and relative tranquillity had been restored to the Azerbaijan province of Persia; that the new Russian intervention was not military at all, but had taken the form of a wide-reaching assumption of administrative functions; and, if so, whether he had already made a friendly protest to Russia on the ground that a wide-reaching assumption of administrative functions in Persia by one of the signatories of the Anglo-Persian Convention of 1907 was not in accordance with either the letter or the spirit of that Convention.

Sir E. Grey: M. Sazonoff stated in the Duma that order, in the stability of which he had not much faith, had been established in Azerbaijan, owing mainly to the presence of Russian troops. I have made a communication to the Russian Government, and pending the receipt of their views I cannot make any further statement.

NEAR EAST BOOKSHELF.

OIL AND WATER.*

Years ago one used to be taught that when certain substances were thrown together and shaken up in a vessel the result was a mechanical mixture, while certain others, treated in the same way, produced a chemical compound. The former could be separated into its component parts at will, the latter had all the appearance of being a new substance. So it has been with the Byzantine Greeks and their conquerors, the Osmanli Turks. At most they produced a mechanical mixture—the Turk despised his *rayah*, the Greek detested and looked down upon his conqueror as a barbarian incapable of civilisation, and each hated the religion of the other. The Normans who conquered the Saxons of England were not kept apart from their subjects by any religious bar, and within a century or so both peoples had been absorbed to form a new nation. But Turk and Greek never mixed. Greek boys might be made Janissaries and Greek girls might be carried off into Turkish harems, but their religious antipathy has co-operated with their mutual racial detestation to keep the peoples apart even after five centuries, and now any observer can see in the Levant the line of cleavage between the two so clearly marked that it is possible to expel the Greeks and leave the Turks, while the opposite policy can be pursued in Macedonia. But it would have puzzled an ethnologist to divide Norman stock from Saxon in the days of the Stuarts.

Demetra Vaka is a Greek, and her thoughts, ambitions, and aspirations are those of a free Hellene, for all that she was born an Ottoman subject, the daughter of a race of *rayahs*, whose men-folk served the Sultan for pay, while their women hated all Turks in their hearts, and mourned, as we have seen free Hellas mourn, for the downfall of New Rome and its unorthodox Autocrat, the Uniat Constantine, in 1453. Demetra herself was perhaps unusually patriotic, and although she was very fond of the little Turkish girls with whom she played in the harems to which she was a welcome visitor, and earned the name of Yilderim, the polite Turkish way of saying spitfire, she could hardly compare with her truculent Aunt Kalliroë. This good woman describes a perfectly respectable Turk as "the Asiatic brute and murderer," and appeals to her "Great Christian God" to save her from the infamy of allowing an infidel daily to pass her door and walk the street where Christian virgins dwell. She makes all this to do because a Turk wishes to buy a Greek house which is for sale, and in order to save it from such profanation buys it herself, and burns incense and candles for four months in her new abode to disinfect it from the pollution of having been coveted by a Turk! The authoress endeavours to show what is best in the overlords of her people, and introduces the reader to some charming scenes in Turkish home-life, describing as their setting just such a picturesque and untidy interior as the imagination conjures up when the word harem is mentioned.

Demetra Vaka has many adventures among Moslems and Christians, she is cured by a saint, rescued from an embarrassing situation by a Turkish gentleman, captured by brigands whose hearts she wins by reciting patriotic verses to them, and desperately imperilled by earthquake, but, however lasting a value these incidents of life in Turkey may have for the future, the immediate interest of Demetra Vaka's story lies in its treatment of the fundamental differences between Turk and Greek. Those who are puzzled by the racial animosities which convulse the Ægean populations of to-day will find the explanation in this book. They will be able to realize the outlook of the Ottoman Greek towards his Turkish master and see how difficult it is for him to remain in the old subjection when his brothers over the water are masters of what used to be Turkish soil and claim victory over the conqueror of long ago. He will also be able to see through the eyes of the Turk how impossible it is to retain under his flag so many hundreds of thousands of unwilling and hostile subjects who despise his rule as much as they detest his religion and hate his race. The time has come to separate this mechanical mixture; it is being done crudely and roughly enough, but Demetra Vaka's book goes far to show how necessary an operation it has now become.

TANGIER TO TEHERAN.

The welcome appearance last week in *The Times* of a message from its Balkan correspondent, dated from Belgrade, does not seem to point to much success on the part of those dynastic efforts which are being directed to the confinement of his activities to Bulgaria as within a ring-fence of hostile influence. Mr. J. D. Bourchier possesses no mean record of services rendered to Greece. As a convinced believer in the principle of nationalities, he has always consistently supported the cause of Hellenism in Crete and the Ægean islands. More than once he joined the Cretan insurgents in the mountains; he pleaded their cause with the commanders of the international fleet at Canea, and helped them in their negotiations with the Turkish Government. His services were recognised by a vote of thanks from the Parliament of the island. After the establishment of Cretan autonomy he kept a vigilant watch over the island, never failing to denounce the infringements of its hard-won privileges which some of the Powers seemed disposed to make in complaisance to the Young Turk régime in Constantinople. It is well known at Athens, as well as at Canea, that he acted as mentor to Prince George during the earlier years of H.R.H.'s High Commissionership in Crete, and that he undertook this duty at the request of King George, who highly appreciated his political abilities and honesty of purpose. When the throne tottered during the stormy days of the Military League, he firmly supported the dynasty at the risk of his personal popularity with the officers, on the one hand, and the demagogues on the other; and the King, whose tact and wisdom prevailed in the end, never forgot the part then played by his friend, whom he often consulted. When Mr. Venizelos, to whom Greece owes everything, came to Athens, Mr. Bourchier, who had always been his warm admirer, did much to smooth the path of the Cretan statesman, whose quarrel with Prince George had naturally tended to prejudice the King against him. It was in collaboration with Mr. Bourchier, whom, in a private telegram recently published, he described as "one of the principal artisans" of the Balkan Alliance, that Mr. Venizelos laid the foundations of that memorable compact which has resulted so auspiciously for Greece.

***

In view of these facts, it is difficult to avoid stigmatizing the highly placed authors of the present campaign against Mr. Bourchier as wanting in gratitude. They owe much—perhaps everything—to him. It would be unfair to Greece to hold her responsible for an unworthy intrigue which recalls the days of Byzantine turpitude. It would be equally unfair to accuse Mr. Venizelos, whose loyalty of character is beyond suspicion, of any participation in this discreditable conspiracy. It is unnecessary to particularize all the forces which have been set in motion—the voice of calumny has not been silent. The Press, of course, has been extensively employed. An important Athens newspaper has been inspired with the suggestion that the Balkan correspondent of *The Times* should be beaten "till the blood flowed." An American journal has been instructed to charge him with wholesale corruption and the forgery of those inconvenient letters of the Greek soldiers, in which they artlessly revealed the orders they had received and their manner of carrying them out. These charges have been reprinted and circulated in handbills throughout the United States. Mr. Bourchier's great crime appears to have been his brief disclosure of the atrocities committed by the Greek Army as revealed by the refugees, who crossed the Bulgarian frontier in scores of thousands. He was contradicted by King Constantine and the Hellenic Legation, but when he offered to produce his evidence his antagonists retired discreetly from the encounter. They had discovered that he had made his inquiry in conjunction with a representative of the British Government, and the circumstance damped their ardour for the attack. A little before, we are told in Mr. Cassavetti's book (pp. 303, 304), he had received a sarcastic telegram "from a high personage in Greece"—to whom he taught a much-needed lesson in dignity by sending a studiously polite and respectful reply. Mr. Bourchier's verdict has been fully endorsed by the Report of the Carnegie Commission, and further persistence in this undignified campaign can only end in further discomfiture.

***

A correspondent tells me that in some parts of Asia Minor the anti-Greek movement was, at the time of writing, quite out of control, and that in some cases the boycott has developed into actual massacre. As my correspondent points out, such excesses are unlikely to be confined to Christians of one nationality only, and I cannot think the Powers view the prospect with equanimity. Identic notes have been delivered to the Porte, and there is talk of an International Commission to supervise the repatriation of the evicted emigrants. This is all very well—but the Young Turks do not want the Greeks back, and it is more than doubtful whether the latter would be wise in returning. I can see a considerable field of utility for the International Commission in securing proper compensation for the refugees; but I cannot believe that the repatriation of an unwanted minority, useful though it be, can lead to permanent tranquillity now that the Ottoman Moslem has so clearly manifested his desire to be rid of the Greeks and their propaganda alike. Like most Englishmen who have realised how uneasy a subject a Greek can be, I am able to understand the Turkish point of view, but I can only deplore the policy which deliberately leaves to the violence of a mob an experiment in expropriation which should require the utmost tact and firmness of statesmen, as much as I reprobate the atrocious means adopted by the mob to secure its ends. Apart from Philhellenism or Pro-Turkism, readers of THE NEAR EAST can only condemn the persecution of racial minorities wherever it may take place and regardless of the identity of those who perpetrate it.

***

The offer made by the High Commissioner of Cyprus to amend the constitution of that Island in such a way as to permit of the discussion of the estimates by the Legislative Council, before their submission to the Secretary of State for the Colonies, and to increase the numbers of non-Moslem elected members and of official nominated members, has not won the hearts of the Opposition. Indeed, such a result was hardly to be expected, as the second item of the reforms tends at once to deprive them of a dearly cherished grievance, and to perpetuate the impotence of any purely factious opposition in the future as in the past. The ambitions of the Greek Cypriote agitator are too well understood by those in authority for the advisers of the Crown to be willing to entrust the future of the Island to a party whose members give constant indications of a consuming anxiety to misuse any power they may possibly acquire. Any observer will realise that it is the duty of the British Administration to see that the Island does not become a second Macedonia in the future, just as at present it prevents the occurrence in the Sanjak of Cyprus of such events as have obtained an unenviable notoriety for Thrace and the Ægean Coast districts of Anatolia.

***

According to the *Jeune Turc*, overtures have been made to Bulgaria by her former allies to join them once more against the Turk. The possession of Kavalla is mentioned as a possible price for her services. I cannot vouch for the accuracy of the information, but the fact that such a move should have been considered possible is at once something of a tribute to the rehabilitation of Bulgarian prestige and a sardonic commentary on the Balkan situation. So far as can be predicted, I think it is safe to say that Sofia will prefer neutrality to co-operation with Athens. Bulgaria has no quarrel with the Porte, and an arrangement such as that apparently favoured by her ex-allies would expose her once again to the brunt of war.

***

There is no doubt that Bulgaria intends to remain strictly neutral in the forthcoming conflict between her Eastern and Western neighbours. That is known on unimpeachable authority, and I cannot see what other course is open to Mr. Radoslavoff. Bulgaria has not entirely recovered from the effects of her recent struggles, and her only policy is to "lie low and say nuffin'." The Northern neighbour is indisposed to see the Treaty of Bucharest upset by Bulgaria at present, although King Carol's Government were, at the time, anxious that Kavalla, as well as Adrianople, should remain Bulgarian. The present Cabinet in Sofia knows full well that it must be on its best behaviour, and I am sure anyone versed in Bulgarian history will readily see that an Administration of the political complexion of Mr. Radoslavoff's can hardly expect to find sympathy or support from official Russia.

***

Among the Honours accorded this year to those whose energies have been displayed in the Near East, the most notable are Lord Kitchener's earldom and Sir Edgar Vincent's barony. If the usage of the mediæval chroniclers serve as precedent, "El Lord" may now become "El Khond." In view of the Government's activities in the Gulf it is not surprising to find the Sheikhs of Koweit, Bahrein, and Muhammerah figuring in the list, as well as the latter's Wazir, the Rais ut Tujjar. The Sirdar obtains a well-deserved G.C.B., and five others who have done good work in Egypt and the Sudan are honoured by His Majesty. Major Doughty-Wylie's services to Islam in Macedonia and to European peace in Albania are also recognized. Whatever may be said of the recipients of decorations nearer home, no one can accuse those who have won distinction in the Near East of obtaining "unearned increment."

PERSONAL & SOCIAL

CALENDAR OF THE WEEK.

Showing Concordance of the Gregorian, Julian, Moslem, and Jewish dates.

Gregorian. New style.	Julian. Old style.	—	Moslem.	Jewish.
1914. June.	1914. June.		1332. Shaban	5674 Tamus
26	13	Friday	2	2
27	14	Saturday	3	3
28	15	Sunday	4	4
29	16	Monday	5	5
30	17	Tuesday	6	6
July. 1	18	Wednesday	7	7
2	19	Thursday	8	8

Tuesday is the birthday of H.R.H. the Crown Prince Danilo, who is acting as Regent of Montenegro in the absence of his father.

Tuesday is the birthday of H.R.H. Prince Joseph of Bourbon-Parma, uncle of the Crown Prince of Bulgaria.

Thursday is the birthday of Princess George of Greece, the daughter of Prince Roland Bonaparte.

Saturday is the birthday of H.S.H. the Prince of Wied, brother of the Mpret of Albania, and son-in-law of the King of Wurttemburg.

Sunday, Shaban 4, will be the anniversary of the wedding of Princess Hadige Hanum, sister of H.H. the Khedive, to Prince Abbas Pasha Halim.

H.M. the Queen of the Hellenes, with T.R.H. Princess Eirene and the infant Princess Catherine, arrived on Thursday last week at Eastbourne, where they will stay for several weeks. On Monday her Majesty visited their Majesties the King and Queen, and remained to luncheon, and on the same day called on H.M. the Dowager Queen Olgo of the Hellenes at Marlborough House.

His Majesty the Tsar of the Bulgarians has returned to Sofia from abroad by way of Belgrade and Nish.

H.M. the Dowager Queen Olga of the Hellenes arrived in London from the Continent on Sunday evening on a visit to H.M. Queen Alexandra.

H.I.R.H. the Archduke Francis Ferdinand has been in Bosnia in connection with the manœuvres.

H.R.H. the Crown Prince of Roumania visited Silistria last Saturday.

H.R.H. Prince Christopher of Greece was present in the Royal Box at Ascot on Friday last.

H. H. the Khedive of Egypt is expected in London on a private visit at an early date. His Highness will be received by his Majesty the King, at Buckingham Palace, and will spend some part of his time at Lord Kitchener's country seat at Broome Park.

Earl Kitchener arrived at Dover by the five o'clock boat on Tuesday afternoon, and motored to his Kentish residence.

On Saturday H.E. the High Commissioner of Cyprus, Sir Hamilton Goold-Adams, G.C.M.G., celebrates his birthday.

On Saturday Mr. Cumberbatch, H.B.M. Consul-General at Beyrout, who was formerly at Smyrna in a similar capacity, celebrates his birthday.

H.H. the Turkish Ambassador attended Lady Dawson's garden party, held at her residence, 7, Edgwarebury House, Elstree, on Saturday.

H.E. the Roumanian Minister and Mme. Mishu have returned to the Legation from the Continent.

Last week H.E. the Servian Minister, M. Boshkovitch, who at one time represented his country in Athens, entertained the British Minister in that capital, Sir Francis Elliot, Lady Elliot and Miss Elliot, at dinner at the Ritz. Among those invited to meet his Excellency were:—The Hellenic Minister and Mme. Gennadius, the Roumanian Minister and Mme. Mishu, who had just returned from Germany, the First Secretary of the Hellenic Legation and Mme. Rizo Rhangabé, the First Secretary of the Servian Legation, Mr. Georgevitch, Mme. de Prelle de la Nieppe, wife of the Councillor of the Belgian Legation, and Captain Wolkoff, Naval Attaché at the Russian Embassy.

H.E. the Hellenic Minister visited Eastbourne on Sunday.

T.E. the Bulgarian Minister and the Persian Minister were amongst those who accepted invitations to be present at the Royal Geographical Society's conversazione on Tuesday evening at its house, Kensington Gore.

The Earl of Derby, G.C.V.O., took the chair, and Lord Emmot, G.C.M.G., Under-Secretary of State for the Colonies was amongst the speakers at the Third International Congress of Tropical Agriculture at the Imperial Institute on Tuesday, when a paper on "'The Work of the British Cotton Growing Association" was read by Mr. J. A. Hutton, chairman of the association.

Mr. J. D. Bourchier, the Balkan Correspondent of *The Times* has returned to No. 13, Arlington Street, St. James's, S.W.

Baron von Falkenhausen, German Consul at Cairo, will not return to Egypt after his present leave of absence, having sent in his resignation to the Foreign Office at Berlin, as his request to be transferred elsewhere has not been taken into consideration.

Mr. Michael Pherekyde, formerly President of the Roumanian Lower House, has been elected President of the Constituent Assembly.

Our Sofia Correspondent states that Mr. Nedkoff, the newly-appointed Bulgarian Consul-General at Salonika, has left for his post.

Colonel Bernard Pasha left Cairo last week for England.

The betrothal of the daughter of the deputy Nedjm-ed-Din Mollah Bey, with Ebulhuda Bey, Secretary-General to the Sheikh-ul-Islam, has been celebrated in Constantinople. T.H. the Grand Vizier, the Sheikh-ul-Islam, Hairi Effendi, the Fetva-Enimi, and several other high officials were present at the ceremony.

Mr. Stellakis, Hellenic Consul at Port Said, has been promoted Consul-General at Ekaterinodar, and Mr. Raphael, Hellenic Consul at Taganrog, has been promoted Consul-General at Jerusalem. Mr. Chorbajioglu, of the Macedonian Administration, has been appointed Consul-General at Adrianople vice Mr. Mavrondis, who is transferred to Trieste.

Izzet Pasha has arrived in London from Constantinople.

The Press Bureau in Cairo has issued an official denial of the rumours as to the Sirdar's approaching retirement, but these rumours still persist, and it is said that Lord Edward Cecil will be his successor.

Amongst the honours granted by the King on the celebration of his Majesty's birthday were the following:—

An Earldom of the United Kingdom has been conferred upon Field-Marshal the Viscount Kitchener of Khartoum, H.M.'s Agent and Consul-General in Egypt. Baronies of the United Kingdom have been conferred upon Sir Edgar Vincent and upon Major-General John Fielden Brocklehurst. Murdoch Macdonald, Esq., Under-Secretary of State for Public Works, Egypt, has been promoted K.C.M.G. Frank Gerard Clemow, Esq., M.D., British Delegate to the Ottoman Board of Health, has been appointed C.M.G. Arthur King Lewis, Esq., Director-General Egyptian Customs Administration, has been appointed C.M.G. Major Lee Oliver Fitz-Maurice Stack, Civil Secretary to the Sudan Government, has been appointed C.M.G. General Sir Henry Macleod Leslie Rundle, Governor and Commander-in-Chief, Malta, has been promoted G.C.M.G. General Sir Francis Reginald Wingate, Sirdar, Egyptian Army, and Governor-General Sudan Administration, has been promoted G.C.B. Major Charles Hotham Montague Doughty-Wylie, Member of the Albanian Delimitation Commission, has been appointed C.B. H.E. Sardar Arfa, Amir Nuyan Sheikh Khazal Khan-iba-Haji Jabir Khan, Sheikh of Mohammerah, has been appointed Honorary K.C.I.E. Sheikh Mubarak-bin-Surbah, Ruler of Koweit, has been appointed Honorary K.C.I.E. Sheikh Esa Bin Ali Al Khalifa, Chief of Bahrein, has been appointed Honorary C.S.I. Haji Muhammad Ali, Rais-ut-Tujjar, of Mohammerah, has been appointed Honorary C.I.E.

Parker Bey, director of the Police School, left Cairo for England this week on three months' leave.

Mr. C. Crawley, of the Public Works Ministry, Cairo, is going on leave this week.

WHERE TO STAY.

LAUSANNE-OUCHY (Switzerland).

SAVOY HOTEL.
Near the lake, with splendid park.

CECIL HOTEL.
In the town and 5 minutes from the station.

Two First-class Family Hotels.
High-class Cuisine. French Chef.
J. SUMSER, Manager-Proprietor.

Sofia (Bulgaria).
GRAND HOTEL BULGARIE
(opposite the Royal Palace).
First-class Hotel. Entirely renovated and beautifully situated in the centre of the city, near Post Office, Theatre, Museums, Banks, etc. Electric Light. Central heating. Baths. Garage. Telephone. Garden. French Restaurant. Good wines. Café. Foreign newspapers. Most frequented by English and American Visitors. Interpreter meets all trains. Rooms from 4 frs.

Cyprus.

Dr. Warnock has been granted three months' leave of absence from July 2.

Mr. F. Newhouse, director of the basin conversion works, has been transferred to the Blue Nile district.

Mr. D. P. MacGillivray, managing director of the Sudan Plantations Syndicate, is on his way to England from the Sudan.

Our Bucharest Correspondent writes (June 20):—On the occasion of the Tsar's visit to Constantza, many decorations were conferred. Mr. Bratianu, the Prime Minister, received the Grand Cross of the Order of St. Alexander-Nevski; Mr. Costinescu, Minister of Finance, and Mr. Porumbaru, Minister for Foreign Affairs, the Grand Cross of the Order of the White Eagle of Poland; other members of the Cabinet, the Grand Cross of the Order of St. Anne. The former Ministers, Mr. Take Jonescu, Mr. Alexander Lahovary, and Mr. Marghiloman, being already members of Russian Orders, were each presented with gold snuff boxes, set with diamonds. King Carol decorated Mr. Sazonoff with the Grand Cross of the Order of Carol I.

H.M. the King of Servia has conferred the Grand Cordon of the Order of St. Sava on Mr. Neklindoff, formerly Russian Minister in Sofia.

Under the patronage of her Majesty Queen Alexandra and Princess Andrew of Greece, Miss Olga Papadachi and Mr. J. T. Grein are organising a matinée on Thursday, July 2, at the Queen's Theatre in aid of the Greek refugees. Amongst those who have promised their services are Miss Lena Ashwell, Miss Constance Collier, Miss Marie Tempest, Miss Gertie Millar, Mlle. M. de Nys, Mr. Ben Webster, Mr. Graham Browne, Mr. Henri de Vries, Mrs. Alix Grein, Mr. Stacy Aumonier, and Mr. Cyril Scott. Tickets may be obtained from Miss Olga Papadachi, 70, Princes Square.

Colonel F. Lee, who has been appointed to the command of the Lowland Brigade, Territorial Force, served as A.D.C. to the General Officer Commanding, in Egypt, from 1891 to 1895. He also took part in operations in Somaliland in 1903-4, and was present at the action at Jidballi, for which he received the medal with two clasps.

A dinner will be given at the Hotel Cecil to-night in honour of Mr. and Mrs. Noel Buxton, on the occasion of their marriage, by Armenians who desire to testify their appreciation of Mr. Buxton's work in their country's cause. The Right Honourable George W. P. Russell will preside, while among those who have promised to be present are:—The Bishop of Hereford, Mrs. Percival, Sir I. F. Buxton, Sir Edward Boyle, Lady Boyle, the Rev. Harold Buxton, Mr. C. Roden Buxton, M.P., and Mrs. C. R. Buxton, Mr. Aneurin Williams, M.P., Mr. J. H. Whitehouse, M.P., Mr. Philip Morrell, M.P., Mr. Arthur G. Symonds, the editor of *The Daily News*, Tigran Nazarian, the editor of *Taraz* and *Aghbur*, of Tiflis, and many others.

Mr. Allan Ferguson Compton Joseph, the well-known civil engineer and financier in Egypt, was found dead at Charing Cross Hotel on the 15th inst., with symptoms of narcotic poisoning. His widow, who lives at Gerrard's Cross, in giving evidence at the inquest, said that her husband was permanently settled in Egypt, but returned at intervals on business. He had considerable property in Egypt, but owing to recent depression there was unable to realize. What financial troubles he may have had could, however, have been only temporary. The Coroner informed the jury that among the belongings of Mr. Joseph some 250 letters and documents were found clearly proving that he had at least temporary financial difficulties. There was no evidence showing that the poison was self-administered. The house physician of Charing Cross Hospital said that death was due to narcotic poisoning, but what particular poison was used he could not say. The jury returned a verdict of death from misadventure.

H.E. the Hellenic Minister and Mme. Gennadius entertained a large party at luncheon last Friday at the Hellenic Legation, 14, De Vere Gardens, to meet Sir Francis and Lady Elliott, who are on a visit to London from Athens. Among the guests were Lord and Lady Bryce, Ellen Lady Swaythling, Sir Lucas Ralli, and Mr. and Mrs. Pember Reeves.

Lord and Lady Oranmore and Browne have come to 12, Cavendish Place, from Bracknell, Berks.

Lady Inchcape gave a large ball at the Ritz Hotel last Friday night for her daughter, Miss Effie Mackay.

F. Orkhan Bey, the first secretary to the Turkish Embassy, was to leave London yesterday for the Embassy at St. Petersburg, where he has been transferred.

Dr. Eloui Pasha and Dr. MacCallan have been selected to represent the Egyptian Government at the Ophthalmological Congress to be held at St. Petersburg this year.

A marriage has been arranged between Captain S. M. Toppin, Royal Artillery (attached to the Egyptian Army), son of Major-General and Mrs. Toppin, of Bournemouth, and Jessy Viva, daughter of Dr. and Mrs. Coleman, late of Streatham.

The marriage took place yesterday, at St. Nicholas's Church, Hintlesham, Suffolk, of Mr. Francis Goldworth Lowick, fourth son of the late Lieutenant W. N. Lowick, R.N., and Mrs. Lowick, of Westbury-on-Trym, and Miss Norah Anstruther Wilkinson, younger daughter of the Rev. A. Anstruther Wilkinson, Rector of Hintlesham. The bridegroom is secretary and editor of the monthly journal of the British Chamber of Commerce of Egypt. The bride is the sister of Mr. Clennell Wilkinson, assistant editor of *The Egyptian Gazette*.

The service was fully choral, the officiating clergy being the Rev. A. Anstruther Wilkinson and the Rev. Canon Beauchamp, Rector of Copdock and Honorary Chaplain to the Bishop of St. Edmundsbury and Ipswich. The bridegroom's brother, Mr. Morris Lowick, acted as best man, and the bride was given away by her brother, Mr. Clennell Wilkinson. The bridesmaids were Miss Eileen Atkinson and Miss Kathleen Hornung (cousins of the bride), Miss Vivian Snelling (elder daughter of Mr. Rowland Snelling, editor of *The Egyptian Gazette*), and Miss Queenie Willcocks. After the ceremony, the Rev. and Mrs. Anstruther Wilkinson gave a reception at the Rectory, and in the evening entertained the villagers. Mr. and Mrs. F. G. Lowick left for a motor tour in Cornwall and Devon, and will go to Egypt to take up their residence at Alexandria next September.

The presents included a handsome silver tray and illuminated address, presented to the bridge by the villagers of Hintlesham, while among the many relations and friends who sent presents were, their Highnesses Princes Abou Bakr and Ahmed of Johore, the Dowager Lady Blois. Sir Gerald and Lady Ryan, Major-General Murray, Mr. F. J. C. Gansoni, M.P., Mr. Edward Shortt, M.P., and Mrs. Shortt, Mr. E. W. Hornung (the well-known novelist, uncle of the bride), Mr. K. P. Birley (President of the British Chamber of Commerce of Egypt), Mr. and Mrs. R. J. Moss, Mr. and Mrs. C. R. Lias, Mrs. A. du Boulay, Mrs. Pryce Weedon, Mr. and Mrs. Rowland Snelling, Mrs. Travers Symons, Mr. and Mrs. Jack Squire, Mr. W. L. Henderson, Rev. and Mrs. Lucius Fry, Miss Withers Green, Mr. and Mrs. W. P. Burton, Mr. and Mrs. Bunnell Burton, Mrs. and Miss Burnes, Miss Alpar, Colonel and Mrs. Flint, Mrs. Farmiloe, and Mr. and Mrs. H. E. Wortham.

The sudden and unexpected death of the distinguished lawyer, Sir John Gray Hill, will come as a great shock to his many friends and acquaintances in Egypt and Palestine. Although he had reached the ripe age of 75, his friends find it difficult to realize this fact. His vigour of mind and body seemed undiminished. Although well known in his profession at home, where he was once President of the Law Society, and in recent years had done very much in training boys for a career at sea, he was celebrated in the nearer East for his devotion to Palestine. Although he had travelled extensively and written not a little about the Holy Land, his main connection with the land was the beautiful house upon one of the points of the Mount of Olives. Here he and Lady Hill spent some weeks annually, enjoying rest and quiet after a strenuous period of work and social duties in Birkenhead. Recently, Sir John Gray Hill exhibited a very active interest in the Zionist movement, and gave one or two most interesting addresses on the subject. He will be greatly missed, and his many friends would offer the deepest sympathy to his accomplished widow.

DOMESTIC ANNOUNCEMENTS

MARRIAGE.

LOWICK—ANSTRUTHER-WILKINSON.—On the 25th inst., at St. Nicholas Church, Hintlesham, Suffolk, by the Rev. A. Anstruther-Wilkinson, father of the bride, assisted by the Rev. Canon Beauchamp, rector of Copdock, Francis Goldworth Lowick, son of the late W. M. Lowick, Lieut., R.N., and Mrs. Lowick, of Westbury-on-Trym, Glos., to Agnes Norah Anstruther, younger daughter of the Rev. A. Anstruther-Wilkinson.

DEATHS.

HILL.—On the 19th inst., John Edward Gray Hill, Knight, of Mere Hall, Birkenhead, and Ras Abou Kharoub, Jerusalem, suddenly, from heart failure, aged 75.

HORNER.—On June 14, at Royal Victoria Hospital, Belfast (of typhoid), Eleanor Elsie Horner, of the International Nurses Home, Cairo.

PATRICCHIO.—On June 19, at 365, Goldhawk Road, London, W., John Patricchio, aged 81.

WHERE TO STAY.

UPPER EGYPT.

FRIDAY, JUNE 26, 1914.

COMMERCE, NOT CONQUEST.

For many years past there have been complaints, both in private and in the Press, that the British Government was paying no manner of attention to the needs of British trade in Persia, and that that trade was perishing owing to the prevalence of local disorders and the diminution of British prestige. This undoubtedly was the case, and the official mind was not greatly exercized thereby so far as the public could see. Such portions of the public as were interested in the matter either financially or sentimentally bitterly resented the official attitude. Now the Government has gone about on another tack, it has proclaimed its own direct and overwhelming financial interest in what had been pictured as one of the most distressful areas in Asia, and has informed the public that in future the British Exchequer is definitely to be embarked in a business venture in Southern Persia. One would have thought that such an action, implying, as it necessarily must, official oversight of the political conditions of trade in the area of operations, would have satisfied those critics who had deplored the disinterestedness of the Foreign Office and the decadence of British commerce. It has, on the contrary, provoked a considerable number of hostile statements, largely based on the dogma that "The Government can do no Right," and on little else. The Bakhtiari tribesmen, the Russian Government, the Sublime Porte, the oil trade itself, and even the British public have been invoked to show cause why Mr. Churchill's new departure must of necessity be a dangerous or impossible experiment, leading inevitably to all manner of disasters to the territorial integrity of Persia, the military and financial capacities of the Indian Empire, and the commercial standing of a variety of companies enjoying British registration. But the complaints do not ring true—at times they suggest the inspiration of monopolists, at others personal pique or simple commercial jealousy, and as further opportunities occur for studying the new policy its potential advantages tend to become more clearly understood and the objections to be urged against it less and less formidable.

It is one of the best-known lessons of history that in the life of a State there is no opportunity for prolonged repose. If at some point in its career its inhabitants decide that the time has come to sit still for a little and think peacefully about the past, then the only future before that State is likely to be occupied with arrangements for its funeral. A people, after some great effort, may lie down and pant with exhaustion, as men do at half-time. That is different, it is only a necessary rest preliminary to that fresh effort, which again keys the nation up for the strife of aggressive existence. And nowadays existence to be successful must be aggressive. A quiescent or even a defensive existence is a sure herald of decay. A nation can show its aggressive existence by diplomacy or war—both very fashionable on the Continent. Great Britain emphasizes the fact that she is still alive and intends to go on living by a bold stroke and a picturesque policy—but one which combines in itself the two great factors of her strength, her Navy and her trade. More than a generation ago Disraeli, with a calculated *coup de théâtre*, thrust Great Britain into an enormously profitable commercial venture closely connected with her naval and commercial supremacy. Now once again does the nation of shopkeepers announce *urbi et orbi* that it intends to trade imperially. The Admiralty has placed itself in such a position that it requires a large and constant supply of oil at a reasonable cost. It has arranged to supply its own oil at a fair market price—a price which will break to pieces any monopolist ring, but will not hurt legitimate trade—a price which will enable the Government in its commercial capacity to draw reasonable profit from its investment and so enable it to develop its new property on behalf of the public without further charge upon the revenue. Moreover, this is to be done, not as by a department of State, but on the business lines of a commercial undertaking which has to hunt dividends and appease shareholders anxious as to their holdings, and not merely satisfy paid and packed Parliaments. The Government under its business disguise has every hope that it will be able, with the co-operation of India, to develop its concession up to a highly satisfactory pitch, and that within a few years. It is expected that the oil produced on commercial lines will fully supply the Navy if necessary, and it is realized that the Gulf, far from being an inconvenient source of supply, is one of the safest that could be found. So long as Great Britain holds the command of the sea—and it is to ensure that command that this Oil Agreement has been made—the Gulf is inaccessible to an enemy, and the tank-ships are free to leave the refineries and come round the Cape to England. No Navy is adequate to patrol the whole Atlantic against our oil-ships while we command the sea—nor in emergency would it be necessary for the tank-ships actually to make a British port. Under the new conditions of warfare a fleet can "oil" at sea. Consequently such an operation can be performed at any point named by authority and communicated by wireless. It may, then, be taken for granted that now and henceforth the Persian Gulf is a *mare clausum* so far as the acquisition of territorial rights on its coasts by outside Powers is concerned.

On land, where the future of the concession is declared by some to be irremediably gloomy, a little examination helps to show that the pessimists tend to exaggerate. The present administration of Mohammerah, the Sheikh and his Wazir, realizes that it depends for its existence upon Great Britain, which has supported, protected, and assisted that curious political entity in the past and is understood to be pledged to do so in the future during good behaviour. The Sheikh maintains his peace throughout those parts of Arabistan of importance to the working of the concession, and there is no apparent reason why he should cease from doing so. The Bakhtiari chiefs, Samsam es Sultaneh Ilkani and Ghulem Hussein Quli Khan Ilbegi, have a very considerable authority over their tribesmen, and are themselves interested in the working of the concession both as beneficiaries and as its salaried servants. In many places, moreover, the economic pressure which has contributed to the turbulence of the Bakhtiari in the past is yielding to the civilizing influence of the commerce fostered by the existence of the concession and of the wages which can be earned by those whom fate had hitherto made caterans. The pipe-line itself—popularly supposed to be the Achilles heel of the whole affair—is buried away underground and its site adequately patrolled. The new demarcation of the frontier, affecting as it does the actual nationality of some of the Anglo-Persian Company's wells near Kasr-i-Shirin, does not impair the validity of the concession, which has been expressly recognized by the Porte as well as by the other three signatories of the Turco-Persian Treaty. The British Government assumes that its concession is good in law, and that very assumption goes far to settle any doubts upon the point, for those who might endeavour to question its validity know full well that in such a case it would not be the Law Officers of the Crown with whom they would have to deal. The Government, however, is determined upon commerce, not conquest, and fully intends to try whether sterling gold will not pacify Southern Persia more rapidly, and more profitably, than sharpened steel. In any case, the Government will have to see that its millions are not damaged by local preventable causes, and in that fact lies an abundant promise of safety for the British trader. We strongly advise him to profit as early as may be from this unlooked-for improvement, or else he will be forestalled by the pushful foreigner.

THE HEIRS OF THE HITTITES.

HITTITE—ARMENIAN? A THEORY.

During the last generation antiquarians and ethnologists have devoted increasing attention to the problem of the "Hittite" civilisation and language. Who were these strange people who ruled an Empire or confederacy that extended from the Plateau of Konia to Carchemish on the Euphrates, whose rulers for a time waged equal war with the greatest of the Egyptian Pharaohs, who opposed a sturdy resistance to the Assyrian monarchs, whose hieroglyphs still undeciphered by scholars are found at Hama in Syria and within a two days' march of Smyrna? Their gods and kings, as depicted on the monuments that have survived them, show that they were a mountain race, wearing the peaked "snow cap" that the inhabitants of the wintry plateaux of Anatolia still don when the wind begins to bite, the snow boots with up-turned toes that are worn in many parts of the Balkan and Asiatic regions of the Near East, the heavy cloaks, and sometimes the baggy breeches of heavy woollen cloth that almost every up-country native of the interior of Asia Minor wears or wore before it became fashionable or genteel to purchase cheap and chilly "reach me downs." Their physique, too, is that of the present-day peoples of the plateau that extends from the Taurus to the Black Sea, and all historical records of their activity describe them as an intrusive race of Northern invaders, who entered Northern Syria as conquerors, and ruled there and in the Taurus for many centuries; an apparently non-Semitic people, though naturally influenced by the higher culture of the neighbouring Semites of Assyria and Palestine and by the mixed Akkadian-Semitic civilization of Babylonia, warriors in their prime and in the days of decline great traders and middlemen whose cities dominated the trade routes from Alexandretta to Mesopotamia and from Mersina to the interior of Asia Minor.

A variety of theories have been current as to the affinities of this people. They have been identified with the "proto-Babylonians" of Akkad and Sumir, with the ancestors of some of the Caucasian peoples of to-day whose languages are as distinct from those of their "Aryan" or "Ural-Altaic" neighbours as Basque is distinct from French, with the "Turanians," *i.e.*, with peoples of what are now called the Turkic and Tatar branches of the Altaic stock, with Iranians and even with the enigmatical Etruscans concerning whose affinities we are as much in the dark as we were 100 years ago. But till a decipherable bilingual inscription is discovered and satisfactorily interpreted by our antiquarians nothing can be said to be known as to their linguistic affinities, save that they were in all probability non-Semitic. Some, too, of the above identifications have been already abandoned by scholars. The theory that the Hittite was a sort of proto-Turk who entered Western Asia 3,000 years or so before the Seljuks is unsupported by archæology. All recent discovery in Central Asia and in Russia goes to show that the Turco-Tatars are late comers into the Near and Middle East, that much of what has been called Turkestan since the early middle ages was inhabited before the Christian era by nations that seem to have been akin rather to the Iranians or to have formed a link between them and the "Aryan" speaking peoples of Europe; that the Scythians of Herodotus, once regarded as typical Mongolian nomads, were of Iranian rather than Turkish affinities, as the names of their sovereigns and a few words preserved by Herodotus seem to prove. Nothing has yet been discovered to connect the Hittites racially with the early non-Semitic Babylonians. The Etruscan theory is a confession of ignorance, and we are now left with two possibilities: One, that they were of stocks which once held most of Asia Minor, left the Lycian and Vannic inscriptions as a memorial of their existence, and may conceivably be represented by some of the strange peoples of the Caucasus, Georgians, Mingrelians, Tcherkess —who knows—the other that they were a Western, and probably an European, intrusive race which pushed from West and North towards the Euphrates and Syria, and was long established, and formed a state or a confederacy of states in the central plateau region of Asia Minor.

Is it not possible that in the Hittites we may have the ancestors of the Armenians? That in Cappadocia and what was once called Lesser Armenia we have the centre round which the invading tribes from whom this ancient race sprang grouped themselves for centuries till pressure from the West or South drove large sections of them into what is to-day Armenia, i.e., the Eastern plateaux and mountain masses between the Euphrates, the Black Sea, the Caucasus, and the Persian border? Such a theory must be speculative in default of exact data, and may at any moment be disproved by fresh discovery; yet for the moment it seems at least as probable as its only important rival. Though much influenced by Persian, as English was influenced by the Romance speech of the Norman-French, Armenian is not an Iranian tongue, but an independent speech possessing affinities with Iranian on the one hand and with Slavonic and Albanian on the other. Now early Greek tradition connected the Armenians with the Phrygians, who had a great empire in north-west Anatolia till the coming of the Cimmerians, and likewise connected the Phrygians with the Thracians, a people of whom we know little, but whom certain archæologists and philologists believe, for reasons that cannot be given here, to have been more rather than less akin to the Albanians, the last survivors of a group of peoples that has been absorbed by Latins, Greeks, and Slavs. Early Greek tradition is by no means always wrong, and its tales of a series of invasions of Asia Minor from Thrace are in all probability founded on fact. That the Armenian came from the West is attested not only by tradition, but by certain well-known historical facts. At Van there are a number of cuneiform inscriptions written in a tongue which the balance of philological opinion connects with some of the languages now spoken in the Caucasus, and which are at all events neither Iranian nor Armenian. They relate the history of the kingdom of Van or Urartu (Ararat) from the tenth century B.C. to the middle of the seventh century B.C., when King Sarduris II. of Van made an alliance with Assur-Bani-pal, the last great Assyrian monarch. Iranian tradition gives no indication of the existence of Armenians east of Van in those days, and it is therefore necessary to believe that the Armenians who now form the majority of the population of the Van district came from somewhere in the West. Furthermore, when Xenophon and the famous 10,000 marched across Armenia to Trebizond, they found Armenians for only four days' march (fifty or sixty miles for armoured infantry in mountain country in bad weather), after they had crossed the Kara Su. The extension of the Armenians into the Hinterland of Trebizond clearly came at a later date. Moreover, such Phrygian inscriptions as have been deciphered show that Phrygian was an Indo-European tongue with certain distinct affinities with Armenian as with Greek.

Of the language spoken by the masters of the Hittite Empire, the centre of which for a long period was at Boghaz Keui, north of Jozgad, in North Central Anatolia, we know practically nothing but the names of certain gods and kings. It is, however, worth noting that the nominatives of these names end in *s* and the accusatives in *m*. This empire or confederacy has left most of its remains in the area between Boghaz-Keui in the north and Adana in the south, and between Angora and Egirdir on the west, and Sivas and the Euphrates at Jerablus on the east. The list of the nations which accompanied the "Hattie" (Hittites) in their wars against the Ramessid Pharaohs includes the Dardani and other peoples of Western Asia Minor, and there are abundant traces of the "Hittite" civilisation in Phrygia. After the Assyrian Empire had formed a barrier to any Hittite advance towards the east, and had begun to conquer the most eastern Hittites, Phrygia seems to have been a powerful and independent kingdom which was finally overthrown in the general confusion caused by barbarian invasions that overran much of West Asia in the sixth and seventh centuries B.C. The Cimmerians, who are described as the most pestilent of these invaders, came from Europe, and it is hard to resist the impression that the early history of Asia Minor resolves itself into a series of invasions from the north-west. The invaders settle down, found kingdoms, and are in the end displaced or conquered in their turn by more energetic newcomers. Till the Persians appear, the movement is from west to east. The Greeks and Romans revive the old order of things till the later Persian and finally the Moslem conquests.

The connection of the Phrygians with the Hittite Empire is, of course, no proof that the Hittites were Indo-European; nor does the fact that the Armenians undoubtedly moved

from what was once the centre of Hittite civilization into their present abode prove that they were Hittites. The Armenians may have been in their earlier stages a subject tribe or a part of a "Hittite" confederacy without being Hittites. Only linguistic evidence can prove the theory here suggested, viz., that the Armenians were either Hittites or a section of a Hittite confederacy and were driven eastward in the welter and confusion in which so many empires foundered between 700 B.C. and 600 B.C.

The type that is so often figured on the Hittite sculptures is decidedly Armenian. The heavy build, short legs, hooked nose, full beard, and, above all, the short, flat-backed "Armenioid" head are characteristic, but here again one must remember that environment influences the physical character of a race, and that the Armenians may well have absorbed much non-Armenian blood in their passage across Asia Minor. Purity of race can never have existed in regions where female slaves were an article of commerce and polygamy recognized, and the Armenians (Haik) of Indo-European speech from the West may have been but a small aristocracy in the midst of a primitive population of slaves and clients. If our archæologists could only find the real key to the Hittite hieroglyphs and a tablet, for example, bearing the pictorial symbols of the "Hatti" and a transliteration of the same in Aramaic or Phœnician characters!

THE PRESS ON THE NEAR EAST.

British Policy in Persia.

In an able article under the heading "The Government's Oil Adventure," which appears in *The Times* (June 20), both the Admiralty and the Foreign Office receive very severe castigation. It is contended "that both Mr. Churchill and Sir Edward Grey have grossly under-estimated the probable consequences of their action." We quote from the concluding paragraph:—

We wish to see a plain declaration of the intentions of the Government regarding Persia substituted for the present tendency towards evasion and muddle. We want to put an end to the confusion of purpose which on the one hand refuses protection to British trade on the main southern routes, and on the other hand talks lightly of pouring British troops into the oil-wells area. We want to stop the sorry spectacle of Government Departments working impetuously upon separate and conflicting lines without any unity of aim. Mr. Churchill drives his bargain, Sir Edward Grey comes in and blesses it and reverses his whole policy of non-intervention at a nod, and neither of them thinks of nor understands the limitations imposed upon the Indian Army. If they had frankly told the country that they were entering upon a very dangerous undertaking, that it might have far-reaching and disturbing consequences, but that the advantages to be gained were greater than the risks involved, we would then have given due weight to their arguments. They did not do so. They glossed over the dangers, they affected to despise them, they tried to lead the discussion in other directions. We believe they erred because, after the fashion of Ministers long in office, they did not give the subject sufficient attention.

Cyprus of To-day.

Dr. Max Ohnefalsch-Richter contributes to the June number of *The Pall Mall Magazine* an article of great archæological interest on "Cyprus: Its Ancient Civilization." The writer has also something to say on the island as it is at the present time in a short introductory passage from which the following is an extract:—

It has generally been recognised that many improvements have been made in Cyprus under the British occupation since 1878. But the Government has been unable to carry out any drastic reforms because of the heavy annual tribute of £92,800 which has been and is still paid to Turkey. It is true that four-fifths of the Cypriotes are Greeks; but as Greece has already doubled her territories since the Balkan wars, and as she will obtain most of the Ægean Islands, an annexation of far-off Cyprus would only be a great burden to her at the present time. Great Britain, however, might with advantage take the present opportunity to annex Cyprus and to commute the tribute to Turkey. From its geographical position opposite to the Gulf of Alexandretta, Cyprus will always have a certain political value for Great Britain. Its commercial value is small. Lying away from the naval route to the Near and Far East, the island has no transit trade whatever. For the same reason it can never become a coal or fuel station like Suez. Famagusta, its sole harbour, will never be a large naval station like Malta, while lack of coal and sufficient water power prevents the growth of mechanical industry.

With regard to the future of Cyprus the writer adds:—

Should Cyprus be annexed as a Crown Colony and the tribute be commuted, it will become, perhaps, the most prosperous and flourishing little community in the Mediterranean, "the Garden of the East," as its first High Commissioner, then Sir Garnet Wolseley, promised it should be. But Cyprus will never reach again such periods of wealth as the island of the golden-tressed Aphrodite has seen in ancient times, during the Byzantine era and in the Middle Ages.

The Fighting round Durazzo.

The Manchester Guardian (June 22) publishes an interesting narrative of the fighting round Durazzo on the day when Colonel Thomson was killed. The letter, which was "received by a correspondent from a friend who was present at the battle," and is dated June 16, gives a vivid description of the confusion and excitement of the day. The following is an extract:—

I got a black coffee and went up to top of hill behind town with a Mr. Corbett, an Englishman, an old man and very game, who came in the same boat here with me. Some Kosovo men with rifles were behind a bank, and as the fire seemed dangerous we crawled along to their cover, where it was quite safe, and a few bullets came over. Then up rode the King. I hadn't seen him before, but had had a long interview with the Queen, who is a bright, intelligent woman. The King looked lean and haggard and as yellow as if he had a touch of fever. He stood up conspicuously, and Corbett cried out to him that he had better take cover. He looked doubtful, and I added, "We have really had four or five bullets here," and he lay down under our bank for a bit. By the middle of the morning the fire was very sharp. The insurgents were fairly close to the town and were sheltering in force, I believe, in the river bed, as it was on that that our gun fire was largely directed. Our guns were served by Austrians, whether officers or civilians I do not know. But the fire seemed very good, so far as one could see from a distance, and all the shells exploded. The natives, as usual, having once began to fire, fired like mad, wasting hundreds of cartridges. It was amazing to see the way both parties walked about in the firing zone conspicuously; I could see them on open spaces, without borrowing Corbett's glass.

The writer of the letter had the news of Colonel Thomson's death early, but he says:—

I had kept dark the fact that Thomson was hit, as it seemed better. But by midday all the town knew the poor chap was dead. A most distressing thing—a fine, plucky chap, and he leaves a wife and child. And such a hole-and-corner affair! After lunch X—— came to find me. He was quite upset, as he had been just alongside Thomson. Thomson turned away from him to urge his men to advance. X—— heard a bullet, looked back, and saw Thomson drop, shot in the neck and unconscious at once. Bled internally. They carried him to a hut, but he died almost directly.

The Ægean Crisis.

In an article in *The Academy* (June 20), under the heading "The Crisis in the Near East," the view is taken that:—

In all the circumstances it is little wonder that at the present moment feeling runs high throughout Greece. Whether or not the Government is exploiting the agitation caused by the ill-treatment of Greeks in Turkey is, for all practical purposes, beside the question. M. Venizelos is no cynical opportunist, nor is he lacking in astuteness. He realises that, while the situation will not permit of procrastination, the moment, so far as national sentiment is concerned, could not be more favourable for decisive action. We cannot do otherwise than hold to the opinion that true statesmanship justifies the Greek Government in issuing at this stage the proclamation of annexation of Chios and Mytilene. Such action, together with the Note which has just been presented at the Porte demanding past and future satisfaction for Greek subjects residing in the Ottoman Empire, is rightly intended to force Turkey's hand. Delay would mean the delivery of the two Dreadnoughts to the latter Power and the temporary disappearance of Greek supremacy on the sea.

NOTES AND NEWS.

NEAR EASTERN EXCHANGES.

On the dates given the rate of exchange ruling in the undermentioned centres on London was:—

Alexandria.....	June 25..	97⅜—⅞ p.t.
Athens.....	June 22..	25·17 drs.
Bucharest.....	June 25..	25·43½—25·51½ lei.
Constantinople ..	June 25..	109¼—110 pi.
Sofia.....	June 22..	27·12—27·20 leva.
Teheran.....	June 24..	55½ krans

Devonshire Square,
London, E.C.

I see that the old scheme of constructing a pipe-line from Chiasurkh—the Turkish section of the Kasr-i-Shirin field—to Baghdad is again being mooted. Readers of The Near East will remember that as long ago as March last it was pointed out in our columns that to attempt to use the Tigris for oil transport from Baghdad to Busreh was out of the question even now—and in the near future the navigable value of the river for such purposes would be even further impaired. At that time it was laid down by a well-informed writer that the only measure to be adopted adequate for dealing with the oil on a commercial basis was the construction of a pipe-line from the oilfields direct to refineries capable of discharging into sea-going ships. The Anglo-Persian Company already has refineries at Mohammerah at the head of the Gulf, and a pipe-line from Kasr-i-Shirin to that port would be more that 150 miles shorter than the existing pipe-line from the Baku Fields to the Black Sea. It is idle to suppose that Kasr-i-Shirin oil can find a market in Baghdad for railway use when the new railway will in a few months actually traverse the enormously wealthy Gayara Field on the Tigris just south of Mosul, consequently I cannot see any reasonable ground even for the rumour of a Chiasurkh-Baghdad pipe-line.

***

I should also like to remind our readers that on March 20 The Near East published a map showing the Turkish area of the Kasr-i-Shirin Field as being on the Ottoman side of the frontier, a geographical fact which appears to have been unknown to some of our greatest contemporaries until they were told about it in the *Sind Gazette* as a piece of news. I suppose we must console ourselves with the reflection that there is now more truth than ever in the phrase *ex oriente lux*.

***

Although, for the moment, at any rate, relations between Turkey and Greece seem to be less strained, it cannot be said that all danger of war has been eliminated. The sale of the American battleships "Idaho" and "Mississippi" to Greece was ostensibly effected as a guarantee of peace. But the forthcoming completion of the Turkish battleship in England will not tend to make Turkey more amenable to the demands of Greece. In any case, Lloyd's are inclined to take a somewhat pessimistic view, and during the last week rates on the war risk market have stiffened considerably. The highest rates, amounting to from 40s. to 60s. per cent., have been paid on grain cargoes in Greek bottoms consigned to European ports from the Black Sea, the Sea of Azoff, and the Danube. The reports of mine-laying at Smyrna and in other territorial channels have also made shippers nervous. The regulations issued by the harbour authorities for the navigation of the Dardanelles, of which we give a summary on another page, would be almost ludicrous if they were not so irritating to shippers. To all requests that foreign ships may be permitted to leave the Dardanelles at their own risk at night the authorities have turned a deaf ear. Further, should any vessel endeavour to pass certain points after sunset, blank shot—at the rate of half a Turkish lira a shot—will be fired across her bows. Should she persist, round shot will be fired at the rate of one Turkish lira per shot.

***

It is announced that the arrangements for a German loan to Bulgaria have now been completed. It was thought at one time that the negotiations would fall through, as Bulgaria was unwilling to grant the guarantee of a tobacco monopoly, which the German financiers demanded. This difficulty has now been overcome, and a director of the Disconto-Gesellschaft has already left Berlin for Sofia, taking with him the loan contract. This fresh German endeavour to re-establish her prestige in the Balkans, which was somewhat damaged by the experiences of her protégé, Turkey, during the war, is of peculiar interest. It is clear, too, that Franco-Russian financiers—and it is even said an English group—determined to make an effort to counteract the enormous influence which Germany must acquire in Bulgaria by means of the new loan, by making offers themselves. The proposals were, however, reluctantly refused.

***

The results achieved by the Imperial Ottoman Bank during 1913 are distinctly satisfactory. The net profits, it is true, only showed an increase of a few hundred pounds, as compared with those for 1912—£362,066, as against £361,223. But the period of reconstruction after a war is always the most trying, and Turkey, in view of her strained relations with Greece, must still be regarded as on a war footing. Such a condition of affairs does not tend to peaceful development and financial enterprise. The directors, however, have been able to declare a dividend of 7 per cent., the same as in 1912, and £23,260 is carried forward as against £22,400. Another hopeful feature of the balance-sheet is the large increase in current accounts, which is a sure feature of returning confidence. At the end of 1913 current accounts stood at £13,452,000. as against £10,935,000 at the end of 1912; while fixed deposits are returned at £1,222,000, against £1,152,000, and bills payable at £1,765,000, against £1,703,000. These totals mean a great stride forward, and it is permissible to assume that the result for 1914 will be even better.

***

Three years ago Bulgarian attar of roses reached the extraordinarily high figure of 3,000 frs. (£120) the kilogram. This naturally did not suit the book of the foreign buyers of this product, the manufacturers of perfumes, who concocted a scheme to bring the price down. They agreed among themselves not to buy Bulgarian attar of roses for a specified period. "In consequence of the limited export," says a Bulgarian correspondent, "stocks amounting to nearly 10,000 kilograms. of attar of roses were accumulated by Bulgarian producers, which may be valued at £1,200,000 out of the total national wealth. The boycott by the Western perfume manufacturers has had its effect. The price of attar of roses has dropped considerably, and exportation at the reduced prices has already begun. The boycott has been removed, and in a short time it may be expected that the whole of the available stocks will be bought up for export. The result will be that a considerable amount of gold will be brought into the country." This boycott strictly carried out by an international ring of consumers against a whole nation of producers is a remarkable illustration of two characteristics of modern business methods — combination and internationalism. I suppose Bulgaria will have to take it lying down, unless, however, she can organise a perfume manufacture of her own and consume her own raw material.

***

Advices from Egypt state that a committee has been formed under the patronage of Prince Ahmed Fouad to organise a joint Exhibition of Ancient Arab Art and Modern Egyptian Industries. It is expected that the Exhibition will be opened at Heliopolis some time in February next year. The Heliopolis Company has consented to place the Stadium and the grand hall of the Heliopolis Palace Hotel at the disposal of the Exhibition Committee. The Stadium will be turned into a model *suk* or market, where workmen may be watched at the actual performance of their tasks, and a valuable collection of ancient Arab art will be housed in the hall of the Palace Hotel. It is hoped that the Exhibition will not only prove a great draw to the tourists who flock to Egypt, but that it will serve to revive appreciation of ancient Arab art, and to show how it may be applied to modern uses.

***

During last year 8,675 parcels arrived at Corfu by post, chiefly from Germany, France, and Italy, an increase of more than a 1,000 over the total for 1912. It is characteristic of our rivals that they are quick to take advantage of any new method of doing business which promises to open a profitable market for their goods. Seemingly, the mail order business does not appeal to British exporters. At any rate, a British Consular Report on Corfu affirms that all countries except the United Kingdom have taken advantage of the facilities for sending out to Corfu packets by parcel post with payment against delivery, and that, consequently, trading in small quantities with Germany, France, Italy, and other countries has increased. If this business pays our foreign rivals, why do British firms refrain from entering the field? Surely here is an opportunity neglected.

***

By an Act passed on January 2/15, 1914. provision is made for the loss of Hellenic nationality by naturalization in a foreign country for which the permission of the Hellenic Ministry of the Interior is essential. A Greek subject who acquires foreign nationality without such permission retains in law his Hellenic nationality with all rights and obligations pertaining thereto.

Constantinople Business Letter

(From Our Own Trade Correspondent.)

Constantinople, June 20.

Fusion of Two Banks.

For some time negotiations have been taking place for the fusion of the National Bank of Turkey and the Banque de Salonique, and it is now stated that an agreement has been reached between these two establishments, and its ratification in detail is only a matter of days.

The balance-sheet for the year 1913 of the National Bank of Turkey, of whose capital of £1,000,000 only one-fourth is paid up, shows gross profits amounting to £T52,653, with working expenses of £T28,863, leaving a net profit of £T23,790. After carrying 10 per cent. to the reserve fund and paying 5 per cent. to the shareholders, various sums were carried forward to the credit of the founders and the shareholders.

As regards the Banque de Salonique, its capital, fully paid up, amounts to £T880,000, and its balance-sheet for last year shows net profits amounting to £T55,718. At the last annual general meeting, held on May 20, the shareholders authorised the change of the title of the bank and the issue of new capital amounting to £T440,000.

Shipping Intelligence.

The Maritime Chamber took the opportunity of the advice that the navigable channel of the Dardanelles had been increased to 1,400 metres to request the authorities that foreign vessels be allowed to pass out of the Straits at night at their own risk. The reply which has been received to this request is laconic and to the effect that ships are not permitted in the Dardanelles by night.

A notice of the harbour authorities, communicated by the Sublime Porte to H.M. Embassy, advises that vessels are not permitted to enter the Bosphorus from the Black Sea beyond Kavak after sunset, and lays down the following regulations for the observance of ships :—

1. No vessel is permitted to pass in beyond the Bay of Buyuk Liman after sunset.
2. Shipmasters are required to comply with the light signals at Buyuk Liman.
3. Half a Turkish lira will be charged for each blank shot, and one Turkish lira for each ball shot fired upon vessels contravening this order.
4. A ball shot will be fired upon any vessel attempting to pass Anadol Kavak after sunset.
5. When the weather is so bad that a vessel cannot anchor for the night at Buyuk Liman, vessels may proceed to an anchorage at Kavak.

Strict observance of these regulations is required, as a non-compliance may involve the damage or even the sinking of a vessel, for which the Ottoman authorities will assume no responsibility.

Electric Tramways.

With the regular arrival of new cars, the Constantinople Tramway Company has been able to increase the number of its cars running on the lines which were already open to the public, as well as to open new lines to traffic, and as a consequence its monthly receipts show a steady growth during the last three months, those for March being £T15,509, those for April £T17,657, and for May £T20,587. No comparison is possible with last year, as during the war the company's horses had been requisitioned, and, pending the electrification of its lines, the entire service was interrupted. The highest receipts during one of the previous three years were in 1911, when they amounted to £T96,051 during the twelve months, the working expenses averaged 87 per cent. of the gross receipts during the years 1909, 1910, and 1911. The capital of the company was to the end of 1912 £T440,000, this capital has since been further called up and appears in the balance-sheet for 1913 as £T656,878. At the last annual general meeting the directors were authorised to increase this by the issue of shares to the amount of £T750,000 and debentures for a like amount.

The statutes of the Ottoman Company formed for the construction and working of an electric tramway system for Broussa have been ratified by the Ministry of Commerce. The company will have a capital of £T50,000, and the concession, which was granted to the French Périer group, is for a period of seventy years.

Several propositions for the establishment of electric tramways in various towns of the Empire are at present occupying the attention of the Ministry of Public Works. A French group are interested in the electric trams and lighting of Samsoun, and are said to have already sent engineers to the spot to report on the subject. Local parties have applied for the concession for the electric lighting and trams of Trebizond. The municipality of Van has asked for a concession for a period of forty years, with a view to the formation of a company for the establishment of an electric tramway service in that city.

The Constantinople Quay Company

The report of the board of directors for the year ended December, 1913, show receipts amounting to £T129,440, which is the highest on record, and greater by £T14,770 than during the previous year. After deduction of working expenses, the net profits during the year amounted to £T43,340, and this, together with the balance of profit and loss account brought forward from last year permits the payment of a dividend of 3½ per cent. to the shareholders, the placing of £T20,000 to the statutory reserve fund, and the carrying forward to next year of the sum of £T8,160.

Port of Haifa.

The Ministry of Public Works has approved the plans for the construction of the new port of Haifa by the French group at the head of which is the Schneider firm.

AGRICULTURAL REFORMS IN CYPRUS

(From Our Own Correspondent.)

Cyprus, June 22.

Agricultural Banks.

A Bill dealing with Agricultural Banks, introduced by Mr. Theodótou, M.L.C., has been passed. It is hoped that this will lead to good results. It is the best step forward that has been made towards the relief of the peasantry, whose indebtedness is one of the principal obstacles to progress in the island. Mr. Theodótou has been most painstaking in his efforts to solve the problem which has been so long under consideration. Mr. Theodótou has also done good service by bringing home, by means of speeches and otherwise, to the peasantry the need of strict forest preservation, and of the damage caused by goats.

Carob Disease.

With a view to remedial measures in dealing with the disease which has attacked carob (locust bean) trees, a Commission has been appointed by Sir Hamilton Goold-Adams, to investigate and report. The new Director of Agriculture, Mr. W. Bevan, and several District Commissioners and members of the Forest Department are members.

Agriculture and Stock-rearing.

The Agricultural Department has done well in organizing meetings of agriculturists for practical demonstration in agriculture and stock-rearing. These are held on fixed dates, at the Government Nursery Gardens, at Nicosia.

NEWS FROM ALL SOURCES.

Our Belgrade Correspondent states that the Servian Government having applied to the German Government to recommend an agricultural expert to act as adviser attached to the Council of the Ministry of Agriculture and Commerce, the German authorities recommended Dr. August Gehrkens, who has since been accepted for this post at a yearly salary of 18,000 francs.

The Board of Trade Journal states that information has been received at the Commercial Intelligence Branch of the Board of Trade, from a trustworthy source, with reference to a trader at Corfu. Certain particulars will be communicated in confidence to firms in the United Kingdom who may be interested on personal application at the Commercial Intelligence Branch of the Board of Trade, 73, Basinghall Street, London, E.C.

In the first three months of this year Servia exported to Italy 6,820 oxen and 2,290 swine of the total value of four million francs.

From January 1, 1915, the maximum draught allowed for vessels passing through the Suez Canal will be raised to 30 feet (9.14 metres).

The new offices of the Anglo-Egyptian Bank at Alexandria, which are housed in one of the finest buildings of the town, were furnished throughout by the Shannon, Ltd.

The Serbo-Montenegrin Commission for the delimitation of the common frontier is again at work.

The production of wines at Corfu last year was only moderate (according to the French Consul at that place) owing to the exceptional drought prevailing from June to August, which was prejudicial to the vines. The vintage hardly reached 90,000 hectolitres, so that considerable quantities of wines were imported from Levkas, Cephalonia, from the Archipelago, and especially from Santorin.

The contract for the supply of postage stamps, postcards, etc., to the Egyptian Postal Administration during a period of five years, commencing on January 1, 1915, and ending December 31, 1919, has been awarded to Messrs. Thos. De La Rue and Co., Ltd., of London, whose tender was the lowest of those submitted.

At the last meeting of the Committee of the British Chamber of Commerce of Egypt it was announced that, with regard to correspondence exchanged with the International Chamber of Commerce, the Chamber concurred with the opinions already expressed by important home Chambers that the advantages to be gained by a second mail service between England and India were out of proportion to the expense involved, which would have to be borne largely by the British taxpayers.

The Astra Romana Petroleum Company, of Bucharest, last year produced only 444,024 tons of oil, against 447,790 tons in 1912; but owing to higher selling prices, the net profits rose from 3,196,031 lei or francs to 6,387,994 lei, and the dividend is increased from 5 to 10 per cent. on the share capital of 60 million lei.

EGYPTIAN FINANCES.

The Interim Account.

(From Our Own Correspondent.)

Cairo, June 16.

Last night's *Official Journal* contained the final figures for the first quarter of the year —the period for which a special *interim* Budget was drawn up owing to the alteration made in the State financial year. The revenue, which had been estimated at £E3,650,000, amounted to £E3,679,754 and the expenditure, estimated at £E3,495,000 (ordinary £E3,315,000 and extraordinary £E180,000) reached £E3,558,292 (ordinary £E3,316,146, and extraordinary £E242,146). A surplus of £E121,462 has therefore been realized, as against £E155,000, the amount budgeted for.

While the revenue has, therefore, exceeded the estimates by about £E30,000, the ordinary expenditure has comparatively speaking been kept at the figure originally fixed. The extraordinary expenditure has, however, exceeded expectations by over £E62,000. This is in part due to the fact that the new credits for urgent work, which were fixed at £E58,000, had to be increased to £E86,516, of which £E73,927 has actually been spent during the period, while instead of spending, as was anticipated, only £E122,000 of the old credits (£E633,414) brought forward from 1913, the sum actually spent was £E168,219.

Of the new credits opened and spent during the *interim* period, £E15,816 was absorbed in dealing with bubonic and cattle plague; £E16,020 by *sadds* (temporary dams) in Lower Egypt; £E3,554 in measures for the prevention of contraband traffic across the frontiers; and £E2,460 in the construction of new telephone lines. Of the amount spent from old credits £E40,000 was spent on new schools, £E46,000 on Public Works and £E5,500 on new barracks in the Sudan.

Realized Surplus.

The realized surplus goes as usual to the Reserve Fund. This fund, on January 1st, 1914, stood at £E5,848,763. A sum of £E34,535 was obtained during the quarter by the sale of Government lands, and a further amount of £E13,658 by sundry special receipts. Both of these items have been placed to reserve. On the other hand credits to the amount of £E1,285,604 against the reserve fund were carried forward from 1913, and new credits for urgent works for £E120,700 were opened during the quarter. Of the first category £E475,201 was spent—£E175,401 on the Lower Egypt drainage works, £E12,589 on irrigation work in the Sudan (for Egypt), £E60,000 on sundry irrigation works, and £E131,000 on the railways, £E21,000 on the Cairo station—while of the new credits £E106,771 was spent, £E85,444 on the Cairo drainage alone.

The ordinary capital expenditure against the Reserve Fund during the *interim* period amounted, therefore, to £E581,972, but in addition an extra sum of £E332,897 had to be taken—£E319,703 for part payment of the purchase price of the Mariut railway line; £E8,089 for railway rolling stock and £E5,105 for expropriations. As a result the Reserve Fund on March 31 was reduced to £E5,103,549, a figure which the Financial Adviser foresaw in his report on the 1914-15 budget.

It is worthy of note, that under the new system, adopted as from April 1 this year, the unexpended balance of credits opened against the ordinary budget (£E477,784) and the Reserve Fund (£E824,332) have been automatically cancelled.

Expenditure on Khedivial Library.

In conclusion the statement of accounts shows that the Public Debt, which stood at £E94,144,640 on March 31 last, was reduced by £E57,900. Interesting balance sheets of the Khedivial Library and Arab Museum are appended, showing that both of these institutions had to draw on their reserve funds to meet their expenses; a statement of the amounts advanced to the Sudan by Egypt for development work (£E5,414,525) since 1899 is attached. The details of the advances made up to March 31 last to the various municipalities and Local Commissions by the Government, for water and light installations, and various other municipal works, amounting to £E432,873 are also shown.

"NEW" BULGARIAN RESOURCES.

(From Our Own Correspondent.)

Sofia, June 19.

At present the tobacco crop of New Bulgaria amounts annually to about 10,000 kilograms, worth £2,000,000. The Minister of Agriculture, who is taking steps to improve the cultivation and extend its area, hopes to treble the quantity of the annual crop.

Forests constitute the source of wealth next in importance in the new lands. The bulk of the population in the districts of Gornia Jumaya, Nevrokop, Mihomea, Jakronda, Dospat and Dovlen, make their living out of the woods in one way or another, and the Razlog district is famous for its extensive virgin forests. Formerly the big Bulgarian timber firms exported large quantities of timber through Turkey, and much of this was sent to Drama, Kavalla, Serres and Salonika. At present the export from Old Bulgaria cannot be increased owing to the lack of railways, and the road to Greek Macedonia is closed. Thus hundreds of villages are deprived of their means of livelihood; and the present Government is, therefore, actively engaged in organising means of transport for the timber trade.

BULGARIAN LOAN COMPETITION.

(From Our Own Correspondent.)

Sofia, June 21.

Last Wednesday M. de Panafieu, the French Minister here, called on the Prime Minister, Dr. Radoslavoff, who is also Minister for Foreign Affairs, *ad interim*, and informed him officially that French banks were ready to advance 100,000,000 francs (£4,000,000) to Bulgaria now, and to negotiate with the Bulgarian Government a loan of 500,000,000 francs (£20,000,000) at 5 per cent., to be issued at 85.

These terms are preferable to those being negotiated in Berlin, and the French are prepared to issue the loan at the end of the present year, paying 150,000,000 francs then and the balance of 250,000,000 francs at the end of 1915. The next day the Russian Minister, Mr. Savinsky, also called on Dr. Radoslavoff and informed him that his Government acquiesced in the proposal of his French colleague, and supported it.

The Prime Minister thanked both diplomatists for their readiness to help Bulgaria in the task of consolidating her finances; but he added that he was afraid the offer was too late, as the negotiations with Berlin were almost finished. The director of the Disconto Gesellschaft, representing a syndicate of the leading German banks, is expected to arrive here to-morrow, bringing the contract of the loan, which will be signed immediately and submitted for the sanction of the Sobranje.

SERVIAN FINANCE.

According to *The Investor's Review*, the Servian Government is endeavouring to place, against orders for military materials, £3,600,000 of Treasury bonds in France and £1,200,000 in Germany. Negotiations have been begun with the supplying firms, who are consulting their bankers. The orders to be placed in Germany are for varying amounts, the Rhine Motor and Machinery Factory, for instance, whose bankers are the Schaaffhausen Bankverein, the National Bank für Deutschland, and a local bank, having an order for deliveries valued at £240,000 to £320,000. Nothing definite, however, has yet been arranged.

ALBANIAN STATE BANK.

According to the *Neue Freie Presse*, arrangements have now been practically completed for the establishment of an Albanian State Bank with a capital of 75,000,000 francs (£3,000,000), contributed in equal shares by the Great Powers. The special interests of Austria-Hungary and Italy in Albania will be recognised by the direction of the bank being placed in their hands. Prince William, adds the journal, will be given a new loan of 5,000,000 francs (£200,000).

AGRICULTURE IN NEW ROUMANIA.

(From Our Own Correspondent.)

Bucharest, May 30.

The Inspector of Agriculture, M. Virgil Dimitriu, has published a report on the state of agriculture in the newly acquired territory, from which the following interesting notes are taken:—

Agriculture is not nearly so much advanced as it might be, as the cultivation of the ground is not carried out in a systematic manner. One cause of this is the lack of agricultural roads and labour, both of which are conspicuous by their absence.

As regards the system of agriculture in general, the newly acquired territory is far behind Roumania itself. Cattle are plentiful, but badly looked after. The use of agricultural machinery is almost nil, and even those few employing anything of the sort lack the intelligence and experience to work the machines. Agricultural credit is good, and the agricultural banks grant credit to proprietors of land both great and small against mortgages, or with cattle or eventual produce as security, or even against drafts alone. They are ready to buy agricultural machinery with a view to selling it to the smaller proprietors on the instalment plan.

The last notes are especially worthy of attention, as they seem to indicate a new market for agricultural machinery manufacturers, which is a peculiarly safe one, the buyers being agricultural banks, and consequently reliable customers. The territory in question is immensely rich as regards its soil, but is so far only in a primitive condition, and opens, under Roumania's forward policy, a new and important market for everything in connection with agriculture.

ROUMANIAN OIL PRODUCTION.

The following information from the 1913 report of H.M. Consul-General at Galatz is published by *The Board of Trade Journal*:—

The Roumanian petroleum industry continues to flourish, although the production of crude oil in 1913 may have been below expectation owing to the war and to the insufficiency of the means of transport; nevertheless, it reached the figure of approximately 1,900,000 tons, as compared with 1,807,000 tons in the preceding year, and 1,625,000 tons in 1911. Since 1906 Roumania has doubled her output of petroleum, and she is now the fourth oil-producing country of the world, coming after the United States, Russia, and Mexico. There should, moreover, be a marked increase in the output once the new pipe lines at present under construction from Baicoi to Constantza have been completed. The total export of crude oil and oil products in 1913 is estimated to have been about 1,030,000 tons, as against 850,000 tons in 1912 and 678,000 tons in 1911. The chief importing countries were the United Kingdom (whose import of Roumanian petroleum has increased enormously in the last few years), France, Germany, and Egypt. Crude oil was exported to the extent of 29,000 tons, mostly to Austria-Hungary. The export of residues reached 341,000 tons, of which nearly a third went to the United Kingdom and about a sixth to Italy. The United Kingdom also took 100,000 tons of refined oil, and Egypt 97,000 tons, out of a total of 419,000 tons. France and Germany were the chief buyers of benzine, each taking about a third of the total export of 208,000 tons.

Near East Markets.

SPECIAL REPORTS.

(From Our Own Correspondent.)

Haifa. June 13.

The crop outlook is good, and there is general optimism. There has been abundance of rain, and it is estimated that the crop this year will be greater by 15 per cent. to 25 per cent. than that of last year. It is feared, however, that the comparatively low prices ruling in Western markets may adversely affect the export trade.

Odessa. June 21.

Further rains have fallen over the greater part of Southern Russia, but the reports received here state that they have come too late in many districts to do much good. These reports are, however, more or less contradictory, and we must await more authentic advices. The general condition of the crops is, I believe, satisfactory.

The demand from the Western grain marts is fairly good, but the local grain stocks are too small to permit of a very active business being done. The Odessa granaries are to-day reduced to 230,000 poods of wheat, 10,000 poods of rye, 80,000 poods of barley, 80,000 poods of maize, and 10,000 poods of oats. Barley of good average quality, with 3 per cent. admixture, brings 89c. f.o.b., or about 3c. in advance of the price obtaining in the previous week. Wheat is also firm, and from 1r. 15c. to 1r. 25c. is paid for the better qualities, f.o.b. Rye is neglected at 90c. to 94c. according to quality. There is a fairly lively inquiry for good dry maize at 80c. to 80½c. per pood f.o.b.

Sofia. June 21.

The rumours which have been studiously circulated that brigands are at work in the Strumitza district are false. These reports have been circulated with the object of preventing the merchants from coming from the West to buy silk cocoons and opium, both of which industries are this year in an exceptionally flourishing state.

The recent heavy rainfalls, followed by disastrous floods, have greatly damaged the harvest. It is estimated that more than 25 per cent. of the crops have been ruined. The havoc is particularly serious on the Danube in the neighbourhood of Nicopolis. The rose crop has been very good this year and the production has been doubled. Reports from the Karlovo Customs-house state that 25½ kilograms of attar of roses, valued at £100 the kilogram, has been exported from that district alone since June 13.

The market for silk cocoons at Soflou has been opened, and in the first three days 12,650 kilograms of yellow cocoons were sold at a price varying from 3.70 to 4.25 fr. the kilogram. The cocoons of Soflou are of a very fine quality. Under Turkish rule the production was 700-800,000 kilograms a year, but this year the quantity will be much less.

The following are extracts from the weekly bulletins received at the London offices of the Imperial Ottoman Bank from its correspondents in the Near East:—

Beyrout. June 13.

The market continues to improve slowly. During the period under review (May 24—June 7) imports have been satisfactory, except in the cases of sugar and coffee. Wholesale merchants are waiting until they have realised on their existing large stocks of these articles before placing further orders.

On the whole the cereal crop in Syria will be, if not superior, at any rate equal to that of last year.

Serres. June 10.

The following are extracts from the monthly report for May:—

The rains have come a little late it is true, but in time to save the crops, which were in a critical situation. Tobacco and maize have especially benefited, and in a less degree wheat, cotton, and barley. The planting of tobacco proceeds actively, and an abundant crop is anticipated.

Aleppo. June 9.

The following are extracts from the monthly report for May:—

The agricultural outlook in our district, although not so brilliant as was anticipated at the beginning of the season, is not unpromising. In the surrounding plains the wheat looks well, but it has been thinly sown and great spaces have been left uncultivated. In consequence of the rain and cold weather the grain is not yet ripe generally, and the harvest will be a little late. Though not expected to be bad, the result will be inferior to last year's.

The activity on the market during the first week of May slackened to a calm, but towards the end of the month the improvement was marked. The sales of imported products have been restricted. In consequence of the improvement in the price of colonial produce in Europe, a distinct movement in these articles has begun.

The wool sales have begun, but the prices offered in Europe are inferior to those offered here.

Busreh. May 29.

The market is still paralysed by the money stringency, which gets worse and worse, and inspires the reverse of confidence in commercial circles.

The stock of cereals here is estimated at 2,000 tons. The arrivals of the produce of the new crop will begin in a week. Some farmers, however, will prefer to keep their grain rather than send it to Busreh, where remunerative prices are doubtful.

The yield of dates will be inferior to last year, particularly that of the "Sayer" variety.

The stock of cotton cloth is very limited. The sugar market improves gradually, though there is nothing doing in this article owing to the glut of sugar at Baghdad—some 180,000 packages. All the localities of the interior draw supplies from Baghdad in consequence of this, and the demand at Busreh is limited to the town and immediate surroundings.

MANCHESTER MARKET.

(From Our Own Correspondent.)

Manchester, June 24.

The general conditions prevailing throughout the market during the past week have shown no signs of more animation, in fact the last few days have been the most discouraging for some time back. Spinning mills and weaving sheds have been producing goods faster than they can be disposed of. It has been talked about on 'Change that if this state of things lasts much longer there will have to be further curtailment of production in both spinning and weaving districts in the near future. Prices in the raw material have been irregular from day to day and buyers have therefore had very little confidence in them. Only in cases of urgent need have operators purchased, the general flow of trade being blocked by cautious buyers. The crop in Egypt is reported to be progressing favourably. Fairly satisfactory reports have been given concerning the weather in the American cotton belt. Owing to the continued unsettled state of the Near East retail orders have composed the bulk of the trade in cloth for outlets in that part of the world. Business for Egypt has been of small extent and bids have been poor. A featureless demand has been experienced in shirtings and *dhooties* for India. Rather better news of the monsoon has been received, but this has not stimulated fresh business being arranged. Rather an improved tone showed itself at the beginning of the week as regards China, but business for that quarter has tapered off, and is now about as quiet as the rest. Not much activity has shown itself in the home trade. The uncertain weather has helped to check the progress of many distributing houses in their summer trade. No relief has come to Burnley manufacturers, and complaints have been numerous from day to day. Sellers of American yarns for home consumption have experienced a slack week and prices have been irregular when tested. The export section has been quiet, and offers have not been of much use for the Near Eastern outlet. Bolton counts have been comparatively steady, without any general flow of orders being recorded.

PRODUCE REPORT.

London, June 25.

Sugar.

The market has been quiet and easier generally this past week, but large business is being done to-day on Beet at slightly improved prices, Aug. 9s. 4½d., Sept. 9s. 4½d., Oct. 9s. 4½d., Oct.-Dec. 9s. 5d., Jan.-Mar. 9s. 6d., and May 9s. 8¾d. f.o.b. Hamburg. Refined continues quiet, with English at late rates to 3d. decline. Tate's No. 1 Cubes, prompt 18s. 1½d., and No. 2, 17s. 7½d.; Granulated fine 16s. 4½d. and Granulated Standard 15s. 10½d. Foreign, refined, is steadier, first marks granulated (50 tons minimum) ready 11s. 3¾d. to 11s. 4½d. f.o.b. Hamburg. Say's cubes, June-July 14s. 10½d., and loaves 14s. f.o.b. Paris. German and Austrian cubes prompt 13s. 4½d. to 13s. 9d.; crushed 12s. 7½d. to 13s. 3d. f.o.b. Hamburg.

The market for cane sugar is rather dull with little doing.

Coffee.

There has been only a moderate demand at auction sales this week, some 3,500 bags that were offered at last sales having been sold at following rates: Mexicans low mid. 70s., Salvador mid. 70s. 6d., and bold 75s., Columbian mid. 72s., and Costa Rica low mid. to mid. 71s. to 77s., and bold 77s. to 87s. The speculative market has been steady, closing at 3d. to 4½d. advance. July sold at 43s. 3d., Sept. 44s. 3d., and Dec. 45s. 3d.

Seeds.

The market has been quiet and easier, in some instances, but is closing steadier generally. Linseed was easier during the week, closing, however, steady at the decline, London-Calcutta afloat being sold at 51s., June-July offered 51s. 3d., July-Aug. sold 51s. 6d., and Aug-Sept. offered at 52s. 3d. Rapeseed is firmly held, Brown Cawnpore June-July 51s. asked, and Yellow Guzerat 55s. 6d. Cottonseed is rather quiet, London-Egyptian July sellers asking £8 7s. 6d., Aug. £8 8s. 9d., Nov.-Jan. £8 10s. per ton. The market for Canaryseed remains inactive, pending definite reports of the new crop, but prices are firm, supplies being very limited.

Oilcakes.

Linseed cakes: There has been a particularly small demand during this past week, but values are fully as dear, and in some instances a slight advance is asked. Fine seedy Calcutta command £7 16s. 3d. to £7 17s. 6d. for arrival. Best London made is in little demand at £7 15s. to £7 17s. 6d. Good quality Russian is offered £7 13s. 9d. to £7 15s. ex quay. Cotton cakes: Only a very little quantity of Egyptian remains in store, and shippers in the meantime are asking almost prohibitive prices in forward positions, quotations being £4 12s. 6d. to £4 13s. 9d. ex ship for June-July despatch, whilst spot parcels are selling £4 16s. 3d. to £4 17s. 6d. ex quay. English makes are quiet at £4 17s. 6d. to £5, and Bombay £4 2s. 6d. Decorticated Cotton Cakes and Meal are in better demand and sell freely at £7 15s. to £7 17s. 6d.

Corn.

Wheat: Owing to the reported weakness in the American market and fine weather in the Argentine, the market for cargoes is very dull and lower to sell. Choice White Karrachee June to August offered 37s.; South Russian on sample June, old style, 34s. 9d. to 36s. 3d. is asked, and North Russian June-July on sample 37s. Barley is quiet, 24s. is asked for South Russian June, 23s. 3d. July, and 21s. 9d. Sept.-Oct., old style. Maize is also quiet, Danubian-Bulgarian, prompt, is offered at 24s. 3d., and Bessarabian June 25s. 3d. Oats are quiet and unchanged.

EGYPTIAN COTTON MARKET.

Good Crop Reports.

(From Our Own Correspondent.)

Alexandria, June 19.

The market has been feverish, and a downward tendency has been in evidence. The export trade has sold large quantities in futures, and speculation has been demoralised. The bulls, who had counted on a lack of water this summer, have found themselves in the wrong, for there was never so much water as there is at the moment in the Irrigation Canal.

The news with regard to the new crop is very favourable. Contrary to previous years, the cotton worm has not appeared. The cotton plant is in a very healthy condition, and part of the time lost at the beginning of the year has been caught up.

The market in futures is calm, and speculative transactions are much reduced. On the other hand, there is more activity in the spot market, and exports have been so large that the stock has been very much reduced.

Very little cotton has arrived from the interior, and it seems probable that we shall finish the season with a stock of 500,000 cantars only.

The rise in the price of cotton seed has been very marked, and the demand from the interior has improved.

Messrs. Davies, Benachi and Co., of Liverpool, have received the following telegram from Alexandria, dated Wednesday :—

Market steady. November, 17 3/32, January, 18 5/32. Exchange, three months' date, 96 1/4.

Steamer Sailed.

June 24.—"City of Oxford."

LIVERPOOL REPORT.

Messrs. Reynolds and Gibson telegraph :—The demand for Egyptian spot since our last report has been generally moderate, the sales amounting in 1,900 bales, as against 2,700 last week. Doubtless holidays had the effect of limiting inquiry, but in any case spinners seem reluctant to buy, except when absolutely obliged. The bulk of the sales consists of medium-grade Afifi and Nubari. In other growths only a small business was done. Quotations are reduced 5 points, except good, fine, and extra fine Nubari, Joannovitch and Sakellarides, which are unchanged.

CROPS IN SYRIA.

Favourable Outlook for 1914.

(From Our Own Correspondent.)

Beyrout, June 10.

The crop outlook in general for 1914 promises a material improvement on that of last year. The principal factors in this improvement have been a good and timely rainfall, and a more settled condition of things that has resulted in the decrease of emigration. Owing to the absence of an official bureau of information and to the Oriental tendency to exaggeration, the forecasts cannot be considered absolutely trustworthy; but as a point has been made of collecting the information from merchants of authority and long experience the estimates may be considered as near the reality as it is possible to arrive.

In this country the wanton work of deforestation that has been going on for centuries—animals as well as men have contributed to the work of destruction—has caused the rainfall to be capricious and unevenly distributed, but this year it has been generally abundant. Still, owing to the widely different nature of the soil and the lie of the land, also to want of proper drainage works, the rainfall sometimes produces contrary results. Thus abundant rains in low and deep lands, as in the Mersyne district, are apt to swamp the crops, while the contrary effect would be caused in high and shallow lands. The same applies in a way to the period of the rainfall. In Gaza, early spring rains are necessary, owing to the hot nature of the sandy soil and the early ripening of the grain, while in other parts late spring rains are necessary. This year, owing to the dry weather that prevailed in February, the Gaza crops have suffered, while the crops in the other districts have not been affected; but have, indeed, benefited by the late spring rains.

In the following summary each district is treated separately. The principal port of each district is particularly indicated, as this report is intended rather for shipping purposes.

Jaffa.—The orange crop, which is by far the most important article of export, including the small proportion of lemons and bitters, is expected to be about the same as last year's—namely, 1,600,000 cases exported. The sesame seed exports are expected to reach about 2,500 tons. The bean crop is small, and there will be hardly any for export. The wheat crop is better than that of last year throughout Palestine, and there may be a small export movement if prices abroad are favourable. The wine crop promises to be good. On the other hand, the olive crop is poor, and imports from Smyrna and neighbourhood continue. The lupine crop is fair, and the bulk of the exports are expected to go to Egypt. There is a large water melon crop. The almond crop is middling.

As regards the barley crop of Gaza, which is included as usual in the Jaffa district, the total quantity available for export is expected to be only about 8,000 tons. This partial failure of the Gaza crop is due to the dry weather in February, mentioned above.

Haifa and Acre.—The crops in general in this district and in the southern part of the Hauran, the exports from which pass through Haifa, are better than last year's. The estimated crop of wheat is about 22,000 tons, of which a good part is expected to be exported to Europe, and principally Italy; barley about 3,000 tons, which, it is anticipated, will be hardly sufficient for local needs and the requirements of Medina; beans about 1,500 tons; peas very abundant, both in Haifa, Acre and Hauran districts; the total quantity of the crop being estimated at about 12,000 tons, of which Marseilles is likely to absorb the largest part. The lentil crop, which is estimated at 1,500 tons, is fair, but still far superior to that of last year. The dari seed crop is estimated at about 2,500 tons, against a production of less than 7,800 tons last year. There will be a large sesame seed crop estimated at about 12,000 tons. The locust bean crop is estimated at about 5,750 tons.

Sidon (Tyre).—The lemon crop, which is the most important article of export, is estimated at about 150,000 boxes, and the orange crop at about 120,000 boxes. Owing to the good demand for fruit, even locally, the orange and lemon cultivation is constantly on the increase. The wheat crop in the plains is expected to be about 30 per cent. less than that of last year, which was also defective. On the high lands, where the rainfall is more plentiful, the crop is good.

The barley crop, both in the plains and in the hills, will probably be double that of last year. Beans are abundant, except in Sidon itself; lentil a smaller crop than last year, but a fair average in general; of peas and fenugrec there is a very good crop. As far as can be judged at this early stage. Maize and dari seed will be better than last year. Locust beans are middling.

The late rains in the spring have done the lemon trees a great deal of good, and it is expected that the crop will be unusually early this year, the first shipment may take place about the middle of August. Owing to the failure of the Italian and Sicilian crop, a good trade may be done with Liverpool, given proper tonnage facilities.

Beyrout.—This port has lost its importance as an export trade centre, after the construction of the Tripoli-Homs Railway to the North and of the Hedjaz railway branch, Damascus-Haifa, to the South. It taps now only the products of the Bekaa and Damascus, and of the northern part of the Hauran. As it is a comparatively large town, its local consumption is such as to leave little grain available for export. The total exports of wheat for this year are expected to reach about 1,000 tons, or the same quantity as last year; barley about 2,000 tons against half this quantity in 1913; peas 1,500 tons against 1,000 tons in 1913; beans 500 tons against 200 tons in 1913; lentils about 200 tons, the same as last year; dari-seed and maize poor prospects; last year's exports of these two commodities were practically nil. A good part of the wool clip continues to find its way through Beyrout. Between Beyrout, Tripoli, and the other coast ports this year's clip is expected to be about 5,250 T. against 4,150 T. in 1913, half of which was shipped to the United States, while two-thirds of the remaining half supplied military needs at Constantinople. The exports of apricot kernels for 1913 amounted to about 16,000 bags, but the estimated quantity for 1914 is about 12-13,000 bags. The exports from China sometimes offer a keen competition to the Syrian article.

(To be continued.)

EGYPTIAN HIDE IMPORTS.

The following information is extracted from the *Bulletin* of the French Chamber of Commerce, of Alexandria :—

According to Customs statistics, the imports of tanned ox and calf skins have decreased by 10 per cent. from 1907 to date. Sheep and goat skins, on the contrary, show an increase of 50 to 60 per cent. This is due to the fact that the prices of the latter products have remained almost stationary during the past few years, while those of ox and calf hides have increased from 25 to 30 per cent., and to the population being accustomed to wear, in preference, shoes made of goat and sheep skins owing to their cheapness.

In the importation of tanned ox and calf skins, England, according to Customs statistics, is at the head of other nations. France occupies the second place, and is still progressing.

The principal exports from England into Egypt are machine straps, the consumption of which is in proportion to the utilisation of new machines, and, consequently, to the industrial progress of the country. We may add that the import figures of this article have not increased in the same ratio as those for boot leather.

England also exports skins manufactured in America, the consumption of which is constantly progressing. Merchants prefer treating with England because the distance between Egypt and America being much more considerable, business with the latter country is more difficult from the point of view of rapidity of execution of orders; the question of credits is also considered.

As American tanned sheep skins are much appreciated in Egypt, it is to be expected that their importation will become still more considerable, and that the total figure of the British exports for Egypt will grow in consequence.

Engineering Notes.

Locomotives for Egypt.

According to *The Egyptian Mail*, fifteen more express locomotives, of the same type as those recently delivered to the Egyptian State Railways, will shortly be put up for tender. There are at present five of this type, numbered 735 to 739, and they have worked very successfully. It is found that they are able to keep time with heavy loads against the head winds so often met with in the Delta. These locomotives were built by the German firm of Henschel, and though the tender for the fifteen additional engines will, of course, be open to firms of any nationality, Messrs. Henschel, through the experience they have already gained (says our contemporary), will probably be able to offer at substantially lower figures than any of their rivals. The cost of these will amount to about £E50,000.

The Heluan Railway.

The doubling of the Heluan Railway is proceeding rapidly, says *The Egyptian Mail*. Last week the new set of rails from Tura reached Massara Station, a distance of five kilometres, and the work of sleeper-laying between Massara and Heluan, seven kilometres, has now been commenced. There is a wide masonry storm water culvert between the last two-named stations, and work on the strengthening of this has begun, while work on the bridge between Tura and Massara, though still in hand, is nearly completed. It is understood that the State Railway engineers hope to have all new construction between Tura and Heluan completed early in July, after which the replacing of the old permanent-way will begin.

Economy of Coal.

If there is one reason more than another which discourages the employment of steam power for industrial or agricultural purposes in the East, it is the cost of coal. It is an item which, in the calculations of cost of engine work, appears with discouraging results; and this is more noticeable when the steam power is wanted for remote districts where coal costs more than double the price than that ruling in England. It will be interesting to users and would-be users of steam engines, therefore, to learn that there is a new and cheap process, of extensive application, for the treatment of coal, by which considerable economy is effected. It has been proved by experts that if bituminous coal be immersed in water containing gas chlorine in solution, the coal absorbs the gas to the extent of 0.10 per cent. Small though this proportion is, the effect on the bitumen fuel is remarkable, causing it to burn like anthracite coal, that is to say, slowly and without the formation of soot or smoke, or much ash. In a boiler test the evaporation was 25 per cent. better with a "chlorinated" bituminous slack than with similar but untreated material. Here, therefore, is a cheap process by which coal can be treated that may not be burnt in the present wasteful way, and thus afford considerable economy in cost of fuel, and with better results.

Bulgarian Port Developments.

Some interesting information on railway and port developments in Bulgaria is given in the report of H.M. Vice-Consul at Sofia (Mr. W. B. Heard). The report states that the port of Bourgas, during and since the war, has been greatly congested, owing to the lack of rolling-stock to transport the accumulated merchandise. Under such circumstances the warehousing accommodation is altogether insufficient, and goods stored on the quays have been greatly damaged by wet. Large orders for rolling-stock are to be given in the future, as the requirements for grain transport alone can hardly be met under present conditions. With reference to the development of Porto Lagos, the report states that it is hoped that in time Porto Lagos may become a Mediterranean port of the first class. At the outset upwards of £1,000,000 is to be expended, and the construction of the port is to be put up to public tender. It is said that the harbour is to lie somewhat to the south-east of the present town. As regards Dedeagatch, it is not intended to construct a harbour there, and the place will accordingly remain an open roadstead as heretofore. As freights for Dedeagatch are high, owing to its unprotected position, it seems doubtful if it will secure much of the seaborne trade now passing through Varna and Bourgas. When Porto Lagos, however, is fully developed, this harbour should prove the principal port for the trade of Bulgaria. It is hardly necessary to point out the great advantage which will be gained for Anglo-Bulgarian commerce by the opening of this port.

Naphthalene as Fuel.

A short time ago a German engineering firm constructed an internal combustion engine specially designed to run on nephthalene, a solid gas-works product that requires to be melted in a special receptacle on the engine before it can be vaporised. It has been demonstrated that by using the new fuel an economy of 60 per cent. over the old liquid fuel can be effected, and with the new type of engine it is now being introduced in the Continent and the Near East with some success.

A good deal has been heard lately about solid oil fuel. Experiments made with it both on ships and in locomotives are reported to have given very satisfactory results; but the question whether it has greater advantages than liquid fuel is not yet finally announced, and the advantages and disadvantages of both varieties continue to give rise to heated discussion by their respective advocates. In these notes we have already recognised the advantages possessed by solid fuel in regard to overland transport facilities, which are an important consideration in many parts of the Near East, where goods have frequently to be carried long distances by mule or camel; but we have been inclined to think that upon the whole the advantage lay in the liquid fuel. If, however, naphthalene is proved to effect the economy claimed for it we may have to reconsider our verdict.

TENDERS INVITED.

EGYPT.

[*The London agent of the Egyptian Government is Sir A. L. Webb, K.C.M.G., Queen Anne's Chambers, Westminster, S.W., at whose office particulars of tenders marked (L) are to be obtained.*]

Uniforms.—Tenders are invited by the Egyptian Postal Administration, Alexandria, for the supply of the uniforms necessary for the staff of the Postal Administration during four years, from 1915 to 1918, inclusive. July 31.

Steel Sheets.—Tenders are invited by the Egyptian War Office for the supply of 1,500 galvanised mild steel sheets. July 29.

Lininette, etc.—Tenders are invited by the Egyptian War Office for the supply of lininette and tarlatan, calico and drill, and grey cloth. July 30 (L.).

Calico and Drill.—Tenders are invited by the Egyptian War Office for the supply of calico and drill. August 5 (L.).

Costumes.—Tenders are invited by the Parquet of the Native Court of Appeal, Cairo, for the supply of 265 coffee-coloured costumes for the guards of the Courts of First Instance, etc. July 23.

Swing Bridge.—Tenders are invited by the Ministry of Public Works, Cairo, for the construction of a swing bridge over Rêyah Tawfiki, at Kafr Shokr, July 2.

Swing Bridges, etc.—The Director-General, 3, Soliman Pasha Street, Cairo, invites tenders for the supply and erection of six swing span bridges and nine lift span bridges for the Central Gharbia drainage projects. September 30.

TRADE OF ROUMANIA.

According to a forthcoming report for the year 1913 of H.M. Consul-General at Galatz (Major J. G. Baldwin, C.B.), extracts from which are published by *The Board of Trade Journal*, United Kingdom merchants do not seem to be over eager to push their wares in the Roumanian market. While their Continental competitors have representatives in the country to nurse the market, British exporters are content to leave their interests in the hands of local commission agents. There is little doubt that United Kingdom interests have suffered greatly in the past from the lack of proper representation, and United Kingdom merchants are strongly recommended to follow their rivals' example and send out capable and energetic travellers to study the conditions and needs of the Roumanian market. Travellers should be capable of transacting business either in German or in French, failing Roumanian, and catalogues should always be in one of these languages.

Germany, Austria-Hungary, France, Italy and Belgium are the chief competitors of the United Kingdom in the Roumanian market. Germany has the largest share in the trade, and her proportion remains more or less stationary. Austria-Hungary, which comes next, is steadily increasing her share. With these two countries the United Kingdom shares over 70 per cent. of the total import trade, but her own quota shows a slight but almost steady decrease. France maintains an almost steady position, but both Italy and Belgium are annually contributing a larger proportion of the total imports. The United States, whose wares a few years ago were rarely seen in Roumania, is also rapidly coming to the front.

Continental manufacturers, and especially those of Austria-Hungary and Italy, have a distinct advantage over their United Kingdom rivals in the Roumanian market owing to geographical position and to cheaper freight rates. Quick delivery by rail tells heavily in favour of Continental manufacturers in those classes of goods which are of high value in relation to their bulk, such as textiles and machinery, and it is precisely in these lines that the United Kingdom is losing ground. The advantage of railway transport is less marked in the case of bulky goods, such as iron, coal and chemicals, and in these goods United Kingdom merchants are increasing their share of the trade.

The new territory which Roumania has acquired is entirely agricultural, the chief product being wheat. There is said to be a great scarcity of commodities in general, and the prices of some of the commonest articles of every-day use are very high. The territory is sadly in need of roads and railways, and the postal facilities also are very poor. The Government, however, seems to be intent on developing the district as rapidly as possible, as the soil is said to be very fertile, and the territory when once opened up should add considerably to Roumania's resources as a grain-producing country.

With the opening up of the territory there is likely to be a marked increase in the demand for agricultural and industrial machinery, and United Kingdom manufacturers would do well to keep an eye on the possibilities of this new market.

Shipping Intelligence.

EGYPT AND THE U.S.A.

(From Our Own Correspondent.)

Alexandria, June 19.

In spite of several attempts, no success has attended the endeavour to start a direct steamship line between Egypt and the United States. This failure is not due to lack of freight, but to the agreement which has been arrived at between the British and German steamship lines.

Egyptian cotton, destined for the manufacturing centres of Providence, Fall River, and New Bedford, has to be despatched to England, where it is transhipped for Boston or New York.

I learn that the Phalère Shipping Company intends to start a direct line between Egypt and the United States.

ROUMANIAN DANUBE PORTS.

(From Our Own Correspondent.)

June 20.

The Roumanian Ministry of Public Works intends greatly improving all Danube ports, and thirty million francs is to be devoted to this. One million is to be spent at once on the port of Silistria, and a like sum on Oltenitza. This is of importance to Great Britain, many lighters on the river being British owned and flying the Red Ensign.

BLACK SEA FREIGHTS.

(From Our Own Correspondent.)

Odessa, June 21.

There has been very little business done during the week, and the tone of the market remains dull and lifeless. Some few parcels were taken for Rotterdam at 5s. 6d., for Hamburg at 6s. and 6s. 3d. was obtained with difficulty. Grain cargo continues very scarce, and the arrivals from the interior are still dwindling. There can be no active revival before the new crops are harvested. At Nicolaieff the grain trade is at a practical standstill. A ship on the Rotterdam berth has been twelve days collecting parcels at an average rate of 5s. 9d., and a part cargo for Hamburg was accepted at 6s. 3d. Beyond this nothing was done in the Bug port except for 2,000 tons taken by a steamer for Genoa at 9frs. (7s. 6d.). At Kherson, two ships have been berthed for Rotterdam at 5s. 6d. For later shipment cargo has been booked for Hamburg at 6s. 3d., and for the Weser at 6s. 6d. At Novorossisk business is somewhat better, but rates are low, namely, 6s. Rotterdam; 6s. 3d. Weser; and 6s. 6d. Hamburg. These rates, have, however, fallen 3d. since yesterday in consequence of the arrival of extra tonnage. From Khorli and Skadovsk there is no demand at all. At Theodosia a steamer has been ten days collecting a part cargo for Rotterdam at 5s. 6d., and was then compelled to go to Novorossisk to complete.

Greek Shipping Warned.

All Greek shipping in the Black Sea and the Sea of Azoff was instructed a week ago through the Consuls to leave these waters with the least possible delay. Many of them left in ballast. Pleading *force majeure*, the shippers declined to fulfil their loading contracts, and cargo-insurance premiums were suddenly raised to a prohibitive figure.

In view of the possibility of another Greco-Turkish rupture, and the consequent reclosing of the Dardanelles, the Black Sea and Azoff Bourses and Chambers of Commerce are again petitioning the Imperial Government to obtain the neutralisation of the Dardanelles and the Bosphorus.

According to *The Motor Boat*, a company has recently been formed to supply new naval vessels to the Turkish Government, and we understand that Messrs. Armstrong, Whitworth and Co., Ltd., have secured the contract. All classes of vessels are included in the scheme from Dreadnoughts to dinghies, and a sum of £20,000,000 has been apportioned, making a record for shipbuilding contracts.

COMPANY MEETINGS.

IMPERIAL OTTOMAN BANK.

The fifty-first annual general meeting of the shareholders of the Imperial Ottoman Bank was held at Winchester House, E.C., on the 24th instant. The Earl of Bessborough, C.V.O., C.B., was in the chair, and said:—

In rising to move the adoption of the report and accounts, it is my painful duty to refer, with much regret, to the loss we sustained in April last, by the death of Mons. Paul Révoil, who, since his retirement from the position of Director-General in Constantinople, had placed his valuable experience at the disposal of the Bank in Paris. The railway receipts show, in the aggregate, an increase as compared with the year 1912:—

	1913. £T.	1912. £T.	Difference £T.
Haidar Pacha-Angora	522,223	537,247	— 15,024
Eski Chéhir-Konia	255,841	284,748	— 28,907
Smyrna-Cassaba(old lines)	278,477	229,166	+ 49,311
" (extensions)	68,530	73,052	— 4,522
Rayak-Aleppo	145,628	136,995	+ 8,633
	1,270,699	1,261,208	+ 9,491
Bagdad	101,430	62,563	+ 38,867
	1,372,129	1,323,771	+ 48,358

The amounts paid by the Ottoman Public Debt to these companies for insufficiency of receipts were as follows:—

	1913. £T.	1912. £T.	Difference £T.
Haidar Pacha-Angora	—	—	—
Eski Chéhir-Konia	12,708	—	+ 12,708

The Administration of the Ottoman Public Debt, after having paid the kilometric guarantees and the annuities of the various Loans, the service of which is secured on the tithes and sheep tax, has been able to show a disposable surplus from this source of about one million two hundred and fifty thousand Turkish pounds, which is the largest amount yet recorded. In April last, five hundred million francs out of the authorised eight hundred million francs, Ottoman 5 per cent. loan of 1914, was issued in Paris. As regards our agencies; we opened during the year, 1913, branches at Djeddah, Hodeidah, Ourfa, and Bolou, and since the beginning of the present year further branches at Dardanelles and Zahlé. On the other hand, as the result of the annexation of Tripoli, our branch there was closed last year; while during the present year we have disposed of our branches at Monastir and Uskub, as those towns no longer belong to Turkey. We are very much indebted to our Direction in Constantinople, and to our staff both at home and abroad, for their attention to the business of the bank during the past year, which has been one of some difficulty. I now, Gentlemen, beg to move: "That the report and accounts now read be received and adopted; that the dividend for the year ending December 31, 1913, be fixed at 14s. per share, and that this dividend be paid in Constantinople, London, and Paris, on July 1, 1914." This was seconded by Viscount Goschen, and carried unanimously.

The Chairman also moved: "That M. Charles de Cerjat, Le Comte Adrien de Germiny, Mr. E. W. H. Barry, and Lord Hillingdon be and they are hereby re-elected members of the General Committee." This was seconded by the Hon. H. A. Lawrence, and carried unanimously.

A vote of thanks to the chairman, which was proposed by Mr. A. Hood and seconded by Mr. F. O. Grant, ended the proceedings.

GHARBIEH LAND COMPANY.

The report of the directors for the year ended February 28, 1914, submitted to the ordinary general meeting of shareholders held on May 30 last, states that the area of the company's estates on February 28, 1914, was 7,929 feddans 20 kirats 3 sahms, the balance-sheet value of which is £E427,042.658. This amount includes, in addition to the cost price, all expenditure on improvements, buildings, etc., up to the date of closing the books. The raising of the Assuan dam heralded a new epoch in the agricultural history of Egypt, and results have not been slow in verifying the anticipations referred to in the last report. Thus the manifest insufficiency of the water supply during low Nile and the exceptionally low flood of 1913 would have seriously compromised the success of the crops and caused incalculable loss to the country if the Ministry of Public Works had not had at its disposal the enormous reserve of water held up by the raised dam to meet such a contingency. Thanks to the judicious disposal of this reserve, the Irrigation Department was able not only to avert disaster, but also generally to insure a better distribution of irrigation water, notably in the Damietta branch of the Nile, than in 1912. Fortunately, experience shows that low Niles generally occur in series and at wide intervals. We may, therefore, infer that the period of drought through which Egypt has passed will be followed by one of high, or at least normal, floods.* Despite, however, the scarcity of water and other adverse circumstances with which it was necessary to contend, the company's crops in 1913 gave better results than in former years. The improvement must be attributed principally to the efficient local management of the estates and to the unremitting efforts of the senior officials. The numerous legal expropriations of landed property now in progress, and possibly to a certain extent the uncertainty which continues to prevail in the political affairs of the Balkan States, have adversely affected the Egyptian land market, and in 1913 sales of land were practically nil. The directors are, however, pleased to announce that the company is on the eve of concluding an important sale, namely, that of the ex-Wilson property of 2,165 feddans, part of the sale price being met by an exchange. Full particulars of this transaction, which relates to the current financial year, will be given in the next annual report. As stated above, the working results in 1913 were in general more satisfactory than in previous years, notwithstanding the abnormal lowness of the Nile and the repeated attacks of insect pests. The improvement is shown by the following figures:—

Year.	Cotton Cantars.	Rice Daribas.
1910-11.....	4,843	—
1911-12.....	5,665	307
1912-13.....	4,982	30
1913-14.....	6,600	1,276

The total value of the 1913-14 crops amounted to between £E36,000 and £E37,000, the major part of which was encashed by the company in payment of rents, annual instalments on land sales, arrears, etc. The surplus reverted to the company's tenants, who will, it is hoped, invest it in the purchase of land during the current financial year. The shares this company holds in the Koubbeh Gardens and the Société Agricole de Kafr-el-Dawar are not quoted officially, and, as in previous years, have been taken into the balance-sheet at their par value. Any depreciation that may have occurred in these shares would be compensated for by the appreciation in the company's lands, a fact which is borne out by the sales already made and the sale of the ex-Wilson property now nearing completion. Debtors' accounts comprise rents in arrear, loans to cultivators, accounts to be adjusted, suspense accounts, etc. A sum of £E1,500 has been reserved out of the profits of the year to amortise such of these debts as seem to be doubtful or irrecoverable, although the amount on the debit side of the balance-sheet under the heading "Reserve for profits not yet encashed" is ample to meet any eventual loss in this respect. The same percentages have been written off as usual. The amount of unpaid calls is £E690 less than the figure on February 28, 1913. Creditors' accounts comprise, in addition to bank credits and sums advanced by the Egyptian Enterprise and Development Company, balances due to contractors, interest accrued but not yet due, suspense accounts, etc. After deducting, from the year's receipts, administration and other ordinary expenses incurred during the financial year, there is a net profit of £E14,167.049, viz.:—

Receipts.	£E.
Agricultural income.....	18,271.635
Interest.....	5,596.037
Land reclamation for third parties	669.142
Profits realised and not encashed (sum available)	515.
	25,051.814

Expenditure.	£E.	
Agricultural working expenses ..	8,872.	
Proportion of administration expenses	1,892.624	
Depreciation on office furniture, etc.....	120.141	10,884.765
Net Profit....		14,167.049
This amount is in excess of that at 28th February, 1913, although there were no sales of land during the year.		
Balance brought forward from the previous year.....		2,609.440
		16,776.489
Less Interest and 5% debenture coupon, etc.		14,407.731
Balance		2,368.758

Exceptional expenditure.	£E.	
Doubtful debts	1,500.	
Partial amortisation of cost of issue and redemption of the 5½% mortgage bonds.....	1,500.	3,000.
Less above balance		2,368.758
Debit balance		631.242

which the directors propose to carry forward.

Resolutions.

The following resolutions were passed at the meeting:—

This meeting approves unanimously the balance-sheet and the profit and loss account relating to the eighth financial year ended February 28, 1914, and grants a discharge to the board of directors in respect of their administration of the company's affairs.

It resolves to carry forward to the next account the debit balance of profit and loss account.

It re-elects H. E. Mansour N. Shakour Pasha and M. Philippe L. von Hemert as directors.

It appoints MM. F. H. Russell and Léon Rolin as auditors for the current financial year, and fixes their joint remuneration at £E150.

Balance Sheet.

The following is the balance-sheet of the company as at Feb. 28, 1914.

Dr. To Capital:—	£E M.	£E M.

Stock and Share Markets.

Bank Rate 3 per cent. (Jan. 29, 1914.)

SETTLING DAYS.

CONSOLS.
Wednesday, July 1.

STOCKS AND SHARES.
In Mining Shares the next carry-over is June 23.

Continuation Day.	Ticket Day.	Pay Day.
Wed., July 8	Thurs., July 9	Fri., July 10
Mon., July 27	Tues., July 28	Wed., July 29

LONDON, June 25.

The market continues inactive. There has been a slight revival in the investment section, but no big business of any sort. Speculation is absolutely dead. Brokers, whether inside or outside the House, do not do a bargain a day. The inaction is probably due to nervousness in regard to Ulster. Until that question is settled we shall have no revival in the Stock markets. New issues do not appear to be going particularly well. The Union of South Africa is an excellent Trustee security. Borax Consolidated Deferred shares have been offered through Messrs. George Clare and Co., but whether the public purchased is doubtful. The City of Kieff also came in the market with a loan of over two millions, a reasonable security at a moderate price.

Money Plentiful.

Money is plentiful, and if there is no foreign complication and the Ulster question can be settled we shall get a 2½ per cent. Bank rate within a month.

The Bulgarian Loan.

In the Foreign market Egyptian Unified have been offered and are now quoted 99¼. The inscribed stock is called 83, and a fair business has been done. The statement that a group of English bankers will advance money to Bulgaria has now been denied. The loan will probably go to Germany. Bulgarian Four and a-Half per Cents. are quoted at 82. The latest news from Greece is more peaceable, and Greek Fours made up at 52. Hungarian Rentes carried over at 82. Turkish Unified carried over at 81, and look like going harder.

Home Rails Depressed.

The Home Railway market remains very depressed. Metropolitans have been sold on the abandonment of the bill. Both Great Western and Great Northern continue to hold their own and both stocks are very much under-valued. Great Western return 5½ per cent. at the present price.

Yankees Weak.

Americans are weak. The more the recent decision in regard to the Inter-Mountain rates is considered the less it is liked. Baltimore and Ohio figures are bad, and it is possible that this road will reduce its dividend. Southern Pacific have been purchased. Steel figures for June promise to be very bad. The only chance of a rise in the America market lies in the hope that the Inter-State Commerce Commission will allow rates to be raised.

Rubber and Oil.

Plantation rubber has fallen to 2s. 3d. Sialang maintains its 15 per cent. dividend, but the shares seem over-valued. Bukit Mertajam pays 6¼ per cent., and on prospects for the current year should double this distribution. Therefore, the shares are cheap. The Spies report is unsatisfactory. The Directors do not speak hopefully of the chance of getting the water out of the wells in the Baskakoff plots. Until the trouble has been overcome it seems wise to keep out of the market. Galician Oil Trust seems likely to be wound up compulsorily. No one should join the reconstruction, as on the figures the funds to be provided would hardly keep the company going six months.

Mines Idle.

There is no business doing in Kaffirs. Some small purchases of Modders and Brakpans have been made from the Cape, but no news that would justify these purchases has been published. Chartered continue most depressed. Russian Mining Corporation report, although it promises large contracts from drainage works in St. Petersburg, failed to move the market.

Egyptians More Active.

The Egyptian market shows a little more activity, but there has been a good deal of selling of National Banks, which are now down to 14. On the other hand, Agricultural Banks have been purchased up to 4⅞, and the deferred have been inquired for at 280. Land Banks have been dealt in at 6⅜. Bank of Abyssinia are 5s. Delta Light Railway prefs. made up at 8½. There has been quite a fair business doing in Delta Lands, which made up at 9s.—some thousands of shares have been bought during the past few days. There has been a little trade done in Behera, which make up at 9. Union Foncière are 21s. 3d. Alexandria Water have been dealt in at 12½ ex dividend. There has been some buying of Aboukir at 21s., and the make-up price hardened to 1 1-16. United Lands have been dealt in at 1s. 9d., at which price they carried over. Sidi Salem remain unchanged at 5s. Gharbieh Land, the report of which appears in another column, carried over at 1⅜. Egyptian Investment Trusts have been dealt in at 5s. Markets are a shade weaker on the death of Mr. Allen Joseph, being now 23s. Khedivial Mail prefs. are 3¾, and the ordinary 10s. Daira Sanieh are nominally 3s.

COMPANY NOTES.

Imperial Ottoman Bank.

The report of the Imperial Ottoman Bank for the year 1913, presented at the meeting on Wednesday, states that, after providing for bad and doubtful debts out of revenue and provisions previously made, the amount available is £362,067, which, added to the balance brought forward, gives £384,467 at the credit of the profit and loss account. After deducting from this sum the amount required for the percentages, in accordance with the statutes, there remains £373,260, and of this the committee recommends a distribution of 14s. per share, equal to 7 per cent., leaving £23,260 to be carried forward.

Sulzer Brothers.

This concern is to be transformed into a limited liability company, with a capital of 24 million francs. The two 4½ per cent. loans for five and seven million francs respectively, issued in 1908 and 1912, will be redeemed or converted into 5 per cent. shares in a new issue of sixteen million francs.

Lake Copais.

The report of the Lake Copais Company, Limited, for the year 1913, to be presented at the general meeting on July 2, states that the profit, after charging interest on the prior lien bonds, amounting to £5,652, was £7,577. From this £1,500 has been transferred to reserve and the balance is carried to the A debenture stockholders' interest account, making, with £25 brought forward, a total of £6,102 at their credit. The directors recommend a distribution of 3 per cent. (subject to deduction for income-tax) on the A debenture stock. In accordance with the resolutions passed last year, this distribution will be paid in fully-paid 6 per cent. second prior lien bonds at par. Fractions of £5 will be paid in cash. The area of land cultivated was 30,325 acres, against 31,740 acres in the previous year. The falling off in the results was due to the reduction in the area under cultivation, consequent upon the war and to flooding, and also to a lower range of prices for produce. Of the area of 30,325 acres mentioned, the farms department cultivated 892 acres only, against 2,219 in the year 1912 and 4,999 acres in the year 1911. The reduction has been made in pursuance of the policy already announced. Snow and rain in February, 1913, resulted in the flooding of some 12,500 acres of land, of which 7,500 acres had been sown. As a result 5,270 acres of the 30,325 acres cultivated produced no crop. The principal works of the year were the completion of the new gas pumping station, the installation of new turbines in the electric generating station, and the improvement of canals, drains and storehouse accommodation.

ALEXANDRIA NOTES.

(FROM OUR OWN CORRESPONDENT.)

ALEXANDRIA, June 19.

Share Market.

The marked fall in cotton has seriously depressed the market. Dealings have been restricted, and demand has slackened owing to the departure of our leading financiers for Europe.

The Zervudachi Estate.

The sale by public auction of 511 feddans of land, situated at Alf, in the Province of Behera, belonging to the estate of the late M. C. G. Zervudachi, will shortly take place. The reserve price has been fixed at £E9,946. An agreement has been reached between the receivers for the estate and the Daira Khassa of H.H. the Khedive with regard to the property situated at Ghizeh and Cairo.

New Companies.

A new company has been formed under the style of the Upper Egypt Artesian Boring Co., which has its headquarters in Cairo. This company has a capital of £E10,000. Messrs. Louis Rahbé and Co. have formed a company with a share capital of £4,000 for dealing in iron and other metals.

Other companies recently formed are:—Messrs. Mattioli, Fumaroli and Co., with a capital of £E2.000, building contractors; Messrs. S. Papazian, D. Ohanessian and Co., with a capital of £E4,290, trade in leather, skins, and leather articles; Messrs. P. Frangos and Co., capital £E2,500, importers of bicycles, motor-cycles and motor-cars.

Cairo Land & Financial Company.

This company has a capital of £E80,000, of which £E50,000 has been issued, divided into 20,000 ordinary shares of £E4 each. Last year's balance-sheet showed a loss of £600.

Owing to the absence of dealings in land in the suburbs of Cairo, the company is in a precarious financial condition. It holds 1,720 shares in the Epargne Immobilière, Limited, 930 shares in the United Hotels of Egypt, Limited, and a few shares in the Express Nile Steamers, Limited, and the Société Anonyme des Halles Centrales d'Egypte. The market value of practically all these shares is very small.

Belge-Egyptienne de l'Esbekieh.

This company, which has a capital of 7,000,000 frs. (£280,000), holds property in the centre of Cairo, which figures on the balance-sheet at a value of 12,686,470 frs. The net profits for 1913 were 361,012 frs., as against 310,044 frs. in 1912. The last dividend was 6 per cent.

COMPANY RESULTS, &c.

AGRICULTURAL BANK OF EGYPT.—The National Bank of Egypt announce that Coupon No. 20 of the Agricultural Bank of Egypt Four per Cent. Cumulative Preferred shares, due July 1, will be paid at its offices in Cairo, Alexandria and London (3 and 4, Lothbury, E.C.), and by the Société Française de Banque et des Depôts, and Messrs. F. M. Philippson and Co., Brussels.

ANATOLIAN RAILWAYS.—The total receipts for the year 1913 amounted to 17,885,211 frs., leaving a balance of 4,969,449 frs., as against 18,840,420 frs. and 4,630,498 frs. in 1912 respectively. The dividend is raised from 5½ to 6 per cent., 500,000 frs. has been set aside for renewals, 192,935 frs. placed to the reserve, and the balance carried forward is 642,635 frs.

ANGLO-EGYPTIAN OIL.—Gemsah — Production for the week, 1,715 tons (last week 2,755 tons.) Hurgada—120 tons (last week 134 tons.)

ANGLO-ROUMANIAN OIL.—(Week ended 20th instant) 284 tons. Well No. 24, Bordeni, still fishing for instruments. All work last week impeded owing to heavy rains.

BLACK SEA OIL.—Week ended 20th instant, 19,203 poods (310 tons.)

CHEMINS DE FER ORIENTAUX.—Including the amount (1,432,233 frs.) brought forward,

Digitized by Google

the net profits for 1913 amounted to 5,667,549 frs., as compared with 7,816,374 frs. in 1912. Dividend to be paid is at the rate of 8 per cent., or 40 frs. per share, and a sum of 1,494,017 frs. is carried forward.

CHEMIN DE FER DE DAMAS-HAMAH ET PROLONGEMENTS.—The dividend proposed for 1913 is 5.78 frs. net per share, as against 5.41 frs. for 1912.

CITY OF ALEXANDRIA FOUR PER CENT. LOAN.—The National Bank of Egypt announces that coupon No. 25, due on July 1, 1914, will be paid at 3 and 4, Lothbury, E.C.

EGYPTIAN HOTELS.—The seventeeth annual general meeting will be held at 11, Ironmonger Lane, E.C., on July 8.

IMMOBILIERE D'EGYPTE.—The ordinary general meeting will be held at the offices of the company in Brussels on the 26th inst.

LAND BANK OF EGYPT.—The Comptoir National d'Escompte de Paris, 52, Threadneedle Street, E.C., has received instructions to pay on and after July 1 the coupons and drawn bonds of the 3½ per cent. and 4 per cent. debentures of the Land Bank of Egypt at the current rate of exchange of the day.

MERSINA-TARSUS-ADANA RAILWAY.—On and after July 1 the company will pay, in Constantinople, at the offices of the Ottoman Railway Company of Anatolia, the Deutsche Bank Filiale Konstantinopel, in London the Deutsche Bank (Berlin), London Agency, 8s. against coupon No. 28, falling due on that date on the First Mortgage bonds of £20. Payments in Constantinople will be at the rate of 110 gold piastres per £1 sterling.

MORTGAGE COMPANY OF EGYPT.—Half-year's interest on Four and a-Half per Cent. First Charge debentures will be payable at Messrs. Glyn, Mills, Currie, and Co., 67, Lombard Street, E.C., on and after July 1 next.

NESTOR GIANACLIS.—The fourth annual general meeting will be held at the offices, Bank of Athens, 22, Fenchurch Street, E.C., on June 26.

ORIENTAL CARPET MANUFACTURERS.—The profits for last year, including the balance brought forward, was £236,700, as compared with £212,700 in 1912. The dividend is at the rate of 20 frs. per share, as against 25 frs. in 1912. The annual general meeting will be held at Smyrna on July 11, when, among other business, a resolution will be submitted confirming the purchase of the ordinary and founders' shares of the Ottoman Cloth Company.

OTTOMAN FIVE PER CENT. LOAN, 1896.—The numbers are published of the bonds drawn for payment at par.

OTTOMAN RAILWAY FROM SMYRNA TO AIDIN.—Receipts for the week ended June 20, amounted to £8,857, an increase of £3,107 over the corresponding period of last year.

IMPERIAL OTTOMAN BANK.

NOTICE IS HEREBY GIVEN that the DIVIDEND of 14s. per Share (equal to 7 per cent. per annum), voted at the General Meeting of Shareholders held this day, will be PAYABLE on and after the 1st July next in London at the Coupon Offices of the Bank, 27, Throgmorton Street, E.C. The Coupon to be presented is No. 56. It must be listed on forms, which can be obtained on application, and be left four clear days for examination before payment.

C. E. L. CORTHORN, Secretary.

London, 24th June, 1914.

COOK'S NILE STEAMERS AND DAHABEAHS.

THOS. COOK & SON have unequalled facilities for Travellers visiting Egypt, now the premier Winter Resort of the World. Their fleet of **Fourteen Large Passenger Steamers** consists of the finest vessels on the Nile, specially built, luxuriously appointed throughout, and fitted with every modern convenience.

TOURIST SERVICE.—These large and handsomely-fitted Steel Steamers sail once a week from **Cairo** to **Assuan**, and twice a week from **Assiut** to **Assuan**, the sailings from **Cairo** beginning in November, and from **Assiut** in January.

EXPRESS SERVICE.—The Express Steamers also leave **Cairo** twice a week, the Friday departures commencing in November, and the Monday departures in December.

There is thus a Service of **Five Cook's Steamers per week** ascending the Nile to the **First Cataract** during the Season—three from **Cairo** and two from **Assiut**—calling at all points of interest on the Nile, in connection with which complete arrangements for sightseeing and excursions are made, enabling Travellers to visit, to the best advantage, all the famous

PYRAMIDS, TEMPLES, TOMBS, RUINED CITIES, etc.

SECOND CATARACT SERVICE.—In connection with the above Services there is also a Service twice weekly by First-class Steamer from the **First** to the **Second Cataract**, with through bookings to **Khartoum, the Sudan,** and **Uganda.**

PRIVATE STEAMERS AND DAHABEAHS.—Thos. Cook & Son have several small Steamers for charter at moderate rates, specially adapted to the requirements of Families, Private Parties, Sporting Parties, etc., accommodating from eight to sixteen passengers, with competent crews, and thoroughly equipped. Also a large Fleet of First-class Sailing Dahabeahs, the best on the Nile.

Illustrated Nile Pamphlet free from:

LONDON (via Brindisi) to **EGYPT** in 4½ days.
LONDON (via Marseilles) to **EGYPT** in 5 days.
LONDON (by Sea) to **EGYPT** in 12 days.

For information as to general passage rates, descriptive handbooks and all information, apply at the Offices, P. & O. S. N. Company, 122, Leadenhall Street, E.C.; Northumberland Avenue, W.C., London.

Khedivial Mail Line.

FIRST-CLASS BRITISH MAIL STEAMERS.

GREECE-TURKEY MAIL SERVICE.

Shortest and most picturesque sea passage between Europe and Egypt. Fast steamers in connection with the Orient express train-de-luxe from Paris, Ostend, Vienna, Berlin, and Budapest leave Constantinople every Tuesday afternoon for Smyrna, Piræus and Alexandria. Return from Alexandria every Wednesday afternoon via same ports.

Service between TURKEY, SYRIA & EGYPT.

Fast steamers leave Constantinople every Saturday for Gallipoli, Dardanelles, Mitylene, Smyrna, Chios, Rhodes, Mersina, Alexandretta, Tripoli, Beyrout, Caiffa, Jaffa (for Jerusalem), Port Said and Alexandria. The voyage takes ten days.

Departure from Alexandria every Saturday, and from Port Said every Sunday, for above ports.

CYPRUS SERVICE.

Fast steamers weekly from Alexandria on Tuesday afternoons, and from Port Said on Wednesday mornings, for Famagusta, Larnaca, Limassol and Paphos.

SUDAN MAIL (SUMMER) SERVICE.

Steamers leave Suez Docks fortnightly on Friday, at 5 p.m., for Port Sudan, whence trains may be taken for Khartoum. Calls made at Suakim as required.

RED SEA COASTING MAIL SERVICE.

Steamers from Suez Docks every Monday evening, at 5 p.m., for Jeddah, calling one week at Tor, El-Wedj, Yambo and Jeddah; and in the following week at Jeddah, Port Sudan, Suakim, Massowah, Hodeidah, and Aden.

For information apply to the Company's London Office, 37, Bishopsgate, or at Alexandria, Constantinople and Suez. Passages may be booked at Company's Agencies at all ports called at, or from the principal Tourist Agencies.

NOTES OF THE WEEK.

The tragedy of Serajevo has by now been discussed in many of its bearings, and the new situation to which it has given rise is slowly ripening. It is not yet known for certain what prompted the assassin to perpetrate his odious crime. He confesses that he had been much influenced by the literature of Anarchism which he had read. It may be that he, like the assassins of the Empress Elizabeth of Austria and of King George of the Hellenes, was a mental degenerate, and had no motive other than a blind desire to strike as notorious a blow as possible. Unfortunately, the murderer seems to be an Orthodox Serb, and the day which he selected for his crime was the anniversary of Kossovo. This has given rise to reports that he was an exponent of "Greater Servian" ideals, and that his action was prompted by a "patriotic" desire to avenge the absorption of Bosnia and the Herzegovina by the Hapsburg instead of by the Karageorgevitch Monarchy. And on this supposition the local populace appears to have acted. Croats, who are Roman Catholic Serbs, and many Bosniaks, who are Moslem Serbs, rose in riot and attacked the persons and property of Orthodox Serbs. Martial law has been proclaimed throughout the two provinces, and the military have been called in to aid the police, overwhelmed by the flood of civil disorder. We cannot but reprobate outbursts of mob violence, but the fact that a crowd should have been so wrought up as to become a mob shows what a profound effect the murder of the Archduke has had upon the Serb populations under the sway of his Imperial and Royal Apostolic Majesty.

So far as can at present be seen the chief effect of the crime of Serajevo has been a heavy blow to the hopes and schemes of the advocates of a Great Servia, which is to include all the areas inhabited by the Serb race. This murder has revealed the inherent weakness of the scheme. Under the Ottoman rule, which has been rolled back from the countries in question within living memory, a man ranked according to his religion, his *millet* was all-important, his race, his language, even his aspirations were of secondary consideration. The Servian ideal is to group Serbs of three faiths under one crown, but the pistol shots of the Franz-Josef's Strasse have awakened old animosities. Catholic has turned upon Orthodox, because the murderer of a Catholic Prince was an Orthodox, and Moslem has joined in the fray, regardless of a common speech, a common blood, and the hopes of a common future, which the expansionists of Servia had been so industriously preaching. It is too soon to judge, but as far as present appearances go it would seem that the violent death of the Archduke has shattered rather the dream of a Servian than the actuality of an Austrian Empire. In these circumstances it is idle to suppose that those whose political propaganda has been so damaged by the crime could have had any interest in inciting it, just as it is absurd to say that the riots at Serajevo call for the intervention of Belgrade. The Serbs of Bosnia are not Servian subjects, and Mr. Pashitch is not the man to thrust his head into a bees' byke without very urgent and pressing necessity. It goes without saying that there will be a great deal of Press snapping and snarling because, after all, the assassin is a Serb, and his victim was an Austrian—the attitude of many Austro-Hungarian journals is already, and in our opinion justifiably, resented in Belgrade. The fact that the former appears to be an Anarchist, while the latter was an Archduke, does not mitigate the offence, which has excited racial and religious passions at a particularly unfortunate moment.

Very little light has been thrown during the past week on the situation in Albania. Durazzo remains in a state of siege. The defences have been strengthened; behind them remain Prince William and the Albanian Government, doing nothing, while the insurgents continue to mark time at a convenient distance away, with intervals devoted to conversations with intermediaries. Reports of what is happening in other parts of Albania are untrustworthy. Thus the alleged capture of Prenk Bib Doda and his subsequent release on parole are now denied. The Mirdite chief is stated to be still advancing on the insurgents, though interested parties are at pains to throw doubt upon his loyalty to Prince William. There would seem to be some ground for believing that in the south the insurgents have captured certain towns and have reduced others to a panic-stricken condition. The reinforcements on which Durazzo was supposed to be relying appear to have paid more attention to looting than to attacking the insurgents, with the result that they fell an easy prey to the latter.

However hopeless the position in Durazzo, the insurgents have given no indication of representing an organised movement with some claim upon the reversion of Prince William's authority. At their request

Digitized by Google

a British emissary was sent out to confer with them, in the person of Colonel Phillips, who is in command of the international force at Scutari. He was confronted with the insurgent Council of War, who demanded the abdication of Prince William, an *interim* Government by the International Commission of Control, and the election of a new ruler, to be chosen by delegates from all Albania. But this Council seemed to be inspired by other leaders in the background, and the only point on which they showed unshakable firmness was the demand for the abdication of Prince William. Their attitude is not complimentary to Albania's first ruler, and points to the accuracy of the report that the whole trouble arose from the Mpret's having mistaken a peasant conference for an incipient revolution, and having ordered it to be dispersed by Malissori. The peasants proved more than a match for the latter, and their success led to the present insurgent movement.

It is to be hoped that Colonel Phillips' official report will throw some light on the general situation and on the strength and inwardness of the insurgent movement. The Albanian Government has found one very candid critic in the United States Minister to Athens. This diplomatist has been undertaking a tour in Epirus and Albania. At Durazzo he does not appear to have been received by the International Commission, and consequently he felt himself under no obligation to return compliments which were not paid to him. In a statement to the Athens Press on his return Mr. Williams denounced both the International Commission and the Albanian policy of the Great Powers. This policy he termed "an epochal scandal of anarchy, incompetence, hypocrisy, and murder." The Albanian Government was accused of having plunged the country into the throes of civil and religious war. It is not improbable that Mr. Williams will consider that he has sufficient proof to make good his charges. Whether he will also be able to excuse his want of diplomatic tact is another matter. He has expressed in picturesque language views that are gaining ground in many quarters; but his method of calling attention to a serious state of affairs will make it difficult to apply the remedy which he advocates. In urging that Albania should be given a trial in self-government, it may be presumed that Mr. Williams is echoing what has already been suggested in these columns, that Albania's ruler should take the Albanians into his confidence and govern with their help rather than remain shut up in the Konak at Durazzo.

The hopelessness of the situation lies as much in the incompetence of the European Concert as in the helpless condition of the Albanian Government. Help must clearly come from without, but in regard to Albania the Concert of Europe remains under the hypnotic influence of Austria-Hungary and Italy, the two Powers which are primarily responsible for the present state of affairs. Unless Great Britain or another Power breaks away from the attitude of cynical indifference to Albania's predicament, which Italy and Austria-Hungary have imposed on the Concert in their own interests, the situation in that country must be a great deal worse before it is better. A policy of drift, quite apart from its effect on the fortunes of Europe's protégé, Prince William, will quickly lead to a religious war between the Moslem and Christian sections of Albania. In discussing the Albanian question in the House of Commons Sir Edward Grey adopted the attitude that diplomacy in Europe was bankrupt. He was perhaps more immediately concerned with Epirus, but his reference was to Albania as a whole. To the contention that there is no halfway house between a policy of *laissez faire* and the landing of British troops we do not subscribe. The position of Great Britain in the council chamber of Europe must indeed be parlous if she cannot exercise influence without a demonstration of strength.

The Greek Government has replied in a conciliatory tone to the Turkish rejoinder to its original Note. It takes note of the Turkish communication concerning the measures adopted to put an end to the incidents in Thrace and Asia Minor, and also of the declaration regarding the reinstatement of the Greeks inhabiting the Asiatic littoral. The proposal for an exchange of peasants who desire to emigrate is accepted, and with it the suggested valuation of property and the settlement of the damage done on either side. For the rest, the Greek Government protests its own blamelessness in regard to the emigration of Moslems from Macedonia, and will not allow that the state of the latter is comparable with that of the Greeks, whose exodus was the result of provocations, attacks, and depredations. The improvement in the tension between Greece and Turkey, brought about by this exchange of notes bears out the opinion expressed in these columns that war was by no means inevitable. It would be idle to suppose that the two countries are yet out of the wood. For the present state of their relations the good offices of Talaat Bey, on the occasion of his visit to Asia Minor, are largely responsible. It remains to be seen, however, whether the Porte carries out its promises in a manner satisfactory to Greece.

The joint action of Russia and Roumania in warning the Porte that the closing of the Dardanelles in the event of a Greco-Turkish war would interpose grave obstacles to international trade, and in particular would cause enormous losses to Russian and Roumanian commerce, may be regarded in part as a corollary to the Tsar's recent visit to Roumania. It illustrates the general recognition now accorded to Roumania as a controlling force in Near Eastern affairs. Roumanian interests alone would justify very strong representations to the Porte on this subject, the more so as the time approaches when Roumanian trade through the Dardanelles will be reaching its maximum volume for the year. But such representations, if backed by Russia, cannot fail to carry weight in Constantinople, and are to be welcomed as a fresh factor in the cause of peace.

In virtue of a concordat negotiated direct with the Holy See Servia becomes emancipated from Austrian religious tutelage. The Austrian protectorate over Roman Catholics in Servia is at an end, and in its stead authority is vested in an Archbishop of Belgrade, with Uskub as a suffragan bishopric exercising jurisdiction in the new territories. The ratification of the concordat acquires enhanced significance from the fact that for some time Austria was able to prevent it.

In a discussion on foreign affairs in the House of Commons Sir Edward Grey made the interesting announcement that the British Government had lately "brought under review with the Russian Government" facts relating to the situation in Persia. The line adopted had been that it was time to take stock of the position, with a view to seeing what had taken place since the Anglo-Russian Convention was made, in the light of "the general cumulative effect of many instances and the tendency of them in the last two years." The British Government had not proposed any alteration in the Anglo-Russian Convention, but they approached the discussion, Sir Edward Grey admitted, under the impression that the situation had worked to the disadvantage of Great Britain by the force of events not foreseen when the Convention of 1907 was made. The Government is to be congratulated on having at last set on foot negotiations of this nature. We may hope that behind Sir Edward Grey's guarded utterance lies a genuine determination to put an end to several anomalies which not only militate against British prestige but impair Persian integrity. The Foreign Secretary permitted himself to say that "it would be a very serious matter if Russian political influence spread from Ispahan into the neutral zone." Serious for whom? As far as Persia is concerned, it must be equally obnoxious to have Russian political influence—as we understand the expression—exercised in Azerbaijan or in the neutral zone. If Sir Edward Grey's idea was that it would be serious for Great Britain, then we shall hope that the Foreign Office will screw up its courage still further and demand very specific alterations in the Anglo-Russian Convention.

CONSTANTINOPLE LETTER.

(From Our Own Correspondent.)

Constantinople, June 25.

The Dispute with Greece.

In spite of warlike rumours and the continued existence of a certain uneasiness, the situation must be described as in every way more satisfactory. The Greek Government seems to have found that a basis of negotiation was to be discovered in the Sublime Porte's somewhat uncompromising reply to its protestatory note; and whether this discovery was due to the fact that the members of the Hellenic war party learnt from the Premier that the French Government had warned him that if Greece allowed herself to be dragged into a war by her own Chauvinists she would obtain no French financial support, or whether the war party was not really half as strong or as numerous as was believed here, it is certain that the two Governments are already discussing a settlement of the question of the Greek and Moslem emigrants on less rough-and-ready lines than has hitherto been the case. The Servian Government has, it is believed, received assurances from Sofia that Bulgaria has no intention of interfering in the present dispute, and there is reason to believe that Mr. Tosheff has told the Porte that his country does not wish for war at present and will remain neutral, blocking Western Thrace against the entry of either Ottoman or Greek soldiers. This has, of course, damped the ardour of the Turkish war party—which, be it remembered, is a very different thing from the Turkish Government—and even the purchase by Greece of the "Idaho" and "Mississippi" is regarded in diplomatic circles as being in no sense likely to be a cause of war, on the ground that a situation in which one of the rival Powers is very much stronger than the other at sea is more dangerous to peace than is an approximate equilibrium of maritime strength. At present Greece is very much stronger at sea than Turkey. In a few months' time Turkey would have been enormously superior to Greece in capital ships had it not been for the purchase, which, if it will not do away with Turkey's eventual superiority, will none the less diminish it, and make a Turkish attack a more risky affair than it would otherwise be. The fact that the Greeks will possess two battleships of some value and a superior torpedo fleet should make Turkish Chauvinists, should they unhappily arrive in power, think twice before they attempt to use even such vessels as the "Osman I." and the "Reshadieh."

The Rival Fleets.

It is not long since I had a conversation with a promising and intelligent officer who was in command of the turret guns on one of the Turkish battleships which took part in the actions off the Dardanelles and Mudros Bay, who gave me a most interesting account of the campaign, and accompanied his account by certain criticisms of the tactics on each side. I am, for obvious reasons, prevented from giving his name, but will give the following résumé of what he said:—

"The Ottoman fleet lost its chance in the action off the Dardanelles, where the 'Averoff' came within 3,500 metres of the 'Torgut' and the 'Barbarossa,'" whose twelve 11-in. Krupps, if older weapons than the 'Averoff's' four 9.2 in. Elswick pieces, should none the less have been able to inflict a knock-out blow on the Hellenic flagship, whose commander's tactics were extremely rash. As it was, the 'Averoff' was badly knocked about, but the supine tactics of the Turkish Admiral prevented the Ottomans from following up their advantage. In the battle off Lemnos the 'Averoff' was certainly well handled, and her shooting had improved so remarkably that it was believed that she had foreign gun-pointers on board. She kept at long range, and, using her superior speed, inflicted considerable damage on the only two Turkish ships which were really engaged. She was herself badly hit at the end of the action, but here again the failure of the Ottoman higher command to rise to the occasion was made manifest. The fleet had left the Dardanelles with orders to return well before nightfall, it having been calculated that the Greeks, who had a large superiority in torpedo craft, would otherwise use the approach of dusk to deliver a dangerous attack. The Turkish Admiral, hypnotised by his instructions and the moral menace of the enemy's destroyers, drew off after a hot action of an hour and a half's duration, and left the field to the 'Averoff,' which alone of the Greek ships took any serious part in the encounter. Some defect of nerves or machinery prevented the 'Messudieh,' which had a strong battery and could steam at 12 knots, from taking part in the battle. Both sides had good luck and bad. The 'Averoff' was able to put a shell into one of the turret ports of the 'Barbarossa' and wreck the turret, but, on the other hand, one of her shells hit and nearly perforated the Turkish flagship's belt only a few inches above its lower edge. A difference of a few inches meant salvation in this case for the Ottoman vessel." All the battle proved, concluded my informant, was that the Greeks shot better than the Turkish fleet, but neither side showed any remarkable tactical skill, and each lost great chances owing to want of enterprise.

In these circumstances I would warn readers of The Near East, should war unhappily break out over the Ægean question, from attaching too much importance to paper strength on either side. Prophecies based on the number of vessels engaged and their strength as given by the various naval handbooks may stray wide of the truth. To use the language of the prize ring, we are not going to see two trained professionals whose form is known enter the ring, but shall rather be witnesses of a set-to between two talented and promising amateurs who have only recently been under the care of experienced trainers.

"Events" at Smyrna.

Talaat Bey, who returns on Saturday, is reported to have dismissed or otherwise punished a fresh batch of officials who have been concerned in recent troubles, and I am informed that some of the "reorganised" gendarmes who indulged in excesses at Phocea and Serckeui will be very severely dealt with. One gets a strong impression that Rahmi Bey's failure to deal with the anti-Greek boycott and with the furiously anti-Greek campaign waged by certain Turkish journals of Smyrna induced many minor officials to suppose that the Government would not object to "events." This deduction proved a mistaken one, unfortunately for the officials concerned; but that it was made at all is partly the fault of the central authorities, and still more the fault of the provincial Government of Aidin. In this connection I should like to say that, while very grave complaints have been brought against the gendarmerie, there has thus far been no complaint whatever of the conduct of the military, who, when called out, behaved with great impartiality and discipline.

The dragomans of the six European Embassies who have been sent, in reply to the Porte's request, to study the situation in Anatolia, all left on Sunday, with the exception of the British representative, Mr. Matthews, a hard-headed Ulsterman, who left on the previous day for Brusa, and will by now have joined his colleagues in Aidin province. Mr. Matthews had been instructed to inquire into the case of Mrs. Wiltshire, a British resident, whose olive orchards in Khodavendikiar, containing some 7,000 trees, were forcibly seized by a band of Moslem refugees, who refused to surrender them.

TURCO-GREEK RELATIONS.

The following letter has been addressed to Sir Edward Grey, the Secretary of State for Foreign Affairs, by a number of noblemen and gentlemen interested in Turco-Greek relations:—

Sir,—In view of the critical situation in the Near East and the fresh menace directed against the peace of Europe we venture to appeal to his Majesty's Government to use their own influence and invite the co-operation of the other Powers in order to avert the threatened hostilities.

The reason put forward by the Hellenic Government for its aggressive attitude is the alleged persecution of Greeks in Thrace and in parts of Western Anatolia. While freely admitting that ill-treatment of Greeks has occurred in Ottoman territory and that considerable numbers of Greeks have migrated to Salonika and the islands of Chios and Mitylene, we are convinced that the sufferings experienced by these Greeks are incomparably less severe and less extensive than those inflicted upon the Moslems of Macedonia. In any case the original aggressors in these persecutions and expulsions were obviously the Greeks themselves. Specific, cumulative, and convincing evidence exists to prove that the migration of some 240,000 Macedonian Moslems to Asia Minor and Ottoman Thrace has been brought about by a wholesale system of oppression and cruelty. It is worth remembering in this connection that the Carnegie Commission reported that, whereas all the Balkan nations had violated the laws of civilisation and humanity, the most deliberate and systematic cruelties were those perpetrated by the Greeks; on the other hand it must not be forgotten that during the progress of the Tripolitan and Balkan wars not a single Italian or Greek was molested in Turkey. The influx into Asia Minor of vast numbers of destitute Moslems has seriously embarrassed the Ottoman Government, and, very naturally, has aroused the indignation of the Turkish people and given occasion for reprisals.

In this connection we venture to hope that his Majesty's Government may see fit to submit to the Ottoman and Hellenic Governments the desirability of accepting an International Commission, for the purpose of regulating what appears to be now inevitable—the migration of Turks to Anatolia and of Greeks to Macedonia and of securing adequate compensation on both sides for those dispossessed of their lands, houses, and property. Greece has no *casus belli* against Turkey which Turkey does not possess in a more valid form against Greece; and timely intervention by the Powers would almost certainly prevent hostilities based on such grounds as those brought forward by Greece. We appeal to his Majesty's Government to use their utmost influence on behalf of peace for several reasons:—

(1) If hostilities are renewed, a war will once more have been forced upon Turkey, a country which earnestly desires peace and needs a period of repose in order to improve the condition of her people, reorganise her finances, and develop her resources.

(2) The legitimate trade interests of Europe in general and Great Britain in particular will again be seriously injured by a fresh outbreak of hostilities in the Ægean. A blockade of Smyrna, *e.g.*, would probably inflict less actual loss on Turkey than it would on the commerce of Great Britain and Germany. British traders are already suffering from the large increase of duties imposed under the new *régime* at Salonika, and the City of London has not forgotten the sinister influences exerted upon the financial and commercial world by the Balkan wars of 1912-13.

(3) When Turkey conquered Greece in 1898 she did not secure a single village for herself; since the last Balkan war Turkey has been deprived of nine-tenths of her European territory and two islands which she regards as essential to the defence of her chief Asiatic port. If Greece is permitted by the Powers to embark on a fresh war of aggression against Turkey it is difficult to exaggerate the effect which will be produced on the feelings of millions of our loyal Moslem fellow-subjects in India, whose patience has been sorely tried by what they consider the injuries and humiliations unjustly inflicted on the Ottoman people.

There is, we think, no ground for assuming that the proposed acquisition of three modern warships by Turkey is an indication of aggressive designs against Greece. A nation with an extensive littoral like that of Turkey must obviously need warships for purely defensive purposes. Turkey has not forgotten what she suffered from the absence of efficient ships during the Balkan war, nor can she overlook the fact that the Gallipoli Peninsula, the key of Constantinople, is always exposed to the risk of capture by an enemy's fleet.—We have the honour to be, Sir, your obedient servants,

LAMINGTON	DENBIGH	AUBREY HERBERT
	WALTER GUINNESS	MARK SYKES
	IVOR HERBERT	J. D. REES
	HAROLD COX	E. G. BROWNE

June 17, 1914.

In answering this communication on behalf of Sir E. Grey, Sir Eyre Crowe wrote:—

In reply, I am to assure you that his Majesty's Government are fully aware and mindful of the reasons adduced in your memorial which make the maintenance of peace especially desirable, and, as Sir E. Grey has had occasion to state in the House of Commons, his Majesty's Government and the Governments of other Powers have made, and are making, representations both at Athens and Constantinople which they sincerely hope may contribute to avoid a rupture.

As regards your proposal that his Majesty's Government should suggest to the Greek and Turkish Governments their acceptance of an International Commission to regulate the reciprocal emigration of their Christian and Moslem subjects, and the adjustment of losses thereby incurred, I am to state that Sir E. Grey considers that these objects should be attainable by the Turco-Greek Commission already designed for the purpose, and, further, it is his experience that offers of mediation are seldom acceptable to Powers at variance, unless they can be made at the desire of both of them. Should, however, both Greece and Turkey express a wish for such an International Commission, his Majesty's Government would not fail to give due consideration to the proposal.

Sir E. Grey has taken note of your view of the responsibility attaching for the present state of things, but he does not feel himself competent to apportion the blame, nor must he be understood to endorse the statements as to the special censure incurred in your view by the Greek Government. It should be remembered that the totals given of Turkish emigration are, in all probability, much exaggerated, and moreover, large numbers of the Moslem refugees from Macedonia come from territories which are not administered by Greece.

THE HELLENIC NOTE TO THE PORTE.

Dr. Streit, the Minister for Foreign Affairs, on behalf of the Hellenic Government has communicated a Note to the Porte which, from its amicable tone, has done much to ease the situation, which had already been somewhat modified in a favourable sense by the previous Ottoman communication:—

> Le Gouvernement Royal, qui, à juste titre, s'est ému de l'émigration forcée des Grecs de la Turquie, dont plus de 150,000 sont venus se réfugier sur son territoire, a pris connaissance avec une véritable satisfaction de la communication du Gouvernement Impérial Ottoman dans sa note responsive d'après laquelle il s'est appliqué à mettre fin aux événements regrettables qui se sont passés en Thrace et en Asie Mineure. Il a également pris connaissance de la déclaration du Gouvernement Impérial, faite par une lettre de son Représentant à Athènes: "Qu'il a déjà commencé et continuera à réintégrer les Grecs de l'intérieur du Vilayet de Smyrne qui se trouvent sur le littoral de la côte asiatique," comme aussi de la proposition contenue dans la lettre précitée de Son Excellence Ghalib Kemaly Bey et d'après laquelle: "les Grecs déjà partis de l'Empire resteraient en Grèce et rentreraient dans le nombre de ceux qui seront échangés." Les mesures mêmes que le Gouvernement Ottoman a fait connaître comme étant adoptées par lui pour faire cesser les persécutions et les violences que le Gouvernement Royal lui a dénoncées prouvent suffisamment que les faits signalés par le Gouvernement Royal dans les différentes Notes qu'il a dû adresser à la Sublime Porte n'etaient nullement exagérés.

The Note, after expressing a hope that friendly relations will not be disturbed in the future, continues:—

> Le Gouvernement Royal a déjà declaré au Gouvernement Ottoman qu'il accepte sous des modalités à concerter et sous la protection des deux gouvernements l'échange simultané des populations des villages grecs en Thrace et dans le vilayet de Smyrne contre les villageois musulmans de la Macédoine et de l'Epire grecque, après constatation, bien entendu, par des Commissions mixtes du désir spontané à émigrer que les dites populations rurales manifesteraient. Le Gouvernement Royal s'empresse encore de déclarer qu'il partage la manière de voir du Gouvernement Impérial concernant l'évaluation des propriétés des populations déjà émigrées de part et d'autre, qui en effet est de toute urgence, aux fins de la réinstallation réciproque et immédiate des émigrés dans les propriétés délaissées, et du réglement définitif entre les deux Gouvernements des comptes en dédommagement réciproque qui en résulteront et du solde qui, après compensation, restera, selon le cas, à la charge de l'un des deux Gouvernements.

After pointing out the difference between the situation of Moslems in Hellenic Macedonia and Greeks in the Ottoman dominions, the Note refers to the stipulations of the Treaty of Athens, and asserts:—

> D'ailleurs, il résulte des statistiques élaborées avec le plus grand soin que des populations musulmanes émigrées de la Macédoine il n'y a qu'un nombre de 52,570 seulement qui soient partis des territoires helléniqueus depuis la première guerre balkanique jusqu'à la fin du mois d'Avril, 1914, y compris ceux qui, arrivés en Macédoine des territoires bulgares, avaient été installés à Drama, et que ce chiffre n'a été augmenté pour les musulmans émigrés des territoires helléniques que de quelques centaines jusqu'à aujourd'hui. Il est encore à relever que les musulmans ayant quitté. La Grèce sont partis en emportant tous leurs biens et que leurs propriétés restent intactes.

The Note concludes with a reaffirmation of the constitutional rights of Hellenic subjects of no matter what religion and of Ottoman subjects resident in Hellenic territory.

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Cairo, June 25.

Government's Summer Headquarters.

The official headquarters of the Government were transferred to Alexandria on Sunday for the summer, and the Ministers will only pay periodical visits to Cairo during the next four months. At one time it was said that this annual change of the official venue of affairs was to be dispensed with this year for financial and other reasons; but the suggestion made was found to be impracticable, and so the old summer programme was adhered to. The Government has its offices at Bulkeley, Ramleh, where the British Agency also has its estival residence, but it is highly probable that new premises will have to be requisitioned next year; for, owing to the creation of the two Ministeries, Wakfs and Agriculture, and the ordinary expansion of the other services, the present accommodation is quite inadequate, even though the staff that proceeds to Alexandria is kept at the bare minimum.

A Record Journey to Alexandria.

When Lord Kitchener proceeded on leave on Thursday last he travelled to Alexandria by special train, which covered the distance in two hours and a-quarter. This constitutes a record run, for the fastest train on the regular service takes just over three hours. Of course, the special train was a good deal lighter than the ones ordinarily used on this line; but even making allowance for this, the time is considerably less than any yet achieved on the Alexandria service. There appears to be really no reason, barring that of expense, why the State Railways should not to-day run non-stop trains between Cairo and Alexandria. The recent performance of Lord Kitchener's special has shown that at least thirty minutes could be knocked off the present journey with the greatest ease and without any ill results, and considering the importance of this service, the extra expense that might be involved would be fully justified by the consideration shown to the public convenience.

The Birthday Honours.

The Birthday honours that have fallen to members of the Anglo-Egyptian community in Egypt and the Sudan have been received with satisfaction, though once again surprise is freely expressed that officials of very long standing should still be without the official recognition to which the great services they have rendered to their country and to Egypt are considered to entitle them.

Lord Kitchener's elevation in the peerage is much appreciated, and is regarded as signifying the Home Government's approval of the economic policy he has initiated and carried out in Egypt. The G.C.B. bestowed on Sir Reginald Wingate is welcomed as a further recognition of the brilliant administrative work he has achieved in the Sudan during the past fifteen years. As for the K.C.M.G. which has fallen to Mr. Murdoch Macdonald, Under-Secretary of State for Public Works, no honour was ever better merited, for the recipient has rendered, and is still rendering, the most invaluable services to both Egypt and the Sudan; and that there has been heard not one dissentient voice is surely evidence of his popularity and of the high esteem in which his work is generally held. The honours bestowed on Major Stack and Mr. King-Lewis are also well merited, especially in the case of the former, who recently received recognition of his services whilst acting as Director of Intelligence and Sudan Agent in Cairo, by promotion to the post of Civil Secretary to the Sudan Government at Khartoum.

The Legislative Assembly.

The prorogation of the Legislative Assembly on the eve of Lord Kitchener's departure came as a complete surprise, for it was generally expected, even amongst the members, that the session would continue for at least another two days. The order of the day included the final accounts for the past financial year; the note of the Finance Committee on the Government's reply to the observations and proposals made on the 1914-15 Budget; the Government's reply to the decision of the Assembly that the Birkets Law must not be promulgated until the consent of the Mixed Court of Appeal to its application to foreigners has been obtained; and a long list of motions. Evidently the delegates were tired out by the concentrated work which they had done during the previous fortnight amid the abnormal climatic conditions that have prevailed. The examination of the final accounts was adjourned to the next session; the Finance Committee's note on the Budget was unanimously approved without the formality of a public reading out of its contents; the Government's reply on the Birkets Law was accepted after a short discussion; and the motions, some of which were withdrawn at the meeting, were adjourned en bloc to the next session. Thus, in a little over two hours all the business had been disposed of, and it was amid much applause that Mazloum Pasha delivered his short prorogation address.

Arrest of a Turkish Officer.

The local Press is displaying no little interest in the case of a certain Mustapha Hakki, a Turkish officer, who has been placed under arrest by the Cairo police at the request of the Ottoman Government. The charge against him is that of deserting from his regiment at Hodeida. Mustapha Hakki, who is a Syrian Arab, and son of Zacharia Pasha, the well-known Damascus notable, does not deny the charge, but says that he left his regiment—he went first to Aden and then came on to Cairo—because he had expressed certain opinions which had displeased his brother officers, and for which he feared he would be called to account. In native circles it is alleged that this is an affair in which politics are mixed up, and it is understood that the Government is conducting a close inquiry into the case. If it is proved that he is in reality a political refugee, then, of course, this officer will not be surrendered to the Ottoman authorities; for although, from a legal standpoint, Egypt still forms part of the Ottoman Dominions, and military deserters can be reclaimed by the Sublime Porte, Lord Cromer established the precedent that this could not apply to any Ottoman subject who could be considered as a political refugee.

It is affirmed, although no one as yet seems to have seen him, that Azmi Bey, one-time Police Commandant at Constantinople, who was dismissed from his post over the Mustapha Kavakli affair, is now in Cairo. Whether there is any connection between the above arrest and the arrival of the man who is said to have played such an important part in the Committee's plots and intrigues it is not possible to say; but the fact remains that the movements of Turkish agents in Cairo and Alexandria have once again become most marked, and many complaints are being received as to the interfering tactics of these spies. Something ought certainly to be done to put a stop to what is nothing short of a scandal.

To-morrow, at 8 p.m., at Queen's Gate Hall, Harrington Road, South Kensington, a "Triple and Trilingual Bill" will be given by "One and Only Oriental Polyglot Company," under the direction of Messrs. Dano and Narsis, of the Ottoman and Egyptian theatrical companies. The plays to be given are: (1) "Ghaneyet el Andelus," one-act drama in Arabic; (2) "Khorotik," an Eastern fantasy; (3) "Balekji Abdullah," a screaming farce, in Turkish. Tickets may be obtained at the Box Office of the Queen's Gate Hall, Harrington Road, South Kensington.

SERVIAN LETTER.

(From Our Own Correspondent.)

Belgrade, June 28.

"Widowdan" Celebration.

To-day, in every town and village throughout Servia, the great national festival called "Widowdan" is being celebrated. Belgrade is en fête; there are military open-air concerts, processions, and festivities, and in the streets ladies are collecting for the benefit of the great patriotic society, the "Narodna Odbrana." The name of Kossovo is eternally imprinted on the memory of all Servians, and although the fall of the empire five centuries ago has been lately gloriously avenged the old commemoration day is still kept up.

Servia and the Vatican.

The Concordat between Servia and the Vatican has been signed—on the part of Servia by the Servian Ambassador in Paris, and on the part of the Vatican by the Cardinal Secretary Merry del Val. The Concordat contains twenty-two articles. For Catholics in Servia there will be appointed an archbishop, whose residence will be in Belgrade, and there will be a bishop residing in Skoplje having jurisdiction throughout New Servia. Before definitely making these appointments the Vatican will notify the names of the candidates to the Servian Government, and if there be no political reason for disapproving of them the ratification will take place at Rome.

Development of New Servia.

A great many persons in Old Servia and abroad desiring to emigrate to the New Servian territories are seeking permission to purchase land there, for which there are ample opportunities in consequence of the exodus of the well-to-do Mohammedans. The Government, in order to prevent speculation, is introducing a law that only such persons as will themselves till the ground will be entitled to purchase, and every intending purchaser must first obtain permission to make such purchase from the Minister of Agriculture.

Many Albanian residents of the New Servian territories who joined the Albanians in the late rising against Servia and fled to Albania now regret their fate, and are seeking permission from the Servian authorities to return to their former homes. Over 200 have already returned.

Dissolution of Parliament.

Parliament is dissolved, and the new elections fixed for August 14 next. There will be a fierce struggle between the parties. The Radical party will be backed by all the machinery at the disposal of the Government, as is usual in the Orient, and hopes to obtain a good working majority. The Opposition parties, consisting of the Samostalni, Progressives, and Nationalists, have decided on a joint platform during elections, and they, too, expect to obtain a majority by a combined effort.

The date fixed for the convocation of the new Parliament is September 23 next.

THE SERVIAN REGENCY.

(From Our Own Correspondent.)

Belgrade, June 28.

Prince Alexander reigns in Servia! A proclamation signed by King Peter, and published in the Official Gazette of June 24, informed his beloved people that by virtue of Article 69 of the Constitution Crown Prince Alexander temporarily reigns in his stead. And this is the latest surprising event in this land of surprises.

The King has *not* left the country; he has only gone to a Servian bathing resort, the Vraniska Bad, whither he set out on the day of the proclamation.

The King is seventy-two years old, and is not in good health, but when seen at the railway station previous to his departure his appearance was not such as to cause any anxiety. Taking into consideration the uneasiness produced by events now taking place in other Balkan States and the political circumstances in Servia, combined with his being a victim of rheumatism, he doubtless needs rest; but the question arises: Why should the Crown Prince reign, and that whilst the King remains in Servia?

The entire Servian Press indulges in comments and plentiful theorizing. The *Zivono* has a leading article headed "Abdicated." The *Pravda* says that, "taking into consideration the age and debility of the King, the proclamation provisionally transferring to Crown Prince Alexander the royal powers is probably of a durable character. *Mali Journal* says: "It was not sickness that constrained the King to delegate the regency to his son, but we may expect other surprises, and that probably in connection with the military."

Should the King quit the country of course he must be replaced, but as he remains in the country, whether in the capital or elsewhere, if he is in a fit state to perform his functions he is expected to do so. In case he is not in a state to perform his functions, and his incompetence is only of a temporary nature, such as an illness of short duration, it is not likely that he would on that account delegate his power.

THE ALBANIAN PROBLEM.

On Tuesday afternoon Mr. James Bourchier addressed a meeting of the Albanian Committee in one of the Committee rooms of the House of Commons. Among those present were the Hon. Aubrey Herbert, Lord Newton, Lord O'Hagan, Sir Mark Sykes, and Lady Barclay. Mr. Bourchier, who had travelled in the interior of Albania last autumn, pointed out that owing to the neglect and indifference of some of the Powers and the selfish aims of others, the situation had undergone a serious change for the worse since the time of his visit. At that time, notwithstanding certain local feuds and the rivalry between Ismail Kemal and Essad, comparative harmony prevailed between the Moslem and Christian sections of the population, and all were eagerly looking forward to the arrival of the new Sovereign. The intellectual leaders of the Moslems had the good sense to desire a Western and a Christian ruler who would lead the country in the path of modern civilisation. Unfortunately, the Powers, who had called the young State into existence, took no measures whatever for the necessary preservation of order within its limits except at Scutari; and as time went on local discords multiplied and foreign intrigues gained a footing in the country. The very first act of Prince William was a serious mistake for which the Powers were responsible. His disembarkation was made at Durazzo—the last town in Albania that should have been selected for his *début*. He should, of course, have made his first appearance at Scutari, when he would have been surrounded by the troops of the Powers; but Italy would not allow this, while Austria would not permit him to land at Valona. Durazzo was selected as a compromise, with disastrous results for the young Sovereign. The present deplorable situation cannot be allowed to continue without serious danger for the peace of the Balkans, and even that of Europe; yet it seems that we are about to adopt a policy of drift and to leave the solution of the problem to the "most interested" Powers. Mr. Bourchier then developed a proposal which he made when the independence of Albania was first mooted. The action of the Powers in Crete should be taken as a model, Albania being divided into sectors, which should be administered by the international authorities until a local force capable of maintaining order could be formed. The international troops could then be withdrawn, as in the case of Crete. Had this plan been adopted at the outset a very small force would have sufficed. A larger number of troops will now be necessary. Meanwhile Prince William has been expected to govern without adequate means of enforcing his authority and to begin his reign by shedding the blood of his own subjects.

NOTES FROM BULGARIA.

(From Our Own Correspondent.)

Sofia, June 28.

King Carol and the Dobruja Society.

A traveller who has arrived here from Bazarjik (Dobritch) states that during the recent visit of the King and Queen of Roumania to that town a deputation of the Bulgarian inhabitants presented themselves before their Majesties and requested that one of the two Bulgarian churches which had been seized by the Roumanian ecclesiastical authorities might be restored to them. The King is reported to have replied that while there were organisations like the Dobruja Society the Bulgarians must not expect any improvement in their lot. One of the members of the deputation, a physician, observed that the Bulgarians in the Dobruja had nothing in common with the society in question, which was outside the country, and that the Bulgarians of the Dobruja are Roumanian subjects, and as such implored that their petition might be granted. The King then replied that he would discuss the question with his Ministers.

At Bazarjik (Dobritch) there is a school built from funds bequeathed by the late Mr. Tzontcheff for the purpose of educating poor children. This school the Roumanians have transformed into military barracks. Profiting from the presence of Queen Elisabeth at Bazarjik, the widow of Mr. Tzontcheff, with several other Bulgarian ladies, appeared before her Majesty, and informed her of what had occurred. The Queen, who was unpleasantly surprised by this information, promised that on her return to Bucharest she will take steps to remedy the injustice.

The Influx of Refugees.

During the past week some 1,170 refugees were disembarked at Dedeagatch, of whom 320 came from the village of Singel, near the Dardanelles, in Turkey; and 850 from Salonika. All of them are destitute, and in a most deplorable plight.

"Autonomous Macedonia."

The Macedonian refugees here have started a weekly paper under the name *Autonomous Macedonia*. Its name is its programme. Its leading article considers the recent manifestations of strong Bulgarian spirit in the population of Macedonia, and says: "The national pride of the young Macedonian students will not be abandoned to silence. The voice of the Macedonian recruits in the Servian Army will not pass calmly as through a desert, while the act of the heroes of Shtip, unique in the history of nations, will serve as a signal to all of us, the banished, and will remind us of our country's duty."

ROUMANIAN LETTER.

(From Our Own Correspondent.)

Bucharest, June 28.

Bulgaro-Roumanian Frontier.

The Roumanian Ministry of War has nominated a Commission to meet a Bulgarian Commission for the purpose of threshing out the unsettled questions with regard to the Bulgaro-Roumanian frontier. It is believed that the questions will be settled in the course of the next month.

The Dardanelles Question.

It is reported in several newspapers here that the real object of the meeting at Constantza was the discussion by the two monarchs of the question of opening the Dardanelles. Quite a sensation was caused here a day or two ago by the publication of an article in a local paper by Mr. Diamandi, a brother of the Roumanian Minister at the Russian Court. Mr. Diamandi pointed out the importance for Roumania of an ever-open door at the Dardanelles, especially to her commercial interests; for only by way of the Dardanelles can she transport the bulk of her produce—grain, petroleum, etc.—to the principal markets. Bulgaria and Servia have now free access to the open sea, the article continues, and in like manner Roumania has a right to demand free passage at any time for her merchant steamers and those of other countries transporting her exports and imports. How her commerce may be throttled owing to this disability was shown when the Dardanelles were closed last year. It has caused surprise not only in Roumania, but elsewhere, that Roumania has approached the Porte on this subject, asking whether her trade would be sure of a free passage through the Dardanelles if a war broke out between Turkey and Greece now, the first time that any country not one of the Powers has dared to take such a step.

Help for Albania.

The Albanian colony in Bucharest, a very large one, held a meeting on Thursday, at which a resolution was unanimously passed that the colony should afford all the help possible to the Mpret. It is stated that a large number of volunteers from among the colony have left, and that many of them have already joined the Mpret's army. All capable of bearing arms were called upon at the meeting to follow this example, and a subscription will be opened for the equipment and maintenance of the volunteers.

NOTES FROM CYPRUS.

(From Our Own Correspondent.)

Cyprus, June 12.

Next week the Government offices will move up to Mount Troodos for the summer. The troops, one company of the Suffolk Regiment, under Major H. D'Arch Smith, took up their quarters there on June 11.

The Cypriot Greeks have again presented a petition to the King, through the High Commissioner, praying for union with Greece.

The reply of the Secretary of State to the memorial addressed to him by Greek members of the Legislative Council, asking that in view of the increased number of the Greek population in the island, in proportion to that of other nationalities, they might be granted the right of sending two additional Greek members to the Council, has now been received and communicated to them. It is to the effect that they may have their two additional members, but on condition that two more official, non-elected, members are also added. As this arrangement is said not to be to their liking, it is probable that the composition of the Council will remain as at present.

The report on the Education of the Island, by Messrs. Talbot and Cape, the experts sent out from Home last year, is a very thorough and practical document. It shows up all the weak points of the present system, and makes many wise suggestions for improvement.

On Wednesday, June 10, a reception was given by Mr. C. B. Wodehouse, the Commissioner of Larnaca, and Mrs. Wodehouse, on the occasion of the marriage of their only son, which took place on that day in England. The party was given in what is now called St. Lazarus Gardens, formerly a malaria-infested place, known to old Anglo-Cypriots as St. Lazarus Marsh. The "At Home" was largely attended, and the charm of the Gardens came as a surprise to most of those present, the work of filling up and subsequently of laying out the ground having been quietly carried out during the last few years. The gardens will now become a popular resort.

FRENCH NATURAL SPARKLING TABLE WATER.

Perrier

"The Champagne of Table Waters."

KEEPS YOU FIT.

HOT CLIMATES.—Perrier, now famous all over the world, is the ideal drinking water for hot climates. Its delicacy and vigour stimulate the digestion and brace up the system.

NOTES FROM SALONIKA.

(From Our Own Correspondent.)

June 25.

The Past and the Future.

The 11th inst. being the anniversary of the taking of Constantinople in 1453 by the Turks, there was held, for the first time here, a requiem service to the memory of Constantine Palæologus, who lost his life defending that city. On this occasion our tram service was not stopped, nor were the shops compulsorily closed, but those tradespeople who desired to share in the general mourning were invited to do so. Naturally, many complied, and flags were generally hoisted half-mast.

A local paper writing on the subject said:—

> The happy results of the two last Balkanic wars whipped up the energies of Hellenism and inspired it with vast hopes. And to-day, while celebrating the anniversary of the fall of Constantinople, which it looks upon as one of national mourning, Hellenism makes manifest its firm will to achieve the realization of its Great Ideal: the restoration of the Byzantine Empire.

However, this celebration has made one thing quite evident, which is that the compulsory stoppage of the tram service along the quay, about which (on the quiet) so many complaints are heard, this grievance being mentioned by "An Occasional Correspondent" in The Near East of the 19th inst., is altogether unnecessary; and so it is to be hoped it will not be again put in force.

The Problem of the Refugees.

When and how this vast immigration of Greek refugees is going to end it is impossible to foresee, and if we escape a serious epidemic as the summer advances it will be more by good luck than anything else. Even now our water supply is not equal to the increased demand; and it is altogether impossible for our authorities, animated with the best intentions, to deal with a situation that would tax the powers of any European country. During three days alone of the early part of last week over 10,000 refugees landed here from Asia Minor, several hundred others from Thrace, and still they come in one steady stream. As an officer of high rank was heard to say, it is worse than a war; and there is hardly a doubt it is a considerable factor in the deciding of Greek policy. But what we cannot understand is why the authorities will not allow the Turkish emigrants now in the town to leave. The place is crowded with immigrants; in the open, in schools, under tents, everywhere; and yet the Turks who have come in from the interior are not allowed to go. The British steamer "City of Malaga" arrived here about a fortnight ago with refugees from the Marmora, and, with the consent of the authorities, was at once chartered to carry Turks to Asia Minor, it being stipulated, however, that she was not to take those coming from Greek territory, but only from the new Servian and Bulgarian provinces. The ship was ready to receive her passengers on the Saturday afternoon, but the port authorities requested the captain to wait until the following morning, when the necessary formalities would be in order. So, early the next morning, the ship being alongside the quay, the gangways were put out and all made ready, when the captain learned that the police were not allowing the passengers, their baggage, etc., to come on board. On going to the officer in charge of the police, this official told him he was quite willing to let the emigrants embark, but the port authorities had forbidden it. So off the captain went to them, but only to be informed that they would be only too glad to get rid of the crowd, but that the police would not allow it. Back he, therefore, went to the police to ask what the little game they were playing meant; but as they still blamed the port authorities, there was nothing for him to do but to go off to the Prefecture. There, the Prefect said it was all nonsense, that, of course, the emigrants were to go, and that he would accompany him to the captain of the port to see that no further obstacle was put in the way. So they drove down together to this latter's office, and the Prefect went in to see him, but came out again in five or six minutes to say the Turks could not go, no reason whatever being given.

Greek Police and the British Flag.

That arrangement having fallen through, the captain was offered freight to carry Bulgars to Dedeagatch, this time with more success, and he managed to get away full up on the Tuesday afternoon. Before doing so, however, and while he was on shore (his officers are all Greeks), the police went on board, arrested three of the Bulgarians, most savagely beating one, and forced them on shore again under arrest. By what right they acted in this brutal manner, beating a man under the British flag, is for the Consul to find out. On hearing about it the captain could only make a protest, also putting in a claim for damages for his loss of time, but that any satisfaction will ever be obtained is exceedingly doubtful. But this was not all the vexation he had to put up with, for his second engineer, a Greek, was served with a notice to leave the ship and join the Fleet. The authorities wanted the captain to pay the engineer off, but this he absolutely refused to do, saying that if the man deserted his ship that was his affair, and he must bear the consequences.

Schemes of Improvement.

I see by The Near East of the 12th inst. that Athens is to be beautified; but so are we—on paper, and when the money can be raised. It is said our municipality are proposing to borrow from £1,600,000 to £1,800,000 for this purpose, beginning, however, with only £600,000 for immediate outlay. When all the projected plans are completed, Salonika will be a different town; but it remains to be seen what population there will be left to make use of the boulevards, promenades, gardens, etc., and to pay the interest on the loans. At any rate, Salonika compares in that respect very favourably with the capital, although, as previously said, the supply is not now sufficient for its regular inhabitants, the military and the 50,000 or so refugees.

The Tramway Sedition Case.

The "Occasional Correspondent" in The Near East of the 19th mentioned the case of Mr. Mehmet Capanji, who was recently hauled out of a tram and rushed off to the police station, and later to the Procureur, for venturing to utter a criticism on something or somebody. This incident has had a sequel; and, to save the situation, a trial of this gentleman took place on Monday in the Correctional Court. According to the report of the case in the papers, the informer was a Greek refugee from Constantinople, who deposed that Mr. Capanji "had spoken against the authorities." One would have thought any magistrate would have at once quashed such a flimsy case, but evidently that would not be in accordance with Greek legal procedure, for two officers (Colonel Cambouris and Lieutenant-Colonel Monferratos) were called for the defence, and "expressed their conviction that the accused, belonging as he does to the upper circles of Salonika society, could never have spoken against the new régime." After hearing these witnesses and "brilliant" speeches for the defence from two eminent lawyers, "the court pronounced a sentence of acquital." So the affair ended for Mr. Capanji, but if the thousands of refugees we have here are going to ride about in the trams amusing themselves by giving in charge their fellow-passengers, they may get some fun out of it, but it will be mightily unpleasant for their victims.

Greeks and Jews.

And now another refugee question has been raised by the authorities. For very many years Jews have had the carrying of salt from the port to the Public Debt stores, for which work they have been paid eight piastres per thousand okes. On Monday the director of this department, now, of course, Greek, sent for these men, and told them that some refugees were offering to do the work for seven and a-quarter piastres, and he asked them if they were willing to accept the same terms. On their replying that the work had been done by them for the last forty years, and that they could not lower the rate, they were dismissed, and replaced by refugees. So now some sixty Jewish families are thrown on the streets to starve or to emigrate, and the refugee problem is much simplified. These refugees have only to cut under the Jewish and alien labour to the extent of a penny or twopence, and this element is then squeezed out, Salonika thus getting rid of it once for all.

SUFFERINGS OF GREEKS IN ASIA MINOR.

THE SACK OF PHOCEA.

We have received from the well-known author "Lascaris" a description written by an eye-witness of the persecution of Greeks in Asia Minor. The mission of Talaat Bey, Turkish Minister of the Interior, to Smyrna and the neighbourhood has, however, it appears from other sources, had a calming effect, and the more virulent forms of persecution have momentarily ceased. An International Commission, accompanied by the dragomans from the foreign Embassies in Constantinople, is now engaged in making an independent inquiry in the affected area:—

M. Félix Sartiaux, the French archæologist, who has been carrying out excavations at Phocea, arrived at Smyrna on June 15. He told me that from May 31 to June 13 armed bands of Turks attacked the village of Sulougjuk, which is inhabited by 150 Christian families. The peasants sent their women and children to the neighbouring island of Englesonisi, and defended themselves bravely against their assailants till their ammunition gave out, when they, too, sought refuge on the desert island. Thereupon the Turks pillaged and set fire to the village, after which they joined the Mussulman population of the neighbouring villages and marched on Phocea. They were joined by the porters of Phocea, who were working in the salt quarries of that city, and by the riff-raff of the town, as well as by members of the Turkish police force dressed as peasants.

This mob fell upon the Christians, and massacred everyone they could find. Those who succeeded in escaping were taken on board an English steamer and a large sailing vessel. M. Sartiaux and his friends were able to save a great number of Christians by hoisting the French flag over the houses in which they lived. The Turks, however, took their revenge in other parts of the town, and acts of barbarity that defy all description were performed. The local authorities made no effort to preserve order, but rather took part in the disturbances. A whole quarter of the city was destroyed by fire. M. Sartiaux has made a list of the victims, about fifty in number. Four girls, aged from fifteen to twenty-two, whose parents are among the dead, were dragged through the streets by the mob, and nothing is known as to their fate. Old men and women and even paralytics and madmen were tortured by having their hands cut off, while others were hanged. The Church of St. Irene was pillaged and profaned, and a *muezzin* went up into the belfry and summoned the Faithful to prayer.

Phocea is deserted. Here and there a few terrified women and children may be seen, and the people of Smyrna are doing their best to relieve their sufferings.

RUSSIA AND THE ANGLO-PERSIAN OIL DEAL.

(From Our Own Correspondent.)

Odessa, June 28.

The British Government's acquisition of a controlling interest in the Anglo-Persian Oil Company, Limited, is not apparently regarded with friendly complacence by the leading organs of the Russian Press. Sir Edward Grey's statement to the House that the intention of the British Government in this matter has long been known to Russia, and that there is no reason whatever for believing that its realisation can in any way ruffle Russian susceptibilities is not accepted without demur. The *Novoye Vremya*, which for some time past has displayed a marked friendship for and sympathy with England, sees in this Anglo-Persian oil deal a "grave danger" to Russia and a still greater danger to Persia, and fears that it may lead to extremely undesirable friction between the two protective Powers in Persia. The comments of some of the other leading Russian organs are more pointedly adverse. The *Semstchina*, for example, sarcastically remarks upon the "curious coincidence" of Sir Edward Grey's announcement and the visit of a British naval squadron to Russian waters.

Whenever (says this journal) England displays a particularly friendly and delicate attention towards this country it behoves us to look for a hidden motive. It has always been so, but our diplomacy is usually too purblind to perceive the machination. The British warships come to anchor at Reval and our Duma Deputies hasten thither to give the British admiral and his staff a cordial reception; and that is the moment chosen by the British Foreign Minister to make his extraordinary announcement concerning his "capture" of the Persian oilfield. Who are the over-lords in Northern Persia, we or the English? Russia will tolerate no encroachment upon her sphere of influence in Iran. This oil concession obviously enables England to extend her sphere of action beyond the neutral zone and into Persian territory which was assigned to Russia's direct protection by the Anglo-Russian Agreement of 1907. The resolution of the British Parliament practically cancels the neutral zone. England's sphere of action in Persia is, as a matter of fact, extended, by means of this oil concession, to a line drawn through Kermanshah, Ispahan, and Yezd, and, consequently, the convention of 1907 may now be considered as worthless and waste paper.

Returning to the subject to-day, the *Novoye Vremya* concludes its further and hostile comments with the declaration that "in making its compact with the Anglo-Persian Oil Company the British Government has openly and flagrantly transgressed the letter and the spirit of the Anglo-Russian Agreement of 1907."

With the exception of the *Rossia*, an official organ, none of the more prominent Russian journals have a friendly and approving word to say for the Persian oil concession, and even the *Rossia* damns it with the faintest approval, or rather with patently grudging acquiescence in the scheme. It goes without saying, of course, that Sir Edward Grey consulted the Russian Foreign Office before making his statement to the House, but Russia's actual reply to the British oil enterprise will shortly become clearly apparent in the further and final consolidation of her permanent occupation of Northern Persia and in the greater absolutism of her influence at Teheran.

NOTES FROM JERUSALEM.

(From an Occasional Correspondent.)

Jerusalem, June 22.

Public indignation still runs high in Jerusalem at the hanging last week, of which fresh and horrid details keep on coming to light. The victim had to be held by several soldiers while they bound him securely, for he was of unusual strength, and fought desperately until overpowered. Apparently he was not blindfolded, and could see the preparations for his death going on around him while he remained helpless. No one in all Jerusalem could be found who would undertake the actual hanging until a gipsy consented to do it for £4. There were eight or ten other men under sentence of death in the prison, who were to have been dealt with in the same way; but a member of one of the chief Moslem families here went to the Mutessarif, and said that if the incidents of June 10 were publicly repeated he would himself raise the place in protest. I am glad to say that in consequence of this energetic protest Jerusalem has been saved from further disgrace of this kind.

Nasr-ed-Din Hodja on the Bench.

From grave to gay—an equally true incident. Last week an Austrian subject, who had lived at Jaffa for twenty years, was arrested there for walking about with a Turkish flag bound round his shoe, the star being prominent. He was thrown into prison for having publicly insulted the Turkish flag; but on appealing to his Consulate the Austrian dragoman went down to the Serai and formally demanded his release. It was refused, and the incident seemed likely to become a troublesome one when the Governor hit upon a happy expedient. "The cause of offence is the shoe," he said; "you can therefore take the man, and we will keep the shoe!" And so it was arranged; the man is free as usual, and the offending shoe, with the Turkish flag bound round it, remains unhappily in prison. Certainly Turkish officials are men of infinite resource.

NEAR EAST BOOKSHELF.

KURDS AND ARMENIANS.*

Many Englishmen still retain old-fashioned notions as to the relative value as a man of the Kurd and the Armenian—the former, in imagination, is endowed with most of the more pleasing characteristics of interesting Highlanders, taken from the pages of the best fiction; while the Armenian is but poorly regarded even by many who have met him. The authors of this book, however, speaking from actual and uncomfortable experience, do a great deal to dethrone the Kurd from his apparently deserved pride of place. They strip him of his mountain virtues, and allow that at best he is merely picturesque; he will not pay taxes, he will not work, he will not serve in the army, and—damning accusation if true—he is not a brave warrior, as every Highlander should be, but figures as a truculent bully, only capable of flaying or fleecing an unarmed population. He is full of pride and thieving, and considers himself to be one of a privileged caste, nor will he condescend to be a productive unit in the labour world until he is out of the shadow of his ancestral mountains. On the contrary, as the authors point out, the local Armenian, whose numbers have been drastically reduced by "artificial means," so that in no vilayet does his race form a majority, is still, in spite of the predatory terrorists who are his neighbours and the lack of protection which the Ottoman administration is in many places far too weak to accord him, a hard-working and thrifty farmer, full of patriotic attachment for his nation and his national Church. The reputation of the Armenian for financial ability and commercial capacity is well known, but many people in the West fail to realise that he is also endowed with administrative and diplomatic gifts, by which his Ottoman overlords have greatly profited in the past. Nor should the European forget that time was when the Armenian ranked as the equal of the Frank in love and war; and the authors of this book very rightly recall episodes in the history of Armenia of which any country might be proud. But, in spite of its military prowess and splendid past, the Armenian monarchy foundered, and since then the rallying point of the nation, as with so many of the peoples subjugated by the Turk, has been its Church—called from its founder, St. Gregory the Illuminator, the Gregorian Church. Some of the nation, however, recognize Papal claims, and form the Armenian Uniat or Mekhitarist Church; others, again, are Armeno-Orthodox, but the great mass are Gregorians, subjects of the spiritual sway of the Catholicos of Etchmiadzin and of the temporal authority accorded by the Porte to the Armenian Patriarch of Constantinople, who is elected and assisted by the Armenian National Assembly. The book contains much information about the Gregorian Church, which appears to have retained, on the one hand, certain sacrificial ceremonies which have a flavour of the doctrine of Blood Atonement; while, on the other hand, it is based on an elective principle, which should earn it the hearty support of some of the Nonconforming organisations of our own country. It is remarkable, moreover, that the Gregorian Church has always resisted the pretensions and attacks of the Œcumenical Patriarchate, and the authors incline to the opinion that its heresy, for which its adherents are damned in the eyes of the Orthodox as being Eutychians, took its rise rather from political and nationalist stubbornness than from spiritual perversity and stiff-neckedness.

The authors explain how scattered is the Armenian nation, and refer to the benefits accorded to this people under Russian rule in Transcaucasia. This, however, they point out, is rather a novelty, as until within the last few years the centralizing spirit of Russia looked with disfavour on national aspirations of all kinds within her borders, and visited minor peoples, such as the Poles, the Finlanders, the Livonians, the Ukrainers, and other non-Russian subjects of her Crown, with pains and penalties for cleaving to their racial characteristics and ambitions. At that time the Russian Armenians suffered severely, and their Church was proscribed and suppressed.

The book, which is most sympathetically written, places an interesting and remarkable people in a favourable light, and should do much to correct misunderstandings in this country upon a whole category of vexed questions concerning the Six Vilayets and their diverse and mutually antipathetic populations. There is a map illustrating the dispersion of the Armenian nation in its present captivity and its numerical preponderance in various parts of the Ottoman and Russian Empires.

TANGIER TO TEHERAN.

It has been reserved for *The Times* to combine the virtues of an official utterance with the advantages of anonymity. In Thursday's issue a letter appeared on the Foreign Page over the signature "Munsef," in which the writer vigorously defended the reputation of the Bakhtiaris, those influential gentry in whose hands is supposed to lie the future of the Anglo-Persian oil pipe-line. Even from an anonymous correspondent the letter was interesting and gave every sign of being as well-informed and authoritative as it turns out to be when on looking in the index the reader finds that it was written by —— well *vide The Times* for July 2, page 8, first column, though I am not sure that his Excellency will be entirely pleased by the publicity of the information.

***

The jubilee of the French College of the Lazarists at Damascus has just been celebrated, and the occasion was marked by a gathering of ecclesiastical clans remarkable even for Syria, that country of innumerable conflicting Churches. Among the prelates who took part in the festivities, in addition to visiting Franciscans and Jesuits, were Mgr. Beshara Shemayel, Vicar-Patriarchal of the Maronites, Mgr. Clement Baccache, the Syrian-Uniat Archbishop, and Mgr. Demetrius Cadi, Melchite Bishop of Aleppo. The French Consul-General at Damascus, M. Ottair, and his staff attended the celebrations in order to maintain the prestige of his country in the Levant, although such an act of piety would not be favourable to his prospects of promotion were he to indulge in it at home.

***

I observe with a certain sardonic interest that the Albanian rebels have established a Provisional Government at Berat. It does not surprise me. Albania is the home of such entities. Ismail Kemal Bey had a Provisional Government at Valona. Mr. Zographos had another in Argyrokastro; a previously unknown hero erected a third somewhere in the north, but as he issued no postage stamps no one troubled to recognise him or his Government, and the Republic of the Drin—which, I believe, was what he thought he had created—died unlamented and almost unknown. It is possible that the Autonomy of Berat will follow that of Epirus into oblivion, but I greatly doubt whether the Mpret will be able to get rid of it by his own unaided efforts. It will probably have to wait for the "Cretefication" of the Principality, which is demanded and predicted by all experts on the Albanian question.

***

Roumania is really becoming very advanced, for I learn from a correspondent that some 300 convicts engaged in serving life-sentences at the salt mines of Turgu Okna went on strike the other day. The grievance which led the officials of the Moldo-Wallachian Criminals' Mutual Protection Association and Convicts' Union to call out their members is stated to be the dishonesty of certain warders, who misappropriated the money obtained from the sale of curios made by the convicts "out of hours" and entrusted to them for disposal. The strikers insisted on sleeping out of doors—had summer weather anything to do with this decision?—and would not obey anybody until they had been comforted by the arrest and dismissal of the peccant officials. This really seems to be a case of setting a thief, if not to catch, at least to watch a thief, and gives the scholar an excellent opportunity to introduce a well-worn Latin tag. I am sorry to learn that the leaders of this justifiable strike have been sent to extra hard labour, which will perhaps leave them neither leisure nor inclination to carve bones or weave leather strips.

***

The true Turk is generally given credit for being a very slow-witted, unimaginative person, without much taste or talent for the pursuit of the arts. However, there are not wanting signs that he is not only making an effort to understand business, but also to take an interest in literature and the theatre. M. Antoine has been appointed director of the Constantinople Conservatoire, and it may be confidently expected that this distinguished Frenchman will not let the grass grow under his feet in his new sphere of activity, but will add to the laurels which he won in the theatrical world of Paris. I understand that a number of plays have been translated into Turkish, including "La Dame aux Camelias," some of the Sherlock Holmes stories, and a few works by Molière. It will be observed that an attempt has been made to suit all tastes. If the experiment is successful, an indigenous drama will probably be encouraged to develop. At any rate, the visitor to Constantinople will now be able to find something more interesting than the shoddy forms of entertainment which have hitherto flourished there like weeds of the Levant. I remember with pain a tour I once made of the places of entertainment in the Turkish capital, the most edifying of which housed a very degenerate circus. M. Antoine will have a task of no little difficulty, but I wish him success.

CORSAIR.

THE NEW TURKISH WRITING.

WHAT IT SHOULD DO FOR TURKEY.

(FROM A CORRESPONDENT.)

Abdul Hamid is always credited with having arrested any attempt at progress for the very good reason that he knew that any change would mean danger to him. One thing is certain, and that is that the art of reading and writing was not encouraged in Turkey in his time, or before his time for that matter, because that would have meant the spread of knowledge and the consequent fostering of progress.

The Turk has for ages left all commercial pursuits to the Armenian and the Greek; he therefore found that reading and writing were not very needful to him. It was only the clerical classes, mostly those persons engaged in the Government service, who possessed these accomplishments. Thus it is, in part, that the Armenian has his reputation for business capacity, and one can realise how he must have laughed at his Turkish compatriots who contented themselves with agricultural pursuits and rather looked down at their Armenian business men.

Turkey is now, however, striving to rouse herself and to bring her humbler subjects with all possible speed over the odd century of time by which their educational standard lags behind that of the lower classes of European countries. It is a stupendous proposition, but several hard-working men, and in particular the Minister for War, Enver Pasha, have decided to start the new education on firm foundations.

As each raw recruit comes up from the interior to do his military service he will find now that he is surrounded by older comrades who can read and write the tongue which he can only talk as yet. He should also find that in one month or so he, too, will be able to read and write with ever-lessening difficulty. When our soldier returns to his native village on completion of his term of service will he not take very good care that his children learn to read, too? Will he not be keen to see the newspaper printed in the new style, which will start him thinking on the affairs of his country and will foster in him a spirit of national unity? He will feel that he has a common bond with those in the capital city, and will begin to realise the why and wherefore of many things that seemed to him meaningless and useless before he could read about them.

To turn to the new writing itself, the idea is to use phonetic writing for all words. Turkish writing is at present a sort of stenography, or, to use a stenographer's phrase, a series of grammalogues, and anyone wishing to read a word aright must first know the word, in the same way that he would have to know the word represented by a grammalogue. To illustrate the difficulties of the old writing, it will be sufficient for the uninitiated to be told that the same sign in Turkish represents the sounds o, ou, u, eu, v; and the reader must know which of these sounds is intended before he can pronounce any particular word.

It will thus be understood why it takes a man of fair intelligence about two years to learn to read a Turkish newspaper thoroughly, and why this attainment is a practical impossibility for a person of minor intelligence.

In the new writing each letter is written separately, thus avoiding the difficulties which were caused in the old alphabet by the fact that there were three separate and different signs for each letter, according to its position in the word to be written. This separation of the letters will greatly facilitate the printing of newspapers and literature in general, and it will enable the easy construction of a typewriter for Turkish—hitherto a matter of considerable difficulty. There are two disadvantages which present themselves, the one being the considerable loss of time in writing by hand and the other being the greater space taken by the new writing. The first of these objections will, I should imagine, settle itself by the adaption of the new style to handwriting, and the other objection would seem to be easily outweighed by the attendant advantages of the new system.

How is the writing being brought into general use? First, as explained above, each soldier is being taught its use, and in this way the knowledge will be disseminated throughout the Empire; and, secondly, all the official correspondence in the Army and at the Ministry of War is conducted in the new style. This latter will therefore receive an official status and recognition which ought to give it much help for its début.

What is the general opinion about it at Constantinople? It is hard to say. There are, of course, differences of opinion on the subject, and new schemes are always opposed by those who were brought up under the older system, and who naturally consider that the old-fashioned things are the best. Young plants thrive well, however, if firmly planted and well watered, and it is certain that the *yeni yazi* (or new writing) will grow to be a tree that should produce good fruit one day if carefully looked after during the more tender years of its existence.

NEAR EAST IN PARLIAMENT.

HOUSE OF COMMONS.

Debate on Foreign Office Vote. June 29.

Foreign affairs were discussed in the House of Commons on Monday, the House going into Committee of Supply on the Foreign Office vote. Below is a summary of the references in the various speeches to the affairs of the Near East.

Lord Ronaldshay said that in view of the contract with the Anglo-Persian Oil Company the Committee was entitled to know what policy was being pursued in Southern Persia. Apparently, Sir Edward Grey was coming round to the views of those who advocated the forward policy. Advocate as he (Lord Ronaldshay) was of a forward policy, it came to him as a considerable surprise that a member of the Government should come forward with a policy of investing public money in a country like Persia. The right hon. gentleman would seem, if he might be allowed to say so, to have out-Heroded Herod. He thought it was desirable that it should be stated explicitly that we had interests in that part of the world, and that we were prepared at all costs to defend them.

Mr. Noel Buxton asked whether it was not possible that the improved state of relations among the Great Powers, and especially with Germany, made it possible that a new diplomatic attitude might be adopted towards Persia—that something on the lines of our diplomatic attitude to Afghanistan might be adopted, and that possibly a diplomatic mission might come to be worth attempting for the revival of some kind of Persian policy, possibly along with the removal of the capital from the Russian sphere of influence. Turning to the troubles arising out of the Balkan war, he said that progress had been very great, but in the minor matter of the treatment of minorities it was the duty of the Great Powers to do something to mitigate the suffering entailed in the transfer of populations. The break-up of Turkey was possibly not very far from sight, financially and morally.

Sir Mark Sykes said that a portion of the oil supply vital to this country existed in the neutral zone and the British sphere in Persia, and it was necessary, therefore, that we should have a definite Persian Gulf policy. If we went into Persia we should have to stop, and we must face our difficulties. One of these was that there might be internal trouble in the region of an oil supply, in which case we should inevitably have to have British occupation. If we had that occupation, on the possible hypothesis mentioned by Mr. Buxton of the complete break-up of the Ottoman Empire, we should have a German frontier in Mesopotamia, and, on the other hand, on the possible hypothesis of the break-up of Persia, we should have a Russian frontier. It must be our interest to maintain the integrity of the Ottoman Empire as long as possible, and the best reforms we could interest ourselves in in connection with that Empire were in respect of the provinces of Mosul and Baghdad, through which the railway was going. The position with regard to Persia was very difficult and complicated, because the desire to avoid internal disorder and yet maintain the integrity of Persia were contradictory things. Sir E. Grey spoke lightly of using two brigades for the defence of the oil pipes. A division seemed nearer the mark, but whatever the number of troops they must be added to the present Indian garrison. The root of the whole of our Persian policy seemed to rest on the question as to how the concession was worked. The Anglo-Persian Oil Company was, as far as one knew, worked on model lines and was above reproach, but as the Government were the predominant partner it was their business to see that these lines were maintained. It was their duty also to keep an eye on other concessionaires and see that they did not victimise or exploit the people, and that the local native communities got a fair share of the profits for maintaining order. Such a policy followed in the neutral and British zones would do much to produce an indigenous native civilisation, which in the best event might become part of a regenerate Persia, and, in the worst event, a native State capable of supporting itself 40 or 50 years hence.

Mr. Baird said that with regard to Mesopotamia, while the Foreign Secretary had recently stated that he did not think he would be in a position to publish the agreements, that could not prevent people being extremely nervous as to their nature, because so far as those agreements were known, by rumour, to the public, it appeared that, having renounced our right to participate in the Baghdad Railway, we hoped to counterbalance the effect of that railway by developing the navigation of the Tigris.

Mr. Aubrey Herbert said that he hoped the present situation in Albania would not be used as an argument for refusing all intervention. He thought that this situation could have been prevented, and that England could have done more. He imputed a full knowledge of everything that had happened to the Greek Government. Unless they were going to give Albania a chance, it would have been better not to constitute a State.

Sir Edward Grey, in reply, maintained that with reference to Persia he had not departed from the policy which was laid down some years ago. It must be remembered that this oil concession existed before the Anglo-Russian agreement was made, and that it remains to-day exactly as it was then. Turning to the question of defence, he said that if he spoke lightly of sending two brigades, it was because he urged upon the House that the conditions which would make it imperative upon us to do so were conditions that could not arise—not that he treated it lightly. The hon. member for Bradford asked who would pay the bill. We did not anticipate that any bill would arise, but if it did arise the circumstances under which it arose would have to be taken into very careful account, and the House would have to be quite clear that no burden was placed upon India if that burden was being incurred not in the interests of India, but solely in the interests of the supply of oil to the Admiralty. Touching on the encroachments of Russia, and the integrity and independence of Persia, he urged that he had always said that when disturbances exist in Persia which threatened Russian interests or trade, they could not construe the temporary protection of those trade routes and the preservation and maintenance of order in the country by Russian troops as being inconsistent with the spirit of the Anglo-Russian agreement. But as order increased the Russian Government had assured him that these troops would be progressively withdrawn, and lately their numbers had been reduced.

A Tendency to Russification.

But lately there had been, besides the presence of Russian troops, a tendency for the civil administration in Azerbaijan to become more and more Russified, not through the deliberate policy of the Russian Government, but through the action of Russian consuls. There was, for instance, the collection of taxes by Russian officials. The Government had lately brought these facts under review with the Russian Government, and said that it was time we had a friendly discussion with them and took stock of the position, so that we might see exactly what had taken place since the Anglo-Russian Convention was made—taking stock, not by the way of making complaint of one particular instance here, and another there, but of the general cumulative effect of many instances, and the tendency in the last few years. That matter we had begun to discuss with the Russian Government. We had not proposed any alteration in the Anglo-Russian Convention. We had simply proposed to discuss the situation which in some respects we thought had worked to our disadvantage by the force of events not foreseen when the Anglo-Russian Convention was made.

With regard to the Baghdad Railway, he hoped papers would soon be published, including the text of the agreements and the covering despatch. The reason the matter was hung up at the present moment was that we had made various agreements with Turkey and with Germany separately. We had signed some of these agreements with Turkey, and we had initialled others with Turkey and Germany. But we could not sign them, and Turkey and Germany could not sign them, until they had completed their own negotiations. When the agreements were laid *in extenso* before Parliament, he thought it would appear that they made a very complete settlement of many troublesome questions. The agreement the Government had made with regard to the Baghdad Railway was that, although we did not participate in it, the railway stopped at Busreh, and by agreement with Germany and Turkey it was not going to be continued beyond Busreh, or to the Persian Gulf, without the British Government's consent in some future agreement. That was a most important point, because originally the Baghdad Railway concession between Germany and Turkey included the right to go to the Persian Gulf. That was certainly the cause of great anxiety in this country. Of course, we had stipulated for equal rights in the sense of equal rates on the Baghdad Railway, and two British directors were to be admitted. As to the question of the navigation at Baghdad, which had previously been in a most unsatisfactory state, under the new arrangement whatever rights the Messrs. Lynch possessed previously were preserved and recognised. The Turkish rights on the river would be entrusted to an Ottoman company, in which there would be 50 per cent. of British participation with the casting vote. Finally, we had got the recognition by Turkey of the *status quo* in the Persian Gulf as the British Government had regarded it for many years past. Under the agreement we should secure from Turkey, to our mutual advantage, a satisfactory understanding about the *status quo*, which would prevent either Turkey or ourselves stirring up trouble against one another at a later date. In return for all these things when they were complete we had agreed to a 4 per cent. increase in the Turkish Customs, which would advance them to a total of 15 per cent. Having got the condition as to the termination of the Baghdad Railway, which secured British interests from disturbance in the Persian Gulf, we were able to agree to the increase in the Turkish Customs. With regard to Armenia, the Turkish Government had appointed two European Inspectors-General who would have very wide powers, quite sufficient to enable them to realise in administration the reforms which they all hoped for, and which the Turkish Government undoubtedly desired to see carried out. As to the protection of minorities in Macedonia and the Near East, he did not think the Powers were at this moment prepared to get up an International Commission for the purpose. With regard to Albania he did not know that except in one respect we could do more than we had done so far. Who were we to deal with? In the present circumstances he would not be prepared to send a British Consul into Epirus where there was no Government to hold responsible for what took place, and where there was no Government whom they could bring to book. He was opposed, and would remain opposed, to sending British troops into Albania. If we sent British troops into a disturbed district they would run the risk, some of them, of losing their lives, and they would run the risk also of having to take life. He was quite sure that if British soldiers were sent into Albania and fired on any section of the Albanian people the House of Commons would want a very strict account of why it had happened. On the other hand, if we were not prepared to send British troops and to use force we must stand aside, and if other Powers took a different view we could not object to the measures they proposed to take.

THE PRESS ON THE NEAR EAST.

Roumania's New Subjects.

In the July *Contemporary* "A Bulgarian" refers to the treatment to which Roumania is subjecting the inhabitants of her new territories in the Dobruja, where, as a result of the Treaty of Bucharest,

at the cost of a few scores of men, none of whom died fighting, she acquired 3,000 square miles of fertile land, with the Balkan hegemony thrown into the bargain.

He points out that

Roumania could lay neither ethnographic nor historic claims to the districts which she obtained in recompense for her chivalrous conduct. Of a total population of some 280,000, the number of the Roumanian inhabitants did not exceed 6,359, as against 134,331 Bulgarians and 106,830 Turks.

"From a historic point of view, her pretensions were even weaker," as her dominion over Silistria lasted only from 1390 to 1394. Not content with abolishing the "universal suffrage and proportional representation" which existed in the ceded territories under the Bulgarians, the new rulers went further and—

When the Roumanians occupied New Dobruja they found in the various localities about 200 Bulgarian schools, all of them in a flourishing condition; not one of them remains to-day. Under the pretext that in Roumania the State alone is responsible for public instruction, the Roumanian authorities closed all existing schools and sequestered their property. A score of schools have since been opened, but as most of the new teachers are Roumanians and the children are ignorant of their language, matters have not been much improved. . . .

The Bulgarian churches have fared no better than the Bulgarian schools. With the annexation the Bulgarian Exarchate was deprived of its legal status in those territories, and all the churches and other religious foundations passed into the hands of the Roumanian clergy. In those cases where the Bulgarian priests agreed to read the service in Roumanian, they were left in possession of their churches. Where that condition was not accepted, the priests were replaced by Roumanians or the churches were closed.

The author then goes on to explain the drastic measures taken on the question of land tenure:—

The Bulgarian law and the jurisprudence of the Bulgarian law courts only recognise one kind of property—that of absolute freehold. All traces of feudal tenure were swept away with the liberation of Bulgaria, and during the last thirty years people have bought and sold on that understanding. . . . Let us now see what the Roumanian law has done. In the first place, it refuses to recognise rights of property unless they are established in a certain way, and this under penalty of confiscation. . . . In the second place, it nullifies rights derived from transactions which, under the Bulgarian *régime*, were held to be valid, the result again being—confiscation. Finally, it forgets that Bulgaria had abolished all forms of feudal tenure and vests the property of practically all the agricultural land in the State, as under the Turkish law. Having whipped a dead horse into life, it proceeds to bury it once more, but, for performing that trick, it retains for the Roumanian State one-third of the property, in money or kind; but when the Roumanian legislator charges exorbitant fees to do what had been done gratuitously twenty or thirty years ago, it looks very much like robbery. The whole thing would have been ridiculous had it not involved millions of pounds and the fate of thousands of families. But even after mulcting one-third of their property, the law does not guarantee to its victims a tranquil enjoyment of the remaining two-thirds. The State only promises to give them a certain number of acres, without undertaking to place them in possession of their old fields. Nothing can, therefore, prevent the authorities from keeping the most fertile land and distributing barren plots.

The Serajevo Crime.

In certain quarters there has been a tendency to hold Servia as a nation responsible for the assassination of the Archduke Franz Ferdinand and his consort. *The Morning Post* of Wednesday reminds us, in a leading article entitled "Austria and the Serbs," that as between the two countries the plotting has not always been on one side. The Agram trials of a few years ago "revealed to the world the nature of the intrigues by which the Austro-Hungarian bureaucrats were ready to attack the unity of the Serb race and the unscrupulous character of those who carried on these intrigues." It was resentment of such treatment as they received that led to the crime of Sunday.

Both the man who threw the bomb and the boy who fired the pistol were Orthodox Serbs of Bosnia. There is no need to look across the border to Servia for instigators of the crime. But it is the obvious cue of the bureaucrats of the class that arranged the Agram persecutions to point to Servia as the source of the trouble. The bomb-thrower if he had Bosnian accomplices whom he wished to screen would naturally admit a connection with Belgrade. There are no doubt excitable men at Belgrade, as in every place east and south of Vienna, where the Orient begins. But the politicians of Belgrade are far too well acquainted with the difficulties of Servia's position to be willing to increase them by promoting plots for assassinations in Austria. It is not a little remarkable that, according to the telegrams, all of which come from and through Austrian territory, the first consequences of the assassination have been anti-Serb riots in that most Serb of Serb countries Bosnia. The Moslems and the Catholics are said to have attacked the Orthodox Serbs, to protect whom a state of siege has been proclaimed in Sarajevo.

Intrigue at Durazzo.

The Outlook (June 27) publishes a very important communication, dated Durazzo, June 14, from a special correspondent. The letter (which is headed "Albania: The Attempt to Stampede King William: International Intrigues") sheds a flood of light on the situation in Albania. The writer, discussing the attitude of the two countries chiefly concerned, says:—

Austrian policy throughout the Balkan crisis has been criticised in many quarters, notably in England. It is, therefore, the more pleasant to be able to record a conviction that in Albania Austria is playing fair. Her *amour propre* is involved, and she believes that if the Albanian experiment fails she will look foolish and suffer loss. Consequently her interests and the cause of Albanian nationalism at the moment coincide. . . Now let us examine Italy's conception of her duty towards Albania and its King. In the beginning she caught Essad Pasha early when he went on tour, kept him long in Rome, and applied such heavy blandishments that he has since been, beyond all question, simply her instrument. Whether or no Italy's original object was—as it now obviously and openly is—to get rid of a German prince as quickly as possible and put forward her own candidate is not clear, but it is plain that, from the outset, she was at least determined to discredit the new ruler. Essad Pasha was instructed to keep him in the tightest of leading strings. Both Essad and Mr. Castoldi, the King's Italian adviser, informed him continually that the country was in the most dangerous condition, and that free movement was impossible. On no account was he to be seen abroad at all unless accompanied by Essad; and sometimes when the King wished to go out Essad was engaged! Then came the "insurgent" movement, magnified in Italian accounts into a dangerous rising of Albanians against the King. There followed the very necessary arrest of Essad for complicity in the insurgent movement, but when he had been safely got aboard an Austrian warship he was surrendered to the Italians. They did not desert their tool, for Essad is now in much honour in Rome. The arrest of Essad is the one great popular act of King William's still short reign. Whatever the insurgents may be "up" about now, it is clearly not about Essad, and the King's cause is gathering strength.

It is stated that the Italians deliberately set themselves to create a panic. But:—

When neither King nor Queen was convinced by these alarms, recourse was had to threats. In the afternoon the [Italian] Minister said that he would withdraw the Italian sailors forming the Palace guard, as all must be got on board. The Italians had now so worked on everyone's nerves that even the Austrian Minister failed the King, and agreed that it was time to leave the Palace. So at 4 p.m. the King and Queen finally consented to go on board. The King returned before 7 p.m., having spent less than three hours on the yacht. But the Italians had attained their object, which was to involve him in discredit. They were quite willing to play the coward themselves if only they could appear to have infected him with fear. The deception was soon exposed, as Mr. Lamb, the English Control Commissioner, accompanied by his German colleague, quietly walked out into the country and met the "dangerous rebels."

The writer maintains that the Dutch officers are performing a difficult task "cautiously and well," but are hindered by the intrigues of the Italians, which even go so far as intercourse with the insurgents.

LETTERS TO THE EDITOR.

The columns of THE NEAR EAST *are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of* THE NEAR EAST.

Letters intended for publication MUST be accompanied by the writer's full name and address, not necessarily for publication, but as an evidence of good faith. They should be worded as briefly as possible and must be written on one side of the paper only.

THE OTTOMAN ASSOCIATION AND ITS WORK.

To the Editor of THE NEAR EAST.

SIR,—Assuredly most of your readers will agree with me in heartily thanking you for opening your columns to all shades of opinion—a privilege which those of us (at least) who differ from you occasionally value very highly.

I note that Mr. Field, of the Ottoman Society, avails himself of this privilege to attack members of the Ottoman Association, and one in particular who, writing in your issue of May 8, said truly that England on the whole was silent on the atrocities of the Balkan wars. The *people* seemingly were silent, because the Press, with a few honorable exceptions, was muzzled. But our distinguished military critic and writer, "Linesman," writing in 1913, said: "We take shame on our country that she has joined in the conspiracy which would inveigle Turkey into embracing her own infamy—*i.e.*, to yield before she is beaten—and has joined in the howl of execration against Turkey never mistaken since she began to lose." "Linesman" was able, by the sheer force of his personality, to make his protest against this howl of the Liberal Press (which is *not* the people's Press, but which is owned by capitalists) and a Jingo Press which exists to create war scares and spread the war fever on behalf of the armament companies. The one daily Labour paper in England was not established when the Tripoli and the Balkan wars broke out. Our Foreign Secretary, Sir Edward Grey, now tells us, in a recent speech, that it is in the power of the Press to create the diplomatic atmosphere, and to say how much should be possible and how much impossible, etc. Just so, and just what we should expect from Sir Edward Grey. This the people realise, and do not intend in the future to accept the dicta of the capitalists who control the Pressmen. In support of this assertion, note the result of the recent French Parliamentary elections and the revolt in Italy. And may I say here that Mr. Field might surely leave the criticism of fellow-workers and friends of Turkey to others, while proceeding with the work in hand? By that I mean helping the Turks to consolidate their country and to ward off the encroachments of Russia, who has established herself in Northern Persia and Teheran (with the acquiescence of our weak and irresolute Foreign Secretary). What will prevent her from encroaching upon India? It will be remembered that Peter the Great's injunction to future statesmen was that it must always be the object of Russia to harass Persia, to increase her influence over the plain of Iran, to push her way to the Persian Gulf, and thus ultimately to secure that vast district and the Levant. British co-operation is sought and desired just so long as it suits Russian ends. The work of the Ottoman Association is on behalf of humanity, irrespective of race, colour or creed, and a work of patriotism to many who believe that the integrity of the Ottoman Empire is indissolubly bound up with the integrity of our Empire. And, moreover, it is a work to save us from being merely a nation of shopkeepers, the docile servants of a cosmopolitan capitalist.

In an article summarising the findings of the report of the Committee of Inquiry appointed by the Carnegie Peace Fund, Professor Th. Ruyssen tells us (see *La Paix par le Droit*, Paris, May 14, 1914, pp. 273-285) that the second Balkan war takes us back not merely to the darkest periods of the Middle Ages, but to primitive ages. Abominable excesses were committed, innumerable acts of violence upon women, and horrors, such as the violation of wounded and dying young Bulgarian and Moslem girls by Greek soldiers. One instance: The daughter of a Bulgarian priest, Theo. Staeff, was carried off, and he himself was colported about the village two days after his eyes were gouged out, and then killed with others. Other victims were mutilated and some were crucified, and it is fully established that all the Greek bishops were accomplices, if not the actual instigators, of the outrages at Drama and Kavalla—and these, if you please, aspire to supersede the tolerant Turks in the Ottoman Empire. For the sake of British reputation my compatriots must cease to pretend and ask for sympathy for these worse than savage Hellenes and Slavs in the Balkans.—Yours, etc., MARGARET ROBINSON.

20, Sutherland Place, London, W., June 7, 1914.

THE ISLANDS OF THE ÆGEAN.

To the Editor of THE NEAR EAST.

SIR,—In your issue of the 5th inst. a certain Dr. Ant. Nakis, writing from Salonika, takes Mr. C. Mayo to task for his letter of the 8th ult. I feel perfectly sure that Mr. Mayo can well reply for himself, but I cannot resist calling the attention of your readers to the following remarks contained in Dr. Nakis's letter:—"As for his (Mr. Mayo's) remarks about naval matters, he proves himself so inexcusably ignorant of the facts as not to be worthy of contradiction. But I wish to inform him that Greece's naval superiority is exclusively due to her excellent seamanship; that the Turks possessed two more big (*sic*) warships than the 'Averoff'; and that if the solitary cruiser of the enemy was able to range for some time over the Eastern Mediterranean, and, finally, to take refuge in the Red Sea, it was because the only other Greek cruisers were older and slower than she. Mr. Mayo says nothing about the blowing up of the Turkish cruiser by the torpedo No. 11 in Salonika Harbour, and seems to have forgotten that the 'Averoff' served as a cork to the Dardanelles."

I would venture, in the first place, to ask Dr. Nakis precisely what he means by "two more big warships"? Does he *intend* to mean "two warships, *each bigger*"? Personally I admit that the expression leaves me in the dark as to its meaning. I would, however, mention that the "Averoff" is a modern vessel and completely outclassed the old Turkish warships "Haireddin Barbarousse" and "Tourghout Reis," two ships purchased from Germany and of quite an earlier generation.

Dr. Nakis's reference to "torpedo No. 11" is diverting. Is the Greek Navy so poorly equipped that they number each individual torpedo? Probably Dr. Nakis means torpedo *boat* No. 11. (Second inaccuracy.)

Dr. Nakis refers to a Turkish *cruiser* having been blown up by the said "torpedo." It unfortunately happens that it was only a small *gunboat*, and, having personally seen her in Salonika Harbour, I am unable to consider that her destruction was such a gigantic triumph for the Greek Fleet as Dr. Nakis suggests. (Third inaccuracy.)

In view of all the above errors in *his own* letter, I therefore think it rather a pity that Dr. Nakis has chosen to pose as a naval expert and to make such scathing remarks about Mr. Mayo.—Yours, etc., ARTHUR P. TULLY.

Constantinople, June 15, 1914.

UNREST IN ISPAHAN.

To the Editor of THE NEAR EAST.

SIR,—I am a Persian, a real Persian, in whom there is no guile. I love my country as much as any patriotic Briton loves his own land; but, unfortunately, since the granting of the Constitution (Mashroota) things have been practically in a state of anarchy. The internal conflicts that were the result of this false Constitution opened the way for the anarchical Kurd to rebel against his heretic Shah, and to massacre his helpless subjects who were not Orthodox Moslems, but were Shiahs, or Christian *Giaours*. It was lawful for a fanatical Kurd to loot their properties and perpetrate any kind of outrage upon them. How can we forget that dreadful sight when the wild Kurds of the Mangoor and Mamash tribe swept away the Shiah villages of Dashaghit and Rashakhan of Dol Mahal? After they had finished their fiendish work there, they rushed down to the plains of the Urmia district, intending to plunder the two famous Christian villages of Takia and Ardishay, but were repulsed, thanks to the presence in the village of three well-armed young men from a distant village, who put to flight this force of 400 men, after killing fourteen and wounding many more!

Personally we have had experience of the cruel and tyrannical *fedayis*, who not only collect money by force from the citizens of Tabriz, but also commit crimes worthy to be ranked with those of Sodom and Gomorrah.

The Persian Mashroota meant the existence of these facts. Then thanks be to Allah, who sent us the Russian troops, who brought us peace. As long as the Russian flag waves in Azerbaijan so long shall we enjoy peace, and until our own Government has sufficient force to keep order within its borders the evacuation of Azerbaijan by the Russian troops will bring absolute ruin in our province. Then we shall repeat the proverb our forefathers used to use: "The cup is the same cup and the basket the same basket."—Yours, etc.,

Tabriz, June 7, 1914. AMIN.

WHAT IS CHRISTIANITY?

To the Editor of THE NEAR EAST.

SIR,—At a meeting of the Victoria Institute, held on the 8th of this month in the hall of the Society of Arts, Bishop Welldon read a paper on "The Supremacy of Christianity," in one part of which he said that he resented the tendency to class all religions together as if they were alike manifestations of the same human spirit seeking after the Divine spirit. He suggests also that the gulf between East and West could only be bridged by Christianity.

I wish to speak for the East and to say that such statements are without value, and that the sentiment which dictates them will bridge nothing.

Christianity is all right, but who and where are the Christians? Islam, for instance, according to the Bishop, cannot be classed with Christianity; but who and where are better men than the Sufis of Islam? Only Christian saints; but how do we know these, and where are we to find them?

I do not say that saints only should people this wide world; the worldly element will ever remain in the majority, and will soon give the saints short shrift; but I do assert with much regret that Christianity is not a living force in Europe, and elsewhere it is no better than its surroundings, as the Balkan and Mexican wars have demonstrated.

Therefore the need of the age is not a theorising about religion, but a promotion of such works as are dictated by the Spirit and the formation of characters which reflect that Spirit.

It is, however, the great reign of Democracy now, and everything and every sentiment seem to be at a lower—what is called a "practical"—level, a business level. This will not make for Christian supremacy, and our saying that it does will convince neither Jew nor Gentile.—Yours, etc.,

Cricklewood, June 9, 1914. A. S.

PERSONAL & SOCIAL

CALENDAR OF THE WEEK.

Showing Concordance of the Gregorian, Julian, Moslem, and Jewish dates.

Gregorian. New style.	Julian. Old style.	—	Moslem.	Jewish.
1914. July.	1914. June.		1332. Shaban	5674 Tamus
3	20	Friday	9	9
4	21	Saturday	10	10
5	22	Sunday	11	11
6	23	Monday	12	12
7	24	Tuesday	13	13
8	25	Wednesday	14	14
9	26	Thursday	15	15

To-day is the birthday of H.I.H. Seif-ed-din Effendi, son of the late Sultan Abdul Aziz Khan, who was deposed in May, 1876, and brother of the Ottoman Heir Apparent.

To-morrow is the anniversary of the accession of the ex-Sultan Abdul Hamid, who succeeded his brother, the late Sultan Murad Khan, on Shaban 10, 1293, or August 31, 1876.

Monday, June 23 (O.S.), is the birthday of H.H. Prince John Constantinovitch of Russia, the husband of Princess Helena, daughter of the King of Servia.

Monday, 12 Shaban, is the birthday of H.I.H. Ibrahim Tewfik Effendi, a nephew of H.I.M. Mohamed Reshad Khan, and eighth in the order of succession.

Tuesday is the birthday of H.R.H. Prince Eitel Friedrich of Prussia, nephew to the Queen of the Hellenes.

Wednesday, June 25 (O.S.), is the anniversary of the election of H. M. Tsar Ferdinand as Prince of Bulgaria by the Grand Sobranje in 1887.

Wednesday is the birthday of H.I.R.H. the Archduchess Joseph née Princess Clotilde of Saxe-Coburg and Gotha, the sister of H.M. the Tsar of the Bulgarians.

Thursday, Shaban 15, is the birthday of H.I.H. Rukie Sultana, daughter of H.I.H. Mehmed Salah-ed-Din Effendi, and wife of Damad Abdul Medji Bey.

Lord Kitchener had an audience of his Majesty the King on Monday.

Admiral Sir A. Berkeley Milne, Commander-in-Chief, Mediterranean, in the battle cruiser "Inflexible," arrived at Constantinople last Friday.

Prince Mohammed Ali Pasha (brother of the Khedive) has arrived in London and is expected to stay for a week.

H.R.H. Prince Nicholas of Roumania has been for the past few days staying in Constantinople, where he had an audience of His All-Holiness the Œcumenical Patriarch.

Sir George Barclay, H.B.M.'s Minister at Bucharest, has gone on leave, and Mr. A. Akers Douglas, First Secretary, is acting during the absence of his chief.

It is announced from St. Petersburg that H.R.H. Prince Carol will make a long visit to the Russian Imperial Family in Italy.

Our Bucharest Correspondent writes (June 28): T.R.H. the Prince and Princess of Roumania returned from Constanza to Bucharest on Tuesday last week.

The British Ambassador to Madrid, Sir A. H. Hardinge, has been visiting Spanish Morocco and Tangier.

Mr. Ronald Graham, Adviser to the Egyptian Ministry of the Interior, leaves Egypt on July 7 for England to spend the summer.

Mr. and Mrs. R. J. Moss were to have left Alexandria for England on Wednesday.

Mme. Grouitch, the wife of the Servian Permanent Secretary for Foreign Affairs, has arrived in London from Washington.

Dr. Ruffer, President of the Egyptian Quarantine Board, is now in Europe on leave.

Djemal Pasha, the Ottoman Minister of Marine, has accepted the invitation of the French Government to attend the French naval manœuvres, and will shortly leave Constantinople.

Our Belgrade Correspondent writes (June 29): The new Roumanian Military Attaché, Major Dimitrescu, has been received in audience by Crown Prince Alexander. Prince Paul, King Peter's nephew, who is at present studying at Oxford University, will come to Belgrade for the holidays.

In consequence of the death of H.H. George II., Duke of Saxe-Meiningen, the Roumanian Court has gone into mourning until July 10.

Mr. Boyd-Carpenter, Senior Inspector of the Egyptian Ministry of Education, has left Egypt for Hungary and will stay for some time at the inland watering-place of Bad Postgen.

Dr. Alfred Eid has arrived in Paris from Cairo.

The marriage of Miss Mary Eid to Mr. Rosario Bassoul, of Beyrout, took place in Cairo last week.

The engagement is announced between Herbert Chavasse Squires, Medical Department, Sudan Government, and Hilda Margaret, youngest daughter of Sir Henry and Lady Norbury.

Last Sunday the Russian Minister in Bucharest, Mr. Poklevski-Koziell, gave a banquet to the Commander and officers of the 5th Roschiori (Red Hussar) Regiment, of which the Tsar was made Honorary Colonel on his recent visit to Constanza. The Commander and a commission of officers will shortly proceed to St. Petersburg to present to the Tsar his colonel's uniform.

A marriage has been arranged, and will take place in August, at Sydney, New South Wales, between Richard Cecil Moser, of the Public Works Ministry, Cairo, Egypt, only son of C. E. Moser, Philbeach Gardens, and Enid, youngest daughter of H. E. Russell, of Creebank, Killibilli Point, Sydney, New South Wales.

Armenians of London entertained Mr. and Mrs. Noel Buxton at the Hotel Cecil last Friday night, on the occasion of their marriage. About 100 guests were present, and the Rt. Hon. G. W. E. Russell presided. Amongst the speakers were, the Bishop of Hereford, Sir Edward Boyle, Mr. C. Roden Buxton, M.P., Mr. Aneurin Williams, Mr. J. Whitehouse, M.P., Mr. A. P. Hacobian, Mr. Aram Raffi, M. T. Nazarian, Mr. Arthur Symonds, and Prof. Hagopian. The list of guests included Lady Boyle, Sir T. F. Buxton, Mrs. Percival (wife of the Bishop of Hereford), Mr. Philip Morrell, M.P., and many others.

Mr. T. A. F. Critchley, the manager of the Imperial Ottoman Bank at Alexandria, left last week with his family for England.

The Egyptian Army annual dinner will take place at the Grafton Galleries on Tuesday next. Members should notify their intention of dining to the Treasurer, Egyptian Army Dinner Club, care of Messrs. Cox and Co., Charing Cross.

The Ottoman Red Crescent Society of Constantinople and the Turkish Empire, under the patronage of H.I.M. the Sultan and the hon. presidency of H.I.H. Yussuf-Izz-ed-Din Effendi, has opened a branch in London at 35, Mildmay Chambers, Bishopsgate, E.C. (temporary offices). H.H. Tewfik Pasha, Turkish Ambassador to the Court of St. James, is the hon. president, Mundji Fikri Bey, Turkish Consul-General in London, is the president, and Mr. Leon Zorayan is the hon. secretary and treasurer.

Colonel Frederick Henry Swinfen, the Senior Military Knight of Windsor, who died last week at the age of 84, served in the Crimean War. He was wounded at Balaclava, where he took part in the charge of the Heavy Brigade, and was also present at the Siege of Sebastopol. He had the Crimean medal with two clasps, as well as the Turkish medal. The funeral took place last Friday with full military honours.

Major-General Sir Luke O'Connor, V.C., K.C.B., who has been appointed colonel of the Royal Welsh Fusiliers, served in the Crimea. He was one of the centre sergeants at Alma, and for his gallantry on that occasion, he received his commission, the Victoria Cross, the medal with two clasps, the Sardinian and Turkish medals, and the 5th class of the Order of the Mejidieh.

Colonel L. C. Sherer, who retires on retired pay from half-pay list, accompanied the expedition to Dongola in 1896 as a special service officer, being mentioned in despatches, and receiving the Egyptian medal and clasp, and the Queen's medal.

Vice-Admiral Charles Matthew Buckle, a Crimean veteran, who died on May 8 last, left estate of the gross value of £47,821, of which the net personalty has been sworn at £47,607.

WHERE TO STAY.

LAUSANNE-OUCHY (Switzerland).

Mrs. Peter Ralli's dance, postponed from June 3, is taking place on July 8 at 11, Hyde Park Gardens.

Our Cyprus Correspondent writes (June 12):—

Mr. Percy White, the novelist, with Mrs. and Miss White, are staying at Troodos for the summer.

The marriage of Mr. C. D. Fenn, Assistant Secretary to the Government, and Miss B. Lawford, took place quietly at Limassol on the 6th ult.

The following departures on leave have taken place:—

Captain C. W. Orr, Chief Secretary, and Mrs. Orr and children.

Captain Fleury, Local Commandant of Police, Famagasta, Mrs. Fleury and family.

Mr. I. C. Macaskie, President, District Court, Famagasta, and Mrs. Macaskie.

Mr. C. S. Cade, Commissioner of Nicosia, and Mrs. Cade.

Major W. Durham Hall, Chief Commandant of Police, Mrs. Durham Hall and family.

Mrs. Thorne and child.

Mr. J. Ferguson Pollok and Mr. C. D. Hay.

Professor Flinders Petrie, F.R.S., has been elected president of the British Constitution Association for the ensuing year.

Princess Andrew of Greece last week gave birth to a daughter at Corfu. The baby Princess will be called Sophia.

The Tsar of Russia has conferred upon Prince Antoine Bibescu the Cross of Grand Officer of the Order of St. Stanislas.

His Imperial and Royal Apostolic Majesty the Emperor Francis Joseph has conferred the Grand Cordon of the Order of St. Stephen of Hungary upon his Imperial Majesty the Sultan, to whom the insignia of the Order were handed by H.E. the Austro-Hungarian Ambassador last week in Constantinople.

APPOINTMENTS AND PROMOTIONS.

The Council of the University of Liverpool have approved the acceptance by Professor John Garstang, D.Sc., of an invitation from the Sudan Government to be their Hon. Adviser to the Service of Antiquities of the Sudan.

Shukri Bey, of the Ottoman Foreign Office, has been appointed Consul at Dedeagatch in New Bulgaria.

Mr. P. A. Stanojevitch has arrived in Bucharest to take up his appointment as First Secretary at the Servian Legation, *vice* M. Svilokositch, nominated Consul-General in that city.

General I. G. Phasile Pasha, formerly of the Ottoman Army, has been appointed Albanian Consul in Belgrade.

Mr. Walter Alexander Smart has been appointed H.B.M. Vice-Consul at Mazagan.

Our Roumanian Correspondent informs us that the following changes have been made among Roumanian commercial attachés: M. Raducan Popesco, Attaché at Constantinople, has been transferred to Antwerp; M. G. Moroiano, Attaché at Vienna, to Milan, for Italy and Switzerland; M. St. Lupashco, Attaché at Smyrna, to Marseilles.

The Senators C. F. Robescu, C. Cociash, I. Plessia and G. Ghitzesco have been elected Vice-Presidents of the new Roumanian Upper House.

Captain D. H. Thorburn, Cameronians, has been appointed for duty with the Egyptian Army.

Brevet Major A. W. F. Baird, Gordon Highlanders, has been selected for service with the Egyptian Army.

Captain G. A. D. Harvey, R.A.M.C., has been seconded for service with the Egyptian Army.

Suleiman Serri Bey, formerly Mutessarif of Kerkouk, has been appointed Mutessarif of the Sanjak of Sparta.

Ali Kiami Bey has been appointed Ottoman Consul at Veles (Kuprulu), in Servian Macedonia.

Jean Tueni Bey has been appointed first secretary to the Turkish Embassy in London. He was lately secretary to the Turkish Embassy in St. Petersburg.

Saad-ullah Bey has been appointed Ottoman Consul-General at Skoplje (Uskub) in Servian Macedonia.

The first of the two Government ex-officio directors of the Anglo-Persian Oil Company has been appointed in the person of Rear-Admiral Sir Edmond J. Warre Slade, K.C.I.E., K.C.V.O., of the Government's Oil Commission.

According to a Reuter's telegram from Athens, Mr. Diamantidis, the new Minister of Communications, took the oath yesterday and assumed office.

Major von der Goltz, son of Marshal von der Goltz Pasha, has arrived in Sofia to take up his duties as German Military Attaché.

Captain R. D. Barber, Army Service Corps, has been placed under orders for service in Egypt.

The command of the Fourth Battle Squadron, First Fleet, was on Wednesday transferred from Vice-Admiral Sir C. J. Briggs to Vice-Admiral Sir Douglas A. Gamble. The flag of Vice-Admiral Briggs was struck in the battleship "Dreadnought" at sunset at Portland on Wednesday, and replaced on Thursday by that of Sir Douglas Gamble, whose flag was last flown as Rear-Admiral in command of the then Sixth (Mediterranean) Cruiser Squadron.

According to *The Albanische Korrespondenz*, H.H. the Mpret of Albania has appointed Mehmed Bey Konitza, who was one of the delegates of the Provisional Government to London during the peace negotiations, to be Minister of Finance.

DOMESTIC ANNOUNCEMENTS

The charge for Announcements under this Heading is 3s. for three lines and 1s. per line afterwards. Minimum charge, 3s. All announcements must be authenticated with the name and address of sender.

FRIDAY, JULY 3, 1914.

COTTON IN EGYPT AND THE SUDAN.

Cotton, hardly known to the civilised nations of the West two hundred years ago, has been described as the central feature of the world's modern commerce. The industry is one of the chief sources of Great Britain's wealth, and no less than seventy million pounds are spent annually on the raw material required to feed British mills. Of the twenty-one million of centals of cotton imported into this country three-quarters come from America; Egypt supplies less than a fifth; other foreign countries and British possessions supply the remainder. In these circumstances the failure of the American crop in any one year may seriously embarrass the industry, and it is only natural that manufacturers should be anxious to see new fields developed. Thanks to the activities of the British Cotton Growing Association, increasing attention is being paid to the potentialities of various British colonies and dependencies as cotton-growing centres. Egypt has, of course, passed beyond the experimental stage. Cotton cultivation has been practised systematically since 1821, and although little is known regarding the stock then introduced or the subsequent stages that led up to the better types associated with the Egyptian product, the fact remains that within recent years Egypt has maintained as regards relative yield and quality the premier position amongst cotton-producing countries. The average value of its imports to the United Kingdom last year was £4 7s. per cental of a hundred pounds; American cotton averaged less than three pounds. But the possibilities of Egypt in regard to cotton are restricted by a variety of considerations. Already practically a third of the total cultivated lands is under that crop, and expansion must depend upon the extension of drainage. In this connection an interesting paper was contributed by Earl Kitchener at a recent session of the International Congress of Tropical Agriculture. Towards the end of 1912, he pointed out, about eight hundred acres of absolutely waste land at Biala in the Delta were taken in hand. The land was so heavily impregnated with salt that "for ages" nothing had grown upon it; but after the introduction of a scientific system of irrigation and drainage it was within a year in a condition to be handed over to fellaheen to be prepared and planted with rice. A satisfactory yield was obtained, and it was found that the land had not gone back in any way. Cotton is now being grown in this area. Reclamation crops will still be necessary, and it remains to be seen whether the cotton will yield level crops. But a start has been made at an expenditure which is remunerative both to the Government and the fellaheen. One and a-half million acres of this waste salt land exist in the Delta, and the success of the experiment holds out the prospect of an enormous increase in the land that can in time be profitably put under cotton.

Compared with Egypt, the potentialities of the Sudan as a cotton-producing country open up still brighter prospects for the industry. With suitable irrigation vast tracts of land will be available for the cultivation of the plant, and in order that the necessary irrigation work may be carried out the Imperial Government, as is known, has sanctioned the issue by the Sudan Government of a loan for three millions sterling. When the works now in course of construction on the Blue Nile are completed the Gezira plain will be able to take up the tale of Egypt's cotton success, with a type as good as the Egyptian, and harvested at a time when cotton is only being sown in Egypt. It is not sufficient, however, merely to hand over to the fellaheen land suitable for cotton cultivation or even to start him with seed to boot. If the high standard set in Egypt is to be maintained, scientific methods of cultivation must be inculcated. After a certain period of years, about seven, Lord Kitchener pointed out in the course of his paper, deterioration sets in, and scientific research has to be continuously employed with a view to re-creating those types of cotton which have given the name and fame to Egyptian cotton which it so rightly bears. The successful development of the industry depends on serious attention being paid to certain points. Among these Lord Kitchener included the renewal by purer strains of the cotton seed in the country, the regulation and improvement of irrigation and drainage, the proper cultivation and manuring of the land and rotation of crops, and the waging of incessant war against pests. Moreover, instruction has to be imparted in such a way that it stands a chance of being acceptable to the fellaheen and capable of assimilation by them. It says much for the paternal solicitude of the Egyptian Government that its efforts in this direction have hitherto met with marked success. The creation of the new Ministry of Agriculture is further evidence of the importance attached to this work.

When the dependence of Egypt upon its cotton crops is borne in mind it is difficult to refrain from pointing the moral of the British Occupation. Cotton growing, as we have seen, has been systematically prosecuted in the country for nearly a century, but it is only within recent years that it has assumed the importance which it now enjoys as a national asset. To improve upon its present position, indeed to maintain it, cotton cultivation requires that the efforts of the fellaheen should be directed and supervised at every turn. If we wish to see the fate of national industries when left to the unaided instinct of a peasant population in the face of competition on scientific lines, it is only necessary to turn to the record of tea and silk in China. Egypt and the Sudan, indeed, lack the advantages with which China in years past dominated the world's trade in these two products. The land has to be prepared by expensive irrigation works for cotton crops, and it will hardly be maintained that the reputation of the fellaheen for unremitting industry stands as high as that of the Chinese. Egypt's success as a cotton country depends on the maintenance of its financial prosperity, in order that the preliminary works may be undertaken at Government expense. It depends also, as we see from the fact that the cotton plant deteriorates, on scientific research at experimental stations, and again on the experience thus gained being placed at the disposal of the fellaheen in a practical manner. Politicians in the Legislative Assembly who are tempted to chafe at being kept in leading strings will do well to bear in mind that eloquence does not constitute the whole art of government. Too often their success as speakers causes them to be carried away with the idea that the details of administration count for nothing. These details, on the contrary, are the essential part of government in a country which not only lacks knowledge and experience, but is ill-supplied with the resources necessary to enable it to meet the commercial and industrial competition of more favoured lands.

THE PASSING OF THE PICTURESQUE.

By H. C. Lukach.

There has lately been issued under the auspices of the Foreign Office a publication of an interest which, at first sight, its title and appearance would scarcely seem to promise. It is the revised edition of a compilation bearing the not very enticing designation of "Treaties of Commerce and Navigation between Great Britain and Foreign Powers, wholly or partially in force on December 31, 1912"; yet there lies amid its thousand odd pages a very world of humour, pathos, and picturesqueness. Chronologically, the earliest of its contents is a Treaty of Peace and Commerce concluded in 1654 between his Highness the Protector of the Commonwealth of England, Scotland, and Ireland and her Most Serene Royal Majesty the Queen of the Kingdom of Sweden; the latest, a protocol between Great Britain and Colombia, signed in August, 1912. Between 1654 and 1912 there have been many changes in the status and methods of nations which this book mutely registers; the spacious days of Cromwell and Christina are succeeded by an age more efficient, perhaps, but sadly more prosaic. Powers once mighty yield pride of place to States then small, or non-existent; the imaginative amenties of old-fashioned diplomatic correspondence make way for terseness and precision.

The book is a melancholy commentary on the decay of the picturesque in official phraseology. Let us glance at a treaty concluded in 1857 between Queen Victoria and his Majesty whose standard is the Sun, the Sacred, the August, the Great Monarch, the Absolute King of Kings of all the States of Persia. The plenipotentiaries of the high contracting parties were respectively Lord Cowley and "His Excellency the Abode of Greatness, the Favourite of the King, Ferokh Khan, Ameen Oolmoolk, the Great Ambassador of the Mighty State of Persia, the Possessor of the Royal Portrait and of the Blue Cordon, the Bearer of the Diamond-studded Girdle, etc., etc., etc."

One would give much to know the significance of the "etc., etc., etc."; but mark the contrast with a later treaty signed in days when the Standard of the Sun had become dimmed, in an era of Belgian Treasury and Swedish gendarmerie. There is no word here of *cordon bleu* and Diamond-studded Girdle; the second Persian plenipotentiary is described *tout court* as "le Sieur Joseph Naus, Ministre d'Etat."

China provides us with no less striking a parallel. The Treaty of Nanking was signed in 1842 by Sir Henry Pottinger and
the High Commissioners Keying, a Member of the Imperial House, a Guardian of the Crown Prince, and General of the Garrison of Canton; and Elepoo, of the Imperial Kindred, graciously permitted to wear the insignia of the first rank, and the distinction of a peacock's feather;
that of Tientsin in 1858 by Lord Elgin and
the High Commissioners Kweiliang, a Senior Chief Secretary of State, styled of the East Cabinet, Captain-General of the Plain White Banner of the Manchu Banner Force, Superintendent-General of the Administration of Criminal Law; and Hwashana, one of His Imperial Majesty's Expositors of the Classics, Manchu President of the Office for the regulation of the Civil Establishment, Captain-General of the Bordered Blue Banner of the Chinese Banner Force, and Visitor of the Office of Interpretation.

In these latter days the Chinese statesman wears a bowler hat rather than a peacock's feather; the counterpart of his Majesty's Expositor of the Classics has an American degree.

Still more significant is the preamble to the Turkish Capitulations of 1675, which run as follows:—

SULTAN MEHEMED. MAY HE LIVE FOR EVER!

Let everything be observed in conformity to these Capitulations, and contrary thereto let nothing be done.

The command, under the Sublime and lofty Signet, which imparts sublimity to every place, and under the Imperial and noble Cypher, whose glory is renowned throughout all the world, by the Emperor and Conqueror of the Earth, achieved with the assistance of the Omnipotent, and by the especial grace of God, in this:

We, who by Divine grace, assistance, will, and benevolence, now are the King of Kings of the world, the Prince of Emperors of every age, the dispenser of Crowns to Monarchs, and the Champion Sultan Mehemed, Son of Sultan Ibrahim Chan, Son of Sultan Ahmed Chan, Son of Sultan Mahomed Chan, Son of Sultan Murad Chan, Son of Sultan Selim Chan, Son of Sultan Solyman Chan, Son of Sultan Selim Chan.

The most glorious amongst the great Princes professing the faith of Jesus, and the most conspicuous amongst the Potentates of the nation of the Messiah, and the Umpire of public differences that exist between Christian nations, clothed with the mantle of magnificence and majesty, Charles the Second, King of England, Scotland, France, and Ireland (whose end terminate in bliss! (i)), having sent an Ambassador to the Sublime Porte in the time of our grandfather Sultan Murad (whose tomb be ever resplendent!) of glorious memory, and full of divine mercy and pity, with professions of friendship, sincerity, devotion, partiality, and benevolence, and demanding that his subjects might be at liberty to come and go into these parts, which permission was granted to them in the reign of the Monarch aforesaid, in addition to various other special commands, to the end that on coming and going, either by land or sea, in their way, passage and lodging, they might not experience any molestation or hindrance from anyone.

He represented, in the reign of our grandfather Sultan Mehemed Chan (whose tomb be ever resplendent!), to our just and over-shadowing Porte, his cordial esteem, alliance, sincere friendship, and partiality thereto. As such privilege, therefore, had been granted to the Kings and Sovereigns of France, Venice, and Poland, who profess the most profound devotion for our most eminent throne, and to others between whom and the Sublime Porte there exists a sincere amity and good understanding, so was the same, through friendship in like manner, granted to the said King; and it was granted him that his subjects and their interpreters might safely and securely come and trade in these our sacred dominions.

The Capitulations of sublime dignity and our noble commands having been, through friendship, thus granted to the Kings aforesaid, and the Queen of the above-mentioned kingdom (i.e., Queen Elizabeth) having heretofore also sent a noble personage with presents to this victorious Porte, which is the refuge and retreat of the Kings of the Kings of the world, the most exalted placed, and the asylum of the Emperors of the Universe (which gifts were graciously accepted), and she having earnestly implored the privilege in question, her entreaties were acceded to, and these our high commands conceded to her.

It is to be feared that the sublimity of the sublime and lofty Signet is less universally conspicuous in these days.

It is interesting to observe the gradual disappearance of religious invocations from the headings of European treaties. The early treaties were habitually concluded "in the Name of the Most Holy and Undivided Trinity." I can find no example here of that pious custom subsequent to a treaty of 1826 between George IV. and his Most Christian Majesty the King of France and Navarre, Charles X. How different is the attitude of the devout Siamese King, "incomprehensible to the head and brain, the sacred beauty of the royal palace, serene and infallible," who dutifully invokes "the powerful Lord, who is in possession of every good, and every dignity, the God Boodh, who dwells over every head in the city of the sacred and great Kingdom of Si-a-yoo-tha-ya."

Much more there is in this fascinating volume: the proud and stately signature of former Kings of Spain, "*Yo el rey*, I the King"; the permission granted by the Sultan of Turkey to the Padishah of England to buy two cargoes of figs and raisins "for his own kitchen, at Smyrna, Salonica, or any other port of our sacred dominions, in fertile and abundant years, and not in times of dearth or scarcity"; the prohibition of United States vessels from touching "at St. Helena so long as Napoleon Buonaparte is there." But there is one document which has been omitted; or else my memory fails me and Great Britain was not a party to it. It is a Proclamation in which a Polynesian monarch announces to his subjects the ratification of an arrangement with some European Power. After enjoining on his people the due observance of all its provisions, he concludes: "And if you fail to obey my commands I shall be annoyed."

(i A subtle aspiration to the effect that he may die a Moslem.

The Balkans in general, and Roumania perhaps in particular, have been very prominent of late in the public eye. Not once nor twice the diplomacy of King Carol and of his late Minister of the Interior, Mr. Take Jonescu, have materially assisted the cause of peace. While the other Balkan States are more or less exhausted or slowly recovering from the effects of their struggle with Turkey and one another, Roumania is the only one who has been able steadily to develop her resources and her territory *sans coup férir*. Only forty-seven years ago, when King Carol ascended the throne, there were no railways, no roads, and no industries to speak of in the country. Now there are 2,310 miles of railway, and Roumania exports annually 3¼ million tons of cereals and 2,000,000 metric tons of oil. No one knows the mineral riches of the Carpathians, but oil is found everywhere, and the harbour of Constantza has been equipped at the cost of millions for handling and lading ships with "liquid fuel." But in order to develop her resources Roumania needs capital; and to attract capital strenuous endeavours are being made to induce people to come and see for themselves. With this end in view a booklet has been issued by the Roumanian Travel Bureau, of 1, Charing Cross, London, W.C., setting forth briefly some few of the attractions of Roumania and the best ways of getting there. Bucharest, the capital, is only 53 hours by rail from London, and the single fare, first-class, *viâ* Calais, is but £11 5s. The scenery, particularly in the Carpathians, is magnificent, and biggest attraction of all to those who really wish to do something more than "trip" superficially through the country, the language to anyone who knows a little Latin and French is comparatively simple.

***

According to a recently published Consular report a fall of 67,000 tons in the imports of British coal into the Piræus has to be chronicled for 1913, while the importation of German coal has increased by over 16,000 tons. At such a rate of progression it is of small avail that the German imports amounted only to twenty-five per cent. of the British. The British figures decreased by some twenty per cent. of their former total, while the Germans went up by over thirty per cent.

Try MAVRIDES'
Matchless Cigarettes.

SOLD EVERYWHERE.
Factory at Choubra, Cairo.

According to the latest available figures it appears that the Roumanian revenue is showing a healthy upward tendency, and that on the old basis of taxation. The total income for the thirteen months ending May 31 (O.S.) (June 13), 1914, amounts to £22,402,400, which is an increase of £565,680 on the figures for the last similar period, and is no less than £950,120 in excess of what had been anticipated in the budgetary statement of the Minister of Finance.

***

During the month of May Bulgaria exported cereals, mainly maize, to the value of 32,250,000 francs (£1,290,000), and imported goods to the value of 32,800,000 francs.

***

The Consular report for the year 1913 on the trade of the district of Patras, comprising the Morea and the provinces of Aetolia and Alarnania, has been issued.

***

The agreement between the Anglo-Persian Oil Company and the British overnment with regard to Persia has been followed by the granting of further oil concessions in Mesopotamia. According to telegrams from Constantinople, the Turkish Government has at last consented to grant the lease of the oilfields in the Baghdad and Mosul vilayets to an Anglo-German syndicate. This syndicate, so far as is known, is composed of Mr. D'Arcy on the one hand, who obtained the original promise of the concession in question and of that in Persia, and of the Deutsche Bank and the Anglo-Saxon Company on the other. Mr. D'Arcy, who, it is believed, has the Anglo-Persian Oil Company behind him, will hold 50 per cent. of the shares in the new concern; the Deutsche Bank will hold 25 per cent., and the Anglo-Saxon Company, which is believed to be a commercial *nom-de-plume*, or at least a financial bantling of the Shell, 25 per cent. The districts to be worked are extraordinarily rich in oil, and it is satisfactory to know that the concession has not fallen entirely into the hands of the Germans, who claimed prior rights. There is one danger, however, to be guarded again. Although British capital will predominate in the new company, success may only be obtained at the cost of another flourishing British industry—that of oil-engines. These engines, although they consume very small quantities of fuel in proportion to the power developed, are dependent on a cheap and plentiful supply of fuel to be an economic success. If the Baghdad and Mosul oilfields are to be worked as an Ottoman monopoly, and if monopoly prices are to be charged, the rapidly increasing prosperity of Mesopotamia must be seriously imperilled.

***

The correspondent of *The Times* in Teheran paints a gloomy picture of the finances of Persia. Ever since the departure of that robust financier Mr. Shuster things have been going from bad to worse, and are now said to be *in extremis*. The Imperial Bank of Persia has informed the Ministry of Finance that for the present it is impossible to continue to honour Treasury drafts. During the month of May the *Gendarmerie* expenses were not fully met, and last month belated payments of hardly appreciable amounts pointed to a complete cessation of payment at no very distant date. Meanwhile, the coronation of the new Shah and all the expenses that such an event entails is drawing near, and Persians are wondering whether part of the £50,000 just advanced by Great Britain can be earmarked for coronation festivities.

***

The Anglo-Persian Oil Company is to be congratulated on the Government's choice of Rear-Admiral Slade as one of the official directors who are to join the board in virtue of the recent agreement. Rear-Admiral Sir Edmond Slade has great personal experience of the Gulf and of the adjacent oil areas. When Commander-in-Chief in Persian waters, as well as in the days of the Commission over which he presided, the new director acquired an intimate knowledge of that part of the world and gained great personal influence with many of the local rulers and other personages of importance. In addition to these qualifications, Rear-Admiral Slade has a thorough understanding of the needs and methods of the vast commercial enterprise which he is now to control on behalf of the taxpayer.

***

In view of the curious way in which people persist in talking of Kasr-i-Shirin as having been transferred to Turkey I should like to point out once more that only a small section of the district surrounding the town of that name has been excluded from Persia. This section is usually known as Chiasurkh. The rest of the district of Kasr-i-Shirin itself, as has been stated recently by the Persian Minister, remains in Persia. It seems to me that some of the critics of the Government's plunge into Anglo-Persian oil were so eager to criticize that they jumped at the statement in the *Sind Gazette* without making inquiries as to the actual course of the new frontier—if they even knew that it had recently been changed—or working at an atlas to see what they were talking about or where it was. In any case it is now known that no pipe-line is to be built from Chiasurkh to Baghdad—and I have good authority for saying that a pipe-line from any part of the Kasr-i-Shirin field—whether from the Persian or the Turkish section—is not likely to be built immediately. There are other and more accessible fields within the concessional area, and it must be remembered that the Anglo-Persian Company is to be run purely on business lines in the future as in the past, in spite of the fact that the Government is interested in its operations.

Constantinople Business Letter

(From Our Own Trade Correspondent.)

Constantinople, June 27.

The Lighterage Corporation.

Since I referred in my letter of May 23 to the memorandum signed by all the British shipping agents in this city anent the Lighterage Corporation, action has been taken in this matter by all the various institutions representing shipping interests.

The Union Permanente des Délégués du Commerce Etranger supported the British memorandum, which it had translated and communicated, with its own views on the subject, to the various heads of diplomatic missions. The International Chamber of Foreign Shipping has held several meetings and maintained the views expressed in the memorandum. The British Chamber of Commerce is also acting in the matter, and I understand that arrangements were made for a deputation of London and Liverpool owners trading to the Levant, including Messrs. Wilson, of Hull, to visit the Foreign Office on June 23, but the visit has been postponed in order to obtain the opinion of Mr. Waugh, H.M. Consul, who arrives in London on the 29th. Delegates of shipping interests appointed by several Embassies to assist at the meetings of a sub-commission sitting under the presidency of Sir Richard Crawford to regulate the means of transport in this port made it a condition at the first meeting that the right of foreign shipping companies to own lighters, and to increase their numbers as circumstances require, shall be maintained; and on the sub-commission declaring that this question was outside their attributions, asked for an adjournment of the meeting to consult their colleagues. I understand that their action was approved by the Chamber of Shipping convened in the meantime, and the various delegates have reported their action to their respective Embassies. I believe they have put forward some further proposals, but I am not in a position to give these.

Projected Law on Trade Marks.

I reported at some length in my letter of May 9 on the subject of the imitation of a well-known mark of a British cotton goods manufacturer, which mark, with a trifling alteration, an enterprising native had registered as his own. The trade mark of this British manufacturer had been known in Turkey for a period of fifty years, but it had, unfortunately, not been registered by the rightful owner.

As bearing on the points raised in the particular case cited above, it is of interest that a law on trade marks has been drafted by the Ministry of Commerce, and is likely to come before the present session of the Ottoman Parliament. I believe that this projected law is also being examined by the Commission of Dragomans of Embassies. It is somewhat early to say whether the law in question will be able to pass this short session, or what alterations may eventually be made in it before it becomes law, but as showing the spirit in which it is drawn up I will quote from several of its articles.

Article 1 defines what will be considered as trade marks, and includes names or denominations having a special form, emblems, stamps, designs, vignettes, reliefs, illuminated words, letters, pictures, figures, and any other signs which may serve to distinguish manufactured articles and is affixed on these.

Article 2 requires that if the trade mark is to consist of a portrait, an instrument in proper form giving the party's consent to its use must be produced, and a similar consent of the majority of the heirs, if the party whose portrait is to be so used is dead. In the absence of any heirs the adoption of the portrait of a deceased person is subject to the approval of the Minister.

By Article 5 the use of H.M. the Sultan's autograph (Toughra), as well as the Imperial Arms, or names or titles of departments, or bodies, or associations, or words indicating the species, quality, or origin of products (unless presented in some special form) is prohibited. Article 6 forbids the use of designs or inscriptions contrary to public morals. Article 10 is to the effect that at the time of the registration of a mark, the Government will only take into consideration the prescriptions of Articles 1, 2, 5, and 6, and will proceed to no other examination. If this Article remains as at present worded the act of registration is purely declaratory, but Article 11 bears on the subject and is of very considerable importance. It states that no one can claim the right of ownership of a mark, and consequently cannot take action against an imitator, unless he has completed the formalities of registration. The fact of registration does not imply that all the requirements of the law have been fulfilled, and that the mark is the property of the person in whose name it is registered, nor can the rights of the proprietor of a non-registered mark be usurped, if such mark has been in use during three consecutive years in the Ottoman Empire.

Article 13 makes it clear that foreigners and Ottoman subjects whose business or industry is established abroad may benefit by the provisions of the law, if reciprocal treatment is granted in that country where the foreigner or Ottoman subject is established.

It seems to the writer that the articles quoted above would tend to remedy some of the defects of the present law and its interpretation by the Ottoman Courts.

Posts and Telegraphs.

The receipts of this Department for the months of April and May of the present year, just published, show marked increases compared with the previous year, as follows:—

April.	1914. £T.	1913. £T.
Post Office	28,700	22,400
Telegraph Department	39,400	27,700
May.		
Post Office	28,300	21,000
Telegraph Department	35,000	31,700

The receipts of this Department for the first quarter of the present fiscal year are just a trifle more than 30 per cent. greater than during the corresponding period of last year.

Biscuit Factory.

A local firm which has been manufacturing fancy biscuits in this city for some few years back is now laying down an important and up-to-date plant, the plans and specifications for which have been approved by the Ministry of Commerce. I would here mention that the Board of Trade returns show the exports of biscuits and cakes from Great Britain to Turkey to have grown from £21,607 during 1909 to £31,986 in 1911, and to £40,634 in 1913. French makers have paid more particular attention to this market of late, and it may be that their trade in biscuits shows even better results than our own. Anyway the greater portion of this trade will not be affected by any local factory.

The Grafsa Railway in Tunis, with 360 kilometres of track under traffic, announces its receipts for 1913 as 11,400,000 francs, against 10,000,000 in 1912. The Bona-Guelma Railway in Algeria, with a system of 1,425 kilometres, took 22,500,000 francs in receipts in 1913, against 19,200,000 in 1912.

AGENTS for EGYPT and the SUDAN:

COMMERCIAL & AGENCY CO. OF EGYPT, LTD., Alexandria & Cairo.

THE RECUPERATIVE POWERS OF BULGARIA.

The following extracts from the forthcoming report by H.M. Vice-Consul at Sofia (Mr. W. B. Heard) are published by *The Board of Trade Journal*:—

No figures of the trade of Bulgaria in 1913 are as yet available; but it is natural to anticipate that they will have dropped to a very low level. During most of the year the Dardanelles were closed, and the traffic through Servia was wholly or partially suspended. The Danube river traffic, however, except for a short period during the second war, continued throughout the year. It was only towards the close of 1913 that trade began to show some signs of revival. The situation of the commercial and industrial classes, however, is not as unfavourable as might be expected. Owing to the cessation of imports, merchants were able to clear off their old stocks at remunerative prices, and are now rapidly replenishing them. Certain industries ceased work until the end of the war and undoubtedly suffered loss. Others, however, such as those producing leather and woven materials, were actively at work all the time supplying equipment for the Army.

Consular advices from Rustchuk report a considerable trade turnover in the autumn. Business men there stood the strain of a whole year's suspension of trade, and the burden of Government requisitions surprisingly well. No important failure occurred, and firms were able to satisfy their creditors by partial payments and the renewal of acceptances. Since September, 1913, the banks at Rustchuk have done very well, after a long period of stagnation, and three local banks have since paid dividends of from 8 to 10 per cent. Foreign commercial travellers (not British) have of late been particularly active, and are obtaining large orders for the replenishment of the merchants' stocks.

The acquisition of West Thrace, with its rich tobacco growing districts and its harbours on the Ægean, should in time prove an advanatgeous exchange for the territory lost to Roumania. The new territories are being settled, as far as possible, with Bulgarian refugees from Macedonia, of whom there are over 100,000 in the country, and a sum of £200,000 has already been set aside for this purpose. The economic condition of the Bulgarian population is sound and prosperous. The harvests of 1912-13 were well above the average, and every branch of agriculture has advanced with rapid strides of late years. In 1913 the crops were harvested with complete success by the woman and those of the men who were unfit for military service. Owing to the shortage of rolling-stock and the low prices of cereals prevailing abroad, but little grain had been exported up to the end of the year. The exportation of these accumulated stocks will greatly ease the economic and financial situation.

The cession of the Bulgarian Dobruja to Roumania will be severely felt by the kingdom, and in particular by the Port of Varna. This district, originally a pastoral region, had become, since 1877, one of the chief corn-growing regions in the kingdom. Its average exports amounted to 20 per cent. of those of the whole of Bulgaria (including 50 per cent. of the beans and 15 per cent. of the tobacco grown in the country). Its pastures still produced a large proportion of the wool and dairy produce of the kingdom. Fifty per cent. of the agricultural machinery imported at Varna was destined for the Dobruja. Banks, schools, etc., had sprung up everywhere, and the prosperity of this region had been growing rapidly with the increase of railway and harbour development at Varna and Baltchik. By the loss of this district, Varna will suffer severely. Much money has been spent of late years on the construction of this port. The available accommodation was insufficient for its growing trade, and the extension of its quays and the erection of fresh warehouses has been for some time in prospect. Now it seems doubtful whether these works will be carried out, as in a few years the opening of an Ægean port will still further diminish the trade of Varna. Its importers can hardly find compensation for lost markets along the line of the Varna-Sofia Railway, where other distributing centres have already been established.

COTTON IN EGYPT AND THE SUDAN.

Lord Kitchener's Views.

Lord Kitchener presided on Monday at the morning session of the International Congress of Tropical Agriculture at the Imperial Institute. Addressing the Congress towards the close of the session, he said he thought they might claim that both as regards relative yield and quality, Egypt had maintained the premier position for many years amongst cotton-producing countries. It was a very interesting study to follow the evolution of the different characteristic types of cotton which had proved to be specially adapted to the climatic and soil conditions of the valley and Delta of the Nile since 1821, when this cultivation was commenced by the first Khedive of Egypt. Unfortunately, deterioration invariably set in after a certain period of years, and scientific research had to be continuously employed with a view to re-creating the types of cotton that had given the name and fame to Egyptian cotton which it so rightly bore.

The successful development of an agricultural product such as Egyptian cotton on a proportionately large scale demanded constant care, and the new Ministry of Agriculture fully realised the importance and responsibility of the task it had in hand, not only as regards Egypt, but also to all those large manufacturing centres that use Egyptian cotton. The successful development of this industry in Egypt depended on most serious attention being paid to the following points:—(1) The renewal, by purer strains, of the cotton seed in the country, which was liable to deterioration every seven years; (2) the regulation and improvement of irrigation and drainage; (3) the proper cultivation and manuring of the land and the rotation of crops; and (4) the waging of incessant war against insect pests.

In a country like Egypt scientific agricultural methods must, in order to be acceptable to the fellaheen, be suggested in simple form for assimilation by them. Prejudice and apathy in these matters were gradually being replaced by a more intelligent interest in the benefits attached to the observance of scientific principles. It might be of interest if he mentioned an example of what could be done by treating Egyptian soil in a scientific manner, and how the value of such methods might be brought home to the fellaheen by practical demonstration. Towards the end of 1912 about 800 acres of absolutely waste land at Biala were taken in hand. The land was so heavily impregnated with salt that for ages nothing had grown upon it. Before the experiment began the distribution and percentage of salt were carefully measured all over the area. A scientific system of irrigation and drainage was laid out on the land, at a cost of £10 an acre, and it was then handed over to the fellaheen in five-acre plots for cultivation. They had to clean and level their plots, which were made over to them on a special tenure, practically becoming their property after repayment of all expenditure and a very small rent. Last year the land was washed and a crop of rice was grown, giving a satisfactory yield. After the rice crop the salt distribution was again taken, by the same system of measurement as before the work had begun. In this case, to the great astonishment of the fellaheen cultivators, a permanent result had been achieved in one year, which under the ordinary system prevailing in this country would have taken three to four years to accomplish, and even then, with inadequate drainage, the land would have been liable to go back to its original state. It would no doubt have been better to have continued the washing and grown another rice crop this year, but owing to the shortage of water throughout the country it was impossible to allow this to be done. Cotton was now, therefore, being satisfactorily grown on a fair proportion of that area, and it was hoped it would bring in from £15 to £20 an acre. When it was considered that there were about 1,500,000 acres of equally waste salt land in the delta waiting for development by drainage, the value of this experiment could be appreciated.

The opening up of a new field for the production of Egyptian cotton in the Sudan was a matter of the highest importance. The results of experiments in growing cotton on the Gezira plain had proved that a fair yield of good quality Egyptian cotton could be produced there at a time of year when there was no special demand for water in Egypt for the harvesting of cotton in the Sudan synchronises with the sowing of cotton in Egypt. Thus a great future was in store for the Sudan as soon as the irrigation works on the Blue Nile now being undertaken were completed, enabling the vast area available for cotton cultivation to be fully developed.

At the same sessions cotton cultivation in Egypt was discussed in a paper prepared by Mr. G. C. Dudgeon, Consulting Agriculturist to the Ministry of Agriculture, Egypt. The area under cotton in that country, wrote Mr. Dudgeon, had increased annually until 32.6 per cent. of the total cultivated lands were under that crop. Extension of the cotton area was limited owing to the insufficient drainage of the lands in many parts, rendering it compulsory frequently to introduce reclamation crops, such as rice. The difficulties occasioned by the incompleteness of the original drainage scheme had made the position with regard to the undrained lands almost impossible of amelioration. The salt lands in the north were capable of reclamation, but the lands were not expected to yield level crops of cotton. Although small effect had been yet caused by the introduction of cotton into a rotation of two instead of three years as previously, it was not recommended to increase this frequency, which would result in a diminution of food crops, and a probable deterioration in the yield of cotton itself. It was improbable that there would be a permanent decline in the quality of the cotton crop in the near future.

CROPS IN SYRIA AND CYPRUS.—II.*

Favourable Outlook for 1914.

(From Our Own Correspondent.)

Beyrout, June 10.

The estimated exports for Tripoli are:—Beans, 2,000 tons against 1,000 tons last year; wheat, 6,000 tons against 400 tons in 1913; peas, 2,000 tons against 1,000 tons in 1913; barley, 15,000 tons against 12,000 tons in 1913; and dari-seed 3,000 tons against 500 tons in 1913. As regards wool, the estimated exports for the coming year are about 8,000 bales against 6,000 bales in 1913, of which about 1,000 bales were shipped to the United Kingdom, and the balance to the United States. The total exports of lemons and oranges last year exceeded 200,000 boxes, shipped chiefly to Odessa. An appreciable increase is hoped for in 1914.

Latakia.—The principal article of export is tobacco. The forecast for the forthcoming crop, which is exported almost entirely to London, is about 12,000 bales against 8,000 bales in 1913. Next in importance to tobacco comes the bean crop, which is estimated at about 1,800 tons for Latakia against about 800 tons in 1913; and about 1,200 tons against about half of this quantity for Jablé and Banias. The wheat crop has been adversely affected by the copious rains in April, and about half a crop, as compared with last year, is expected. The prospects of the barley crop are, on the other hand, fairly good; and about 2,000 tons are expected to be available for exportation. The crops of peas and dari-seed are also expected to be much better than those of last year, thanks to the copious spring rains.

Alexandretta.—Since the construction of the Rayak-Aleppo Railway *vid* Homs and Hama this port, in regard both to exports and imports, has fallen into almost complete inactivity. Its exports in grain and wool are confined to a few hundred tons per year. From Sweidieh, a neighbouring port of the district, about 500 tons of dari seed have lately been shipped to Malta intended principally for England, and there remains a balance of about 300 to 400 tons. It is expected that the export movement at both Alexandretta and Sweidieh will be brisker than last year. No particulars are yet to hand, but the general rainfall and improved economic conditions, thanks to the increased activity that the Alexandretta-Osmania branch railway of the Baghdad Railway has created, cannot fail to have a healthy effect on this district.

Special mention should be made of the orange crop, which is exported principally from Payas and Dortyol, which are situated close to Alexandretta, to Constantinople and Odessa. The average exports are about 500,000 small boxes, half the size of the Tripoli and Jaffa box. The production is increasing, as elsewhere, and unless the crop is spoiled by bad weather a total export of about 600,000 small cases may be expected for the coming year.

Mersina.—The staple product of this district is cotton. Although no trustworthy forecast can yet be made, the crop for next year is expected to be about 150,000 bales—that is to say, about 30 per cent. more than last year. This increase is chiefly due to the extensive cultivation of the cotton plant in the Adana district. Cotton is ousting grain, and the grain exports from Mersina have been decreasing in proportion to the increase of the cotton exports. In the region of Mersina, Tarsus, and Adana the cereal crop is poor, but in Djeihan, Osmania, etc., it is said to be fairly good. The barley crop is estimated to be about 10 to 15 per cent. less than last year, and wheat 25 to 30 per cent. less. The oat crop, which formerly used to be exported from Mersina in thousands of tons, is practically nil. On the other hand, the sesame seed crop is expected to be about double that of last year, or about 12,000 tons. Mersina exports also unwashed wool, and the total quantity exported annually is about 300 tons.

Cyprus.—A "bumper" crop of about 80,000 tons was confidently expected, but the appearance of blight has seriously discounted these sanguine expectations. It seems to be almost certain now that the total crop will not be more than 50,000 tons. Judging from the following particulars to hand of the crops of the Famagusta district, which is the principal grain district, there seems to be, on the whole, an improvement on last year's yield. The quality of the barley this year is very good.

	Total of crops for 1913.		Estimate for 1914.
Wheat	120,000	quarters	40% less
Barley	90,000	"	About same quantity.
Vetches	7,777	"	25% more
Oats	9,000	"	20% more
Linseed	90	tons	About same quantity.

Although no particulars have yet come to hand about the grape crop, which is an important agricultural product of Cyprus, as considerable quantities of wine and raisins are exported abroad, yet it may be inferred from the good rainfall in the spring that the yield will exceed that of last year. Total exports in 1913, wine 800 T., raisins 3,000 T.

Recent reports announce that the cool weather, that has recently prevailed in the Island, has revived the carob trees, and enabled them to resist to a certain extent the ravages of the new disease. Indeed, the locust bean crop in the Famagusta district is expected to be about 7,000 tons, against 5,000 tons last year.

According to reports received from the interior, it would seem that the crops in the region of Aleppo, Homs, and Hama do not promise so well as was at first expected. The unusually cold weather that prevailed about the end of April seems to have affected adversely the fields of barley, and of wheat, in the hilly regions. On the other hand, the prospects of the crops are quite favourable in the plain of Antioch, at Amouk, and on the coast line. It is said also that the prospects of the dari crop in the region between Sweidieh and Alexandretta are very good, and that the brisk export movement to the United Kingdom from Arsous and Sweidieh will be at last resumed.

It is reported that the pea crop at Latakia is excellent. The harvest will begin about the end of this month, and the crop is estimated at about 2,000 to 2,500 tons, against 1,500 to 1,800 tons last year. It is expected that Jablé and Banias will export about 1,200 tons.

The crop of vetches is also said to be quite abundant, but the largest part will be for local consumption, and only about 1,000 to 1,200 tons will be available for export.

Owing to favourable weather conditions, the prospects of the dari crop continue to be good, although no trustworthy forecast can be made before the middle of next month.

* The first part of this article, dealing with the crop outlook in Jaffa, Haifa, Sidon, etc., appeared in our issue of last week.

EGYPTIAN CO-OPERATIVE SYNDICATES LAW.

Explanatory Government Note.

(From a Correspondent.)

The proposed law for the institution of Co-operative Agricultural Syndicates, which the Government wishes to introduce, is at present before an extraordinary committee constituted for the purpose by the Legislative Assembly. In view of the great amount of discussion, to which this measure has given rise, and the uncertainty which has been somewhat freely expressed in competent circles as to the exact intentions of the Government, the explanatory note which the latter has now drawn up and which it has attached to the bill, is interesting.

Complement of Five Feddan Law.

The Government points out that in all other agricultural countries Co-operative Agricultural Syndicates are a necessity, and that in Egypt they have become more so, since they constitute, as has been so often pointed out in The Near East, the natural complement of the Five Feddan Law. This latter measure, the object of which was to afford some protection to the small agricultural land owner, has had for result the restriction of the borrowing power of the small cultivators; for their crops constitute to-day the sole security that they can offer for loans.

Need for Legal Basis.

The object of these Syndicates is to enable the cultivators to obtain the funds, and other necessaries, which they require for the development of their property, and the intention underlying the elaboration of this measure has been to facilitate their formation by assuring to them the credit indispensable to their existence. The note explains that these Syndicates depend entirely for their operations on the obtaining of funds at reasonable terms from financial establishments, but that to obtain these funds the Syndicates must inspire the fullest confidence. For this they require the moral support of the Government; for the latter has ascertained that the chief financial establishments would refuse their assistance, more especially would not grant loans at reasonable rates to these Syndicates unless they were assured that the latter had been established on a stable basis from the legal as well as the financial point of view.

Principle of State Approval.

Hence the reason why it has been laid down in the law that the Government's authority must be obtained for the creation of these Syndicates, and for the contracting of the loans required by them. Such authority can only be given after the object of the loan and the statutes and financial position of the Syndicates have been inquired into, and a Syndicate has every interest in allowing these investigations to be made when it is created, for it will enable it to inspire the banks from the very outset with the confidence without which it cannot exist, whilst the fact that the application for a loan is authorised by the Government will facilitate the obtaining of the money. Other considerations justify the principle of State approval, which is admitted in the case of limited liability companies. Just as the latter have to inspire confidence because they appeal to the public credit, so also Co-operative Agricultural Syndicates must obtain the confidence of the rural population, seeing that the law permits them indefinitely to increase their membership. Moreover, it is quite possible that the statutes of a Syndicate may fulfil the requirements of the ordinary codes and yet not conform to the ideas of co-operation, wherefore State approval is absolutely necessary.

Unlimited Liability.

In the matter of the liability of members, it is pointed out that the need to consolidate the credit of these societies has required that this liability should be unlimited. This is the principle followed in most countries where these Syndicates exist, the idea being that as the ordinary resources of the societies are too restricted alone to inspire confidence, an additional guarantee had to be offered in the solidarity of the members, which moreover ensures the efficient administration of the funds, since the members conscious of their personal responsibility naturally will pay particular attention thereto.

Government Intervention.

With regard to the Government's relations with the Syndicates, to which some objections have been raised, no action will be taken with regard to the employment of the proceeds of loans contracted. The Government will limit its intervention to giving its consent to the contracting of loans, in which connection it will confine itself to an investigation into the financial position of the Syndicate at the time of its foundation, or of the contracting or renewal of a loan. (This auditing of accounts is really a service rendered to the Syndicates, seeing that the number of competent accountants in Egypt is restricted.) It will also afford its assistance to the Syndicates in regard to making public their requirements, and any advice which they may require in connection with the introduction of new remunerative agricultural industries, the market prices of foods, the various qualities of manure, seeds, and agricultural implements, etc.

Question of Reserve Fund.

Certain objections have been raised anent the provision laying down that each Syndicate must devote 50 per cent. at least of its profits to the constitution of a reserve fund, and regulating its distribution in case of dissolution. It is pointed out that the object of the fund is not solely to provide for contingencies. It is hoped that by its means the Syndicate will gradually succeed in dispensing with all outside assistance, and that in time it will become self-dependent, and no longer have to have recourse to banks. Consequently, every provision which tends to protect this reserve fund must be beneficial to the Syndicate, and assure its development and its future, whilst as regards the distribution of the fund in the event of dissolution of the Syndicate, the restrictions imposed are absolutely necessary in order to restrain the cupidity of certain members who might be tempted to force a dissolution in order to divide up the funds, as has happened in other countries, where such restrictions had not been laid down.

Council of Delegates.

A Council of Delegates from the different Syndicates of the Province is to be formed in each Province. Its mission will be to advise on questions of common interest. It will also have the effect of setting up between these Syndicates an intercourse which cannot fail to be to their mutual advantage.

Compulsory Dissolution.

The law gives the Government the power to dissolve any Syndicate which devotes itself to objects other than those laid down by the law, and it accords to every Syndicate thus dissolved the right to appeal to the Council of Ministers. This has evoked much criticism, and the note replies to the questions raised as follows:—

"It must not be supposed that the Government will make an arbitrary use of this power to the prejudice of the Syndicates. It is indeed obvious that the Government, which is doing its utmost to encourage the creation of these Syndicates and to procure for them all manner of assistance, will only have recourse to this extremity if it appears imperative, not only in the interest of the district where the Syndicate in question is operating, but also in that of all the Syndicates which are in need of the public confidence. That this power will be used in a reasonable manner is guaranteed by the right accorded to every society condemned to dissolution to appeal to the Council of Ministers, whose decision will be final.

"It is not possible to argue that in that case it would have been better to give the judicial authority the right to pronounce the dissolution, for such a provision would take that authority out of the domain of its ordinary attributions. Indeed, if a Syndicate concerns itself with politics, or other questions likely to affect public security, the exact appreciation of such a fact could in no wise come within the jurisdiction of the Courts.

"Moreover, the Government does not expect that the least objection will be raised to the power which it has reserved to itself in this respect; no one will admit that such organisations, whose *raison d'être* is essentially economic, may depart from the object for which they have been created, such a departure being likely to give rise to the most regrettable consequences. Moreover, it is to be foreseen that the Syndicates themselves will not commit any act which will force the Government to have recourse to such an extreme measure."

Finally, the Government draws attention to two points. First, the fact must not be overlooked that the provisions of the new law are not obligatory for all Co-operative Agricultural Syndicates already created or that may be created in the future. Such societies will retain complete liberty of action, the law dealing only with those who willingly submit to its provisions in order to obtain the advantages which it assures them. Secondly, the Government formally declares that, in granting personal status to Syndicates created in accordance with the present law, it in no wise intends to prejudice either directly or indirectly the personal status which any of these societies acquire under the existing codes.

BUSINESS CARDS.

GRANT & CHINN,
The British Sanitary Engineers
of Egypt and the Sudan.
CAIRO and ALEXANDRIA.

USES OF RUBBER.

Fourth International Exhibition.

The fourth International Rubber Exhibition which is now being held at the Agricultural Hall, Islington, reflects the greatest credit on Miss Fulton, the secretary, and Mr. Manders, the manager. Some hundreds of exhibits have been brought together, and no one interested in tropical products—particularly rubber and cotton—can afford to miss the exhibition.

To the initiated it is difficult to see how the world, even if we all wore goloshes, can consume yearly so much rubber. Every district which has pretensions to heat and moisture seems to produce it in overflowing quantities. No wonder there is a slump in the market, and that the supply greatly exceeds the demand. Moreover, the initial cost of production is, comparatively speaking, costly. All manner of ingenious devices are exhibited to show to what manifold uses rubber may be put. The North British Rubber Company has a room entirely furnished with rubber. Everything in it "except the electric globes and the ink" is of rubber. Rubber carpet in an art green; rubber coverings to the chairs and sofa; rubber bindings to the books. Even the tables are all-rubber, or rather all-vulcanite, of a lustrous black, and capable of taking on a polish as of ebony, that should make them dear to the housewife's heart. Commercially, however, it is doubtful whether vulcanite furniture could ever be a success. Vulcanite by weight is expensive, and although the tables and chairs were as if clamped to the floor, so steady were they, they were also immensely ponderous.

One of the most interesting features of the rubber trade is the immense business which is done in reclamation. New rubber from the point of view of durability is of small use, until it is mixed with some other substance, and one of the substances very widely used is old rubber. The Provodnik Company of Riga make a speciality of this kind of work, and handle something like 100,000 pairs of goloshes in a day; while their annual output of reclaimed rubber is 4,000 tons a year.

One of the most interesting exhibits is that of the Leyland and Birmingham Rubber Co., Ltd., which shows some rubber-covered wooden blocks which were laid in the Old Kent Road. The traffic at this spot is one of the heaviest in London, and is estimated at 90 tons per square foot per hour of the twenty-four hours. The wooden blocks surrounding the rubber ones wore while the experiment was in progress from ⅛ in. to ¼ in., but the rubber blocks hardly show any sign of wear.

It is suggested that this system may revolutionize our system of road-making. If it does it will immensely increase the dangers of the streets. And even to know that rubber shares are soaring will be poor compensation when caught at the Bank or Piccadilly by a juggernaut of a motor-bus which has stolen up unbeknown behind you.

The Exhibition, however, is not entirely devoted to rubber. One particularly interesting section shows the product of the Anglo-Egyptian Sudan. Chief among these is cotton, and in view of Lord Kitchener's recent speech these exhibits aroused especial interest. There is also a particularly well-organized section devoted to the Belgian Congo, and there is an interesting series of photographs, one of which has for its gruesome subject the swallowing of an immense pig by a comparatively small, but most elastic python.

INSURANCE IN GREECE.

In his recently issued report on the trade of the Piræus in 1913 Mr. Consul Norcop says that about twenty-five years ago three Greek insurance companies commenced operations in Greece. Owing, however, to bad management, two of these suspended payment. The Greek Government then passed a Bill for the protection of persons insured. Its provisions proved so stringent that several British companies withdrew, but it is hoped that as peace and order have been restored those companies will return. Foreign insurance companies intend to open up general agencies in Greece. Fire insurance is said to have good prospects of succeeding, owing to the solid structure of the buildings and the creation of modern fire brigades.

ROUMANIAN EXPORTS FOR 1913.

(From Our Own Correspondent.)

June 14.

The figures for the exports from Roumania during the past year have only lately been published by the Ministry of Finance. Cereals to the amount of 86,424 tons less were exported in 1913 than in 1912, the cause being doubtless the lack of means of transport during the Balkan war. For the exports of flour, bran, etc., the figures for last year show an increase of 69,847 tons over those for 1912.

In the exports of petroleum and its derivatives the increase was about 133,700 tons. A comparison of the exports of petroleum, etc., with the production of raw oil (which amounted to 1,885,225 tons in 1913, as against 1,807,000 tons in 1912) shows that nearly 50 per cent. of the petroleum produced is consumed in the country, which is a measure of the importance of oil fuel in the native industries.

Great Britain is the largest buyer of petroleum, etc., in 1913, taking 100,000 tons residues, 89,000 tons refined oil, and 30,000 tons benzine. France is more interested in benzine, and she imported last year 76,000 tons benzine and 34,000 tons refined oil. In the same period Italy purchased nearly the same quantities of benzine and refined oil as France, and also 76,000 tons residues. Germany imported in 1913 benzine 71,000 tons and refined petroleum 31,000 tons. Austria-Hungary bought 41,278 tons residues, Turkey 56,000 tons petroleum, Egypt 97,000 tons refined petroleum.

The figures for the exports of building timber were 13,710 less, for the exports and of logs 34,814 less, than in 1912. Austria-Hungary took 192,069 tons fir poles, Turkey 25,000 tons building timber, Holland 30,000 tons building timber, and Egypt 38,000 tons building timber.

As a whole, the export figures for 1913 are higher than for the previous year.

ROUMANIAN POSTAL CONVENTION.

The Moniteur Officiel has published the text of the postal, telegraphic, and telephonic conventions between Roumania and the following countries :—Servia, Greece, Montenegro, and Bulgaria.

According to the conventions the postage rates for mails addressed from Roumania to places in these countries and *vice versâ* are as follows :—

Letters, 10 cms. per 20 grammes or fraction; postcards, 5 cms.; printed matter, samples, and business papers, 5 cms. per 100 grammes or fraction. Parcel post : Servia, 1 fr., of which 50 cms. are for Roumania and 50 cms. for Servia; Greece, 50 cms. for Roumania, 50 cms. for Greece, and 25 cms. for transit; Montenegro, 50 cms. for Roumania and 50 cms. for Montenegro; Bulgaria, 1 fr., of which 50 cms. are for Roumania and 50 cms. for Bulgaria. Parcel post in transit, 25 cms. Postal orders, 10 cms. for each 25 frs. or fraction.

Unprepaid items to pay double postage, and those insufficiently stamped to pay double the deficiency. Correspondence between the Foreign Ministers, Ministers Plenipotentiary, and Consuls of the contracting parties is free.

NEWS FROM ALL SOURCES.

Abdul Hamid Bey Shedid, formerly manager of the Banco di Roma at Cairo, has been appointed Inspector-General of that bank for the Orient.

The Egyptian Gazette reports that the question of the drainage of Hadra lake is again being taken up by the Alexandria Municipality, and the committee, which is negotiating with the Daira in reference to the widening of the Aboukir road, is to be invested with wider powers so as to be able to negotiate with the Daira on the subject of the drainage of Hadra lake.

The importation of coal into Egypt during the period January 1 to June 18 amounted to 752,711 tons, as against 638,067 tons in the same period last year.

Shannon, Ltd., have received an order from the Egyptian Government for a large number of vertical filing cabinets and over 300 card index cabinets. The qualification tests of strong construction, first-class material, easy running of drawers, etc., were passed successfully by the company in competition with numerous other applicants.

It is expected that the new high-road between Haskovo and Gumurjina will be opened for traffic by the middle of July. Arrangements are being made for a service of motor-'buses between Old and New Bulgaria by this route.

The road between Philippopolis and Xanthi has been repaired and is now open for motor traffic. It is understood that the mails will be conveyed by motor-car between the Old and New Bulgaria.

According to *The Echo de Bulgarie*, direct taxation in Bulgaria during the first five months of 1914 produced 19.692.290 leva, as against 5,830,753 leva in 1913, 10,763,134 leva in 1912, and 9,821,408 leva in 1911.

According to the *Oesterreichisch-Ungarische Konsular-Korrespondenz*, Vienna, trade is showing signs of improvement at Salonika. There is a fair demand, it is reported, for colonial commodities, lumber, leather, packing paper, cotton, thread, glassware, ordinary earthenware, and haberdashery. On the other hand the sale of cottons and clothing is somewhat restricted at present.

The revenue derived by Greece from the Petroleum Monopoly in 1913 amounted to 5,065,448 drachmas, as compared with 5,024,595 drachmas in 1912 and 5,048,370 drachmas in 1911.

Exports of flour from Roumania in April, 1914, were as follows :—Albania, 28,000 kilos; England, 1,062,000 kilos; Austria-Hungary, 528,027 kilos; Belgium, 69,750 kilos; Egypt, 883,139 kilos; Germany, 113,000 kilos; Greece, 1,325,215 kilos; Italy, 60,000 kilos; Holland, 46,750 kilos; Turkey, 2,579,309 kilos.

OTTOMAN RAILWAY RECEIPTS.

According to the *Gazette Financiere*, the various Ottoman railways have with few exceptions shown a substantial increase in their receipts for the beginning of May over those for the similar period of last year. These figures go far to prove the recuperative power of commerce in Turkey, and it is greatly to be hoped that this favourable start will not be vitiated in the near future by another outbreak of hostilities :—

RECEIPTS.

Line.	No. of miles open to traffic.	1913.	1914.	Increase or Decrease.

Near East Markets.

SPECIAL REPORTS.

(From Our Own Correspondents.)

Baghdad. June 7.

The state of the market is by no means satisfactory just now. Rates of transport to Hamadan and Kermanshah have fallen, but those markets are fully stocked with Russian goods and goods brought in from the North, where security reigns. This hits Baghdad rather hard, and general merchandise suffers in consequence. The market is much overstocked with sugar, and much has been sold at a loss.

The crops are reported as excellent, and when they are got in the agriculturist should have money to spend freely, which will benefit trade very considerably.

Odessa. June 28.

More rains have fallen during the last few days, and the crop prospects are said to be generally good, except in the neighbourhood where the winter cereals are stunted and partially withered by the previous drought.

Bucharest. June 28.

The reports of the wheat crop are much more reassuring than they were a week or two ago. Not so much damage has been done by the late rains as was at first thought. The mildew has altogether disappeared. The area sown is much larger than last year, and the farmers expect to make a profit, as the harvest promises to be excellent.

Maize has, in fact, benefited from the rains, and the signs point to a record maize crop.

Sofia. June 30.

The harvest in the Gumuldjina district has been in full swing since June 7. The wheat is abundant and of good quality. The vineyards, the maize, and the other summer sowings, thanks to the regular rainfall this year, are in excellent condition. Tobacco sowing has already begun, and as the ground is in a nice moist condition, the tobacco cultivators are very optimistic and expect abundant crops.

The price of silk cocoons at Souflon varies from 4.35 frs. to 4.65 frs. the kilogram. The price in the district of Gumuldjia is lower, but according to the Ministry of Agriculture the cocoons from this district are actually of a finer quality.

The following are extracts from the weekly bulletins received at the London offices of the Imperial Ottoman Bank from its correspondents in the Near East:—

Homs. June 17.

The following are extracts from the monthly report for May:—

The crops seem safe, and it is asserted that the barley crop will be 10 per cent. better than last year's. There is no advance to record in the wheat crop. There is no longer any fear of the appearance of rats and other rodents, which last year ravaged the crops in some parts west of the Orontes. In general, the outlook is satisfactory.

This favourable crop prospect has encouraged business during the month. Stocks of cereals of last year's crop have been sold at good prices. Native tissues have also been exported in fair quantities.

Imports have not been so active as expected, as the principal articles (manufactures, colonial produce, etc.) have risen in price. Merchants have preferred to draw on existing stocks in expectation of a drop in prices.

OPIUM MARKET.

Messrs. Barker Brothers, Smyrna, report as follows for week ending June 19:—Our market has been again very active, with sales amounting to 104 cases at last week's full figures—viz., 14s. 9d. to 16s. 3d., as to quality. To-day's closing figures are:—For current, mixed grades, 9 per cent. (average), 13s. 6d.; for Carahissar druggists, 10 per cent. (average), 14s. 6d.; for Carahissar druggists, 11 per cent. (average), 15s.; for Carahissar druggists, 11½ per cent. (average), 15s. 9d.; for Yerlis, as to quality, 14s. 6d. to 16s. 6d. The latest estimate of our crop is 8,000 cases, which fact by this time should have brought down prices fully 2s. per pound under above quotations. The arrivals to date are 141 cases, against 95 at same date last year.

PRODUCE REPORT.

London, July 2nd.

Sugar.

The market continued quiet this week, the demand, however, is very slow, and stocks difficult to move in spite of the low prices. Beet is steadier with only moderate business passing for August at 9s. 4¼d. to 9s. 5¼d., September 9s. 5¾d., October-December 9s. 6d., December 9s. 6¼d., and January-March 9s. 7¾d. f.o.b. Hamburg. Refined, English is steady but moves slowly that refiners evidently reduced prices to help the situation. Cubes No. 1 prompt 18s., No. 2 17s. 6d., Granulated fine 16s. 3d., and standard 15s. 9d.

Coffee.

The market remains almost in the same position as last week. Only moderate supplies have been offered at auction meeting, a fair demand at about steady values. Common qualities were slow of sale. Prices are for Santos 50s. to 56s., Jamaica ordinary 58s. to 65s., Guatemala 65s. to 85s., East India small 70s. to 75s., Nicaragua, foxy, 55s. to 60s., Costa Rica ordinary to mid. 70s. to 85s., Mocha 88s. to 100s.

Currants.

Market business has been moderate, principally confined to smalls and medium bold Zante, which latter is now considered cheap. Sales of Panaritz have also been made at full prices. The threatened bad weather in Greece does not seem to have developed to any important extent, and the attitude of holders would lead to the supposition that the growing crop is going on satisfactory. Prices are Provincial 23s. to 23s. 6d., Amalias 24s. 6d., to 26s., Patras 27s. 6d. to 30s., Gulph 28s. to 31s., Vostizza 32s. to 36s., Islands 26s. to 30s., and Smalls 25s. to 33s.

In Liverpool the demand is somewhat slow, but still there has been a quiet business passing; and duty paid clearances continue satisfactory, being 6,674 tons since January 1st up to end of last week, against 6,915 tons for the same period last year.

Sultanas.

The market generally is quiet and somewhat easier. This may be attributed to a temporary absence of consumptive demand, and not to any alteration in the general position. The recently reported closing of the port of Smyrna seems to be only of a temporary measure, a steamer, however, has left with a moderate cargo, and the fruit she brings is expected to be of good quality, and to afford some relief to the market in this respect. The reports from Smyrna with regard to the growing crop are, as usual, of a contradictory nature, but by reliable authorities the crop is estimated as not likely to be more than 40,000 tons, and possibly less.

Figs.

The prices mentioned for bags of natural new crop, September shipment, are very high, most merchants refusing to risk selling at any reasonable price. Some quantities, however, have been sold.

Seeds.

Linseed is inactive, London, Calcutta spot and afloat quoted 50s. 9d., July-August 51s., August-September 51s. 9d., September-October 52s. 3d. Rape seed is quiet, brown Cawnpore July-August 51s. 3d., and Yellow Guzerat ditto 56s. Cotton seed is neglected. London-Egyptian July is offered at £8 6s. 3d., August £8 7s. 6d., November-January £8 10s. per ton. Canary seed, Turkish quoted 92s. to 96s.

Oilcakes.

Egyptian Cotton cakes in store are offered sparingly at £4 15s. 3d. to £4 17s. 6d., but there are sellers for June-July shipments at £4 12s. 6d. to £4 13s. 9d. ex-ship terms, with English makes at £4 17s. 6d. to £5, and Bombays at £4 2s. 6d. to £4 5s. per ton. Linseed cake has little demand, but with limited supplies of foreign and a strong attitude of home manufacturers the market is well supported. Fine seedy Calcuttas are quoted at £7 15s. to £7 17s. 6d. ex ship for arrival, and best quality Russian make at £7 13s. 9d. to £7 15s. ex quay. London-made sell quietly £7 17s. 6d. to £8.

ROUMANIAN TEXTILE MARKET.

(By Our Bucharest Correspondent.)

Textiles in New Roumania.

The demand for textile goods in the newly acquired territory is stated to be extremely active of late, and many Bulgarian warehousemen have disposed of the contents of their premises to Roumanians recently settled in the district. The textile factories in this country have very largely benefited from the improved demand. Depôts have been cleared out completely, and new orders are keeping employed up to their full capacity the machines both of the cotton and wool consuming factories.

Trade in Yarns.

These improved conditions have also had a satisfactory influence on the yarn business. Apart from the very cheap yarns, which are spun in the country itself, Roumania is a large consumer of raw material for large factories, as well as for domestic use. The principal countries supplying combed yarns, the demand for which is increasing steadily, are Saxony first, then Austria and France, though both of the latter are a long way behind the first. Cotton yarns are supplied by Great Britain, Italy, Austria-Hungary, and Germany. In vigorgne yarns Germany holds the field practically alone. Italy attempted during the past season to compete in this line, without, however, any appreciable success.

Woollen Goods.

Printed flannels are supplied chiefly by Great Britain and Italy, as well as by Austria, Germany, and Belgium, though the two first are far ahead of the others in quantities. It may be noted that only of late years has Italy come to the front in this class of goods, which had been hitherto practically a monopoly of Great Britain's. The trade in woollen materials for ladies' costumes (jacquards) which formerly were imported solely from Bohemia and Saxony, has now got almost entirely into the hands of Italian competitors, and during the past year especially Italy secured practically the whole business. Woollen goods for trouserings are still furnished by Germany (Saxony and the Rhine provinces), whilst Bohemia has an appreciable share of this trade, in spite of the strong Italian competition. It is worthy of remark that in earlier times the supply of this line of goods was entirely in British hands. We now supply only the very finest cloths, and these in retail lots.

Dress Materials, etc.

In ladies' dress materials in general the trade hung somewhat; only at the end of the year orders began to be made more frequently. For the more fancy lines of goods both for ladies and gentlemen the demand was unusually lively during the past year. Needless to say, in this line France was far ahead both in quantity and quality. In silk goods the Swiss and Lyons factories did most business in the finer sorts, whilst Germany also made herself felt, and one German firm secured large orders not only in silk ribbons but also in every class of ribbon. This trade was formerly a speciality of France.

Shirts and collars are obtained—in spite of the competition of the local factories—principally from Germany and Austria. A very few only now come from Great Britain, though this was not formerly the case. But there is no reason why we should not regain our footing in the market if it were properly worked.

EGYPTIAN COTTON MARKET.

(From Our Own Correspondent.)

Alexandria, June 26.

Prices are down and speculators are demoralised. The industrial demand is good, but transactions in the new crop are unimportant. The difficulties that have arisen in America, regarding the importation of Egyptian cotton, have exercised a depressing effect here. Having regard to existing conditions it cannot be said that the present level of prices is low, since the average price of the 1913-4 crop has been 18 9-32 tallaris, as compared with 17⅞ the previous year. If speculation has not been marked, it is because with prices as they are speculators, as a whole, have found little encouragement to set the ball of speculative purchases rolling. Speculation, therefore, cannot profit by the present state of affairs, and a rise in prices can only be brought about by adverse factors. And that is why the market is irregular and nervous.

Cotton seed is in increased demand owing to speculative purchases which are uncovered.

Messrs. Davies, Benachi and Co., of Liverpool, have received the following telegram from Alexandria, dated Wednesday :—

Market steady. November, 18⅛, January, 18¼. Exchange, three months' date, 96⅛.

Steamers Sailed.

June 24.—"City of Oxford."
June 25.—"Merchant Prince," Manchester.

LIVERPOOL REPORT.

Messrs. Reynolds and Gibson telegraph :—As anticipated, there has been only a very limited demand for Egyptian spot cotton, and the little business put through has generally been for deferred delivery. The medium grades of Upper Egyptian have been in some request, and reasonable priced staple cotton of this variety is becoming scarce. Outside this the demand has been featureless. Quotations are reduced 10 points for all qualities, except Good and below in Sakellarides and Joanovitch, which are only 5 points lower, Estimated sales, 1,300 bales.

A special supplement of 56 pages on "Trade Products of the British Empire," is issued with the July number of *The Chamber of Commerce Journal*. The supplement is a very comprehensive statistical survey of the resources of the British Empire as a supplier of foodstuffs and raw materials for British industries. Foreign sources of importance are also noticed.

MANCHESTER MARKET.

(From Our Own Correspondent.)

Manchester, July 1.

The general state of affairs in our market has shown no improvement during the past week, and continued inactivity has prevailed from day to day. The inquiry has not been plentiful, and offers that have come round have been too low to be practicable to sellers. Production has been much larger than the clearances, and some big concerns in both spinning and weaving districts have stopped part of their machinery in order to relieve the accumulation of stock somewhat. Many sellers, weary of waiting in vain for orders of any weight, are already looking forward to the coming holidays as a relief, after which, it is hoped, when the new cotton season begins, there will be a revival in demand generally. Prices in raw cotton have shown very little change, and the fluctuations have not been more than a few points a day. Fairly satisfactory reports have been circulated with regard to both the Egyptian and the American crops, and the weather in the Egyptian belt is said to have been on the whole satisfactory. Trade for the Near Eastern outlets has been as bad as ever, and the present uncertain state of that part of the world has not encouraged cloth buying on any large scale; in fact, piece goods have been sold with more difficulty than for some time back. Egypt has also been in an unsettled condition, especially as regards money coming in, and buying for that outlet has been considerably checked. India trade has been unimportant, and sales have been few. China business has been featureless from day to day, although prospects have continued brighter. The home trade has now entered upon a slack period of the year, and distribution has not been active. The lot of the average yarn seller has been anything but a happy one, and home American spinnings have dragged in demand at practically unaltered quotations. Export numbers have moved off very slowly for the Near East. Bolton counts have been steady in price, but the turnover has been of small extent.

SUDAN COTTON.

The following is an extract from the paper on "The Work of the British Cotton Growing Association," by Mr. J. Arthur Hutton (Chairman of the Council), read at the Third International Congress of Tropical Agriculture, at the Imperial Institute, on June 23 :—When the Association commenced operations there were no economic means of transport to the interior of the Anglo-Egyptian Sudan, but as soon as the Suakin-Berber Railway was completed in 1906 the Association offered to do what they could to assist, but they were informed that their help was not required, and no further steps were taken in the matter. In 1909 the Egyptian cotton crop was an absolute failure, and it became evident that one must look elsewhere for an addition to the supply of cotton of the Egyptian type, and the Association again began to make inquiries as to the possibilities of the Sudan. On October 13, 1910, Sir William Mather gave an important address at the Manchester Town Hall on the cotton possibilities of the Sudan, and the Association then decided to take up 5,000 shares in the Sudan Plantations Syndicate, which was far and away the most important cotton growing firm in the Sudan. The Association appointed a representative to join the board of directors of the syndicate, and subsequently took up a further 4,000 shares.

The Sudan Government had commenced an important practical experiment at Tayiba to prove whether cotton could be grown on the Gezira Plain with irrigation between July and March, and they wisely handed over the management to the syndicate. In view of the great importance of the question, and with the object of acquiring more definite information on the subject, the council decided in 1911 to send out a deputation, and representatives of the Association visited the Sudan in January, 1912. The deputation were most deeply impressed with the cotton possibilities of the Sudan, and they were particularly struck with the excellent quality of the cotton which was being grown there. Their report has been published in full, but the results of their investigations may be summarised as follows :—

1.—Tokar : Good possibilities of producing 10,000 to 20,000 bales of cotton of fair quality in the immediate future.

2.—Khartoum and North : Moderate prospects of producing 5,000 bales or more of high-class Egyptian cotton in the immediate future, with further possibilities of increase if an earlier maturing and more robust type of cotton can be established.

3.—Gezira : One of the finest cotton propositions in the world. There seems to be no reason why in the next few years one should not raise annually 50,000 bales or more of really high-class Egyptian cotton, with the prospect of the production increasing to 250,000 bales within ten or fifteen years, and with further possibilities later on of a production of 1,000,000 bales or more.

4.—Rain-grown Cotton : The prospects in the Sudan of producing very large quantities of cotton of American type are most encouraging, and in some ways better than those in either Northern Nigeria or Uganda. There is land enough to grow millions of bales, but the future must depend on sufficient population, efficient Government supervision, and the requisite commercial assistance for buying and ginning.

5.—Gedaref and Kassala : There are considerable possibilities in these districts for both rain-grown and irrigated cotton.

There is not the least doubt that the Tayiba experiment was an eminent success, and the council therefore decided to press the Government to do all in their power to push on the development of the Gezira Plain with all possible speed. The establishment of cotton growing is a slow business at the best, and many years must elapse before any new field can be expected to produce 100.000 bales annually even under the most favourable conditions. Considering that Lancashire consumption is over 4.000,000 bales per annum. and considering also that the world's demands for cotton are growing rapidly every day, it is evident that the question is one of the greatest urgency. The association were convinced that the Gezira Plain was the only new field where one might expect an appreciable quantity of high-class cotton in a reasonable time, and on January 23, 1913, a deputation from the association waited on Mr. Asquith and urged that the Government should guarantee the interest on a loan of £3,000,000 to be raised by the Sudan Government for the construction of irrigation and other works in the Sudan. The Government soon afterwards introduced the necessary legislation in Parliament, and it is hoped that the loan will shortly be issued and operations commenced with the least possible delay. We can at any rate congratulate ourselves on the fact that Lord Kitchener has taken up this important question with his well-known zeal and energy, and I think we can safely leave the matter in his hands.

TEXTILES AT BEYROUT.

In his report on the trade and commerce of Beyrout and the coast of Syria for 1913, Mr. Vice-Consul H. C. Hony says :—'British textiles still hold their own against all foreign competition, although this competition is becoming more acute, especially from Italy. Since the Turco-Italian war that country has been very active in this market, chiefly in grey tweed cloth, Oxford prints, yarn, and flannelette. The long credit given by Italian manufacturers helps the demand for their goods, although it is not to be denied that they sometimes suffer from this.

Italy competes in yarn of the coarser qualities, Nos. 4 to 12, while the British quality from No. 12 to 32 is considered better. India sent about £25,000 of coarse yarn. The imports from Italy include black tweed cloths of various qualities, which find an easy sale on account of the fastness of their dye.

Spain has been supplying for the last two years a kind of Oxford print to the annual amount of £12,000."

There is at present a good demand for shoemakers' thread in Bulgaria. These threads are mainly provided by Italy, and are supplied in balls of three different qualities, selling at 2.40 frs., 2.45 frs., and 2.60 frs. per kilok. c.i.f. Varna, with six months' credit. Cotton fustians are also much sought after. They mainly come from Italy, their annual importation into Bulgaria representing the value of 200,000 frs.

Engineering Notes.

Prahova Port Works.

Our Belgrade Correspondent informs us that the *Servian Correspondence* reports that the British contractors now in Belgrade with the former Servian Minister in London, Mr. Cheda Mijatovitch, are endeavouring to obtain the concession for the construction of the port of Prahova on the Danube. This is the port at which the projected Danube bridge will connect the Roumanian with the Servian railway lines. The journal adds that the Government has not yet come to a decision in regard to the port concession.

Servian Railways.

Our Belgrade Correspondent writes (June 28):—There is reason to believe that negotiations with good prospects of success are being carried on with a French financial group for a loan, and it is expected that it will be for an amount of from four to five hundred million francs, which will be used for railway purposes and for military equipments. Meantime a large quantity of rails bought in France have arrived in barges at Semendria, whence they will be forwarded by rail to Nish, in order to be placed on the new line Knjaschovatz—Nish, which forms part of the Danube-Adriatic line, commencing at Prahovo, near Negotin, on the Danube.

A Gearless Motor-Car.

A complicated machine is always looked upon with a certain amount of scepticism in the East, and in selecting a machine of any kind the buyer does not forget the existing scarcity of efficient repairing shops and of skilled mechanics in his district. This consideration is studied more or less by foreign manufacturers in their efforts to gain the Eastern markets; and as to machinery and mechanical devices generally, they have found that simpljicity of construction brings the best sale results. It is well known that the complicated gear of a motor-car has often dissuaded an Oriental buyer from purchasing what he admired and coveted. A gearless car, therefore, such as we describe below, or other of similar design, should find an excellent market in the East if properly introduced.

The car we refer to is of a quite recent design, extremely simple, easy to manipulate, and low priced. Its system of gearless transmission is based on a driving plate of special alloy, connected to the engine shaft, and a friction rim composed of compressed fibre held on a cross-shaft that connects to the rear axle by means of chains. This arrangement eliminates the necessity of the usual clutch, and accordingly renders the driving of the car much simpler. Changes in speed are effected by the shifting of the fibre-rimmed wheel along the cross-shaft so as to press nearer or farther from the centre of the alloy driving disc. Thus any ratio in speed can be secured between the engine driving shaft and the cross-shaft by this simple means. A lever is provided for separating the driving plate from the fibre-rimmed disc, so that the car can be stopped while leaving the engine running. One of the outstanding features of this gearless transmission is claimed to be a great economy. The life of the fibre-rim, under normal conditions, is between 3,500 and 5,000 miles, while the cost of renewal is exceedingly low—it is claimed to be less than the cost of the grease that would be required in the ordinary gear transmission to cover the same distance. The extreme simplicity of this transmission, and the absence of many complicated parts, tend towards low maintenance cost, since there is the least possible opportunity for derangement and repairs; and it also enables the average owner to readily understand the mechanism and make such simple repairs as may be necessary. This gearless transmission possesses the important advantage of offering a greater range of ratios between the engine speed and that of the driving wheels than can be secured from any other form of transmission.

Roumanian Railways.

Our Bucharest correspondent writes: On July 28 a very important adjudication will be determined here for the undertaking of the construction of the railway line between Craiova and Bucharest, via Caracal. The estimated cost is sixty million francs (£2,400,000), and the length of the line to be constructed is 200 kms. This new line will shorten the route to the Orsova frontier by 51 kms., and the time taken on the journey by about 3 hours. An additional advantage is that the line will run through a very fertile agricultural country, which has hitherto suffered from the absence of rail transport facilities.

The recently completed Servian Railway line to Pratovo (opposite to Gruia on the Roumanian bank of the Danube) was opened for traffic last week. For a short time two passenger trains only will run each day. This line is in connection with the Trans-Balkanic line, which will link the Roumanian railway system with the Adriatic.

It is proposed to construct a railway bridge over the Danube, by means of which the Roumanian and Servian railway systems will be linked up. In connection with this project Mr. Cottescu, the Director-General of the Roumanian State Railways, accompanied by several Roumanian and Servian engineers, has left for Gruia, his object being to decide upon the exact spot where the Romano-Servian railway bridge is to cross the river. The bridge will shortly be begun, and it is expected to be completed in two years. Mr. Cottescu will also inspect the route of the line which is to be constructed from Craiova to the bridge-head. This work will also be taken in hand at no distant date.

The railway authorities are making arrangements for regular through services of goods trains in every possible direction in order that the damage sustained by goods transferred from one train to another shall be minimised. This is good news, especially for importers, to whom the question of settling the frequent claims for deterioration was a grave vexation which will now be practically abolished.

Bulgarian Railways.

The management of the Bulgarian State Railways will shortly call for tenders for 25 locomotives and 500 railway wagons. The estimated amount of the contract is 5,000,000 frs. (£200,000).

For Beet Cultivators.

There have been several inquiries recently from Governments and landowners in the Near East interested in the progress of sugar beet cultivation for modern implements specially adapted for that purpose. In Roumania, South Russia, and other neighbouring regions the average sugar beet grower is making use of the ordinary implements that he uses for the cultivation of other crops, but for such operations as digging the beet-root, lifting it, cleaning, etc., he uses methods that are not only inefficient, but are also causing considerable damage to the root. To assist such growers official inquiries are being made for modern implements as used in other beet-root cultivating countries. Most of the implements or machinery used by some of the large sugar beet growers in the Near East are of French, Belgian, or German construction; but there are similar improved and new designs of British construction which we believe would be more acceptable if they were properly introduced. Some time ago we described in these columns a new beet-root digging, stripping, and cleaning machine, and we now describe another—a new lifter and cleaner, which will interest sugar beet growers in the Near East.

The Beet-Lifter and Cleaner.

This machine is specially constructed to lift and clean beet-roots with ease and with the minimum of abrasion and loss. It is on the double disc principle, and is said to give the best results when operating upon rows of beet from which the leaves have been previously stripped. Two women in ten hours, with specially shaped spades, easily remove the leaves from over two acres. When three rows of beet have been cleared in this fashion the machine can be started to work. Two horses (perhaps three of the small size used in the East) are sufficient for its operation, whilst one man without previous experience can guide them and attend to the machine at the same time. The discs penetrate the ground at converging angles, and it is said that, however long the root may be, it is completely lifted. Nothing is left behind in the soil, and it is claimed that the weight of produce per acre when lifted by this machine is nearly one ton more than when dug by hand. Moreover, none of the roots are bruised or cut. There is a rotary drum at the rear of the machine which it is claimed to clean the beets better than chain harrowing, and has the further advantage of saving the labour necessary for that implement's employment.

TENDERS INVITED.

[*The London agent of the Egyptian Government is Sir A. L. Webb, K.C.M.G., Queen Anne's Chambers, Westminster, S.W., at whose office particulars of tenders marked (L) are to be obtained.*] 8

Shipping Intelligence.

SUEZ CANAL COMPANY'S REPORT.

The "Big Ship" Era.

(By Our Port Said Correspondent.)

A striking feature of the report of the Suez Canal Company's directors for the year 1913 is the recognition of the "big ship." The usual statistics have been freely quoted as showing a decrease in tonnage and receipts, but for present purposes the following figures may be noted as evidence of the new order of things in the Eastern shipping trade.

	1912.	1913.
Number of vessels passing through the canal	5,373	5,085
Total tonnage	20,275,120	20,033,884
Average tonnage	3,774	3,940
Receipts (about)	£5,600,000	£5,200,000

It will be seen that notwithstanding the decrease in the number of vessels passing through the Canal, the average tonnage has risen considerably. Of the total number of vessels using the Canal during the year 44 per cent. were steamers exceeding 4,000 tons, and 5 per cent. steamers exceeding 6,000 tons, as compared with 22 per cent. and 1 per cent. respectively ten years ago.

The company announces, simultaneously with the issue of its report, that the maximum draught of water for steamers using the Canal will be increased, from January 1, 1915, from 29 to 30 feet. This should not come as a surprise to readers of The Near East, as this further concession was foreshadowed in these columns a few months back.

It is announced in the directors' report that to maintain this standard, the depth of the Canal will be increased to 33 feet throughout, and operations will shortly be commenced to increase the depth to 39 feet. This should result in a corresponding increase in maximum draught, which, in the near future, should be extended to 36 feet.

In connection with the safe handling of larger steamers several other progressive works are foreshadowed. The Canal will be widened in the south, where strong currents are prevalent, to 200 feet; while at the northern end several of the mooring stations are being widened to allow larger vessels to pass in safety.

NEW P. AND O. STEAMER.

The P. and O. Company's new steamship "Kaisar-i-Hind" was successfully launched on June 28 from the builder's yard at Greenock. She has a gross register of 11,400 tons, is 520 ft. long by 61 ft. broad by 32.2 ft. beam, and will have accommodation on five decks for 315 first and 233 second saloon passengers. The sixth deck, the boat deck, will be used for recreation purposes for the passengers. The vessel will be driven by two sets of quadruple expansion reciprocating engines, developing 16,000 horse-power. The passenger cabins will include a limited amount of *en suite* accommodation in the shape of *cabines de luxe* and bedrooms, with bathroom attached. It is anticipated that the vessel will be ready for sea in September, having meantime completed her outfit and run her official trials. She is intended more particularly for the company's mail and passenger service between London, Marseilles, and Bombay, and is scheduled to make a maiden departure from London for Bombay on November 20 next.

Jaffa is now considered free from plague, and special restrictions against shipping from that port have been suspended in Egypt.

BLACK SEA FREIGHTS.

(From Our Own Correspondent.)

Odessa, June 28.

There has been no change during the week in the stagnant condition of the freight market, except, perhaps, that even lower prices have been accepted in a few instances to expedite completion of cargoes. One steamer loaded her last 500 tons for Rotterdam at 5s., and another the same amount for the same destination at 4s. 6d. Both these boats were chartered at 7s. The scarcity of spot cargo continues, and the arrivals from the interior are of trifling amount.

The nominal standard rate for the moment is 5s., and it is possible to berth two steamers for Rotterdam and Hamburg respectively at that price, but as soon as they have been berthed the rate is sure to decline to 4s. 6d.

Nicolaieff remains in the same depressed condition, and very little cargo is offering. As the Weser pays a slightly better rate than other markets, a steamer has been put on that berth at 6s., while another has difficulty in obtaining a full cargo for Rotterdam at rates varying from 5s. 3d. to 5s. 9d. There will be no demand to speak of for tonnage in the Bug port before the appearance of the new crop.

At Kherson there is scarcely any cargo offering, and there is no standard rate to quote. Novorossisk shows a little more activity than any other Black Sea port, owing to its better supplies of grain. Several steamers have recently loaded there at 6s. for Rotterdam, 6s. 9d. for the Weser, and 6s. 6d. for Hamburg. At Theodosia nothing is doing, and nothing will be done before the new crop is in hand.

SERVIAN DEVELOPMENTS.

Italian Enterprise.

(From Our Own Correspondent.)

Belgrade, June 29.

A group of Italian financiers and contractors is expected here this week in order to investigate on the spot several enterprises which have been offered to them—namely, the exploitation of forests and coal mines and the erecting of factories.

Two other Italians, contractors to the Italian Government, have been here lately and bought over 4,000 horned cattle for export to Tripoli. When the shipping and harbour arrangements at Salonika are completed, it is expected that there will be a lively trade in the export of cattle to Italy, Egypt, Malta, and other ports.

An arrangement has been concluded with the Orient express passing through Belgrade four times weekly to take the mails, simple and registered letters only, in the journeys going both north and south. The contract is for five years.

A report to the *Politische Correspondenz* from Belgrade announces that a group of English financiers under the leading of M. Mijatovitch, formerly the Servian Minister for Foreign Affairs, has applied to the Servian Ministry of Commerce for permission to establish an Anglo-Servian bank at Belgrade. The share capital will be 20,000,000 francs (£800,000), and the bank would undertake large public works, particularly in the districts of New Servia.

Company Notes and Reports.

Egyptian Hotels.

The report of the Egyptian Hotels, Limited, for the year to April 30 last, to be presented at the meeting on the 8th instant, states that after charging all expenses in connection with the working of the hotels, the returns show a satisfactory improvement on those of the preceding year, the profits of hotels being £30,651, an increase of £7,033. After providing for the annual charges payable in London the accounts show a profit of £26,086. From this has to be deducted debenture interest £3,529, and reserve for depreciation £5,612, leaving £16,945, which with the balance of undivided profit brought forward, £4,017, makes £20,962. The directors propose to pay a dividend of 10 per cent. on the ordinary shares, carrying forward £2,711. During the year £9,981 has been expended out of revenue on maintenance of buildings, gardens, plant, fixtures, and furniture at the hotels. The expenditure on capital account has been £7,327, of which £6,423 was on buildings and £904 on plant.

Egyptian Delta Light Railways.

The report of the Egyptian Delta Light Railways, Limited, for the year ended March 31, to be presented to the seventeenth ordinary general meeting on July 13, at Winchester House, E.C., states that the modified conditions of the contracts with the Government of Egypt were signed in Cairo on March 7. The modifications took effect from April 1, 1913. As a result of the sale of the Cairo Helouan Railway and its dependencies to the Egyptian Government and of the consolidation of the company's system of light railways, the balance-sheet, etc., are presented in a greatly modified form. During the year an additional 32 kilometres have been opened, making a total of 1,003 kilometres (say, 623 miles) open and working at March 31. The Biela Baltim line is now completed and surveys have been undertaken for the Sah-el-Hagar to Berimbal extension. The revenue account shows: Gross receipts, £255,927; average mileage open, 618; average receipts per mile per year, £414 2s. 5d.; average receipts per mile per week, £7 19s. 3d. The coaching traffic shows a satisfactory improvement, the number of passengers carried being 7,319,663, as compared with 6,974,927 for the previous year. The gross receipts were £156,244, as compared with £148,047 for the year ended March 31, 1913, an increase of £8,197. The average per mile per week being £4 17s. 3d., as compared with £4 15s. 6d. for the previous year. The improvement in goods traffic has also been satisfactory. During the year 968,576 tons were lifted, as compared with 958,916 tons lifted, the gross receipts being £91,559, an increase of £8,773. The total expenditure under the head of working expenses was £154,681, as compared with £142,841. The ratio of actual expenses to gross earnings was 60.44 per cent., as compared with 60.15 per cent. The balance of expenditure to make up the 64 per cent. of the gross receipts required by Government, under the new conditions, to be spent on maintenance and improvement of the lines, has been carried to a suspense account for expenditure in subsequent years. The net earnings from all sources aggregated £92,134, which, with interest and dividends earned, amounting to £2,518, and the balance brought forward from 1913, gives a total of £113,261 to be dealt with. After providing interest on debentures and all fixed charges, a balance of £76,733 remains. The Board recommends the payment of a dividend of 5 per cent. on the preference share capital for the year ended March 31, 1914, which will absorb £52,039, leaving £24,694 to be carried forward.

Egyptian Agricultural.

The report of the Egyptian Agricultural Company, Limited, for the year ended March 31 last, submitted at the meeting on June 29, states that the work at the Agricultural estates has been steadily continued throughout the year. The cotton crops were excellent, and realised good prices. The tenants generally have done well and are contented. Owing to an unusually low Nile the prospects for the current year are less promising, but if there should be a set-back it will probably only be temporary. At Atfeh (2,154 feddans) the capital outlay during the year was £E2,814, against £E5,235 the previous year. Good progress was made both in reclamation and in improving the accommodation for cultivators. The area let in 1912-13 was 866 feddans for £E3,134, and in 1913-14 980 feddans for £E3,740. The area thus far let for 1914-15 is 1,028 feddans for £E4,288. The managers report that if they can succeed in obtaining an improved water supply the whole of the estate will now quickly come under revenue producing crops, when its value will be greatly enhanced. At Chaba (2,042 feddans) the capital outlay during the year was £E4,614, against £E3,971. Much work has been done in canalising, in improving the drains, and in the building of tenants' dwellings. These latter are already attracting native cultivators to settle on the land. The area let in 1912-13 was 289 feddans for £E1,159, and in 1913-14 381 feddans for £E1,280. The area thus far let for 1914-15 is 565 feddans for £E2,157. The managers report that the property made a very distinct advance in 1913, and the tenants prospered as in no previous year. At Dekerness (4,019 feddans) the capital outlay during the year was £E5,926, as against £E6,263. The area let in 1912-13 was 110 feddans for £E436, and in 1913-14 98 feddans for £E392. The area thus far let for 1914-15 is not yet ascertained. This estate is at present only in the initial stage. The managers report that "the new pump is now beginning to make itself felt," and a considerable area of land has been well washed. Had there been a better supply of water reclamation on an extended scale could have been undertaken. They say that the general surroundings, apart from the company's operations, are greatly improved, as the Government are dredging the two main drains and have constructed a bridge, which gives much better access to the property. The purchaser of the Chaba property has altogether failed to carry out his agreement, and steps have been taken to enforce a claim for damages, the result of which is still awaited. He has paid a further sum of £3,500 in respect of the Dreaga purchase referred to in the last report, but much of the interest is still unpaid, though it is hoped it may shortly be arranged for. Only a small sum has been realised during the year from the "outside assets," but every effort is being made to get in the remainder, though the process is a slow one. The principal item consists of valuable building land near the centre of Cairo, for which no sufficient offer has yet been obtained. Meanwhile it has been necessary to obtain temporary advances in order to meet the outlays necessary on the estates. The Egyptian Assets Realisation, Limited, referred to in the last report, have not yet succeeded in realising enough even to recoup the advances they made. The resident director, Mr. Bonham-Carter, is doing his utmost in the matter, but has been greatly hampered for want of the information and assistance he had looked for when he took these assets in hand. The profit and loss account shows a nominal surplus of £1,955, which has meanwhile been carried to the credit of "realised deficit." It includes interest in arrear on the Dreaga purchase, most of which is at present unpaid. Should this interest, now and in future, be regularly paid, the financial position of the company will be greatly improved. The gross receipts from the estates were in excess of the previous year, but a larger proportion of the fixed charges for taxes, maintenance and administration have been charged this year to revenue, in order to avoid unduly burdening the capital outlay.

"SU-TALL" Cabinets

THE WORLD'S GREATEST FILE VALUE.

FOR QUARTO PAPERS

£3 : 19 . 6

Made of Guaranteed Reliable Basswood, highly polished Mahogany or Oak colour. Every Cabinet Guaranteed.

Our 72-page Art Catalogue No. 125, Just Published. Post free upon application.

JOHNSON E. TAYLOR & CO., Ltd.,
General Office and Library Furnishers, with the Largest Stock in the City of London.
38, "Su-tall" House, Fore Street, London, E.C.

Nestor Gianaclis.

The report for 1913 of Nestor Gianaclis, Limited, presented at the fourth annual general meeting at the offices on June 26, states that the debentures drawn for payment August 1, 1913, have been duly paid and one year's debenture interest has been paid and charged to profit and loss account. The sale of Nestor Gianaclis Boston business has been completed and the proceeds brought into the year's accounts. The Frankfort company has made a small profit, which it has been decided to utilise in reduction of installation expenses, consequently no dividend has been declared upon these shares, but the directors are informed that the company is progressing very favourably. After deduction of all charges, including income-tax to December 31, 1913, writing off the year's proportion of debenture expenses and sundry depreciations in the Cairo accounts, and making provision for bad and doubtful debts, there remains a balance of profit amounting to £19,030, from which is deducted £951, being 5 per cent., carried to reserve account. Adding the balance, £18,078, to the £3,374 brought forward from last accounts gives a balance on profit and loss account of £21,452, of which the directors have decided to distribute £17,997 for dividend, as follows:—On cumulative preference shares at 5 per cent., £15,000; on ordinary shares at 1 per cent., £2,997, carrying forward £3,455. The report of the auditors, Messrs. W. B. Peat and Co., states that except that £271 has been written off at one of the branches, no provision has been made in the accounts for writing down goodwill. They have no means of ascertaining the market value of the investments other than the Crédit Foncier bonds. The book debts taken over from Mr. Nestor Gianaclis at December 31, 1909, and not yet collected, are guaranteed by Mr. Gianaclis. The redemption of £2,340 of the debentures on August 1, 1913, and debenture interest for the five months from that date have not been charged against revenue.

NEW COMPANY.

Moreni and Bordeni Oil Syndicate Limited.

A private company with the above title was registered on June 15 by Hargreaves and Joblin, 7, Stone Buildings, Lincoln's Inn, W.C., with a capital of £10,500, in 10,000 preference shares of £1 each and 10,000 deferred shares of 1s. each. The objects of the company are to acquire and work oil-bearing lands, to search for mineral oils, etc. The first directors (to number not less than two nor more than four) are to be appointed by the subscribers. Qualification, £1 shares. Remuneration, £100 each per annum (£50 extra for the chairman). The registered office is at 65, Bishopsgate, E.C.

THE GREEK DEBT.

The Council of Foreign Bondholders issues the following information compiled from figures published by the International Financial Commission at Athens with regard to the revenues assigned under the Law of Control for the service of the Greek Debt from January 1 to April 30, 1914 (new style January 14 to May 13, 1914):—

—		Monopolies, Tobacco, Stamps, Stamped Paper, Naxos Emery.	Piræus Customs.
		Drachmæ.	Drachmæ.
Gross Receipts, April	1914	2,627,614	2,521,488
Do. do do	1913	2,338,698	2,166,323
Estimated Receipts for 4 months (Law of Control)		9,633,333	3,566,666
Actual receipts for 4 months	1914	13,442,646	10,115,332
Do. do. do.	1913	9,917,237	8,108,678
Difference between estimated and actual receipts for 4 months	1914	+ 3,809,312	+ 6,548,666
	1913	+ 283,904	+ 4,542,011

Note.—Of the surplus over the estimated receipts from monopolies, tobacco, stamps, stamped paper, and Naxos emery 49 1-5 per cent. is applied towards increasing the minimum rates of interest and sinking fund of the External Gold loans of 1881 to 1893. The receipts in gold from both Naxos emery and the Piræus Customs are converted into drachmæ at par when the average rate of exchange for the month is par or below par, but when the average rate for the month is above par the conversion is made at that average rate.

Stock and Share Markets.

Bank Rate 3 per cent. (Jan. 29, 1914.)

SETTLING DAYS.

CONSOLS.
Wednesday, August 6.
STOCKS AND SHARES.
A Mining Shares the next carry-over is July 7.

Continuation Day.	Ticket Day.	Pay Day.
Wed., July 8	Thurs., July 9	Fri., July 10
Mon., July 27	Tues., July 28	Wed., July 29

LONDON, July 1.

There is no improvement to report in markets. Everything remains idle. The hot weather and the indecision in regard to Ulster have driven the speculator out of the House. Numberless new issues have made their appearance, but very few of them have been subscribed. Liebig's have been borrowing on short-dated notes at 6 per cent. and Grand Trunk of Canada at 4½. The Province of Quebec asked for a million at 4½, and the Manila Railway offered some attractive 5 per cent. guaranteed bonds at 90. The Stuposian Oil Field and the Arizu Estates seem companies to be carefully avoided.

Money Easier.

The Money market is now easy. There was a small rush at the end of the month, but rates are now low, and it is probable that the Bank of England will lower the official rate to 2½ per cent. The Bank of France will also lower its rate as soon as the new national loan is safely out of the way.

Internationals Steady.

The Foreign market is quite steady, and prices show very little alteration. The murder of the heir to the Austrian throne was taken calmly by all the Bourses, and it seems unlikely that any complications will ensue. Austrian rentes are quoted 84. Bulgarian Fives are 101 and the 4½ per cent. are 92. Egyptian Unified have been dealt in at 99½. French rentes are 85. Greek Fours remain at 53. Hungarians are steady at 82 and Turkish Unified are called 81.

Home Rails Idle.

Home Rails are idle. Traffics are good considering the state of trade, but there are no buyers about. The Scotch labour agitators talk very big about a national strike, but the Stock Exchange considers most of this talk to be bluff. Undoubtedly, the best things to buy are Great Western, Great Eastern and Great Northern. In each case the interim dividend is likely to be maintained.

Yankee Prospects.

The troubles of the Cincinnati, Hamilton and Dayton have affected the Baltimore and Ohio. On the other hand, the certainty that Union and Southern Pacific will both maintain their usual dividend has hardened the quotation in these stocks. There is not likely to be much rise in Yankee rails until the rate decision is published. Crops are good and the railways, although 1913 was a bad year, will probably have good traffics in the autumn.

Rubber and Oil.

Plantation has fallen below 2s. 3d., and the share market is dull. Perak dividend has been reduced from 35 per cent. to 17½ per cent. Sapong has come out with a loss on the year's trading. Bambrakelly has not done well and Jasin (Malacca) is also disappointing. On the whole the rubber market looks tired. Oil shares are dull, but prices generally have been maintained. The Baku report is very encouraging. But the directors have very wisely decided to pass the dividend, and conserve their resources. The Roumanian Consolidated continues to give us very good news concerning the development of its various plots, and the shares keep very hard. No explanation is given of the falling off of the Egyptian output for the past week. The market took the loss of 1,000 tons very quietly, and the price of Anglo-Egyptian B did not move.

Mines Dull.

The Mining market remains dull. Modders continue to be bought, and there has been some small movement in Chartered on the tale that Sir Abe Bailey is beginning to buy the shares. Tanganyikas have also been moved up. The Canadian market continues to be rigged, and Copper shares have hardened a fraction.

Miscellaneous.

In the Miscellaneous market Marconis are offered steadily, and the price falls each day. Millar's report is fairly satisfactory, and the dividend has been increased to 6 per cent., but Argentine Iron and Steel issues a disastrous report, and the capital is to be scaled down. The San Antonio Land scandal has assumed very serious proportions. We have not heard the last of this unfortunate business.

Egyptians Dull.

The Egyptian market continues to follow the rest of the House. There is very little business doing, and it is almost impossible to either buy or sell shares, the quantity of stock offering is so small. National Banks have been done under 14, but a fair business has been transacted. Agriculturals are a fraction under 4, and here again there has been a moderate amount of trade. The deferred are 280. Land Banks are 6⅜ nominal, and the deferred 40. Bank of Abyssinia are 5s., and show no change on the week. Delta Light Railway Prefs. are 8½, and the deferred are quoted 1½ nominal. Delta Lands have been picked up in small lots, and the price has now hardened to 9s. 6d. A well-known firm of brokers have been advising their clients to purchase these shares as a lock-up. Beheras have hardly been mentioned during the whole week, and the price has sagged to 8½. The preference are 4⅜. Union Foncière are still 1⅛. Alexandria Water have been dealt in at 12½, but Aboukir Lands are weaker at from 20s. 6d. to 21s. There has been some buying of United Lands at 1s. 9d., and a few small parcels have changed hands at this figure. Trusts are called 5s. Salt and Soda are 15s. New Egyptian are 10s. 3d. ex dividend of 9d. Markets are 23s. Khedivial Mail prefs. are 3⅜ nominal, and the ordinary are 10s. Daira Sanieh are 3s., and Associated Cotton Ginners are ¾ nominal.

ALEXANDRIA NOTES.

(FROM OUR OWN CORRESPONDENT.)
ALEXANDRIA, June 26.

Share Market.

A certain improvement in the situation is noticeable, due to the lessening of the tension between Greece and Turkey. The gold that has been used in lifting the crop is now returning to Alexandria, where there is plenty of money available, and we are still shipping gold to London, whence it will return to us next November for the requirements of the next crop.

Egypt's foreign trade shows signs of steady progress. During the first five months of this year exports amounted to £E13,668,539, as compared with £E12,601,915 in 1913, or an increase of £E1,066,624; while the imports for the same period amounted to £E11,684,054 as compared with £E10,955,659 in 1913, an increase of £E728,395 for the five months. These figures bear witness to the extraordinary productivity of the country and its large purchasing power.

Indo-Egyptian Bank.

It was anticipated that Egyptian capitalists would have subscribed the greater part of the capital of £800,000, but with the exception of a few strong pan-Islamists they have declined to have anything to do with it.

Building Lands Co.

There has been a sharp rise in the price of this company's shares. This is due to the fact that the position of the company has improved as a result of repayments which have enabled the company to reduce its indebtedness to the bank. It is hoped shortly to redeem the securities of the company, which consist of Tramways d'Alexandrie shares, in order to distribute the proceeds amongst the shareholders of the Building Lands Co.

Bank of Abyssinia.

The gross profits for the last financial year amount to £E22,824, but owing to the depreciation of silver, the profits are balanced by the losses. The situation of the bank is not likely to improve sufficiently to warrant thoughts of a dividend until the railway from Jibuti reaches Adis-Abeba, and thus renders communication with the sea more easy. And that will hardly be before two years.

COMPANY RESULTS, &c.

ANGLO-EGYPTIAN OILFIELDS.—Gemsah production for week, 2,282 tons (last week 1,845 tons), of which Hurgada 89 tons (last week 120 tons).

ANGLO-ROUMANIAN PETROLEUM.—Telegram, dated Campina, June 26: "Bordeni well No. 24 commenced flowing yesterday while fishing, still flowing. Production until noon to-day was about 350 tons."

BAGHDAD RAILWAY.—Net profits for 1913 amounted to 1,147,032 frs., against 1,111,626 frs. in 1912. A dividend of 5 per cent. is declared, 87,551 frs. is placed to reserve, and 309,480 frs. carried forward.

BALIA-KARAIDIN MINES.—The net profits for 1913 amounted to £T190,490, as compared with £T157,778 in 1912. A dividend of 35 frs. is declared on the old shares, and of 15 frs. on the new shares.

BANQUE FRANCO-SERBE.—The dividend for 1913 of 21.60 frs. per share is payable on and after July 4.

CAIRO WATER COMPANY. — Receipts for May amounted to £E19,783, as against £E18,972 during the same period last year.

EASTERN BANK.—The subscribed capital of the Eastern Bank, Limited, has now been increased to £1,500,000 by the issue to shareholders of 50,000 new shares of £10 each at a premium of 15s. per share. The reserve fund is also raised from £30,000 to £55,000.

EGYPTIAN DELTA LIGHT RAILWAYS.—The annual ordinary general meeting will be held in Hall No. 43, Winchester House, Old Broad Street, E.C., on July 13.

HAIDAR PASHA PORT.—The net profit for 1913 amounted to 1,466,871 frs., as against 1,408,157 frs. in 1912. The dividend is maintained at 8 per cent.; 400,000 frs. are set aside for renewals, 37,474 frs. placed to ordinary reserve, and 322,130 frs. carried forward. The capital has been increased from 8 to 16 million frs., 2 millions of the new shares having been issued September 1, 1913.

KHEDIVIAL MAIL COMPANY.—Holders of Preference Share Warrants to Bearer are requested to lodge at the offices of the company, London or Alexandria, the talons attached to Preference Share Warrants to Bearer for 1, 5, 10, and 20 shares, in exchange for which new coupons will be delivered.

MERSINA-TARSUS-ADANA RAILWAY. — The total receipts for 1913 amounted to £T69,638, as against £T72,248 for 1912. Net profit £T24,688. The dividend (now payable) on the preference shares is fixed at 6 per cent., and that on the ordinary shares at 3 per cent. £T7,736 is devoted to the redemption of preference shares. Rent to the Anatolian Railways is increased to £T5,952, and £T1,767 is carried forward.

OTTOMAN RAILWAY FROM SMYRNA TO AIDIN. —Receipts for the week ended June 27 amounted to £8,634, an increase of £704 over the corresponding period of last year.

PIRÆUS, ATHENS, AND PELOPONNESUS RAILWAY.—The coupons and drawn bonds of the Three per Cent. bonds due on the 15th inst. will be paid on and after that date at the offices of Messrs. R. Raphael and Sons, Austin Friars House, E.C.

ROUMANIAN CONSOLIDATED OILFIELDS.—Cablegram from Ploesti, dated June 29:—"Moreni well, No. 24, still flowing. Moreni well No. 17 flowing at intervals. Baicoi well, No. 1, has struck rich fountain source; yielded 50 tons in an hour before being capped; now engaged in fitting safety appliances."

ROYAL ROUMANIAN GOVERNMENT 4½ PER CENT.—The second drawing of bonds of the Royal Roumanian Government 4½ per Cent. Gold Loan of 1913 will take place on 1st prox. in Bucharest, when 1,289 bonds to the value of £46,213 4s. will be drawn.

Digitized by Google

SALONIKA-MONASTIR RAILWAY.—Net profits for 1913 amounted to 444,888 frs., as compared with 960,275 frs. in 1912. A dividend at the rate of 6 per cent. is to be paid on the preference shares, and at the rate of 2 per cent. on the ordinary shares. 7,577 frs. are placed to reserve, and a sum of 4,734 frs. is carried forward.

SOCIETE DU BEHERA.—Bearers of the Behera Company's debentures and preference shares coupons falling due on July 1 (Coupon No. 40 of debentures and Coupon No. 19 of preference shares), as well as the reimbursement of debentures that were redeemed at the drawing of May 29, will be paid at the following establishments:—In Alexandria, at the National Bank of Egypt; in Cairo, at the National Bank of Egypt; in London, at the National Bank of Egypt, 3 and 4, Lothbury, E.C.; and in Brussels, at the Société Belge de Crédit Industriel et Commercial et de Dépôts, 60, Rue Royale.

SOCIETE OTTOMANE D'HERACLEE. — Profits for 1913 amounted to 1,230,000 frs., as against 1,595,333 frs. in 1912. A dividend of 4½ per cent. is to be paid on "obligations à revenu variable," and 10 per cent. of the balance is devoted to amortisation of these shares.

TRAMWAYS LIBANAIS NORD ET SUD DE BEYROUTH.—The profits for 1913 amounted to 85,920 frs., as against 65,512 frs. for 1912. With the amount brought forward, the available balance is 265,000 frs., of which the sum of 92,447 frs. is placed at the disposal of the debenture-holders.

COOK'S NILE STEAMERS AND DAHABEAHS.

THOS. COOK & SON have unequalled facilities for Travellers visiting Egypt, now the premier Winter Resort of the World. Their fleet of **Fourteen Large Passenger Steamers** consists of the finest vessels on the Nile, specially built, luxuriously appointed throughout, and fitted with every modern convenience.

TOURIST SERVICE.—These large and handsomely-fitted Steel Steamers sail once a week from **Cairo** to **Assuan**, and twice a week from **Assiut** to **Assuan**, the sailings from **Cairo** beginning in November, and from **Assiut** in January.

EXPRESS SERVICE.—The Express Steamers also leave **Cairo** twice a week, the Friday departures commencing in November, and the Monday departures in December.

There is thus a Service of **Five Cook's Steamers per week** ascending the Nile to the **First Cataract** during the Season—three from **Cairo** and two from **Assiut**—calling at all points of interest on the Nile, in connection with which complete arrangements for sightseeing and excursions are made, enabling Travellers to visit, to the best advantage, all the famous

PYRAMIDS, TEMPLES, TOMBS, RUINED CITIES, etc.

SECOND CATARACT SERVICE.—In connection with the above Services there is also a Service twice weekly by First-class Steamer from the **First** to the **Second Cataract**, with through bookings to **Khartoum, the Sudan**, and **Uganda.**

PRIVATE STEAMERS AND DAHABEAHS. — **Thos. Cook & Son** have several small Steamers for charter at moderate rates, specially adapted to the requirements of Families, Private Parties, Sporting Parties, etc., accommodating from eight to sixteen passengers, with competent crews, and thoroughly equipped. Also a large Fleet of First-class Sailing Dahabeahs, the best on the Nile.

P & O Express Service via Brindisi.

From Charing Cross 9 p.m. every Friday.

LONDON (via Brindisi) to EGYPT in 4½ days.
LONDON (via Marseilles) to EGYPT in 5 days.
LONDON (by Sea) to EGYPT in 12 days.

For information as to general passage rates, descriptive handbooks and all information, apply at the Offices, P. & O. S. N. Company, 122, Leadenhall Street, E.C.; Northumberland Avenue, W.C., London.

Khedivial Mail Line.

FIRST-CLASS BRITISH MAIL STEAMERS.

GREECE-TURKEY MAIL SERVICE.

Shortest and most picturesque sea passage between Europe and Egypt. Fast steamers in connection with the Orient express train-de-luxe from Paris, Ostend, Vienna, Berlin, and Budapest leave Constantinople every Tuesday afternoon for Smyrna, Pirœus and Alexandria. Return from Alexandria every Wednesday afternoon via same ports.

Service between TURKEY, SYRIA & EGYPT.

Fast steamers leave Constantinople every Saturday for Gallipoli, Dardanelles, Mitylene, Smyrna, Chios, Rhodes, Mersina, Alexandretta, Tripoli, Beyrout, Caiffa, Jaffa (for Jerusalem), Port Said and Alexandria. The voyage takes ten days.

Departure from Alexandria every Saturday, and from Port Said every Sunday, for above ports.

CYPRUS SERVICE.

Fast steamers weekly from Alexandria on Tuesday afternoons, and from Port Said on Wednesday mornings, for Famagusta, Larnaca, Limassol and Paphos.

SUDAN MAIL (SUMMER) SERVICE.

Steamers leave Suez Docks fortnightly on Friday, at 5 p.m., for Port Sudan, whence trains may be taken for Khartoum. Calls made at Suakim as required.

RED SEA COASTING MAIL SERVICE.

Steamers from Suez Docks every Monday evening, at 5 p.m., for Jeddah, calling one week at Tor, El-Wedj, Yambo and Jeddah; and in the following week at Jeddah, Port Sudan, Suakim, Massowah, Hodeidah, and Aden.

For information apply to the Company's London Office, 37, Bishopsgate, or at Alexandria, Constantinople and Suez. Passages may be booked at Company's Agencies at all ports called at, or from the principal Tourist Agencies.

NOTES OF THE WEEK.

Talaat Bey, the Turkish Minister of the Interior, has added to his reputation as representing the enlightened section of the Ottoman Government by the straightforward attitude which he has adopted in regard to his mission to Asia Minor. He found a very serious state of affairs, and has had the courage to say so. The gravity of the situation has been established. What is not known, and perhaps may never be known fully in Western Europe, is the real extent of the sufferings inflicted upon the Greeks. Many of the refugees fled in anticipation of what would be their fate if they remained in their homes or villages; but the Turkish population found enough victims for their campaign of outrage and elimination. Only the timely arrival of Talaat Bey appears to have prevented still more terrible excesses. He has curbed the blood-lust of the Turks in Asia Minor, and has given assurances of Turkey's intention to make such amends as are in her power, and as far as possible to restore the *status quo ante*. It remains to be seen whether Talaat Bey will be allowed by his fellow-Ministers and the extremists of the Committee of Union and Progress to give effect to his promises. Unless the punishment of the ringleaders among the perpetrators of the excesses and of the authorities who connived at their work is carried out with a thoroughness which is not usual in similar circumstances in Turkey, the Porte will once more have disappointed its best friends. Responsibility for the policy which led to the forcible expulsion of the Greeks is not restricted to a few subordinate officials in Asia Minor. It is shared in far higher quarters, and if the Turkish Government wishes to "save its face" abroad it must be prepared to lose some of it at home.

The conciliatory replies sent by the Porte to the Greek Notes on recent events in Asia Minor hold the field for the moment, and have created a good impression. But feeling in Greece has probably been roused to too high a pitch to allow the Government to be put off with fair words. Unless Turkey follows up Talaat Bey's promises with definite action, the tension between the two countries will not be relaxed. The situation is without doubt a difficult one for the Porte to cope with, even with the best intentions. If it is going to employ its ingenuity in order to extricate itself from an embarrassing position with as few amends as possible, the outlook will become serious. In reply to interpellations in the Turkish Chamber, Talaat Bey pointed out that in order to allow the Greek emigrants to return to their homes the Mohammedans who now occupied them would have to be turned out; while to provide for the quarter of a million of Mohammedans from Macedonia in remote parts of the Empire, the Porte would require a sum of money amounting to twenty million sterling. The force of this argument will not be lost upon the Greek Government; but it can hardly be expected to acquiesce in the present state of affairs merely because the excesses in Asia Minor have been carried out on a scale too great to allow full amends by Turkey. For the moment we can but hope that the attitude of Talaat Bey reflects a change of policy on the Turkish Government—a tardy recognition that resort to oppression and massacres neither pays nor argues sound statesmanship. So little is needed to enable the Porte to summon to its aid all that Europe has to offer for the development of Asia Minor on lines that must ultimately leave the Balkan States far behind the Ottoman Empire in prosperity and material resources; but its present policy has the effect of continually postponing the realization of that bright future, and of bringing nearer the day when the logic of events may prevent any Power from offering resistance to the partition of the Turks' possessions in Europe and Asia.

Prince William of Albania has been credited once before with the intention of abdicating, and it was subsequently stated that such an idea had never been entertained by him for a moment. It is possible, therefore, that the present reports of his impending abdication are equally false. They may have originated in the departure of the Princess and her children from Durazzo. But there can be no valid reason why the Princess should remain in that unhealthy port during the summer months. In normal circumstances July would hardly have found Prince William himself there. It would be straining the conception of duty to pretend that the Princess and the children ought to continue to endanger their health in the face of the heat and insanitary conditions now to be met with in Durazzo. If Prince William is not contemplating abdication, he must be credited with some courage and persistency. No improvement can be recorded in the situation in Albania. The body of insurgents which has made itself responsible for the beleaguering of Durazzo is said to have agreed to a ten days' truce with the Government; but elsewhere Albanian bands hostile or indif-

Digitized by Google

ferent to the Durazzo régime continue to dominate the country and to occupy various towns. Further complications have been introduced by the arrival of the time for giving effect to the Corfu Convention. The Epirotes, at the instance of the International Commission of Control, undertook to recognize the Albanian Government in return for certain concessions. For the moment, however, the Albanian Government does not recognize itself, and the Epirotes are naturally unwilling to throw in their lot with the Durazzo régime and so court hostilities with the insurgent bands. On the other hand, the essence of the Corfu Convention was that they were to accept the sovereignty of Albania's ruler as that of a Christian monarch. If the insurgents win the day and Prince William has to make way for a Mohammedan ruler, the Epirotes argue, the Corfu Convention becomes null and void; for they will certainly not place themselves under a Moslem ruler. Meanwhile, the Powers, fearful lest anything done in the interests of Albania might prove of advantage to one of their number, maintain their policy of inaction, and allow the situation to go from bad to worse.

The United States Government has dispensed with the services of its unconventional Minister at Athens, and unless an American newspaper engages Mr. Williams as its correspondent the world may lose the second instalment of his views on Albania. Meanwhile, he has contrived to deliver himself of such unmeasured strictures upon the Albanian situation that one is left with the impression that the only thing which can be worse than the muddle in that country is Mr. Williams's attempt to set it right. An independent opinion, well informed, might have proved of value to the Concert of Europe if communicated through the proper channels. Mr. Williams's method of stating his views not only prevented serious attention being paid to them, but challenged the accuracy of the information on which he had based his embittered judgments.

A welcome restraint has been shown both in Roumania and Bulgaria in discussing a regrettable incident which occurred near Kemanlar on the frontier recently ceded to Roumania. The two versions differ in detail; but the facts established are that a collision took place between Roumanian and Bulgarian soldiers, as a result of which one Roumanian was killed and another wounded on Bulgarian territory. A joint commission has been appointed to hold an inquiry, and no doubt the incident will be kept within its true proportions. Both the Roumanian and the Bulgarian Governments are anxious to preserve correct relations between the two countries. Certain actions on the part of Roumania in adapting the administration of the new territory to her own requirements have been resented by her Bulgarian subjects and in Bulgaria. The attention of King Charles and Queen Elizabeth was called to particular grievances on the occasion of their recent visit to the Dobruja, and these, no doubt, will be remedied in due course. The land policy introduced by the Roumanian Government into the new territory offers a more serious problem; and if persisted in it can only be hoped that the actual administration of the law will prove more humane and reasonable than the provisions as worded in the statute book.

As the welfare of the Balkans depends largely on the judicious expenditure of funds for development purposes, the conclusion of fresh loans is a matter of importance for all the States. Bulgaria has now concluded her negotiations with the German banks, and the contract has been ratified by the Sobranje. The amount of the loan is £20,000,000, redeemable in fifty years at 5 per cent., the price of issue being 84. Bulgaria is to receive the sum of £4,800,000 at once, and the balance of half the total amount before the end of the year. The second half of the loan will be issued within two years. The money is required for the construction of railways and ports. As a *quid pro quo* the German banks are given a concession to construct the Porto Lagos line with a guarantee of 10 per cent. profit on the capital, and the right of developing the coalfields at Pernik conjointly with the Bulgarian Government.

The accuracy of the report that the Somaliland Mullah is advancing on Burao is denied. If the report proves true the British Colonial Secretary will have a personal grievance against this troublesome chieftain. Somaliland shares with certain other countries the fate of not being *terra grata* with the British Government. It may do what it likes and its inhabitants may do what they like, provided nothing is heard of them. In accordance with this policy the late Mr. Corfield was allowed to raise a camel corps, and to harass Dervishes so long as he did nothing to attract notice. When an engagement was fought that could not fail to be reported, the taboo on Somaliland was rudely destroyed and some explanation of the situation became necessary. Mr. Harcourt, as we know, blamed Mr. Corfield, who lost his life in the successful action against the Mullah, and upheld the officers and officials who executed a hasty retreat to the coast. Somaliland, as far as British purposes were concerned, was to be reduced to a narrow strip of coast line. At the same time the Colonial Secretary administered a soporific to Parliament and the British public. "The Mullah," he pointed out, "is an old man in an advanced stage of dropsy, physically unable to move himself . . . with a little patience and a little endurance we may see Somaliland a comparatively peaceful country." Unfortunately the patience appears all on the British side, the endurance all on the Mullah's, and peace nowhere. The recent report that an army airship might be requisitioned for service in Somaliland indicated that the news from the interior was not satisfactory. Further activities on the part of the Mullah, if unchecked, will encourage him to attempt more serious raids on the coast town, while the lot of the friendly natives whom we have abandoned to the Mullah's tender mercies will become still more parlous. As an expedition against the Dervishes is not desirable, the only practicable alternative is a mobile force, such as was formed and led by the late Mr. Corfield, but strong enough to harass the Dervishes, if they come within striking distance, and so to make them more inclined to keep out of reach.

The political situation in Persia threatens to become almost as desperate as that of Albania. Another defection from the Cabinet is reported in the resignation of Vosouk-ed-Dowleh, Minister for Foreign Affairs. The date of the Shah's coronation approaches, and if to a non-existent Parliament has to be added an exiguous and divided Cabinet the unconstitutional outlook becomes far from satisfactory. As was to be expected, the action of the British Government in connection with the Anglo-Persian Oil Company has not been allowed to pass unchallenged in Russia. The revision of the Anglo-Russian Convention is not merely regarded as a possibility, but is now demanded in certain quarters as a necessity. It is urged, however, that such a revision must not be "one-sided." Russia will, no doubt, press for a *quid pro quo*, and it will depend on the statesmanship of the two Governments whether consideration is to be paid to Persian interests or whether Russian policy is merely to be dictated by the interests of concession-hunters. If certain Russian journals are to be believed, the British Government's oil deal is likely to have far-reaching political effects.

CONSTANTINOPLE LETTER.

(From Our Own Correspondent.)

Constantinople, July 5.

Talaat Bey's Return.

The Minister of the Interior has returned from the Province of Aidin, where he has been engaged for the best part of three weeks in the energetic restoration of order. According to information from well-informed quarters, the Minister confesses that till his arrival the situation had been a dangerous one. Very grave peril of a general fanatical outbreak existed, owing to the original failure of the local authorities to repress the excesses of the Smyrna Press, which seems to have fanned the flames of religious discord, and to the consequent belief of large numbers of petty employees, gendarmes, minor officials, and rough elements both among the local population and among the "muhadjirs" that the Government desired something more than the development by pacific means of Moslem commercial and other resistance to Greek penetration. Having taken this line of reasoning, the elements in question proceeded to interpret the supposed desire of the Government, and what certainly was and is the desire of the Union and Progress extremists, into action. Their action took the form of the more or less forcible expulsion of Greeks from certain localities, while in others the mere threat of attack drove the Greek population in panic to the sea coast. In some cases, notably at Phocea and Serekeui, horrible excesses were committed; but the arrival of Talaat Bey put a stop to the overture which heralded a massacre. It is to be hoped that any officials or employees of the State who have really been guilty of murder and rape will receive an exemplary punishment. In the meanwhile, thanks to Talaat's efforts and the more conciliatory conduct of the Hellenic Government during the last fortnight, the Porte seems to have escaped from a serious and dangerous situation with far less hurt than could have been anticipated. It is to be hoped that the lesson will not be forgotten, and that the Central Government will henceforth teach its provincial subordinates and the extremist politicians, who are its often compromising supporters, that they must refrain from initiating semi-revolutionary movements on their own account.

Results of the Greek Emigration.

It is hard at present to form any idea of the financial loss caused by the emigration of some 130,000 Greeks from Asia Minor and Thrace. The writer has heard estimates of a loss to the revenue of over £T400,000; but it is difficult to form any idea of the truth, all such estimates being based on very imperfect data. Business at Smyrna has also suffered, and in some districts it will be difficult to get the crop in owing to the shortage of Greek labour. There has, moreover, been quite a series of cloud-bursts in Northern and North-Western Anatolia during the last fortnight. These have done further damage to the crop, notably in districts of Soma, Balikessir, and Trebizond, where there has been an anti-Greek campaign and an exodus of Greek peasants. At Tsharshamba, near Trebizond, the extent of the damage done amounts, so the local Press says, to £T100,000, and there has been much loss of life. Even in parts of the plateau of Anatolia, which is usually dry enough, and where drought is more feared by the cultivator than flood, there has been too much rain. It will be interesting to see how the authorities will regard the situation in a fortnight's time, when it will be possible to form some idea of the extent of the damage to agriculture caused by (1) emigration and (2) by rain. In Thrace the crops promised well according to the latest news to hand.

Priest or Politician?

Negotiations between the Porte and the Œcumenical Patriarch have been resumed, and it is hoped that the Greek schools and churches will soon be opened. It is very doubtful whether the action of the Patriarch in closing them was either wise or solely inspired by a desire to improve the situation of the Orthodox Church. Not to put too fine a point on it, there can be little doubt that Hellenic rather than Ottoman Greek influences have swayed the Holy Synod of late, and that the Patriarchate has consequently suffered. At present the Church is much criticised by a considerable section of Ottoman Greeks on account of its policy in the recent crisis. These critics, many of whom are Turkish-speaking Greeks who are less amenable to Hellenic influences than the Greek-speaking community, roundly say that the Holy Synod has been altogether the instrument of Hellenic ambitions, or rather of the ambitions of Hellenic extremists, and that the neglect by numerous Metropolitans of the counsels of Russia was a grave error. The Russians have from the beginning urged the Patriarchate to regard the Greco-Turkish question purely from the Church point of view, and to abstain from demonstrations which can only injure the prestige and the best interests of the most ancient branch of the Orthodox Church, the Mother Church of Eastern Christianity. It is to be hoped that the Patriarchate will eventually be induced to retire from the position which it has taken up. The Porte may be relied on to make withdrawal easy.

British Naval Visit.

The terrible crime at Serajevo naturally prevented the full programme of entertainments in honour of the visit of Admiral Sir Berkeley Milne on board the "Inflexible" from being carried out. The British Admiral was the bearer of a letter from King George V. to the Sultan, who presented him with a gold watch decorated with brilliants. After the dinner at the Palace on Sunday night, the dinner which was to be given to the Admiral and his staff, and to which numerous members of the Ottoman Government had been invited, had to be altered to a purely unofficial and private entertainment. Sports were held at Moda on Monday; and a cricket match between H.M.S. "Inflexible" and an All-Constantinople team skippered by Mr. H. C. A. Eyres on the Saturday ended after an exciting finish in a narrow victory for the home team, owing to the sporting manner in which the "Inflexible's" captain declared his second innings closed after leading on first knock, so as to give the homesters a chance. The visit closed with a reception of the British colony on board the "Inflexible," which was largely attended. A number of Turkish military and naval officers were invited thereto, and they greatly admired the design and proportions of this splendid battle-cruiser. The "Inflexible" left on Wednesday for Marmaris, where the Mediterranean squadron will hold its regatta.

The comments of the Turkish Press concerning the situation created by the Serajevo horror are studiously vague. The general impression is that we are entering on a period of Austro-Servian tension, and that at any moment the death of King Peter of Servia or of the Montenegrin King may bring about that union of Servia and Montenegro which the Austrian Press assures us will be opposed by the Dual Monarchy by force of arms.

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Cairo, July 2.

Lord Kitchener and India.

Once again Egypt is perplexed and anxious. On Friday last *Al Mokattam* published a special cable quoting *The Daily Mail* as having been informed from an official source that Sir Francis Bertie's tenure of office in Paris, which under ordinary circumstances should come to an end next August, will be extended until April, 1915, when he will be succeeded by Lord Hardinge, whose place as Viceroy of India will in all probability be taken by Lord Kitchener. What reliance is to be placed in the latter part of this statement? This is the question that each is asking the other. Twice before—in November and December last—has the same news come into circulation, though not in so authoritative a manner as now, and on each occasion its accuracy has been denied, the last time most categorically. Although *The Daily Mail's* statement bears out what I wrote you in my letter of Nov. 27 last, one is perhaps justified in feeling somewhat sceptical as to its reliability, seeing that in the first place the passage referring to Lord Kitchener is not as definite as that dealing with Lord Hardinge and Sir Francis Bertie, and in the second place the precarious position of the Home Government would, one would think, militate against the taking of such a decision as the one referred to so far ahead.

Nevertheless, most people are disposed to credit the news, and nearly everyone admits that Lord Kitchener's promotion to India is but what had been expected; for although—for many reasons, apparent and otherwise—a change in Agent in the near future would be very regrettable, it has all along been felt that, in so far as Lord Kitchener was concerned, the requirements of Egypt would have to be subordinated sooner or later to the greater claims of the Empire. As I wrote you on a previous occasion, the situation requires the directing hand of a strong man to-day, just as much as it did three years ago; for although matters may be very much improved from the point of view of political unrest, the country is now committed to a series of reforms, the benefit of which might easily be jeopardised by any slackening of the reins. Indeed, it is the general opinion that if Lord Kitchener's services are for Imperial reasons required in India, his successor should be a strong man with personal prestige and full support from London, and that his appointment should be accompanied by an assurance that no new experiments in policy are to be imposed on him.

If, however, the statement published by *The Daily Mail* is but a summer "canard," the sooner it is officially contradicted the better; for the periodical circulation of these rumours can do no good either to the persons concerned or to Egypt, since they must necessarily encourage the setting up of obstacles to the efficient execution of the policy laid down, and tend to have an unsettling effect on the country. Indeed, it were well if an official statement on the subject could be made as soon as possible, the present state of uncertainty being far from satisfactory.

Abaza Pasha Returns to Politics.

The event of the week next in importance is the return of Ismail Pasha Abaza to the arena of Egyptian politics. He has consented to stand as a candidate for the Legislative Assembly for the Hehia constituency, from which his brother was recently unseated as a result of an election petition. The Abaza family is one of the best known in the country. In the past it was a veritable power in the land, and even to-day, although, thanks to the energy and activity of Hassan Pasha Hassib, Mudir of Sharkia, its hold over the fellaheen has been considerably weakened, it still retains a certain amount of influence. Abaza Pasha will be best remembered for the part he played in the famous discussion in the General Assembly four years ago on the Suez Canal Concession, and it was mainly owing to his personal influence that the proposal was rejected. Since then he has not figured so prominently in politics, and at present he is Director-General of the Khedivial Wakfs of Kavalla and Thassos, to which he was appointed by the Khedive. Abaza Pasha is a Nationalist by politics, though he has never, as far as is known, been a member of the Nationalist Party. He is a most able man and a most eloquent speaker, and it is expected that if he succeeds in entering the Legislative Assembly he will challenge Saad Pasha Zaghlul for the leadership of the Opposition, in which case his presence in the House may prove to be very beneficial to the country. Abaza Pasha is to be opposed by Mustapha Pasha Khalil, another wealthy notable, who it may be remembered entertained on a most lavish scale a large party of naval officers on his estate at Shirshima during the visit of the British Fleet last November.

The Protest Against the Press Law.

The correspondence exchanged between the Khedive and a number of English journalists, when the latter protested to his Highness against the Egyptian Press Law, has just been published here. It seems a thousand pities that people who are so noted for their intelligence should display such patent ignorance of the circumstances of the case which they have taken up. Egypt without some means of bridling the local Press would become an impossible country. We have already tasted of the sweets of a free Press in Egypt; and none of those who went through the experiences of the first decade of this century, and who followed with an unbiassed mind the course that events took then, would wish to return to such a state of affairs. No doubt the existing Press laws are not as satisfactory as they might be, and some adjustment might be found beneficial without creating any dangerous situation. But there is a wide margin between a complete repeal such as is advocated by the signatories of the above-mentioned protest and an adjustment of the laws. The complete change in tone and the remarkable rise in standard of the vernacular Press during the past four years are the greatest justification that could be found for the maintenance of a Press Law in this country, and only those local journalists who find it irksome to restrain their venomous pens are in favour of the re-institution of a free Press.

The Nile Flood.

News of the Nile flood appears to be more satisfactory, and rotations in Lower Egypt have been reduced from twenty-four to twenty-one days, with one day instead of two days' stoppages. I have been authorized to state that all the rumours that have been in circulation are unfounded, and that the various predictions made are absolutely unreliable, since even with the data and records available the irrigation authorities cannot foretell the date or size of the flood, until about fourteen days before it actually makes its appearance.

Another Senussi Visitor.

It is announced that Sayed Hilal El Senussi, the youngest brother of the Grand Sheikh, has left Jarabub, travelling eastward, and that he is coming to Egypt. Whether he will actually come to Alexandria is not known—the latest news is that he has crossed the frontier—but there seems little doubt that both his and his cousin's journeys have some political object, possibly not unconnected with the position in Tripoli. It is said that the Senussi is annoyed at Egypt having allowed Italy to pass camels and horses into Tripoli, and that he is making representations to this effect to the Egyptian Government. If he does protest he will doubtless be informed that it is not Egypt's business since peace has been made between Italy and Turkey, and Tripoli belongs to the former; and he will probably be advised to accept the peace terms offered him from Rome. From news that reaches me, it appears that the Senussi is no longer in a position to put up much of a resistance to the Italians.

THE EGYPTIAN LEGISLATIVE ASSEMBLY.

A Review of the First Session.

(From Our Own Correspondent.)

Cairo, June 19.

During its first session, which opened on January 22 and closed on June 17, the Legislative Assembly held forty-five sittings, some of short and others of long duration, the average being about four hours per sitting. At first glance this does not convey an impression of great industry, but it must be borne in mind that ten days had at the very outset to be sacrificed to the elaboration by a special committee of rules and regulations, without which the debates could not proceed; that a week was lost during the Ministerial crisis, when in the absence of the Ministers no business could be transacted; and that for eleven days pending the examination by the various Committees of the Bills submitted by the Government the Assembly had no work to do. In other words, the session for working purposes was reduced to one of under four months, giving an average of three sittings per week, which is, perhaps, as much as one can fairly expect from a body which is composed for the most part of men who have important private interests, and which, owing to the administrative calls on the Ministers' time, cannot sit in the forenoon.

But although to the outer world the Assembly's labours were restricted to forty-five sittings, this in nowise conveys a correct impression of the work actually done. The greatest credit is due to the eight Committees that had to examine and report on every Bill, every motion, and every petition presented to the Assembly. Day after day the members composing them met for the purpose of hearing evidence, discussing the questions at issue, and finally drawing up reports that eloquently showed how closely the various projects had been studied. Special mention should be made of the report on the Wakfs Budget (Pious Foundations), which constituted a model of lucidity and common sense. As an example of what work fell upon the shoulders of these Committees, I may mention that the Petitions Committee alone had to examine and report on no fewer than 644 petitions presented by various members of the community.

The Work Done.

The business actually done by the Assembly has been by no means inconsiderable. In addition to drawing up the regulations for its own guidance, it approved of the General and Wakfs Budgets for 1914-1915, and passed the highly important Bills:—Court of Criminal Appeal, Co-operative Agricultural Syndicates, Weights and Measures, Filling in of Birkets (Provincial Marshes and Pools), Destruction of Boll-Worm, Creation of Higher Commercial Schools, besides several laws making alterations in the Criminal Codes. This is no mean list, and the measure of the assistance given by the Assembly, and especially by the Committees, may be gauged from the fact that in a great many instances the amendments proposed were accepted and incorporated in the projects by the Government, and that on at least one occasion a measure was withdrawn at the instance of the Assembly.

Growth of an Opposition.

It is much to be regretted that the excellent impression created by these results should have been marred by the exceedingly acrimonious discussion that arose on the question of the acting Presidency of the Assembly, the raising of the question of the legality of the creation of the Wakfs Ministry, and by the regrettable incident during the debate on the Birkets Law.

For some reason or other the Said Cabinet was not looked upon with favour by a certain section of the House, which set itself to oppose everything proposed by the Government. Full advantage was taken of this attitude by interested circles, and even after the Said Ministry fell the Opposition continued for some time to give proof of its steady growth. Not that there is any real animosity towards the present Premier and his colleagues, but there have been factors at work, some of them personal, which have strengthened rather than weakened the Opposition. A good deal of this opposition has also been due to the initial inexperience of the majority of the members, who no doubt felt strange in their new surroundings, and so fell an easy prey to the influence of certain of their colleagues, who were more practised in the subtle art of political controversy and very often had their own axes to grind.

In this connection it must be placed on record that the nominated members, with one or two notable exceptions, have proved highly disappointing. Had they possessed the energy and talent that was naturally expected of them, and had they taken the part in the debates which by right fell to them, much of the opposition would have collapsed. It might, indeed, never have arisen, for the simple reason that it would have been disarmed by the support which the Government would have received.

A Mistaken Attitude.

No one wishes to see the Legislative Assembly become a mute institution for the formal approval and passing of the Bills which the Government proposes to introduce. There is, however, a wide margin between such a condition and the opposition set up in the heart of the Assembly during the past session. Opposition is as necessary in a legislative body as competition is to trade. But due regard for circumstances and a sense of proportion must be maintained. And this has not characterized the opposition in the Legislative Assembly. Those responsible for its creation have not borne in mind that the delegates are not called upon to form parties, as is done in European Parliaments; that, indeed, the Legislative Assembly is not a Parliament with power to decide who shall administer the country, but that it constitutes purely a consultative body with certain, as yet, very limited powers. The Opposition members have all along made a point of forcing their views on the Government, and when the Government has declined for excellent political and other reasons to accede to those opinions, they have adopted an attitude of righteous indignation.

The Future.

Making due allowance for what is after all in most cases a first appearance in public life, and assuming that the work in Committee may be taken as a fair sample of what the average delegate is capable, one cannot regard this first session as altogether unsatisfactory. Indeed, it has shown that the Assembly on balance contains elements that are distinctly promising. Valuable contributions have been made by members during debate, and latterly a decided impatience has been shown with the methods of the Opposition.

Much relief might be obtained from the tediousness and undue protraction of the debates if the suggestion made, I think, by Gallini Pasha Fahmy were adopted. He proposed to forbid any member to speak more than three times during any debate on any particular subject. The suggestion as made is, perhaps, somewhat too general, though in view of the loquacity of some of the delegates it is fully justified. It might with profit be adopted with the provision that this limitation does not apply to the Premier, the Minister interested in the subject under discussion, and the President and reporter of the Committee which has had to examine the Bill in question. If some such provision were inserted in the rules of procedure, and those members who broke away from the Opposition at the end of the session do not return to their obstructive tactics, there is every reason to expect that the next session, which begins on November 1, will show a marked improvement on the one just closed.

PORT SAID NOTES.

(From Our Own Correspondent.)
Port Said, June 25.

The Regatta.

The annual regatta organised by the Port Said Rowing Club was held in the harbour on Saturday last in the presence of a large number of onlookers. The course extended over 2,000 metres, and the principal event of the day was a race for the Prince d'Arenburg Cup, presented by the president of the Suez Canal Company. The cup was won for the two past years by the Alexandria International Club, and as a win for them this year would gain them the cup outright considerable interest was taken in the event. Four boats started, and after a most exciting contest the race was won by the Cercle d'Aviron of Ismalia from the Alexandria Club by three yards.

There were several other events, including races for canoes and four-oared boats, and after an afternoon's keen sport the rival teams adjourned to the Casino Hotel to a banquet given in their honour by the Port Said Rowing Club. A ball following in the evening provided a fitting conclusion to an enjoyable and sporting day.

British and German Warships.

The German Dreadnought cruiser "Goeben," which has been staying in port here during the past few days, is said to be the largest warship in the Mediterranean. The British cruiser "Pelorus" arrived from the Persian Gulf on Monday, homeward bound, and an unusual sight was witnessed in Port Said when British and German sailors fraternised in their leisure moments in shop and café.

SUDANESE ANTIQUITIES.

The Institute of Archæology, University of Liverpool, is holding a special exhibition of antiquities discovered at Meroë during the past five seasons in the rooms of the Society of Antiquaries, Burlington House, Piccadilly (by permission of the Council), from Tuesday, July 7, to Saturday, July 25, inclusive, between the hours of 10 a.m. and 5 p.m. The subjects shown will include decorated pottery vases, sculptures and inscriptions, objects of faience and of bronze, intaglio rings, jewels, gold treasure and coins, copies of frescoes, plans and photographs, etc.

The recent excavations prove the importance of the city whose glory was at its height during the period known as the Middle Meroitic period, B.C 300 to B.C 1. The earliest remains date from the sixth or seventh century B.C., and consist of the original portions of one of the Royal palaces, the Sun Temple, and other buildings; this year's work has, however, decided that the enclosing walls of the city date from the beginning of the Greek period, about the third century B.C., when the city underwent replanning, and Egyptian characteristics disappear under the newly imported influence. One of the most striking instances of this is the sudden change in the funerary customs. The Egyptians, who, we know, from 4,000 years before Christ had always buried their dead, now adopted cremation and burial within the city walls. This year's excavations in the north-east area have brought to light an enclosure at the back of the later palace, to the east, which extends as far as the main wall of the city, and was used as a cemetery for the ashes of the dead, the crematorium having been discovered between the Palace and this cemetery with its flues and hearth.

THE NEAR EAST.

THE NEAR EAST is on sale at all Bookstalls and Newsagents in the United Kingdom. Should any difficulty be experienced in obtaining the paper, readers will oblige by notifying the Manager. Abroad THE NEAR EAST may be obtained in:

PARIS. Librairie Hachette, 79, Boulevard Saint-Germain; Librairie Galignani, 224, Rue de Rivoli, and at Railway Bookstalls.
VIENNA. Goldschmiedt Brothers, Zeitungsbureau, Wollzeile, 11.
CONSTANTINOPLE. Economic Co-operative Society, Pera; Benjamin Rawa, British Oriental Bazaar; D. Marianopoulo, 250, Grande Rue de Pera; and The Nautical Bazaar, Galata.
SALONIKA. Librairie Francaise, Rue Sabri Pasha.
SMYRNA. Dem. Tzannou, Petite Rue de Rose, and F. S. McVittie.
BEYROUT. Sarrafian Brothers.
JERUSALEM. Palestine Educational Store, Jaffa Road.
CYPRUS. Cababe and Wilson, Nicosia.
CAIRO. Diemer and Company, Shepheard's Buildings; The British Library, Sharia Kasr-el-Nil; C.M.S. Bookstall, 15, Sharia Madabegh; and at Railway Bookstalls.
ALEXANDRIA. Librairie Schuler, Rue Cherif Pasha; Nacamulli and Company, 12, Rue Sesostris; Librairie Calebotta, Rue Cherif Pasha Librairie Cauro, Rue Cherif Pasha; The Eclectic Bookstall; F. Diemer, Cairo Station.
PORT SAID. Charles Evans, and on board vessels in the harbour.
KHARTOUM. Sudan Stationery and Bookstore, and Victoria Bookstall
ATHENS. Eleftheroudakis and Barth, Place de la Constitution.
SOFIA. Librairie de la Cour.
BUCHAREST. Socec and Company, Calea Victoria
BELGRADE. La Librairie Internationale, 16, Rue Prince Michel.
NEW YORK. The International Bibliopole, 118, East 28th Street.

Readers in France who desire to secure THE NEAR EAST regularly are informed that any Newsagent in that country can obtain the paper for them through Messrs. Hachette, in Paris. In the same way any Newsagent in Belgium can readily obtain the paper from the Agence Dechenne, Bruxelles.

LETTER FROM ATHENS.

(From Our Own Correspondent.)
Athens, July 1.

The Purchase of Warships.

The formal authorisation by the American Legislation of the sale to this country of the "Idaho" and the "Mississippi" was anxiously awaited here, and the news that it was actually granted was received with real relief. Ease of mind thus assured, for a time at least, the country can now turn to peaceful pursuits. The Government has telegraphed its thanks to Mr. Wilson, and the entire Athens Press makes itself the interpreter of the national gratitude to the United States President, who by his personal intervention is considered to have secured peace to Greece.

The acquisition of these two vessels—which will in all probability be renamed "Kilkis" and "Lemnos"—will certainly assure supremacy in the Ægean to Greece for the time being, but when the "Sultan Osman" and the "Reshadieh" are added to the Turkish Navy the artillery of the latter will be superior to that of the Greek Navy. The Ministerial journals minimise this superiority as far as possible—emphasising the better training, greater skill, and higher courage of the Greek sailors, and so forth—and conclude that the Turkish fleet, even when it has been strengthened by the two Dreadnoughts mentioned will not venture outside the Dardanelles or indulge in a battle that might prove its undoing. The Opposition Press, on the other hand, deplores the inferiority of the Greek Fleet, even after the purchase of the two American vessels—which, chiefly because of their slow speed (16 knots against the 22 knots of the Turkish Dreadnoughts) will never be able to take the offensive—and attacks Mr. Venizelos for not purchasing the Brazilian Dreadnought. But, as I have pointed out before, even had Mr. Venizelos bought the "Rio Janeiro," that would only have given Greece naval superiority for a short time; for Turkey, being richer than Greece, would construct more large vessels, while this country ought to be bound by the limits imposed upon it by the state of its finances.

The entire Opposition Press accuses the Government of high treason, because it does not attack Turkey while there is still time and before she receives her Dreadnoughts, and it is suggested that the islands ought to be annexed immediately, since that would lead to a settling up of accounts with Turkey.

The Turkish Note and Greek Reply.

The complementary declarations made by Ghalib Bey to the Athens Cabinet have brought about a change in the impression first produced by the Turkish Note. By these declarations Turkey has promised, in addition to a cessation of the persecutions, the reinstatement in their homes of the Greeks still remaining on the Asiatic coast, and proposes the exchange of other emigrants who wish to change their country and of their properties. This exchange of properties, according to the Turkish proposal, would be subject to valuation by a mixed Commission; and though doubts are entertained as to such a Commission ever arriving at any definite conclusion, the Greek Government, wishing to show a conciliatory spirit, has accepted the proposal in principle. It made certain reservations, however, especially regarding the exchange of urban populations, demanding that note should be taken of their own wishes, so that those of the Greek emigrants who would be ruined if forced to leave the country, may be permitted to return to Turkey.

Finally, the Greek Note draws a sharp distinction between the Turkish emigration from Macedonia and the Greek exodus from Asia Minor, and denies that the former can have provoked the persecution of the Greeks, as the Turks claim. The Greek Note concludes by reciprocating the Turkish Government's hope that "henceforward nothing may occur to injure the good relations between the two States." These, say the Greeks, are very fine words, but the realisation of the hope depends entirely on Turkey. In fact, people here ask what guarantees Greece can have that similar per-

Digitized by Google

secutions and expulsions will not take place periodically in the future, followed each time by the same fine promises and excuses; so that the Ottoman Empire will gradually be cleared of Greeks. The Ministerial Press urges that Greece should press for a prompt settlement of her account with Turkey; and since the island of Sasseno has been already handed over to Albania there is, they say, no reason why Greece should not carry out the will of the Powers, annex Chios and Mytilene, hand over the other islands to Turkey, and demand effective guarantees in favour of the Greeks in Turkey.

NOTES FROM CYPRUS.

(From Our Own Correspondent.)

Cyprus, June 26.

The King's Birthday.

The King's Birthday was kept with due ceremony here on the 22nd inst., and as the date happened to fall on the eve of the departure of Government for Mount Troodos it provided a fitting wind-up to the Nicosia season. The day was kept as a public holiday, and was marked by official functions at each of the six principal towns, but at Nicosia, as being the seat of Government, it was naturally celebrated with special éclat.

A Te Deum service was held at the Phaneromeni Greek Orthodox Church at 9 a.m., followed by another at the Roman Catholic Church half an hour later, both of which were attended by a number of English officials and residents. A special service took place at the Anglican Church of St. Paul's at 10.30 a.m., at which his Excellency the High Commissioner and Lady Goold Adams were present, and shortly afterwards a levee was held in the Legislative Council Chamber, which drew a large gathering of officials and leading personages to pay their respects to the High Commissioner. Those present then adjourned to witness a parade of the Cyprus Military Police, and the proceedings terminated in a *feu de joie* and three cheers being given for his Majesty the King.

In the evening a large reception was held at Government House, when all the different communities were represented. The San Sofia Mosque was brilliantly and beautifully illuminated, and the Public Works Department is to be congratulated on the fine and festive appearance of the Konak and Government House.

There has been at Nicosia a welcome revival this summer of cricket. Quite a number of players have been regular in attendance at practice, and several matches have been played. The popularity of the game has fluctuated a good deal for some years past, and it is satisfactory to find that this year it has again attracted a fair share of attention.

There has been much talk of late in regard to the possibility of abandoning the present premises of the Nicosia Club. There had been anxiety owing to the contemplated erection of buildings which would have overlooked the club grounds. Happily the project seems to have been relinquished, and it is a relief to present members, as no doubt it will be to the many past members who have pleasant memories of the present building, to learn that matters have been satisfactorily arranged, and that after all no change of premises will be necessitated.

BULGARIAN LETTER.

(From Our Own Correspondent.)

Sofia, July 5.

A "Progressive" Demonstration.

Last Monday, the anniversary of the outbreak of the Balkan War between the Allies, the Left, or Russophil party (the "Broad" Socialists, Radicals, and Agrarians), organised a demonstration; and University students, labourers, and a few other citizens formed a procession, which bore Socialist flags draped in black through the streets. In front of the statue of the Russian Tsar Alexander II., and opposite the Sobranje building the crowd halted, and speeches were delivered by students representing the Socialist, Radical, and Agrarian parties, and also by the three leaders of those parties, and deputies in the Sobranje. All the speakers condemned the personal régime and monarchism as responsible for the wars, and especially for that of a year ago.

The Serajevo Tragedy.

The sad news of the dastardly murder of Archduke Franz Ferdinand and his consort at Serajevo was received here with sincere regret, and all the Bulgarian journals with the exception of the ultra-Russophil *Balkanska Tribuna* and the *Zarya* had published articles expressing sympathy with Austria-Hungary and the aged Emperor, and strongly condemning the abominable crime. The King and Dr. Radoslavoff, the Prime Minister, called upon the Austro-Hungarian Minister here, Count Tarnovski, to express their sympathy; and the former telegraphed to the Austrian Emperor, and the latter to Count Berchtold on behalf of the nation and the Government.

The Loan Negotiations.

As one consequence of the murder, the negotiations for the Bulgarian loan, which were on the point of completion last Monday, were suspended for a few days; but on Wednesday they were resumed, and it is understood that the agreement was actually signed yesterday, and that it will be submitted to the Chamber for approval to-morrow. It is further stated that the first instalment of the loan, £4,800,000, has already been forwarded by the lending banks, and is at the Banque de Credit here, ready to be paid over to the Government as soon as the loan is voted by the Sobranje.

Amongst the privileges accorded to the German banks are: the construction of the Haskovo-Portslagos line and the construction of a port at the latter place; the construction of the Dupintza-Gornia Jumaya line and the Galrovo Siolirvo-Soothcha-Plevna line, with 10 per cent. on the capital invested; and a share in the exploitation of the Government's coal mines at Pernik.

Greco-Bulgarian Relations.

The new Greek Minister Plenipotentiary, Mr. Naoum, arrived here yesterday, and called upon Dr. Radoslavoff, who is Foreign Minister *ad interim*, to whom he expressed the desire of the Greek Government for the resumption of friendly relations between the two countries. The same desire has also been expressed by Mr. Passaroff, the Bulgarian Minister to Athens, who arrived in that city yesterday.

A Roumano-Bulgarian Incident.

On the 1st inst. two Roumanian soldiers, accompanied by four Turkish labourers transporting wood, were found by the Bulgarian frontier guard on Bulgarian territory, some 200 metres beyond the frontier. The Bulgarians told them to withdraw, whereupon one of the Roumanians seized a Bulgarian's rifle, and the other Bulgarian promptly raised his rifle and shot him. The second Roumanian, who also raised his rifle, was also fired upon and wounded. Yesterday the Bulgarian Government sent a Note to the Roumanian Government expressing regret for the unfortunate incident, and announcing its readiness to appoint with the Roumanian Government a joint Commission to inquire into the affair and fix responsibility for it.

NOTES FROM ROUMANIA.

(From Our Own Correspondent.)

Bucharest, July 4.

Roumania's Independent Policy.

The rumour regarding a meeting of the Roumanian, Servian, Montenegrin, and Greek monarchs, which originated in Athens, finds neither confirmation nor credence here. Nor is the idea underlying it regarded with any favour in this country, for it is generally considered that such a meeting would in no way strengthen the Peace of Bucharest, while by excluding the ruler of Bulgaria it might create feelings the reverse of peaceful. Moreover, it is most unlikely that Roumania will bind herself in any form of a general Balkan Alliance. She will rather pursue that independent policy which has been so useful and successful of late in maintaining peace amongst her fiery neighbours.

The Serajevo Tragedy.

The news of the assassination of the Archduke Franz Ferdinand and his Consort was received here at first with open scepticism, but when its truth was recognized the doubt turned to very genuine regret and indignation. "That is Servia's work!" was a very general exclamation.

The Archduke was regarded as a sincere sympathizer and friend of the Roumanians of Transylvania, who hoped that great things would take place on his accession. Now those hopes are dashed to the ground, for the late Archduke was the only friend they had in higher circles. Apart from this he was regarded as a good friend to this country, and those who still retain some friendship for Austria regret his death for political reasons, apart from personal considerations. Both Houses adjourned on Monday as a mark of sympathy. The Crown Prince represents King Carol at the funeral, and to-day a requiem service is to be held, at which the King and Queen, the Ministers, and the Diplomatic Corps will be present.

The Sinaia Season.

Sinaia is now filling up. Most of the foreign Legations have moved there, and the King and other members of the Royal family will take up their residence there next week. The Casino is open, the management promises a varied programme of entertainments, and play has commenced most actively. In spite of this—or should we say because of it?—a number of villas remain unlet, which seems to indicate that Bucharest society no longer cares for the place now that it has been converted into an indifferent copy of Baden-Baden and Homburg in the old days. In fact, an unusually large number of Roumanians are going abroad this year, Sinaia and Constantza having lost all attraction for them now that they have become such haunts of the gamblers.

Bucharest, July 5.

A Frontier Incident.

On Wednesday an unfortunate affair occurred on the new Bulgaro-Roumanian frontier, when a party of Roumanian officers and soldiers who, assisted by a number of Turkish workmen, were engaged in marking out the new frontier line, were suddenly fired upon by some Bulgarian soldiers at close range. One Roumanian soldier was killed outright and one severely wounded. The Roumanians were unarmed at the time, being engaged only in surveying and delimiting the frontier. Representations have been made to the Bulgarian Government. According to the Press, this is not an isolated case of the Bulgarian frontier guards using their arms.

Help for Albania.

On Thursday a party of eighty volunteers, under two officers, left for Durazzo. Many of these volunteers are Albanians of the Bucharest colony, which has subscribed a large sum for the equipment and travelling expenses of this party. Another party, numbering nearly 500, is expected to depart in a week or ten days.

NOTES FROM PERSIA.

(From An Occasional Correspondent.)

Ispahan, June 21.

State of the Roads.

For the moment quiet prevails on the Ahwaz-Ispahan road owing to the activity of Sardar Jung, who has proved himself an able administrator. This does not mean, however, that the Kuhgelus are discouraged, or that a repetition of the raiding to which they are so prone will not take place. It means merely that effective repressive or preventive measures have driven them away from the caravan road temporarily: any relaxation of effort will at once cause a recurrence of disorder.

In the Bistagoon district near Ispahan we have trouble of a different nature. There Riza Khan Joozani is in question, and as he is apparently protected, or recognized, by the Russian Consular officials, his case presents political as well as civil difficulty.

The Coronation Postponed.

The Coronation has been postponed from July 21, the date originally fixed, to September 18. The difficulties in connection with the event are perhaps more political than financial. It is hard to conceive of the enthronement of the young Shah without the assembly of the Mejliss, before which the declarations necessitated by the Constitution will have to be made; but the elections are still in the initial stage, and as far as the Province of Azerbaijan is concerned are out of the question. The same may be said, with the same emphasis, of the greater part of Persia within the Russian sphere. We have yet to learn how this constitutional difficulty has been obviated.

The Nizam-es-Sultaneh has actually left Teheran to take up his governorship, and is nearing Sultanabad. Presumably his conditions have been accepted.

"KING'S BIRTHDAY" AT MESHED.

(From Our Own Correspondent.)

Meshed, June 24.

King George's birthday was celebrated by receptions and garden parties in the British Consulate-General on June 22 and 23. The first day was for officials, and the second for merchants. The grounds were in very fine order, and the lawns, trees, and flowers presented a most beautiful appearance. The main entrance and the Consulate building were decorated with the flags of ten nations, and many small flags fluttered over the main avenues. Cosy corners were prepared on the various lawns, and the large reception tent was pitched on the lawn nearest the main entrance, with avenues marked by flowers leading into it. Here the Consul-General and Staff, in full uniform, received the guests, while the Russian Cossack band, stationed on one of the lawns at a little distance, furnished music, and the staff of servants dispensed refreshments. Men only were present. The guests on the first day, numbering a hundred or more, included the Governor-General and suite, Persian officials and grandees, the Russian Colonel and officers, and all the English and foreigners. Everyone seemed in his happiest mood, and the company broke up reluctantly just before dark, on the band playing "God save the King."

The second day was an equally pleasant occasion, with a large company of the merchant classes present. One feature of this day was the reading of a really beautiful original poem by Mirza Hassan Shirazee, entitled "The Birthday of His Majesty George V., King of England and Emperor of India," in which he lauded the glorious reign of the King, whose prosperous dominions extend round the world, bounded on one extreme by the North Pole, and on the other by the South Pole, and whose subjects enjoy peace and quiet and every advantage and blessing.

In choosing of a Turkey carpet there are three main points to be studied: the design, the colouring, and the texture, and all these can be carried out in their entirety by native work; though, of course, numbers of special patterns are sent from Europe, and many copied from ancient carpets from Syria, Persia, and elsewhere. The colouring in former days was entirely from vegetable dyes and of little variety, but now since the introduction of aniline dyes several hundred gradations of colour are available. The texture depends on the fineness of the workmanship and the nature of the wool. The differences in this respect indicate the various qualities—such as Oushak, Koula, Akhissar, Giordis, and so on, which take their name according to the district in which they are manufactured.

LETTERS TO THE EDITOR.

The columns of THE NEAR EAST *are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of* THE NEAR EAST.

Letters intended for publication MUST be accompanied by the writer's full name and address, not necessarily for publication, but as an evidence of good faith. They should be worded as briefly as possible and must be written on one side of the paper only.

THE HAIFA VICE-CONSULATE.

To the Editor of THE NEAR EAST.

SIR,—I think it is imperative in the interests of his Majesty's Government to draw attention to the following facts:—

Last week I repeatedly applied to the British Vice-Consulate here for the attestation of the signatures of two local doctors on a certificate of which I am in great need. I was informed that his Britannic Majesty's representative was absent, and I would have to await his arrival on Tuesday, the 23rd instant. Tuesday came, and the Consul did not arrive. I subsequently applied to the Acting Vice-Consul in charge, and explained to him the necessity of having my affairs completed. I endeavoured, in vain, to persuade him to perform the formality. My arguments were futile. He refused on the ground of his inability to execute the required business in view of his not being authorised to transact affairs of a notarial nature. I wondered what sort of function was he authorised to execute.

Onlookers, who have the interests of his Britannic Majesty's Government at heart, cannot but deplore this state of things as altogether unbecoming to the prestige and dignity of Great Britain. Many complaints, I understand, have been made lately on account of the continual absence of the Consul at this town, and the non-appointment, during his prolonged absences, of a suitable deputy. As things are, much inconvenience may be caused to those who happen to apply to the Vice-Consulate for the execution of some business or other.

I wish it to be understood that I do not make any reflection on the British Vice-Consul himself, who, in his capacity as a non-salaried Consular Officer, is only required to give adequate time to the execution of his Consular functions. His Consular duties are naturally of secondary importance to him.

I understand, by the way, that the British Vice-Consulate at the port of Haifa has no dragoman. I ascertained that, on the other hand, the other foreign Consulates here have, in addition to the salaried dragoman, two honorary ones. An efficient well-paid Consular staff is, therefore, essential at Haifa, and an increase in the personnel at the Consulates elsewhere is desirable.

How long, I wonder, is the British Government going to maintain the hitherto non-salaried Consular post in this flourishing port? Other foreign countries have long ago created salaried Consular Offices here, and have eventually profited greatly. Will not his Majesty's Government realize, after all, the folly of overlooking this point? May I confidently hope that this significant matter will receive the attention of the British Government in the immediate future?—I am, sir, your obedient servant,

INTERESTED ONLOOKER.

Haifa, Palestine, June 25, 1914.

ISLAM AND THE TWENTIETH CENTURY.

To the Editor of THE NEAR EAST.

SIR.—I have read Mr. Biddlecombe's letter dealing with one of my articles on "Islam and the Twentieth Century."

Mr. Biddlecombe has taken "polygamy" as the main subject of his letter, and from this very fact it is apparent that he has read but one of my series of articles. In one of my articles I stated that the Koran does not order polygamy, but allows it—the distinction is important. Even with this permission a caution is given: "Be just to all your wives." To a civilized man living in a civilized country life is so complex, its necessaries are so varied, its phases are so many, that it is next to impossible for justice to be done to a second wife. It is only to persons living on a high social plane that I refer when I say, "I cannot name one man who has more than one wife."

It seems childish to argue that polygamy thrives to a much greater extent amongst educated and civilized people than amongst the semi-barbarian tribes. The evidence of one's eyes is sufficient to disprove it. My friend gives me a list of semi-civilized peoples, and asserts that polygamy has grown to be an institution amongst them. I quite agree. To them more wives means more riches. This fact alone shows the wisdom embodied in those words of the Koran which do not command but only allow polygamy.

With regard to my statement *re* illegitimacy, I do not know if my friend's statement with regard to the cities he mentions is correct. If it is, then surely it is due to the negligence of the Turkish Government. It is through mistakes of this type that foreign prostitutes, drawn from France, Russia, England, Prussia, not to mention many other places, find shelter in Turkey. It is this that is the real source of this illegitimacy, and its source is Europe. Is this Islam's fault? Islam, by limiting society life and ordering women to be womanly, has created a system of prevention in Turkey. In London, on the other hand, it is with shame that we see young girls walking the streets at midnight. Venereal diseases are common in almost any city of importance in Asia Minor. This dread scourge, too, we owe to the prostitutes coming from other countries. Indeed, the very word for it, "feenghee," means "French" or "foreign."

I do not wish to go any further into this none too pleasant subject. I will not do more than refer to the social scandals so common in the high society life of modern Europe.

My critic also asserts that I paint Islam as I should like it to be. I wrote an article some time ago on the reform of Islam, and in it I appealed for a return to the real, the true, and the simple Islam, as founded by Mohammed. The Islamic Empire is ruled by ignorant men and fanatics. Its progress has been stopped. I respectfully advise Mr. Biddlecombe to read "The Spirit of Islam," by the Right Hon. Ameer Ali, and "The Preaching of Islam," by Professor Arnold. These two will help him to look with more sympathy and understanding on the doings of Mohammed's followers.

My friend also talks about the temporary marriages of the Shia sect. By our law such a marriage is not legal. I ask his opinion of that fashionable institution of the civilized Christian world—the mistress.—Yours, etc.,

13, Prince's Square, W. M. SAADI BEY.

To the Editor of THE NEAR EAST.

SIR,—In your issue of April 3, under the title "Islam and the Twentieth Century," I read a letter by Mr. S. H. Biddlecombe, of Ispahan, Persia, who, in controverting Dr. Saadi Bey (with whom I have no communication or acquaintance), puts forward some baseless arguments against Islam, and doubts that Islam is and will be everlastingly a living force for good.

Mr. Biddlecombe's pessimistic and baseless statements concerning the Mohammedan world do not merit contradiction. But, as a Moslem by birth and experience, I maintain against him that the world-wide religion of Islam has from the very beginning been not to the detriment but for the betterment of society—a truth which has been proved over and over again by many great thinkers of different nations during past and present centuries.

Polygamy and bigamy are primitive customs, and were practised ages before Islam, and are practised still by many non-Moslems in all parts of the world. Nevertheless, they are better than promiscuity and prostitution, such as exist in many parts of the Christian world, as I can prove from an intimate knowledge of the social and moral life of many parts of Europe and America. Islam sanctioned polygamy only where it took the place of less civilised marriage customs. A glance at history and evolution will remove a great deal of misunderstanding about Islam. The philosophy of the sacred law of polygamy can easily be grasped, and the necessity cannot be denied for this simple reason: In the struggle for existence, in war and industry, 95 per cent. of the loss of life is amongst men. In my opinion the best antidote to the enlightened habits of prostitution and white slavery is the barbarous custom of polygamy.

Mr. Biddlecombe's statement about "the thousands of prostitutes who throng many of the larger Mohammedan cities" is a gross exaggeration.

If a Moslem, Christian, or Jew misbehaves himself it is not fair to lay the blame on his religion. No recognised religion in existence has permitted wickedness or vice. The defects in the lives of Mohammedan peoples are attributable to the fact that they are not true Moslems. On the other hand, the pressure of capitalists from Christian lands in contributing to the political and economic development of these peoples has forced them to neglect the commands of the Great Prophet, and to some extent to imitate some of the dangerous and evil habits of Christendom, especially those of Paris.

Our Christian friends object to Islam on the ground that it has been spread by the sword. But how does this objection stand in the light of the massacres by Christians—Italians, Bulgarians, Servians, Greeks, French, and Russians—in Tripoli, Thrace, Macedonia, Albania, Morocco, and Persia? Then consider the intolerance and oppression of the Christian Government of Russia, the bombardment of the great golden dome of the most sacred shrine of Ivan Reya, the hanging of Moslem preachers and the Constitutionalists, the annihilation of villages and tribes, the burning of men, women, and children in Azerbaijan.

In conclusion, I would ask Mr. Biddlecombe to allow us to abandon prejudice on both sides, Moslems and Christians alike, and to seek truth for the sake of humanity.—Yours, etc.,

M. S. HOSEYN KHAN.

THE BALKAN COMMITTEE.

At a meeting of the Balkan Committee, held at the House of Commons last week, a manifesto was drawn up stating that in view of the present disturbed relations between the Balkan States the Committee desires to suggest that the Governments of Bulgaria, Greece, Roumania, Servia, Albania, and Montenegro should summon a conference to discuss means whereby the civil and religious disabilities of the alien minorities in their several territories may be diminished by mutual concession, and the conditions of the refugees relieved by generous measures of repatriation with compensation for property abandoned.

The Committee urges that the Great Powers should make a declaration that they will decline to give recognition to the Treaty of Bucharest and the new territorial acquisitions until they are satisfied that real efforts are being made by the Balkan States themselves towards the realization of conditions of justice for all the populations within their dominions. It further urges that the Powers should take steps to vindicate the authority of the Concert of Europe by insisting on the immediate and peaceful transference to Greece of the Ægean Islands assigned to her by the Treaty of London; and, finally, it protests against the ruthless expropriation of Greeks from Asia Minor and Bulgarians from Thrace, and calls upon the Powers to warn the Porte that the inevitable result of the resumption of her old policy of cruelty towards her subject populations will be another war.

NEAR EAST BOOKSHELF.

ART IN ANCIENT EGYPT.*

Probably no living writer is better qualified to deal with Art in Ancient Egypt than is Sir Gaston Maspero, who combines an intimate knowledge of his subject with a lightness of touch that is somewhat rare in the Egyptologist, and who, thanks to his long tenure of the post of Director of the Service of Antiquities in Egypt, enjoyed unique opportunities in regard to the collection of material. What admirable use he has made of these opportunities the really wonderful collection of illustrations suffices to show at once. The value of the accompanying letterpress becomes apparent only upon a closer examination.

To attempt to do justice to the author's views in a short notice such as this would be futile; so would the attempt to criticise them. To do either one would have to write a veritable essay on the subject. Fortunately, however, Sir Gaston's views are generally well known; and though we need not always agree with them, we can always admire the way in which he sets them before us. In this instance he develops his arguments largely by means of his illustrations, which are remarkably well chosen and arranged; and as he never loses sight of the fact that the art of a people and the life of a people are bound up together, the book provides us with a wonderfully vivid picture of life in the Nile Valley in the early days of its civilisaton. We are shown, too, how inseparable were the art and religion of the ancient Egyptians; how the requirements of religion shaped and moulded the art of the nation; and how when the religion passed away the art necessarily passed with it. The Memphite, Theban, and Saite periods are all dealt with in turn—Sir Gaston considers the second as the most vital; the architecture of temple, tomb, and palace is most interestingly discussed; and ample justice is done not only to those minor arts in which the Egyptians admittedly excelled, but also to the sculpture and wall paintings. In short the ground is well covered, and the bibliography which is given at the end of each section will enable the student who wishes to follow the subject still further to do so.

The book is one that every traveller to Egypt who wishes to understand the art that flourished there fifty centuries ago should take with him; while to the less fortunate individual who is unable to visit the land of the Pharaohs in person its wealth of illustrations and its sympathetic letterpress will render it hardly less valuable. The volume is in all respects worthy to take its place with the others of the "Ars Una" series, which is high praise indeed.

NEAR EAST BOOK NOTES.

Messrs. Kegan, Paul, Trench, Trübner and Co. have prepared a catalogue of works on African philology, price 6d., which includes grammars and dictionaries of an immense variety of tongues, among them being Amharic, Berber, Kabyle, Tigrina, Tamachek, and two forms of Ethiopic.

"La Ceramique dans l'Art Musulman," by M. Henri Rivière, has been published in two volumes by the Librarie Centrale des Beaux Arts, Paris. It contains one hundred coloured plates representing specimens of the pottery produced in various parts of the Moslem world. M. Gaston Mignon contributes an introduction. The price is 625 frs.

"The Balkan Wars, 1912—1913." By Mr. J. G. Shurman, has been issued by Humphrey Mulford at 4s. 6d. net.

We have received a selection of the latest batch of the Wayfarers' Library. Anyone who wishes to possess and enjoy at a moderate cost some of the best things in modern English literature will find in this library a never-failing source of delight.

A CARPET DISTRICT IN ASIA MINOR.

BY R. F. L. BAILLY.

Carpet-making is one of the few industries that the Turks can justifiably claim as their own. The peculiar merit attaching to the true Turkey carpet is too well known to need much comment, but probably few of its users can picture to themselves the conditions under which it is manufactured and the striking contrasts presented from its first inception in its native village to its final resting-place in the dwellings of the well-to-do.

Oushak, a town in Asia Minor, 150 miles from the coast, and now reached by railway in some ten hours, is one of the chief centres of the industry. The streets present the usual straggling and indeterminate aspect of the inland Turkish town, but in the houses there are several hundred looms continuously at work. The poor man owns, perhaps, a single loom, worked by his wife and children during the winter months, but comparatively rich men often control a hundred looms or more.

On two or three occasions the writer was the guest of one of the larger proprietors, a rotund old Turkish gentleman, one of the chief local magnates, both of the town and of the carpet industry—in fact, the head of one of the carpet families. His younger brother, one Achmet, was the hereditary dyer of the family—a fact well impressed by the variegated hues of his arms, which underwent chameleon-like changes of colour from day to day, according to the particular dye of the moment.

It may be mentioned here that the dyeing of the wool is practically the only stage in the carpet manufacture in which the male element takes part, the rest of the work being done by women and girls. It is very probable that the stability of the industry in Turkey is due to this fact. The skilled labour, being done in their own homes by women and girls, produces the minimum conditions of cheapness, and as the transport of a finished carpet is a mere fraction of its value, they can be produced at a good profit even in far remote districts.

Looking into almost any house in Oushak, you will find a carpet in some stage of progress. One enters, perhaps, a mud hovel some 20 ft. by 15 ft., with a bare mud floor, a piece of tile acting as a charcoal brazier, a baby or two slung in a hammock made of an old sack, a few pots and pans, and then the loom, on which is slowly evolving a magnificent carpet to adorn a palace. The loom itself is a rough frame of wood, a log above and a log behind, the stretched interlacing strings forming the skeleton of the carpet.

Seated on the floor, some five to ten little girls are hard at work, tying innumerable knots, cutting the wool for each knot from overhanging balls of coloured wool. Each little girl has her allotted space of some two feet, and as each row of knots is completed it is patted and pushed down by a wooden comb, the teeth of which fit between the strings. A very good worker can do two square feet a day, depending, of course, on the fineness of the texture. The knot-tying is carried on with incredible rapidity, and little dabs and dots of colour appear as if put on with the slow movement of a paint brush. It is wonderful to see the design gradually creeping up from this chaos of knots. A woman superintendent overlooks the whole, very often keeping the design in her mind entirely from memory, though for the more complicated carpets a coloured picture of the design, or merely one corner of it, is hung up for reference. To the European eye the surroundings look comfortless, yet all the workers seem very happy, and chatter gaily.

NEAR EAST IN PARLIAMENT.

HOUSE OF LORDS.

Albanian Situation. July 6.

Lord Lamington asked his Majesty's Government whether, in view of the declaration made by Sir Edward Grey last week that no more British troops would be landed in Albania, he would state what steps would be taken to safeguard the independence of that country—an independence which we were so largely instrumental in setting up—and whether he could state what was the present position of Colonel Phillips.

Viscount Morley: I would most willingly give the noble lord all the information that he would like to have if it were possible, but I am sure he is well acquainted with the complexity of the matter which he has approached in his question. It involves both a very important and vital Cabinet question, and also, what is even more important, a great and complex international question. As to Colonel Phillips, he is, by the choice of the Powers, in command of the International Force in Skutari. The question of the extension of his authority over a larger area than he now controls is clearly a question involving a great number of international considerations. It might mean a large increase of the force now there composed of detachments of, I think, all the Great Powers except Russia. Any step taken in regard to the extension of the area controlled by Colonel Phillips would be very serious. Sir Edward Grey laid down the whole position no farther back than last Monday. The thing is to be summed up in a sentence: British interests in Albania are not of a nature to warrant anything like a special British initiative. All fears as to British lives not being safe are guarded against by the presence of one of his Majesty's ships at Durazzo.

HOUSE OF COMMONS.

Naval Mission to Greece. July 3.

Mr. Molteno asked the First Lord of the Admiralty the names, numbers, and ranks of the naval officers constituting the mission which was sent to Greece.

Mr. Churchill: The information asked for is as follows:—Officers lent to Greece: Rear-Admiral Mark E. F. Kerr; Commanders H. S. Cardale, R. G. H. Henderson, A. L. Strange, G. P. Leith, R. C. Hamilton, G. A. Wells; Lieut.-Commander (as Acting-Commander) S. J. Meyrick, Lieut. H. D. Gill, Acting-Lieut. R.N.R. (Royal Flying Corps) C. P. Pizey, Engineer-Captain (retired) J. H. Watson, Engineer-Lieut. G. W. Cannan, Assistant-Paymaster A. C. Winter, Gunner F. J. Moon, Gunner (T) G. Prince; also a constructor and a naval store officer.

Officers Lent to Turkey.

Answering a similar question about Turkey, Mr. Churchill said that the following officers had been lent to Turkey:—Rear-Admiral A. H. Limpus; Lieuts. F. Elliott, G. W. Hallifax; Commander (retired) Arthur Truscott; Commander A. L. Ashby (relief appointed); Engineer-Lieuts. G. W. Le Page, G. Moore; Staff Paymaster A. E. Stack; Naval Instructor H. H. Holland. Additional retired officers had also been lent as follows:—Captain E. H. Edwards; Lieuts. V. Marryat, W. P. Koe, H. Finch-Dawson (to replace Commander Ashby), E. L. B. Boothby.

Trans-Persian Railway. July 7.

Colonel Yate asked the Secretary for Foreign Affairs whether, considering that the main object of the proposed Trans-Persian Railway was to secure through overland communication between Europe and India, the option which his Majesty's Government were considering for a line of railways in Persia, connecting with the Russian railways in the north and ending in Persian territory at or near the sea in the south, would provide for this line being commenced simultaneously at both ends; and whether the construction from the south end northwards would be carried out on an Indian gauge and the construction from the north end southwards on a Russian gauge, so that when the question of linking with Indian railways came up for consideration there would be no difficulty in providing that Indian goods should have the same facilities of entry into Persia from the south without break of gauge that Russian goods would have in the north, and thus of securing equality of treatment for the commerce of both countries.

Sir E. Grey: It is our desire that construction should begin simultaneously at both ends, but we cannot prevent railways from being begun in the sphere of Russian interest, or stipulate that none should be begun there before British capital is prepared to make railways from the south. As regards break of gauge, the question was considered with the Indian Government, and for strategic reasons it was held that there should be a break of gauge when this railway entered the sphere of British interest, but for commercial reasons we have not stipulated that there should necessarily be a break of gauge in any railway connecting the North of Persia with the coast, so that Indian goods landed at a port could be carried into any part of Persia without break of gauge.

Mr. Morrell: When is it proposed to begin the work on this railway, or is the project actually under consideration?

Sir E. Grey: It is in just the same state as I explained the other day. What is under consideration now is whether the option shall be applied for which will enable surveys to be made for the making of the railway, but the question of whether the railway could be begun has not been settled. The other conditions will be agreed to subsequent to the option.

Colonel Yate: Is it finally settled, then, that goods coming up from India by the railway are not to have entry into the neutral sphere of Persia without break of gauge?

Sir E. Grey: No. I said that if they enter at a port outside, on the edge of the sphere of British interest, they would be able to come into Persia from south to north without break of gauge.

Colonel Yate: But those entering by the railway would not be able to——

Sir E. Grey: The hon. and gallant gentleman is raising very hypothetical questions. If the railway was subsequently continued to make a junction with the Indian railway, as at present laid down, the condition of the Indian Government is that there should be a break of gauge when it enters the British sphere.

Anglo-Persian Oil Scheme.

On the report stage of the resolution authorising the acquisition of capital in the Anglo-Persian Oil Company, Mr. Gretton criticised the Government policy, and complained that the First Lord of the Admiralty had never told the House at what price he would have been forced to buy oil in consequence of the operation of the trusts. The whole matter was covered in a veil of impenetrable secrecy, which was contrary to the traditions of the House.

Mr. G. Lloyd said they had never had an answer to the question as to whether the Indian Government had been consulted, and he wanted to know whether the War Office had been consulted before the contract was concluded, and whether the Board of Admiralty were unanimous in regard to the oil contract.

Mr. Churchill: The Board of Admiralty were and are unanimous that this contract is of paramount importance.

Other members having spoken, Mr. Churchill said he felt he could not, by answering all the questions that had been put to him, present the argument for the Anglo-Persian contract in any manner which would do justice to the subject equal to that contained in the argument in which he originally submitted it to the House. If any of the objections that had been raised were accepted by the House unquestionably they ought to drop the whole business, but he did not believe they would drop a proposal offering prospects so promising and assured. He had been asked why he did not disclose the price that they had paid and were paying under other contracts. It had been the custom approved for many years that Admiralty contracts should not be made public. There was no secret as between the Minister and Parliament, but as between Parliament and the interests of the public service. Granting all the disadvantages that had been urged, although they were absurdly exaggerated, where else than in Persia could they find an alternative source of supply at the present time? There was no other area of supply which offered advantages comparable with those existing in Persia. Our forces in the Mediterranean were being strengthened, for we should have before long a squadron of eight battleships there, and there was no reason for supposing that we should be confronted in the Mediterranean alone. But if necessary the Cape route could be used, and this would only mean two more cargoes in transit.

On the House dividing the report was agreed to by 228 to 48.

Greco-Turkish Relations. July 7.

Sir J. D. Rees asked if the Secretary of State for Foreign Affairs had received any representations from the London All-India Moslem League concerning his action with regard to the present attitude of Greece towards Turkey; and, if so, what answer had been returned to such communications.

Mr. F. D. Acland said that Sir Edward Grey had received such a communication. The Committee of the League would no doubt inform the hon. member of the terms of his reply if they thought fit.

The Turco-Persian Frontier.

Sir J. D. Rees asked the Secretary of State for Foreign Affairs if he would state what are the provisions of the Anglo-Turkish Agreement of November, 1913.

Mr. Acland: I presume the hon. member refers to the protocol respecting the Turco-Persian frontier which was signed at Constantinople last November by the British, Russian, and Persian Ambassadors and by the Grand Vizier of Turkey. I propose to lay this document with the other Agreements which have recently been under negotiation between Great Britain and Turkey and Great Britain and Germany in regard to various questions concerning Asiatic Turkey and the Persian Gulf as soon as I can. It is undesirable to lay any of these documents separately. I understand this is also the view of the Turkish Government with regard to publication.

The Situation at Muskat.

Sir George Scott Robertson asked the Under Secretary of State for India whether he could say what was the present position of affairs at Muskat? Had the fighting ceased? Had the rebels been defeated effectually? Had any of his Majesty's ships been actively engaged recently, or had any of his Majesty's Indian military forces been engaged at all up to date?

Mr. C. H. Roberts replied that there had been little change in the situation at Muskat. It would not be correct to say that the rebels had sustained effective defeat. None of his Majesty's ships had been actively engaged since the incidents of May 21. British Indian troops had not been engaged.

Kasr-i-Shirin.

Sir J. D. Rees asked the Foreign Secretary whether the Persian Government had acquiesced in the award of Kasr-i-Shirin, or the Chiasurkh district, to Turkey.

Sir Edward Grey: Kasr-i-Shirin has not been awarded to Turkey; as regards Chiasurkh the answer is in the affirmative.

Armenia's High Commissioners. July 8.

Mr. Aneurin Williams asked whether Messrs. Westenenk and Hof had now taken up their duties as High Commissioners in Armenia; and what were the powers conferred on those gentlemen by the Porte.

Mr. Acland: According to my latest information the gentlemen in question have arrived in Constantinople, and will shortly take up their appointments. I cannot say whether they have yet proceeded to the scene of their duties. I am unable to make any communication with regard to their powers beyond that they will have control of justice, police and gendarmerie, as I have not yet received the official intimation from the Turkish Government.

TANGIER TO TEHERAN.

Our Cairo Correspondent's reference this week to the latent rumours concerning Lord Hardinge's tenure of office as Viceroy of India, in connection with *Al Mokattam's* publication of a statement made in *The Daily Mail* on that subject, is a reminder that people have come to regard Lord Kitchener as the only possible successor to the present Viceroy. If, however, we are to accept current reports, a surprise may be in store when Lord Hardinge leaves India. For some time there has been a persistent rumour to the effect that Mr. Asquith would not look askance at the reversion of the office were he offered it, and though the Premier is, perhaps, one of the last people in the world that a speculative public would associate with the Viceroyalty, he is, at any rate, in a position to make his desire effective, and, if he really does wish to go to India, there is no obstacle in his way.

***

Some of the reports of the "demonstration" that took place in Sofia on the anniversary of the outbreak of war between Bulgaria and her former allies appear to have been very much exaggerated. In fact, many of them show inventiveness unusual even in regard to "news" of the Balkans. As a matter of fact, I am informed by a trustworthy correspondent, the demonstration was an insignificant kind of affair, noteworthy chiefly because the principal orators, taking full advantage of the immunity assured to them by their position as deputies, delivered speeches of extraordinary violence. These oratorical efforts, however, appear to have defeated their object by their very lack of restraint; and the crowd of sightseers who gathered round the small body of actual demonstrators refused to take the whole affair seriously at any price. In these circumstances the rumour, boldly launched from one quarter, that Tsar Ferdinand was so impressed by the demonstration that he was thinking of abdicating in favour of Prince Boris, was, to say the least, rather ridiculous.

***

I gather from a correspondent that the improvement in the treatment of Greeks in the Anatolian coast lands is less real than the friends of peace in the Ægean would wish. Up-country Greeks and members of isolated communities are still exposed to treatment which leaves them only a Hobson's choice between extermination and expulsion. My informant expresses his opinion that the expulsion of the Greek population of Turkey has been decided upon, an opinion which, I may say, is widely shared by resident observers and by many who have abundant opportunities of being well-informed. The Turk appears to have weighed the danger of tolerating in his own dominions the presence of two million Greeks who are incited against his rule by the propagandists of Hellenism and the preachers of the Great Idea, and that of depriving himself of the greater part of the commercial classes and most important taxpayers in his country. That he should have chosen the latter as the minor peril shows either that Hellenism is regarded as a very real menace by the Ottoman, or that he has not read aright the lessons of Roman history to be drawn from the parable of the Belly and the Members. Or perhaps he expects the Armenian to take the place of the Greek and so put an end to collections for the Hellenic Navy among Ottoman but Greek-spirited subjects.

***

On July 13, 1878, the deliberations of the Berlin Congress on the Eastern Question came to an end, and the Treaty of Berlin was signed by the plenipotentiaries of Great Britain, Germany, Austria, France, Russia, and Turkey. By Article XXXIV. of the Treaty the independence of Servia was formally recognised by the Powers. Monday next will be the thirty-sixth anniversary of the establishment of Servian independence under the sanction of international law. The Padishah, whose writ had long ceased to run in what had once been the pashalik of Belgrade, whose *de facto* sovereignty there was a thing of the past, now surrendered his *de jure* overlordship. After four hundred years of subjection to an alien yoke, the Servian nation could again call itself free in face of the world. On the following August 22, Prince (afterwards King) Milan proclaimed the independence of his principality in Belgrade. Since then the annals of Servia have been too often stained with blood. But well-wishers of the country may be permitted to hope that the wild-cat crop of picturesque tragedies has been gathered in, and that a worthier harvest may be reaped from the good seed which has been and is being sown.

***

The Berlin correspondent of *The Times* announced a few days ago that the German Orient Society has published a report on the excavations it has been carrying out at Assur—which is to-day Kalat Sherghat. He added that "the most interesting finds were a temple of Astarte, which the archæologists ascribe to the end of the fourth millenium B.C., and five sarcophagi of the Assyrian kings, apparently the first ever discovered in Babylonia." Of course, Assur is in Assyria, not Babylonia; but that is a detail. The main point is that the Germans, who have been at work on the mounds of Kalat Sherghat ever since the beginning of the century, have made a remarkable haul, to which their patience and perseverance well entitle them. The site is a large one. Layard, who dug there for a short time, describes the principal mound as "one of the largest ruins with which I am acquainted in Assyria," and gives its height above plain level as nearly 100 ft., and its circumference as 4,685 yards. It was from this site that he obtained the black basalt statue of Shalmaneser II., which is now in the Nimrod Central Saloon of the British Museum; and on leaving the work he wrote: "I have little doubt . . . that many objects of interest . . . exist in the mound." It has been left for the patient, plodding Teuton to prove the correctness of this opinion.

***

Of course, Layard was in no wise to blame for the abandonment of the site; for, as he wrote, he "renounced the further examination of these ruins with regret." His work in Assyria and Babylonia was that of the pioneer; and in that capacity he and the other English excavators and explorers accomplished great things, as the German archæologists, who have reaped where they sowed, are ever ready to acknowledge most generously. But it hardly redounds to our credit as a nation that we have left this field of scientific research so much alone as we have done during the past fifty or sixty years. It is, of course, primarily a matter of financial support: we have plenty of good men capable of excavating any site creditably; but the funds to keep them in the field are not forthcoming. All the money we can afford for excavating—and it is little enough—seems to go to Egypt, the Sudan, Athens, and Rome. I should like to see Babylonia and South Persia receive attention.

***

Having now had an opportunity of reading the complete text of the amazing statement made by Mr. Williams, the American Minister to Greece and Montenegro, regarding Albania, I am not at all surprised to learn that his country shows no reluctance to lose Mr. Williams's services as its diplomatic representative. Quite frankly, I consider that his statement (I refer to his first indiscretion) does credit to his heart, but diplomatists are usually supposed to possess heads as well as hearts, are they not? With a good many of his criticisms I am in entire agreement; but really Mr. Williams ought to have remembered that on subjects so sacrosanct as the European Concert and the ways of European Diplomacy no mere man should venture to express any opinion at all. Moreover, the famous statement appears to me to contain not only many glaring examples of bad taste, but also a good many inaccuracies. For instance, when he says: "Prince Wied has no more right than I have in Albania," Mr. Williams forgets that the Prince went there by invitation of the Albanians, while he himself appears to have gone by invitation of—Mr. Williams.

***

In a letter to *The Westminster Gazette*, a correspondent tells how the late Mr. Chamberlain, "after the failure of the Round Table Conference . . . . spent a winter in Egypt"; and how, breaking his homeward journey in Paris, he remarked to the then British Ambassador, the late Lord Lytton, "I have come back from Egypt a 'Jingo.'" The correspondent adds:—

> Of course, as a member of Mr. Gladstone's second Administration, Mr. Chamberlain did not like our having to occupy Egypt, and after the occupation was, to use his own words, "forced upon us," he "looked forward to an early, it might be even an immediate, evacuation.
>
> What he saw, during his stay in Egypt, of the reforms already effected by British officials under the inspiring direction of Lord Cromer (then Sir Evelyn Baring) caused Mr. Chamberlain to completely change his mind regarding the extended occupation, and possibly this was also the beginning of his career as an Imperialist.

Be that as it may, it is certain that Mr. Chamberlain took a strong interest in Egypt, and I well remember a story concerning him that was told me by a well-known Egyptologist. This was to the effect that when Mr. Chamberlain was leaving Egypt, an Egyptian notable went on board the steamer to bid him "Good-bye"; and the famous statesman, who had seen much of the Egyptian referred to during his stay in the country, said quite frankly: "Good-bye, sir, I hope we shall soon have the pleasure of seeing you at Westminster as one of the Egyptian members in an Imperial Parliament." A bold saying, but typical, I think, of the man.

OF PRIESTS AND PATRIARCHS.

By H. C. LUKACH.

Of the factors which govern the life of peoples in the Turkish Empire and its lost provinces the religious is admittedly one of the most vital. The native inhabitants of European Turkey are not classified by race for administrative purposes; they are divided into *millets* or "nations," which rest on a basis religious rather than racial. Moslems, of whatever race they may be, compose the *millet* of Islam; the Christian subjects of the Porte form separate *millets*, according as they acknowledge the Patriarch of Constantinople, the Pope, the Bulgarian Exarch, the Armenian Katholikos, or the Protestant Vekil as their ecclesiastical superior. As a result of this system, and of the fact that to each *millet* a measure of autonomy is given, the Churches in Turkey are not only spiritual refuges, but the rallying grounds of national aspirations; the head of a Church is not only a spiritual chief, he is also a political ethnarch. It is thus immaterial that the ethnologist in the Balkans is not infrequently baffled; his place is taken by the prelates and clergy, who influence the results of the religious census. The ubiquity of the Eastern ecclesiastic, and his varied activities, render a study of his habits and foibles both instructive and diverting; it is a field which offers a profitable return to the observer. In the matter of erudition, for example, the greatest contrasts may be observed among the Orthodox clergy. There are monks in Mount Athos who are men of the world, zealous students of the financial Press which guides them in the Stock Exchange operations to which they are addicted. On the other hand, I have known Abbots in various parts of the Levant whose signatures consist of the imprint of the abbatial thumb, smeared with ink, the all-saintly-and-erudite ones being strangers to the arts of reading and writing. One Abbot in particular, who died about eight years ago, was unable so much as to say his prayers, but employed a sort of whipping-boy for the purpose. The Abbot sat in his chair, the boy stood beside him and spouted the prayers, and the Abbot's vicarious devoutness was universally pronounced to be edifying and satisfactory. His brother and successor, the present Abbot, is, however, a man of some culture, having once been a schoolmaster; he makes, moreover, a most excellent liqueur, so that he is in all respects a pillar of the Church. His only peculiarity is a failure to apprehend the functions of a mosquito-net. In winter, when there are no mosquitoes about, the holy man puts down his net and sleeps inside it for warmth; in the hot weather, when the mosquitoes begin to swarm, the net is removed.

If we find simplicity in signatures exemplified in the Abbot's thumb, so do we find the converse in the official signatures of Orthodox Patriarchs. These are indeed fearful and wonderful things, requiring close on half an hour to be completed; and when they are achieved I defy anybody to decipher their subtle and tortuous sinuosities. What they would become were Patriarchs to subscribe their full titles is indeed difficult to contemplate, for the titles of Patriarchs outrun in length and sonority those of the mightiest of kings. Thus, His Beatitude of Alexandria is known as "The Most Blessed and Holy Pope and Patriarch of the Great City Alexandria, and of all Egypt, Pentapolis, Libya, and Ethiopia; Father of Fathers, Pastor of Pastors, Archpriest of Archpriests, Thirteenth Apostle and Oecumenical Judge"; he of Antioch as "The Most Blessed and Holy Patriarch of the Divine City Antioch, Syria, Arabia, Cilicia, Iberia, Mesopotamia, and All the East, Father of Fathers and Pastor of Pastors"; while the Coptic Patriarch rejoices in the designation of "The Patriarch of Egypt, Jerusalem, the Holy City, Nubia, Abyssinia, the Five Western Cities and all the Preaching of St. Mark." The Oecumenical Patriarch goes one better. He is the only Eastern prelate entitled to be called "The Most Entirely Holy"; but this has not prevented the holders of that office from suffering, in the course of history, from a distressing absence of security of tenure. In a recently published catalogue of the Patriarchs of Constantinople[1] we find the following remarkable statistics. Of 328 vacancies between A.D. 36 and 1884:—

One hundred and forty were by deposition, forty-one by resignation, three Patriarchs were poisoned, two murdered, one beheaded, one blinded, one drowned, one hanged, one strangled; so that only 137 closed their term of office by a natural death. In the circumstances it is surprising to read that one Patriarch, Kallinikos III., died of joy on hearing of his election in 1726. The frequency with which deposition is resorted to is, in fact, the predominant characteristic of the Patriarchate of Constantinople. Many Patriarchs have had two, three, four, and five reigns; one, the celebrated Cyril Lucar, had as many as six. The result is that there are almost always a number of ex-Patriarchs of Constantinople languishing in exile, intriguing for their restoration and for the removal of their supplanters, and hoping for better times. Their usual resort is now some monastery of Mount Athos; in former times it was the island of Prinkipo, where their number was such that they found it necessary to build a large, commodious house, adorned with spacious gardens, for themselves and their successors; in other words, a residential club for deposed Oecumenical Patriarchs. But singular as have been the vicissitudes which have befallen Patriarchs, only one such prelate, I believe, has had the strange experience of being enrolled as a Janissary. The episode occurred in the latter half of the eighteenth century, in the reign of Sultan Ahmed IV., in the following circumstances:—

The Armenian Patriarch, who resided at Constantinople during the late war (*sc.*, with Russia), having created a suspicion, by some expressions in his sermons, that he was a Roman Catholic at heart, the Armenians complained to the Grand Vizier, and obtained an order to send him to the galleys; but the Patriarch, being apprized of his danger, immediately sent for a colonel of the Janissaries, to whom he made known his situation, and prayed to be enlisted into his company, which was accordingly done the same day, and he invited the colonel, with the rest of the officers of his regiment, to dine with him at his house the next day, which happened to be Sunday. He officiated as usual, and upon coming out of the church he found one party of Janissaries ready to conduct him to the galleys and another to protect him, but the former instantly retired upon hearing from the latter that the prelate was a *Yengi-cheri*, a new Janissary, and their officers joined the company at dinner, where they were all very merry at the expense of the Grand Vizier, whose order to arrest the Patriarch was the subject of ridicule.

In view of the fact that the higher clergy of Eastern churches are recruited almost exclusively from the ranks of the monks, there is a marked difference in many respects between the regular and the secular clergy. While a few persons may enter monasteries in order to retire from the world, the majority of the monks are eager and ambitious spirits, whose aim is precisely the reverse. But the village *papas*, who must be married, and is thereby deprived of the hope of promotion unless he should chance to become a widower, is a rude and unpretentious person, principally occupied in seeking to supplement his meagre pittance for the support of his numerous brood. No task, however menial, is beneath his dignity; indiscriminately he ploughs and preaches, celebrates the liturgy, and tills his field. In a village I know of the priest darns the linen which his wife, who is a laundress, washes; in another village, in the Cyprus mountains, I have seen a priest, with his ragged cassock tucked in his baggy blue breeches, and with his high black cap, working as a labourer in an asbestos mine. In his leisure hours the *papas* sits in the coffee shop with his fellow-villagers and smokes his hubble-bubble; he makes no claim to be treated with especial deference in virtue of his priestly office, either by his flock or by anyone else. It will, therefore, be readily understood that no resentment was evoked whenever the document which I quote below was received; it was the form for burial permits for Christians, issued by the Muftis in Turkey from 1695 to 1808:—

"You old priest of evil basis! Wearer of the tar-coloured garment, bearer of the mitre of Satan,[2] and deprived of access toi the Throne of Grace.

"It is reported that infidel ——, son of infidel ——, one of your abominable lot of disbelievers, has become *mürd*,[3] and although his abominable carcass is denied reception even by the soil, yet what remedy, what remedy, what remedy?[4]

"In order that the noxious stench of it should be done away with, you are to take the corpse outside the town, dig up a ditch, and then cast it thereinto, cover it up with earth, trample, beat it down, and come back, you old priest!"

(1) C. D. Cobham. "The Patriarchs of Constantinople." Cambridge, 1911

(2) *i.e.*, the cassock and priest's cap.

(3) *Mürd olmaq* is a contemptuous phrase in Turkish, meaning "to die," which is applied only to Christians. It corresponds more or less to the French word *crever*.

(4) *i.e.*, what remedy is there for the evil?

THE PRESS ON THE NEAR EAST.

Russian Encroachment in Persia.

We quote below from a vigorously phrased note on the Persian problem, which appears in *The Nation* (July 4):—

Persia has never had her chance, and that chance she will never have unless this Russian policy of encroachment is reversed. It has gone far, and the worst aspect of the case is that the Persians themselves have become demoralised. We have always thought that her national existence could have been saved before the expulsion of Mr. Shuster, if, instead of aiding and even proposing his dismissal, our diplomacy had been willing, at need, to check Russian aggression by some effective but pacific step, such as the stoppage of the streams of capital by which our finance is assisting Russia's internal development. For Russia, money is a necessity, and Persia is only a luxury. We should welcome even now a firmer tone and a strong effort to save Persian independence from the wreck. But this would mean a complete reversal, under British pressure, of a policy which Russia has steadily pursued for many years, and it would require a longer spoon than Downing Street has used for a decade.

The Dual Monarchy and Servia.

A leading article in *The Morning Post* (July 6), under the heading "Austria and Servia," discusses the bearing which the tragedy of Serajavo has on the relations of the Dual Monarchy and Servia. We quote below:—

It would be rash to pretend to know what the statesmen who surround the Emperor think. They are, at any rate, well aware that a policy of expansion would involve serious risks. It would arouse strong dislike in Russia, and, if the Russian Government were disposed to take action, would conjure up that European war which statesmen have everywhere made sacrifices to avoid. It would overthrow the whole of the recent settlement in the Balkans. It would hardly be found acceptable by Italy except upon terms which have been supposed to be most repugnant to Austro-Hungarian statesmen. For an advance of Austrian forces into Servia would hardly be watched in inaction by Italy, which would expect then to establish herself in part of Albania. Thus it might seem that an Austro-Hungarian attack upon Servia was an adventure fraught with great peril both to the Dual Monarchy and to the peace of Europe. The impression was that the Emperor refused to permit it on more than one recent occasion when troops were mobilised and great expense incurred, and that Count Berchtold thought it contrary to the best interests of the Monarchy. On these previous occasions there were in the Press of Vienna and Budapest violent articles directed against Servia, and the infamous Agram trial was regarded as an attempt to create a case against Servia in the event of a war against that country being undertaken. The charges now made against Servia suggest that there is to be a repetition of the attempt to bring on the war that has been, as it seemed wisely, postponed. It is to be hoped that this interpretation of symptoms will not be justified by events.

Goldsmiths of Old Egypt.

In the course of an article ("The Power of the Past") which he contributes to *The Daily News* (July 3) Professor Flinders Petrie pays the following tribute to the goldsmiths of ancient Egypt:—

Now and again some striking example comes to light of the marvellous work that has been done thousands of years ago, and compels us to see how the taste to devise and the ability to execute has been quite as good in those remote times as it has ever been since. The jewellery which London is now admiring at University College shows that 5,000 years ago the art of the goldsmith was as delicate and as perfect as it has been at any later time. The gold is joined with a minuteness and finish which cannot be exceeded; the art of gold-soldering was already perfect, and it had been perfect even 2,000 years earlier, at the very beginning of all written history. The smooth fitting of long sliders proves how true and precise was the construction and how clean the handling of the work. The cutting of hundreds of minute pieces of inlay of hard stones needed the greatest skill; so small are they that they can only be handled now by lifting them clinging to a wetted needle. The drilling of long thread-holes through hard cornelian and other stone beads requires long patience and care; rarely is a crooked hole found. Another art, which is usually credited to a much later age, was also fully known—that of making patterns by minute globules of gold soldered on a plate. So delicate were these that eighty tiny pellets go to a single inch, yet they were attached with faultless regularity to form a design. A modern master goldsmith could not say how this could have been done on a cylindrical surface.

An Armenian Original.

"Evelyn Westwood" contributes to *The Morning Post* an amusing character sketch, under the heading "Krikor's Progress," which purports to be the veracious and eventful history of "my servant Krikor," an Armenian peasant. Being, "one fine day, convinced of the limitations of the village of Divrik in the Vilayet of Sivas as a sphere for his budding activities, and fired, no doubt, by the natural desire of youth to see something of the world, he set out and proceeded to Chamurkeuy." His sojourn there was rudely disturbed by the "Chamurkeuy massacres of evil memory" from which he barely escaped with his life. Unhappily:—

Grand Cairo had a demoralising effect. Evil ways were learnt from Berberine fellow-servants, and, feeling his booted feet at last on soil free from the dominion of the Terrible Turk, he relaxed much of his mediæval subservience. He began by abandoning the picturesque practice of retreating backwards from my presence, increased my misgiving by having the audacity to suggest a rise in wages, and put the culminating touch to his iniquities in the unthinkable shape of a cap—a greasy, shabby, disreputable English cap of the coster persuasion—in which I surprised him parading offensively in the Opera Square at the third hour of the day. We have now happily emerged from the contaminating atmosphere of Cairo, and Krikor, his wild oats duly sown, has resumed the hated fez, and settled down into the semblance of a semi-respectable—though always seedy-looking—member of society. Wars and rumours of wars divert his thoughts from the village of Divrik, and an educational visit to the Cinema Pathé, where Red Indians, in all their blood-curdling reality, were displayed for the first time before his dazzled eyes, has for the present driven from his head all idea of seeking fortune in a continent inhabited by beings ten times more unspeakable than mere Bashi-Bazouks.

In spite of his seedy appearance, his ignorance of the uses of soap, his horde of unpleasant relations, and his lack of the "European conception of a moral sense," Krikor has his good points as a gentleman's body-servant:—

Krikor is typical of his race. He is willing and industrious, absolutely noiseless in his movements (on account of his rooted objection to the boot habit), never utters a complaint, and—except in the matter of hard cash—strictly moderate in his appetites. With other primitive uses he has long discarded that of the old stocking, and now banks with the Crédit Foncier. He keeps his old mother and at least one sister-in-law in the Back-of-Beyond, has emigrated three kinsmen to America, and will doubtless die the possessor of a row of villa residences in the suburbs of Divrik. Some day, I suppose, he will realise that Red Indians are a fast dying race, only good for frightening naughty Armenians at cinematograph shows, and, fortified with pickings from my language and wardrobe, set his sails for one or other of the two continents which he has not yet visited.

"Spanish Jews in Turkey."

The Times' Spanish Supplement (June 29) contained a very interesting article on "Spanish Jews in Turkey," by Mr. S. P. Cockerell. Thousands of the Jews who were expelled from Spain in 1492 by Ferdinand and Isabella, found refuge within the Turkish Empire—in Constantinople, Salonika, Cairo, and Barbary. As to those who found their way to Constantinople:—

They were given settlements on the Golden Horn, at Hasskeui, and Balat, and there the great Jewish colonies of Constantinople are still established. At Hasskeui there are to be found to-day 20,000 Spanish Jews still clinging to their religion and to the language which their forefathers brought along with them from Spain. There are no buildings of antiquity or historical interest in Hasskeui, except the Synagogue de la Señora, which some attribute to Doña Gracia Mendez—that great Jewish Señora from Spain, whose nephew, Don Joseph Nasi, was to rise to be Duke of Naxos under the Sultan Selim I. The main street, if such it can be called, is full of booths and crowded with men; few women are to be seen. Fruits of all kinds, melons, pomegranates, tomatoes, pistachios, and apples mingle their colour in the bright scene of red fezzes, mellowed tatters, and the gilding of the Eastern sun, and the baker tempts the passer-by with "roscas" and "buñuelos" piled up on trays outside his shop. There are 20,000 Jews, too, in the district of Balat, and another 30,000 are scattered in the districts of Kuskundjuk, Haidar Pasha, and Kuru Cheshme, which are included in the wide area known as Constantinople.

There are also 90,000 Jews at Salonika, the most interesting of whom are the Moslem Jews or Dunmehs. There are three sects, of whom the writer says:—

These three curious sects are mistrusted by true Musulman and true Jew alike, because to the former they appear only half Musulman, and the latter only half Jew. They have nevertheless survived, and the "Dunmehs" still number 10,000 souls, of whom 6,000 reside in Salonika. They reckon among their number Djavid Bey, the present Turkish Minister of Finance. They live beneath a shroud of mystery. Though in the seclusion of their homes they may still talk Spanish, in public they feign not to understand it; though they preserve their Spanish family names, they hide them; their women veil, their windows are latticed; they sometimes go to the Mosque, and are indeed officially regarded as Musulmans.

CALENDAR OF THE WEEK.

Showing Concordance of the Gregorian, Julian, Moslem, and Jewish dates.

Gregorian. New style.	Julian. Old style.	—	Moslem.	Jewish.
1914. July.	1914. June.		1332. Shaban	5674 Tamuz
10	27	Friday	16	16
11	28	Saturday.....	17	17
12	29	Sunday	18	18
13	30	Monday	19	19
	July.			
14	1	Tuesday	20	20
15	2	Wednesday	21	21
16	3	Thursday	22	22

To-day, Shaban 16, is the birthday of the ex-Sultan Abdul Hamid.

Sunday is the birthday of his Majesty the King of Servia.

Sunday is the birthday of H.R.H. Prince John.

Tuesday is the birthday of H.R.H. Prince Adalbert of Prussia, nephew of the Queen of the Hellenes.

Monday is the birthday of Princess Louise of Battenburg, sister of Princess Andrew of Greece.

To-day is the birthday of H.H. Princess Aminah Hanum, the eldest daughter of the Khedive.

Monday, Shaban 19, will be the anniversary of a triple wedding in the Ottoman Imperial Family. On that day in 1306 (April 20, 1889), T.I.H. Zekie Sultana, daughter of the then Sultan Abdul Hamid, Saliha Sultana and Nazime Sultana, sisters of the Heir Apparent, were married respectively to Damad Nur-ed-Din Pasha, Damad Ahmed Pasha, and Damad Khalid Pasha, son of Marshal Dervish Pasha.

Tuesday will be the anniversary of the reception of H.H. the Duchess Jutta of Mecklenburg-Strelitz into the Orthodox Church in 1899, just before her marriage under her new name of Militza to the Crown Prince of Montenegro.

Wednesday will be the anniversary of the wedding of H.R.H. Princess Beatrice of Saxe-Coburg and Gotha, sister of the Crown Princess of Roumania, to H.R.H. the Infante Alfonso d'Orleans of Spain.

Sir Louis Mallet, H.B.M. Ambassador to the Porte, celebrates his birthday to-day.

H.M. the Queen of the Hellenes, accompanied by T.R.H. Princess Eirene and Prince Christopher of Greece, honoured H.E. the Hellenic Minister and Madame Gennadius with their presence at luncheon at the Hellenic Legation on Monday. Some prominent members of the Greek community had the honour of being presented to her Majesty and of remaining to luncheon. Mlle. Contostavmos and M. Theotokis were in attendance.

Princess Frederick Charles of Hesse, with her sons, Princes Wolfgang, Philipp, Richard, and Christoph, left Cronberg, in the Taunus, on Monday for Eastbourne. Her Royal Highness is the sister of the Queen of the Hellenes, and will return to Germany with her Majesty at the end of the month.

H.M. the Dowager Queen Olga of the Hellenes will probably remain in London as the guest of H.M. Queen Alexandra until about the end of this month.

According to the Constantinople Correspondent of *The Daily Telegraph*, H.I.H. Yussuf-Izz-ed-Din Effendi, heir-apparent of the Sultan, has accepted the invitation of the Emperor William, conveyed in an autograph letter, to witness the forthcoming manœuvres of the German army.

A Memorial Service for the Archduke Franz Ferdinand and the Duchess of Hohenberg was held last Friday morning at the Roman Catholic Cathedral at Westminster. Prince Arthur of Connaught attended on behalf of the King, and Queen Alexandra was represented by Earl Howe. The Turkish Ambassador, the Hellenic Minister and Mme. Gennadius, the Consul-General for Montenegro, and Lady Parkington, the Prime Minister and Sir Edward Grey were amongst those present.

The latest reports concerning the health of H.M. King Peter state that the "cure" which he is taking at Vraniska, has been so beneficial that he has already got rid of his rheumatism and is able now to go for long walks in the mountains.

The report that Dr. Chvostek, the Austrian specialist, had been summoned to Servia to attend King Peter has been semi-officially denied in Belgrade. Dr. Chvostek, it is added, has gone to Belgrade for purely personal reasons.

Prince Calodinovitch, of Roumania, is now staying in London.

Earl Kitchener was amongst the guests entertained at dinner last Friday night by Lord and Lady Charles Beresford at 1, Great Cumberland Place.

Sir Reginald Wingate, who left Karlsbad on the 4th inst. for town, is leaving London to-day for Knockenhair, Dunbar.

Our Cyprus Correspondent writes (June 26):—His Excellency the High Commissioner and Lady Goold Adams leave to-day for a three days' camping tour in the Pitsillia on their way up to Mount Troodos.

Our Port Said Correspondent writes (June 25):—Mr. Milne Cheetham, C.M.G., Councillor at the British Agency in Cairo, arrived at Port Said on Tuesday by the P. and O. s.s. "Egypt," and proceeded to Cairo. Mr. Cheetham is acting as Minister Plenipotentiary and Agent during Earl Kitchener's absence.

Admiral Robinson, Director-General of the Egyptian Ports and Lights' Administration, left Egypt for Europe on Friday last on two and a-half months' leave of absence.

Sir Murdoch Macdonald left Port Said last week by the P. and O. steamer.

Sir Joseph Saba Pasha has left Egypt for Carlsbad.

Mr. Walter Bond, vice-president of the Native Court of Appeal, left Cairo last week en route for Europe.

Sir William Garstin was amongst the guests entertained at dinner by the Right Hon. the Speaker and Mrs. Lowther at the Speaker's House last Friday night.

Lord Colum Crichton Stuart and Dr. Scott Moncrieff were among the passengers from Alexandria in the ss. "Karnak," which arrived at Marseilles on the 1st inst.

Dr. Douglas Dunlop, LL.D., Adviser to the Ministry of Education, Cairo, has arrived at Oban, N.B.

Writing on June 28, our Haifa Correspondent says:—Dr. Donald A. Coles, Director and Medical Officer of the Jerusalem and the East Mission in Haifa, Palestine, accompanied by Mrs. Coles and other members of the Mission Staff, leaves for England to-day, on the s.s. "Prince Abbas," for the summer.

Monsignor Stanley, Bishop of Emmaus, has arrived in London from Rome.

Presiding at the annual meeting of the Anglican and Foreign Church Society, held at the Church House, Westminster, on Monday afternoon, the Bishop of Gloucester referred to the retirement of the Bishop in Jerusalem (Dr. Blyth), and said that it was very largely owing to his wisdom, tact, and judgment that the Anglican Communion held the place it did in Palestine and the East.

Turkhan Pasha, the Albanian Premier, arrived at St. Petersburg from Vienna yesterday.

Essad Pasha arrived in Paris on Monday from Italy.

Our Athens Correspondent writes (July 5):—Mr. Mélot, the Belgian Minister in Athens, will go on leave on the 7th inst.

Fuad Sultan Bey has arrived at the Hotel Metropole from Cairo.

Skander Pasha Fehmy has arrived in London.

Lady Roper Parkington, the wife of Sir John Roper Parkington, Consul-General for Montenegro, gave a reception at Claridge's Hotel on Tuesday night. Amongst the guests were H.E. the Hellenic Minister and Mme. Gennadius, Sir John and Lady Bland-Sutton, and Sir Edward and Lady Boyle.

The annual meeting of the Balkan Committee will be held on Wednesday, July 15, at 2.45 p.m., in the Conference Hall of the Central Buildings, Westminster. The chair will be taken by Mr. Noel Buxton, M.P., and the meeting will be addressed by the

WHERE TO STAY.

LAUSANNE-OUCHY (Switzerland).

SAVOY HOTEL.
Near the lake, with splendid park.

CECIL HOTEL.
In the town and 5 minutes from the station.

Two First-class Family Hotels.
High-class Cuisine. French Chef.
J. SUMSER, Manager-Proprietor.

Sofia (Bulgaria).
GRAND HOTEL BULGARIE
(opposite the Royal Palace).
First-class Hotel. Entirely renovated and beautifully situated in the centre of the city, near Post Office, Theatre, Museums, Banks, etc. Electric Light. Central heating. Baths. Garage. Telephone. Garden. French Restaurant. Good wines. Café. Foreign newspapers. Most frequented by English and American Visitors. Interpreter meets all trains. Rooms from 4 frs.

Cyprus.
THE CYPRUS HOTEL CO.
Open all the Year round—
LIMASSOL (Olympus Hotel).
FAMAGUSTA (Savoy Hotel).
For Summer Seasons—
PLATRES (Platres Hotel). 4,000 ft. from the sea level. Opens from May till Oct.
TROODOS (Olympus Hotel). 6,000 ft. from the level of the sea. Opens from May till Oct.
Perfect Situation. French and English Cuisine. Moderate Terms. Also Excursion to Mount Troodos.
For Tickets and further particulars apply to—
NAJEM HOURY, Limassol, Cyprus
(Proprietor of the Army and Navy Stores).
Head Office: Najem Houry Stores, Limassol, Cyprus.
Branches: Polymedia, Troodos, Nicosia, Famagusta, Larnaca, and Platres.
All arrangements for Transport by Carriages, etc. are made by the above Firm.

Right Hon. Viscount Bryce, Mr. J. D. Bourchier, Sir Arthur J. Evans, Sir Edward Boyle, Bart., and others.

Mrs. Peter Ralli gave a dance on Wednesday night at 11, Hyde Park Gardens for her daughter, Miss Alexandra Ralli. Among the guests were H.E. the Greek Minister and Mme. Gennadius, Sir Lucas and Lady Ralli, and Lady Inchcape.

Baron de Ward, of Constantinople, has recently arrived in London.

Jean Tueni Bey, the newly-appointed First Secretary to the Turkish Embassy, has arrived in London, and entered upon his duties this week.

Our Bucharest Correspondent writes (July 5):—Next Thursday, Mr. M. G. Ristitch, the Servian Minister in Bucharest and the doyen of the Diplomatic Corps, who has been appointed to another post, will be received in farewell audience by King Carol. Mr. Bratianu, the Prime Minister, will leave in a few days for a "cure" at Reichenhalle. Mr. Take Jonescu, the leader of the Democratic Conservative Party, will leave on Wednesday for London, and later will go to Aix-les-Bains.

Dr. Denison Ross, C.I.E., lately Officer-in-Charge of Records of the Government of India, has joined the staff of the British Museum as Keeper of the Stein collection of Central Asian Antiquities.

Captain W. V. Cole, who has been promoted to that rank in the retired list, was a sub-lieutenant of the "Monarch" during the Egyptian War of 1882, receiving the medal and star for his services.

The Egyptian Mail reports that the employees of the Anglo-Egyptian Bank in Cairo have decided to make a presentation to Mr. Cookson, the retiring manager, who is leaving after a long career in the service of the bank.

M. Jules Vedrines, the famous airman, whose recent visit to Cairo created a good deal of stir, is expected to return to Egypt shortly.

The Rev. Edward B. Haskell, D.D., and family have moved from Salonika to Philippopolis, and their address henceforth is American Mission, Sahat Tope, Philippopolis, Bulgaria.

The Orient reports that Dr. Edward P. Case, of Erzeroum, had a narrow escape from serious injury on June 8. On his return from the house of a patient, he was violently thrown from his horse, and suffered a severe concussion of the brain and a scalp wound reaching the bone and requiring four stitches. Fortunately no bones were broken, and he made a rapid recovery after a day in bed.

The marriage took place on July 4 at Christ Church, Hampstead, of Mr. Ernest Gabriel Lomas, H.B.M. Vice-Consul, Rabat, Morocco, and Miss Emily Violet Fernau, daughter of the late Mr. George Fernau, of Heathside, Hampstead. Mr. Lomas was Acting Vice-Consul at Constantinople in 1905.

The marriage arranged between Captain Leonard Kirke Smith, D.S.O., the Royal Scots, attached to the Egyptian Army, fifth son of Mr. Francis P. Smith, of Barnes Hall, Grenoside, Sheffield, and Miss Vera Hicks, only child of the late Captain and Mrs. C. H. Hicks, will take place at Holy Trinity, Brompton, on Tuesday, July 14.

The death took place in the Frimley District Cottage Hospital, near Camberley, last Saturday night, of Rear-Admiral Edward Percy Ashe, of Longwood House, Camberley, owing to severe injuries incurred in a motoring accident. Admiral Ashe served on the "Thalia" in the Egyptian War of 1882, being rewarded with the Egyptian medal and the Khedive's Bronze Star.

The Cairo Correspondent of *The Times* telegraphed on July 6 that Dr. R. W. J. Pearson, acting director of the Abbassia Asylum, was found shot on the previous night. It is suspected that his death was due to an accident.

General Sir Laurence James Oliphant, who died at his residence in London on Monday night, aged sixty-eight, served through the Egyptian War in 1885.

A matinée in aid of the Greek refugees took place on Thursday afternoon last week in the Queen's Theatre before a full house. The amount received for the fund was over £1,000, of which £500 was sent as a special donation by H.M. Queen Sophia of the Hellenes. Among those present were H.E. the Greek Minister and Mme. Gennadius, H.E. the Servian Minister, H.E. the Roumanian Minister, the Hellenic Consul-General and Mme. Stavridi, M. A. Rizo-Rhangabé (First Secretary of the Hellenic Legation), M. Georgevitch (Secretary of the Servian Legation), the Montenegrin Consul-General, and Sir Lucas and Lady Ralli. The programme included performances in Greek, French, and English. Mr. H. B. Irving and Miss Miriam Lewes presented the melodramatic sketch "The Mask"; Mlle. Régina Flory appeared as a singer for the first time in England; Miss Marie Tempest sang French songs; Miss Lena Ashwell recited; Mr. Hayden Coffin sang; and other performers included Miss Phyllis Bedells, Mr. Ben Webster, Miss Helen Mar, Mr. Maurice Farkoa, and Mlle. Marie de Nys.

The Exhibition of water-colours by Mr. Benton Fletcher of "Egypt and its Temples," which is being held under the auspices of the Fine Art Society, at 148, New Bond Street, will remain open till July 14.

APPOINTMENTS AND PROMOTIONS.

Our Athens Correspondent writes (July 1):—Yesterday Mr. Passarof, the newly-appointed Bulgarian Minister in Athens, arrived here, and to-day Mr. Naoum, the newly-appointed Hellenic Minister in Sofia, left for the Bulgarian capital. Mr. A. Schliemann, hitherto deputy to the Hellenic Parliament, has been nominated Hellenic Minister in Washington, and has left for Paris. Within a fortnight he will take up his new duties. Mr. Th. Ristitch, Secretary of the Servian Legation in Athens, has been transferred in a like capacity to Constantinople.

President Wilson has cabled his acceptance of Mr. Williams's resignation of his post as United States Minister to Greece.

During the absence of Mr. Ronald Graham, Morice Pasha, Director-General of Public Security, is acting as Adviser to the Ministry of the Interior.

Our Cyprus Correspondent informs us that Major W. N. Bolton, Commissioner of Limassol, has been appointed to act as Chief Secretary; Mr. E. F. Lucie Smith as Acting Commissioner, Nicosia; Captain A. Gallagher as Acting Chief Commandant of Police; Major G. C. Bayly, Commissioner, Paphos, as Acting Commissioner, Limassol; and Mr. Thomas Greenwood, Local Commandant of Police, Paphos, as Acting Commissioner in that district.

The Egyptian Gazette states that according to information received from Athens, Mr. Sachtouris, the Hellenic Consul-General at Alexandria, has been offered the post of Secretary to the Hellenic Embassy in Vienna.

DOMESTIC ANNOUNCEMENTS

The charge for Announcements under this Heading is 9d. for three lines and 1s. per line afterwards. Minimum charge, 3s. All announcements must be authenticated with the name and address of sender.

MARRIAGE.

HARRIS—COCKE.—On June 6, at St. George's Church, Penang, Henry Gladstone, eldest son of Henry Alexander Harris, late of Constantza, Roumania, and Hester Mary, eldest daughter of the late Edmund William Cocke, Ealing, London.

DEATH.

HOBART.—On July 1, at Kassala, E. Sudan, Captain G. B. Hobart, York and Lancaster Regiment, attached to Egyptian Army, eldest son of Lieutenant-Colonel G. Hobart, late R.M.L.I.

WHERE TO STAY.

Cairo's Hotels de Luxe.

FRIDAY, JULY 10, 1914.

AUSTRIA-HUNGARY AND SERVIA.

A fresh cloud has risen over the Balkans, raised by the pistol-shots which brought to a tragic end the lives of the Archduke Franz Ferdinand and his Consort. It was inevitable that the Serajevo crime should have stirred the people of Austria-Hungary to the extremes of indignation; inevitable too that, as the murder was committed by a Serb, such indignation should find vent in wholesale allegations against Servia. Relations between the two countries have never been cordial, and Servian successes as the result of two Balkan Wars have only helped to embitter them. Austria-Hungary has not yet become reconciled to the existence of a Greater Servia, which seems to interpose a still more formidable barrier in the way of the realization of the Austro-Hungarian desire for a port on the Ægean Sea. The Servians on their part, smarting under the recollection of many past grievances, have not been loth to emphasise the significance of the improvement in their national fortunes. Accordingly, when it became known that the assassination of the heir to the Austro-Hungarian throne was the work of an organized conspiracy, it was natural to suppose that the plot had been hatched outside Bosnia. Conjectures and suspicions are easily converted into categorical assertions when public feeling is aroused, and long before any facts regarding the Serajevo crime could be elucidated, a section of the Austrian Press seems to have decided that the honour of the Dual Monarchy could only be vindicated by a declaration of war against Servia. While the danger of any further tension in the relations between the two States has to be admitted, we need not take these Press recriminations too seriously. The thoroughness of the arrangements for the murder of the Archduke Franz Ferdinand point to a carefully elaborated conspiracy, and it may well be that its headquarters were in Belgrade or in some other town of Servia. This circumstance *per se* would not imply Servian complicity. Plots against the life of a Tsar have too often been hatched outside Russia without the connivance of the country where the conspirators have foregathered. If certain Serb subjects of the Dual Monarchy wanted to discuss their dastardly plans with a greater sense of security than might have been possible in Bosnia itself, they would not unnaturally betake themselves to Servia. The success of their machinations does not necessarily imply remissness on the part of the Servian authorities, still less any sympathy with the foul plot. Somewhat tardily the Austro-Hungarian Government seems to have impressed this view upon its bellicose Press, and reminds it in a semi-official communication that no concrete proofs have yet fixed upon Servia guilt or complicity in the Serajevo crime.

It is right that the origin and details of the plot should be probed to the bottom. Far too grave a blow has been dealt to the monarchy, and the possibility of too serious an anti-dynastic movement has been revealed to justify half-measures. We can hardly suppose that the Servian Government will not lend all the aid in its power to enable the truth to be learned; but it may well resent the reckless insinuations of which the Austro-Hungarian Press has been guilty before even an investigation into the origin of the conspiracy could be instituted. Servia will also feel aggrieved by the demonstrations and excesses that have disturbed the public order in various parts of Austria-Hungary. Orthodox Serbs have in every case been the victims or objects of popular opprobrium; but there is no indication that the Austro-Hungarian authorities have not done all within their power to check these outbreaks and to keep the peace. The fact that chief among the rioters have been Catholic and Moslem Serbs must give the Servian Government "furiously to think." The Balkans would not be the Balkans if every country did not see visions or dream dreams of the glorious revival of an empire that was once its own. But memories of Dushan must begin to grow dim once more when the murder of the heir to the Hapsburg throne can fling the Serbs at one another's throats. Both the interests of Servia and those of the Serbs under Austro-Hungarian jurisdiction will be better served by evidence to the effect that the Serajevo crime was the work of a small band of malcontents. If the principle of *cui prodest?* be applied, it will be difficult to find any considerable community that could hope to benefit from the assassination of the Archduke Franz Ferdinand. We may, therefore, hope that the result of the investigations now being carried out will be to vindicate Servian innocence and to reassure the people of Austria-Hungary who have been so sorely tried in the misfortunes that have befallen their dynasty. Such a result will not only dissipate the small cloud which has appeared over the Balkans, but will also remove a danger to the peace of Europe as a whole. The recent upheaval in the Balkans has made Russia and Austria-Hungary more than ever watchful of one another's movements; and the latter country must be well aware that the mention of war with Servia, even though it be made only in an irresponsible Press campaign, must just now cause Russia to prick up her ears.

The course to be adopted by the Servian Government so long as its policy continues to be directed by the wise statesmanship of Mr. Pashitch is clear. Any inclination to resentment at the unjust attitude of the Austro-Hungarian Press will be suppressed, and the Government of the Dual Monarchy will be met half-way in its natural desire to sift the conspiracy to the bottom. No civilised Government has any interest in simplifying political assassination or in preventing the conspirators from being brought to justice. Above all, the Servian Government at the present time has a strong interest in maintaining correct relations with its powerful neighbour. The temporary abdication by King Peter of his sovereign rights during his stay at a Servian watering-place, the difficulties that have arisen between the civil and military authorities, the political crisis which has led to the dissolution of the Skupshtina—all these circumstances must prompt the Servian Government to exercise its best endeavours to prevent complications in the foreign relations of the country. Servia does not stand alone among the Balkan States in wishing to avoid war except for a very serious cause. If her alliance with Greece against Turkey imposes any corresponding obligations upon the Greek Government in the event of Servia being engaged in war, Greece's influence must also necessarily be on the side of peace. It is significant of the explosive material still to be found in the Near East how lightly the thoughts of the different peoples turn to war in spite of their severe experiences during the last two years. But between the rattling of the sabre and the deliberate declaration of war we believe a wide gulf will generally be found to have been fixed. It remains the duty of Europe as a whole to see in each case that this gulf is not bridged.

Teheran	July 8..	55·85 krans

Devonshire Square,
London, E.C.

We publish to-day, as a part of our usual issue, a supplement dealing with the commerce and financial resources of Servia. Next week we hope to publish a similar supplement dealing with Bulgaria, and the week after one dealing with Roumania. Month by month we hope thus to be able to set before our readers in an up-to-date form the progress and commercial possibilities of these vigorous young States which, the horrors of war now overpast, are able to turn their attention to the development of their natural resources. In the introductory article which we publish on Servia from the able pen of Mr. Percy F. Martin, it will be seen that the openings for British capital in that country are almost unlimited, and it is the same throughout the Balkan Peninsula. We hope that by this monthly survey of the Balkan States some assistance may be rendered to our readers who wish for information, and that the importance of the Near East as a market for British goods may be more fully recognized.

***

The new Greek ministry, the Ministry of Communications, is to commence work next week, I understand. Mr. Diamantidis, Greek technical delegate on the Paris Conference, is to be at the head of the new department, and his extensive acquaintance with railways and their workings should certainly qualify him to make a success of the undertaking. Now that Greece is extending her railways, and is shortly to be linked up with the European system, the post will be no sinecure; but the opportunities of doing good service will be numerous, and Mr. Diamantidis is to be congratulated on his appointment.

***

Roumania, as I mentioned in these notes last week, has opened a Travel Bureau in London. Now a correspondent writes that the Greek Government intends to found at once a "Society for Foreigners," to be known as the "Hetairia ton philoxenon." This Tourists' Bureau is to receive a subvention from the Government of £200 a year, and will be under the direct patronage of the Royal family. Chief among the aims of the Bureau is to improve existing hotels and to erect new ones on the best modern principles. Those who have visited Greece will fully appreciate and applaud this last-mentioned object. Except in the larger towns the "hotels" of Greece can only be compared to the equally unpleasant "hotels" of Spain. Whether tourists will appreciate being met at stations and personally conducted "à la Cook" is another matter; but, in any case, we wish the "Hetairia ton philoxenon" success and congratulate the Greek Government on its enterprise.

***

Lord Charles Beresford once said that building battleships was cheaper than making war, and the Greek authorities must have had this maxim in mind when they purchased the two American battleships, the "Idaho" and the "Mississippi." At the same time, viewed from a purely business standpoint, the price paid seems to have been excessive. The two vessels were completed in 1908, so that they are both more or less out of date; their estimated cost, complete, was £900,000 to £1,000,000. It is stated that Greece has paid to the Navy Department at Washington no less a sum than £2,500,000. Compared with the cost of a fresh war, however, this sum is a mere drop in the bucket, and Mr. Venizelos must be congratulated on his bold policy of thus insuring against war, even if the premium is a heavy one.

***

The June issue of *The Quarterly Trade Journal* of the British Chamber of Commerce of Turkey and the Balkan States has now reached me; and I am glad to learn from an editorial note that there is a good prospect of this most useful publication being converted into a monthly in the near future. This is the more satisfactory because the prospect is admittedly due to the support accorded to the *Journal* by its advertisers; which seems to indicate that the British merchant and manufacturer who is out to do business in the Near East is beginning to realise the importance of advertising. Another point on which I congratulate the *Journal* is the fact that it is now printed in London, with the result that its general appearance is greatly improved.

***

The *Journal* is full of good things that I should like to quote, but for the time being I must content myself with a reference to two points touched upon by the Chamber's Athens representative. He reports that "recently an order for 50,000 complete uniforms with overcoats was placed with a well-known British agency at Athens, but the clothing 'ring' in England made the order impossible of execution in that country owing to the artificial inflation of prices. Consequently the order was withdrawn and public tenders were invited, with the result that the business went to an Austrian firm at a price at which it will be almost impossible to fulfil the specification as to quality of material." This paragraph obviously affords food for reflection to the British clothing contractor; and it seems to me that it no less obviously contains a hint which the Athens Ministry of War would do well to take. The Chamber's representative states that since the French Quartermaster-General and his assistants have been replaced by Greek officers, "Germany and Austria are coming to the front, and *cheapness will be the first consideration.*" The italics, which are mine, convey, I fear, a pitiful truth.

***

The second point to which I refer, shows, however, that our countrymen are not going to be driven off the field without a struggle. One British firm "has just secured a good order for saddlery," and another "is well in the running for a supply of motor lorries for the Ministry of War." The last-mentioned firm, by the way, appears to have shown enterprise of an altogether unusual description as far as British houses are concerned. It had a lorry specially constructed to meet the Greek specification, and sent it out, accompanied by an experienced man, to its Athens agents. This is distinctly refreshing, especially having regard to the gloomy views expressed on the subject by the writer of the article "Automobilism in Greece," which appeared in our Engineering Supplement recently; and the firm in question undoubtedly deserves all the luck it looks like getting.

***

An indisputable proof of the great natural resources of the Balkan States is the rapid advances commercially which they have made since the beginning of this century. The case of Roumania is remarkable. The total exports from that country, which in 1899 were valued at less than £6,000,000, had increased to more than £24,000,000 in 1910, that is to say, they were more than quadrupled in eleven years. An outstanding feature of this rapid development is the growth of exports to Egypt. In 1899 this trade was insignificant. In 1913 the total imports into Egypt from Roumania, according to statistics of the Egyptian Customs, amounted to 28,291,861 frs. (£1,131,674). The chief articles of export are timber, flour and petroleum. Of the total imports of petroleum into Egypt 90 per cent. is from Roumania, the Roumanian product having replaced that of Russia and America, while Roumanian flour has driven from the field the French, Russian and Italian article.

***

The importance of the Roumanian flour-milling industry has often been referred to in the columns of The Near East. I see that Major Baldwin, H.M. Consul-General at Galatz, states in his report for 1913 that in Galatz and Braila alone the present output is 1,000 tons a day. According to the report, every year new mills are being built and old ones are increasing their capacity. From what I know of British millers I do not suppose they would relish the prospect of Roumanian competition. As things are there is little fear of that, for no regular line of ships running direct to London from Roumanian ports exists, and all flour destined for the United Kingdom has, therefore, to be transhipped at Antwerp or Rotterdam, with the consequence that freights are increased. But the British millers' poison is the British milling engineers' meat, and it is greatly to be hoped that the latter are alive to the opportunities which should offer themselves in Roumania for selling their machinery and plant and recommending their special "systems" to the Roumanian miller.

Constantinople Business Letter

(From Our Own Trade Correspondent.)

Constantinople, July 4.

Great Britain's Trade with Turkey.

The Board of Trade has just issued the first volume of the "Annual Statement of the Trade of the United Kingdom with Foreign Countries for the year 1913, compared with the four preceding years," containing details of the trade exchanges with different countries. Notwithstanding the decrease in the total exports from Great Britain to Turkey during the year 1913, compared with the two preceding years, a study of this publication, so far as the trade exchanges between the two countries are concerned, conveys some very interesting facts. The total increase in Great Britain's exports to Turkey during 1913 as compared with 1912 amounted to £370,000, and to over £1,700,000 as compared with the record year, 1911. The decreases in the enumerated exports during 1913 compared with 1912, as published in the monthly returns, were known to amount to £275,000 in cotton piece goods, to £150,000 in cotton yarns, and to £125,000 in woollen and worsted tissues. In the detailed returns just published there are naturally other articles which show decreases, and to these I may return at a later date. I wish at present, however, to call attention to quite a long list of exports, which for some years have shown a marked and steady upward tendency, and which, even under adverse conditions, not only again hold their own, but, in quite a number of cases, are actually in excess of the record year, 1911. The latter I have marked with an asterisk. I take the risk of again being charged with a fondness for statistical displays by some who are not averse from copying tables of figures, the separation of which from a volume of 700 pages has necessitated no small expenditure of time and labour. The values are given in pounds sterling:—

—	1909.	1911.	1913.
Apparel, waterproofed	13,257	13,599	16,270*

Trade of Trebizond.

A Consular Report on the Trade and Commerce of the Vilayet of Trebizond for the year 1913, just published, states that local industries are of little importance, the making of silver filigree work in Trebizond and of linen cloth at Rizeh being the only two worthy of notice. There are also a number of small tanneries.

According to the statistical tables, to which undue importance must not, however, be attached, as they are compiled from private sources of information and are, therefore, only approximate, there was, as compared with the year 1912, a decrease of about £187,500 in the value of imports. It should be noted that the importation of food-stuffs is still a large one. In the value of exports there was an increase of about £129,500. A very large increase in the number of animals exported is chiefly responsible for this. As regards trade with the United Kingdom there were decreases of about £20,000 in imports and of £17,900 in exports. It is, however, almost certain that owing to the difficulty of obtaining accurate information, especially in the case of articles imported in comparatively small quantities, the value of imports from the United Kingdom is understated.

The chief imports from the United Kingdom are cotton goods and yarns, woollen yarn, sewing cotton, copper, tin, drugs and chemicals, tinned fish and preserves, biscuits and confectionery, waxed cloth, bedsteads, safes, machinery, oils and paints. The United Kingdom has also a share in the importation of the following:—Spices, woollen goods, old clothes, canvas, galvanised iron pipes and sheets, iron and enamelware, starch, candles, and soap.

(From Our Own Correspondent.)

Sofia, July 5.

The Budget for 1914 was introduced into the Chamber on Friday by the Minister of Finance, Mr. Tontcheff. Expenditure is estimated at 251,340,499 frs. (£10,053,619), and revenue at 251,345,070 frs., showing an estimated surplus of 4,571 frs. The Army Estimates are put down at 52,972,503 frs. It is possible that the discussion of the new Budget will not have terminated by July 13 (June 30 O.S.), and the Finance Minister, therefore, asked the Chamber to grant a provisional credit for one month to cover expenditure during July (O.S.). The delay in the introduction of Budget was explained by the two General Elections and by the negotiations for the loan.

Mr. Tontcheff dwelt on the economic resources of Bulgaria which were chiefly agricultural. In the year 1911, before the Balkan Wars, 4,000,000 hectares were under cultivation, as against 3,000,000 hectares in 1907, and 2,000,000 hectares in 1905. In six years, therefore, the area under cultivation had doubled. Imports and exports, in particular of flour, showed large increases; bank deposits were steadily growing; the revenues of the State had almost doubled during the last ten years; and recent Budgets had shown a considerable surplus. All these signs, said Mr. Tontcheff, pointed to a peculiarly healthy state of the national finances.

Cost of the War.

The public debt now stood at 627 millions of francs, of which 600 millions had been incurred as a result of the wars. The revenue for the year was coming in well, the total received by the Exchequer for the first five months being 82 millions of francs. Bulgaria had suffered heavily by the loss of the Dobrudja, but it was hoped that the revenues from the newly acquired territories, where the tobacco in particular was of great value, would compensate for this loss.

GOLD IN ROUMANIA.

(From Our Own Correspondent.)

Bucharest, July 5.

It is often asserted that this country must be rich in minerals by reason of its position, but that hitherto its resources have not been worked owing to lack of initiative and capital.

As is well known, when the Romans first came to Dacia they were attracted by the gold brought from the Dacian rivers, which were regularly worked by the inhabitants, and from which large quantities of gold were obtained. Indeed, the legend of the Golden Fleece is said to have its origin in the then long and difficult voyage from Greece to the foot of the Carpathians. The origin of the Golden Fleece itself doubtless may be found in the fact that the gold was packed in sheep skins, which, after having been used a number of times, were burnt to obtain the gold dust remaining in the wool.

Several attempts have been made in modern times to work gold mines in Roumania, hitherto without much success. On the Hungarian side of the mountains, however, the mines yield a certain though modest profit. M. Gaillac, a French resident, who has occupied for some years an estate at Valea lui Stan, in the Valcea district, finding traces of gold on it, set about working the discovery systematically but quietly. The venture has been rewarded, for a rich vein has been struck, which appears to run for a long distance. Since the beginning of the work 40 kilos of gold have been obtained, and a few years ago M. Gaillac, at the command of King Carol, who had heard of the find, and was much interested was received in audience, when he presented to his Majesty a medal made from the first gold found.

M. Gaillac suggested that some 20 and 10 franc pieces, as well as "Salbe" (the coins worn by Roumanian peasant women to decorate their hair), should be struck from Roumanian gold to commemorate the fiftieth anniversary of the King's accession, which falls in 1916. The King readily gave his approval.

The Situation in the Sudan.

Bernard Pasha's Report.

(From Our Own Correspondent.)

Cairo, June 30.

At the beginning of this month I was able to give you the final figures of the Sudan Account for 1913. These enabled a fair idea to be obtained of the financial and economic situation of that country. More definite information is now available from the report of the year's working written by Colonel Bernard Pasha, the Financial Secretary, who has so ably assisted Sir R. Wingate to administer the Sudan, and to bring it to its present condition. His views on the situation and the future outlook confirm the remarks which I made when I communicated the final figures for 1913.

Bernard Pasha points out that for the second year in succession the Sudan has suffered from a low flood and a poor rainy season. The flood of 1913 was, as is now known, one of the worst on record; and whilst in the provinces of Halfa, Berber, Khartoum, and the White Nile, much land on which crops were grown in normal years was left uncultivated, in Dongola none of the basin lands received any water at all. As concerns the rain-area, the fall in Kordofan, Kassala, and the more southerly provinces was good, but in Sennar and the Blue Nile, "the great grain producing lands of the Gezira," it was poor.

As a result it is to be feared that a loss in the number of oxen used for cultivation will ensue, whilst although an abundant harvest in Kordofan made up in a measure for the shortage in the north, the price of grain remained very high. It is not surprising to read that the prosperity of the population in the Gezira and the north has received a temporary set back, and that "in spite of a steady development of trade in the southern provinces, business has suffered from the general depression and from the feeling of unrest brought about by the war in the Balkans."

The Financial Secretary draws attention to the fact that the circulation of silver, which is an indicator of the state of trade, since it constitutes the greater part of the currency, has contracted. Whereas in 1911 and 1912, £E190,000 and £E170,000, respectively, had to be imported to move the crops, and the maximum Treasury balance in 1912 was £E215,000, in 1913 no outside assistance had to be obtained, and the Treasury balance attained £E330,000. But although primarily this decrease in circulation, despite the undoubted increase in the amount used in the southern provinces, is due to the unfavourable climatic conditions and to the diminished exports of gum—this commodity dropped by 4,500 tons last year and the price remained low owing to the large stocks still held in Europe—a secondary cause may, in Bernard Pasha's opinion, be found in the opening by the National Bank of Egypt of branches at El Obeid, the gum centre, and Wad Medani, the chief town of the grain producing district of the Gezira. "The introduction of credit transactions by these branches, and the use of gold, small notes and other forms of paper money must to some extent restrict the employment of silver." In this connection it is to be noted that the inhabitants in the less civilised regions are beginning to appreciate the use of money, and for their own produce and labour are now taking cash in preference to trade goods.

Trade Returns.

The trade returns show a slight reduction as compared with those of 1912—£E3,294,962 as against £E3,340,548. Imports rose from £E1,967,429 to £E2,109,776, food-stuffs and cotton-goods being mainly responsible for the increase. Exports, however, declined from £E1,373,119 to £E1,185,186, owing to the low price of gum and the smaller quantities exported. On the other hand cotton exports rose from £E139,185 to £E152,497, whilst those of cotton seed increased by £E5,278 to £E21,097.

This latter is a very welcome feature and it is interesting to note that in Kassala "there appears to be a growing interest in the cultivation of cotton," the crop being 7,000 cantars as compared with 6,000 cantars in 1911-12, and that the Tokar crop reached 36,454 cantars, a slight increase over that of the previous year. What is more to the point is that the quality was excellent, the two higher grades obtaining better prices than Egyptian f.o.f. Bernard Pasha writes that the experimental work carried on by the Government at Tokar has apparently instilled into the cultivators a desire to adopt better methods of cultivation. "The chief drawback to Tokar as an area for cotton growing is the element of uncertainty as to the direction which the flood will take, and the consequent impossibility of being assured that land . . . will continue to receive sufficient water to mature the crop." This last year the Khor Baraka, watered 53,000 feddans at Tokar, but a very large portion could not obtain sufficient for maturing the crop, which would otherwise have been much larger. Both at Tokar and Kassala the difficulty can only be overcome by the construction of irrigation works, and at the former point the question is now being studied by the Irrigation Department.

The Guaranteed Loan.

Referring to the Sudan Guaranteed Loan, the Financial Secretary makes the interesting statement, that £500,000 has already been raised and that a commencement has been made therewith with the construction of the Gezira irrigation works, and he takes the opportunity of aptly remarking that "the benefit which these works will be to the country could hardly be more strikingly demonstrated than at the present time, when the inhabitants of the fertile districts to be embraced in the scheme of irrigation are suffering so severely from a failure in the rains upon which in the past they have been entirely dependent for raising their means of subsistence."

Although, as the report says, the future, from a financial point of view, is not free from anxiety, and a continuation of the recent climatic conditions would bring about a situation of real difficulty, the fact that in a year like the past one the revenue was collected without difficulty, and that there was only £E30,000 of arrears at the close of the account, together with a study of the advance made in past years, point to the present being but a transitory set-back, so to speak, and justify a feeling of confidence and hope in the capacity of the Sudan to make even more marvellous progress than it has done in the past.

The Revenue.

Some interesting details are given in the section dealing with the revenues. The total area under cultivation in 1913 was 2,303,000 feddans, as against 1,937,000 feddans in 1912. Of this, 130,000 feddans were irrigated by artificial means from the river, 123,000 feddans by river flood and 2,050,000 feddans by rainfall. Whilst the two former areas do not differ very much from those similarly irrigated in 1911, the rain-irrigated area has increased by 40 per cent. in the two years and by 25 per cent. as compared with 1912. This explains, therefore, the great increase in the Ushur Tax.

A detailed table attached to the report shows that tribute was levied on 1,519,694 animals, and animal tax on 2,245,724 animals. Almost all these came under the category of livestock, and this indicates what an opening for export trade the Sudan possesses in this respect. Already no inconsiderable traffic is carried on with Egypt, and it is interesting to note that last year two consignments of live cattle were, for the first time, shipped from Port Sudan to Malta.

The Traders' Tax.

In the course of his report, Bernard Pasha gives some interesting details regarding the Traders' Tax, which was imposed last year, and which has aroused so much controversy in the Sudan. It was introduced because "in the past all direct taxation was borne by cultivators and owners of land and cattle, and the trading community as a class have contributed practically nothing to the Revenue in the way of direct taxation." Since the majority of native traders keep no proper books, it was not possible to get them to produce a proper trading account. It was, therefore, decided to divide traders into classes, according to their assessed annual profits, and to tax them on a sliding scale, which worked out, for profits under £E100 at 2 per cent. or less, profits between £E100 and £E300 at about 3 per cent., profits between £E300 and £E600 at about 4 per cent., and profits over £E600 at 4 per cent.

A Board consisting of not less than two Government officials, with two or more traders sitting as assessors, sits in each assessment area. Every trader is asked to make a declaration of profits for the period of assessment. If his declaration is accepted, the tax is assessed forthwith. If it is rejected, or if he prefers to make no declaration, the Board itself proceeds to assess his profits and to fix the tax payable accordingly. Traders have the right to appeal against the Board's assessment.

Exemptions for the purposes of assessment are allowed for agricultural profits, profits arising from a mining lease granted by Government, profits below £E24 per annum in amount, and rent derived from land or buildings.

During 1913, 7,288 traders were assessed and £E7,906 was collected from the tax; 3,573 traders with profits below £E24 per annum were exempted. Considerable leniency was exercised in applying the tax in view of the traders not being used to it.

ALEXANDRIA NOTES.

(From Our Own Correspondent.)

Alexandria, July 3.

Share Market.

Large sums of gold, which the close of the cotton season has set free, are still being shipped. During the last fortnight £450,000 has been exported to London. Leading securities, as, for instance, those of the Agricultural and National Banks, have been in small request. On the other hand there has been an active business done in the shares of the Building Lands Co., and the Cassa di Sconto. The value of the shares of the Cassa di Sconto is from 90 frs. to 100 frs. They are actually quoted at 49 frs., so that there is a considerable margin for a rise.

Greco-Egyptian Agreement.

The Greco-Egyptian Commercial Agreement is to be signed this week. The provisions do not differ to any great extent from the old treaty, and the modifications that have been made are, in the main, in favour of Greece.

Comptoir Belge Oriental.

This company has a capital of 1,000,000 frs., of which 625,000 frs. have been paid up. It is mainly concerned with the importation of chemical manures, metal goods, building materials, coal, etc. Agencies have been opened in the principal centres. Last year's trading showed a gross profit of 223,775 frs., and a dividend on the ordinary shares of 6 per cent. was declared.

L'Auxiliaire Immobiliere d'Egypte.

During 1913 this company showed a profit of 108,737 frs., of which 5,337 frs. was placed to reserve, and 101,400 frs. distributed in dividends to the preference shareholders, making a dividend of about 6 per cent. The company, which has a capital of 4,800,000 frs., was established to finance the development of the important property of the Société Centrale Immobilière du Caire.

Near East Markets.

SPECIAL REPORTS.

(From Our Own Correspondents.)

Alexandria. July 3.

The low Nile of 1913-14 has prevented the flooding of the high lands of Upper Egypt, and irrigation has had to be done by hand. As a consequence, nearly 400,000 feddans have remained out of cultivation. The production of corn, beans, lentils, and onions has shown a very large decrease. The cultivation of cotton and sugar-cane has not, however, suffered to any great extent from the lack of water. Although the onion crop for this year is only half that of last year, 420,000 cantars, as against 755,000 cantars in 1913, had been exported up to June 30. The rise in price—from 35 piastres per cantar in 1913 to 125 piastres—has largely compensated for the smaller output. This record price is due to the failure of the Spanish crop. Onions this year have yielded as much as £E100 per feddan.

Owing to the restrictions placed by Government on the rice growing, the acreage under cultivation this year has fallen to 35,000 feddans, compared with 200,000 feddans in 1913. The favourite varieties sown have been those known as "Fino," "Sultani" and "Ain el Bint." The Nile flood is expected to be early this year, and it is hoped that it will be possible to plant 100,000 feddans with Japanese rice about July 15. If the Irrigation Department forbids the sowing of rice until after this date, the variety known as "Sabeimi" will be sown. This variety ripens in 100 days after sowing, whereas Japanese rice takes four months, and the Egyptian varieties, "Fino" and "Ain el Bint," five months.

"Sabeimi," which has risen to 175 piastres the ardeb, has more than doubled in value, on account of the brisk demand for seed.

The following information is extracted from the weekly bulletins received at the London offices of the Imperial Ottoman Bank from its correspondents in the Near East:—

Mosul. May 31.

The following are extracts from the monthly report for May:—

The optimistic reports concerning the cereal crops are confirmed day by day. It is generally agreed that the barley harvest will be from 25 to 30 per cent. in excess of last year's, and at the same time the wheat crop is estimated as 100 per cent. above that of 1913, regarded as a good year, in spite of the appearance of locusts.

In view of the excellent crop outlook, the prices of cereals, which had already dropped appreciably, maintain a reasonable level. With regard to the wool market, during the month a lively note has prevailed and prices have risen.

Balikesser. June 25.

The following are extracts from the report for the months of May and June:—

The lack of snow and frost has ruined the winter sowings of opium in a great part of our district, and the heavy rains, which last several weeks, have damaged the prospects of the spring sowings. The harvest, which is beginning, is poor, the yield being estimated at 300 coffers, against about 600 in 1913.

The reports concerning the crops of cereals and cotton are favourable, and the yield is said to be satisfactory.

The commercial outlook has been dull during the period. The cattle and corn markets have been weak. Imports have been paralysed by the boycott of the Christian element.

Busreh. June 13.

The market continues calm, in spite of the satisfactory character of the crop reports. This state of the market is due to the abstention of exporters of cereals from purchasing deliveries or making advances to farmers and holders of corn. This abstention has intensified the money stringency, and has put a check on business transactions. A recovery is not to be expected until the exportation to Europe of some score of thousands of tons of cereals has restored the economic equilibrium of the country. In view of the abundant harvest, it is expected that within two months from now that quantity will be drawn from our market before the shrinkage of the rivers in the interior.

Already, in consequence of the rise in the prices of barley on the European markets, export houses here have bought up all the available stocks, estimated at some 1,500 tons.

PERSIAN AND TURKISH PRODUCE.

In their June report, received this week, Messrs. F. W. Bowyer and Bartleet report:—

Asphaltum.—Egyptian.—No change to note. Value nominally 70s. per cwt. Syrian character has been selling steadily full values. Gum Ammoniacum.—No demand for this gum at present. Values unchanged, but stocks have materially increased. Prices asked are 70s. for good pale free drop, 60s. for blocky, and 50s. for low seedy quality. Gum Assafoetida.—Market dull and inactive, no transactions of any kind. Stock consists mostly of low grades, stuff which is not wanted at present. Good pale free qualities might attract attention. Gum Arabic.—Egyptian.—This gum remains in a somewhat stationary position, without much business doing on this side. Crop news is bad according to advices received, and offers from the Sudan are sparse. The latest figures which have been quoted are about 37s. 6d. c.i.f. On the spot 40s. is asked. Persian Insoluble.—This market has been almost cleared of stock. For arrival we are sellers of new crop at 17s. c.i.f. for ordinary Bushire sorts. Gum Tragacanth.—This month business has been extremely quiet with no enthusiasm amongst buyers. From all quarters we hear the same dismal report that there is no trade, and all we can advise sellers to do is to be patient and wait their time for a better demand to spring up. Good white Bagdad descriptions are scarce and wanted. Gum Mastic.—Rather more inquiry, and some business has resulted both on the spot and to arrive. Value 2s. 6d. per lb. Galls.—Since our last sales have materially fallen off. Blues are scarce on the spot. We are buyers for arrival at 46s., but sellers are asking 48s. Greens are unsaleable, and can be bought very cheaply at 42s. 6d. per cwt. Whites are quiet, 40s. at 42s. 6d. being about spot value. Opium, "Soft Shipping."—As we have not yet received samples of the new crop from Constantinople and the old crop being practically exhausted, sales have been of a very retail character at 21s. for fine and good 18s. 6d. per lb. Persian.—Considerable business has taken place during the month, owing to the reason above stated, and if holders continue to accept present prices we can look for a continued demand. Prices to-day being:—Good to fine 17s. to 18s., second quality 16s. to 16s. 6d., and inferior 14s. 6d. to 15s. 6d., according to quality. Senna.—Alexandrian.—No change to report, consumers appear to be well supplied. Demand extremely slow. Pods have been sold at very full values. Scammony Root.—No change.

OPIUM MARKET.

Messrs. Barker Brothers, Smyrna, report as follows for the week ending June 26:—The sales this week on our market amount to 68 cases at 14s. to 16s. 6d. per lb. as to quality and crop. So long as this active demand continues we cannot give hopes of any decline, notwithstanding that it is now generally accepted that our crop will reach the high figure of 8,000 cases. A protracted absence of demand may bring down prices 10/15 pence lower, but should we have, for the world's consumption of Turkey opium, 9,000 cases, during 1914 and 1915, as it has been during the past twelve months, then a decline is not possible, for in that case we must expect very important weekly sales, which will maintain the position. The arrivals are 238 cases, against 258 at same date last year.

PRODUCE REPORT.

London, July 9.

Sugar.

The Beet market has been quiet and more or less easier, but the decline in many cases has since been recovered, and with moderate business passing the market is closing steady for August 9s. 4d., October-December 9s. 5d., January-March 9s. 7d., May 9s. 9d., f.o.b. Hamburg Refined, English is rather quiet, only moderate trade passing at previous prices. Foreign, Refined, has been slow of sale, but prices remained fairly steady, July first marks, granulated, offered at 11s. 5½d., August, 11s. 6d., October-December 11s. 5½d., f.o.b. Hamburg. Say's cubes July 14s. 10½d., loaves 14s. f.o.b. Paris, German and Austrian cubes prompt 13s. 5½d. to 13s. 9d.; Crushed 13s. 3d. f.o.b. Hamburg.

Coffee.

The market is fairly active, and prices well maintained. At the auctions 4,757 bags were offered which went off slowly at steady prices. Costa Rica low mid. to mid. sold at 75s. to 78s. 6d., bold 80s. 6d. to 81s. East India small 65s. to 67s., low mid. to mid. 68s. to 73s., bold 73s. to 78s. 6d. Guatemala ordinary to fine, ordinary 54s. 6d. to 64s. 6d., low mid. to mid. 68s. 6d. to 73s. 6d., bold 73s. 6d. to 77s. 6d. Nicaragua good to fine ordinary foxy 55s. 6d. to 58s., fine coloury 83s.

Seeds.

The market remains quiet and more or less unchanged. Linseed is dull and easier. London-Calcutta spot and afloat is quoted 50s., July-August sold at 50s. 6d., August-September 50s. 9d., Sept-October 51s. 3d., La Plata spot, Hull, sold 46s., July-August 47s. 3d. A limited business is passing in Rapeseed, which is dull and easier inclined. Brown Cawnpore July-August 50s. 6d., Yellow Guzerat ditto 55s. 6d. and Ferozopore July-August, new terms at 49s. 9d. Cotton seed is inactive, London-Egyptian quoted July, £8 3s. 9d., August £8 6s. 3d., and November-January £8 8s. 9d. per ton. The market for Canary seed presents no fresh feature, demand is small, but prices, and especially for Turkish, are very firm, owing to restricted supplies. Haricot beans are quiet and without much alteration.

Oils.

Linseed oil is rather quiet, spot pipes, landed, offered at 24s. 10½d., and barrels ditto 25s. 3d. Rape oil ordinary brown naked sold at 30s., refined casks 31s. 9d. Cotton oil is in slightly better demand, crude spot quoted 28s. 9d., refined sweet 32s. to 35s., and ordinary pale 28s. 6d. Roumanian, Russian, also American Petroleum is quoted spot 7¼d. and water white 8¼d. per gallon.

Oilcakes.

Linseed cakes:—There is no improvement in the consumptive demand, which continues extremely small, but values generally are well maintained. Fine seedy Calcutta sold at £7 16s. 3d., to £7 17s. 6d. ex steamer for arrival; best quality Russian make offered at £7 15s. to £7 16s. 3d. ex quay. London made finds a moderate demand at £7 17s. 6d. to £8. Cotton cakes.—Although Egyptians are coming fairly freely, they are disposed of before arrival, and there are buyers now at £4 13s. 9d. to £4 15s., ex ship for June-July shipment, with spot parcels at £4 15s. to £4 17s. 6d., ex quay. Bombay makes are firm at £4 5s., and English £4 17s. 6d. to £5.

Decorticated Cotton Cakes and Meal went off rather more freely at £7 13s. 9d. to £7 15s. per ton ex dock.

EGYPTIAN COTTON MARKET

(From Our Own Correspondent.)

Alexandria, July 3.

After signs of a rally, prices have again fallen. The market in futures has, however, been very active, and export firms have made large purchases in futures in order to cover foreign sales. Uncovered sales are very small, and it is therefore unlikely that there will be a permanent rise in prices.

The Egyptian crop continues to make satisfactory progress. Owing to the mildness of the last few days enormous numbers of eggs have been laid by the cotton worm. Thanks to the prompt measures taken by the authorities, the fields have, however, been cleared, and it is not thought that the worm will have gained hold. Dealings in the new crop are very restricted. The banks are making practically no advances to merchants for the purchase of the new cotton from the interior, and growers are experiencing great difficulty in selling their crop in advance. Owing to the large stock of cotton already in Alexandria, it seems that spinners are in no hurry to make provision for their future needs.

Price of cotton seed is firm, but the amount exported is small.

Messrs. Davies, Benachi and Co., of Liverpool, have received the following telegram from Alexandria, dated Wednesday :—

Market steady. November, 18⅛, January, 18⅛. Exchange, three months' date, 97½.

LIVERPOOL REPORT.

Messrs. Reynolds and Gibson telegraph :—The demand for Egyptian spot has shown little improvement compared with the two preceding weeks, sales amounting to 1,600 bales against 1,300 bales last week. Spinners will only buy for their immediate requirements, and although in certain qualities, notably medium grades Sakellaridis and White Cotton, the selection has become restricted, prices have been on the easy side, and buyers have been able to trade on what appears to be a reasonable basis. Quotations are raised 10 points for all qualities.

MANCHESTER MARKET.

(From Our Own Correspondent.)

Manchester, July 8.

There have been very few signs of improvement in the market during the past week. In both yarn and cloth there is much irregularity in quotations, and the prices taken depend a good deal upon the position of individual sellers. Machinery in both spinning and weaving is not being run at full stretch, and in one way and another producers are striving to cut their losses. A definite attempt is now being made to organise short time in American spinning, and it is thought that the proposal of the Masters' Federation to stop the mills for three weeks before the end of September will be adopted. Manufacturers of cloth will probably make their own arrangements as to stopping looms. There is no particular new feature with regard to the Egyptian cotton crop. Prices are rather steadier, but most of the advices are favourable to the growth. Prices in American cotton are easier on the week, and the plant in certain sections seems to be doing rather better. Our foreign trade in cloth for the month of June, according to the Board of Trade returns, shows a distinct falling off as compared with last year, the takings of India being decidedly smaller. Yesterday and to-day a few more offers have been met with in piece goods for Bombay and Calcutta. Here and there sales have been arranged, but very low prices have had to be taken. China continues unsatisfactory, and most of the bids are altogether too low. No improvement can be recorded in the amount of business offering for Egypt. Financial matters continue to retard progress, and merchants are afraid to commit themselves to orders of any importance. For the Levant a dragging demand has been experienced. Goods are backing up in Manchester owing to customers abroad not being in a position to accept deliveries against old contracts. There has been very little doing in printing cloths, and the Burnley holidays this week have been very welcome. Here and there a little more inquiry has been met with in light fabrics. Shirtings have not been altogether neglected. As is usual at this time of the year, the home trade has been quiet. American yarns for home use have been purchased in small lots from day to day. Prices, when tested, show much irregularity. The outlook for spinners remains poor, and it is hoped that the short-time policy will bring relief. There has not been much workable business offering in yarn suitable for shipment abroad. Bolton spinnings have not been active, but late rates are fairly well held.

SUDAN COTTON.

The following are extracts from the monthly report for May of the Central Economic Board, Sudan Government :—

A Red Sea Province report for May states :—Tokar.—The yield of the cotton crop up to date this season amounted to 19,753 kantars of 315 rottles (142 kilos) as compared with 36,455 kantars last season. This big falling off is attributable to the fact that the Basin was so very poorly watered. New banks, etc., have been made this month, and it is confidently expected that the flood this year will be forced to spread eastward as well as westward, and so flood a large area of land. According to a Kassala Province report for April, up to the end of the month 983 kantars Afifi and 16 kantars of American were sold. A Berber Province report for May states :—A considerable quantity of cotton has been sown on the Government farm at El Damer. It is hoped in the coming year to make the farm something of a centre for demonstrating and pushing improved methods. So far the Ashmuni sown has germinated far better than the Darmali American, while the Zeidab American has germinated worst of all, perhaps owing to the excessive amount of lint on the seeds. Brown and green caterpillars appeared on some young lucerne during the month, and locusts have been seen in most places since the 15th, though not in sufficient numbers to be destructive.

BIG CAIRO FAILURE.

The Egyptian Gazette of June 29 reports that the well-known Cairo firm of A. Sednaoui and Co., trading as manufacturers in the Hamzaoui, and composed of a sleeping partner and Messrs. Antoine, Tewfik and Aziz Sednaoui, ceased payment on June 15, 1914.

"Through Mr. Ferro, lawyer," the *Gazette* adds, "this house deposited its balance-sheet on June 27 with the commercial greffe of the Mixed Tribunal at Cairo, in order to obtain the benefit of a "concordat préventif." The firm states that the filing of its balance-sheet has taken place as the result of a series of losses sustained by the bad condition of trade. The assets amount to about £E42,400 and the liabilities to about £E36,400, that is an excess of the former over the latter of £E6,000 including capital of £E10,000, of which £E4,000 was lost in administration. The assets are composed of £E4,900 in merchandise, £E13,500 in property, £E23,600 in various credits, cash £E100, and in deposit £E900—altogether a total of about £E42,400."

SUDAN MARKETS REPORT.

The following are extracts from the monthly report for May of the Central Economic Board, Sudan Government :—

Gum.—During May 2,431,654 kilos. of gum, valued at £57,693, were exported viâ Port Sudan, and 1,037 kilos., valued at £15, were exported viâ Halfa. During the four months, January to April, 1914, 5,786 tons of gum were carried on the Kosti-El Obeid railway, as against 5,211 tons during the same period of last year.

A Kordofan Province report for May states :—The gum season appears to have come to a premature end this year. The main reason for this is, it is thought, that the trees last year did not get sufficiently watered, and are rather lacking in vitality this year in consequence. In the latter half of April the amount of gum coming into the market in El Obeid fell off considerably. Some optimistic persons believed that this was owing to the price being low, which caused the Arabs to hold up the gum, and that when the price rose a lot would be put on the market. The price, however, during May has risen to almost unprecedented heights, but the amount coming into the market has been steadily falling. Only 19,314 kantars of 120 rottles (54 kilos.) have come into the market during the month, compared with 46,868 kantars in May, 1913, which, however, was the record month. According to a Karsala Province report for May the amount of gum imported and exported during the month at Gedaref was as follows :—3,224 kantars of 110 rottles (49 kilos.) Hashab and 710 kantars Talh exported; 2,210 kantars Hashab and 418 kantars Talh imported. At Mafaza 1,350 kantars of 110 rottles (49 kilos.) Hashab and 155 kantars Talh were exported and 1,160 kantars Hashab and 110 kantars Talh were imported. It is reported from the Sennar Province that the amount of gum put on the market in May was less than in April, 1,635 kantars. This is the result of collectors returning to clean and prepare their lands for cultivation.

A report for Nuba Mountains Province states that exports viâ Kaka, Upper Nile Province, during May amounted to 515 kantars—mostly Talh.

Live Stock.—A Berber Province report for May states that the sheep and cattle in El Damer market during the month totalled 4,031 and 296 respectively. A Halfa Province report states that 106 cattle, 2,619 sheep, 21 camels, 4 goats, 680 hides, and 3,305 sheep skins were exported in May. According to a Red Sea Province report for May 126 camels, 95 sheep, 330 hides, and 8,632 skins were exported during the month.

Cattle Disease.—The following fresh outbreaks of disease occurred during the month :—An outbreak of cattle plague in a small herd of cattle at Rahad, Kordofan Province. Pleuro-pneumonia appeared at Um Hiaia, White Nile Province, affecting six animals, three of which died and three were destroyed. All incontacts, numbering close on 3,000, have been inoculated. Disease in other centres reported last month is being satisfactorily dealt with.

Engineering Notes.

Motor Launches for Greek Government.

One of the two fast motor launches recently completed to the order of the Greek Government by Messrs. John I. Thornycroft and Co., was on Wednesday moored off the Waterloo Bridge Pier, and inspected by a number of visitors. The vessels, which are painted white, are driven by twin Thorneycroft motors of their Z/5 type, giving a combined power of 140 b.h.p. and a speed of a little over fifteen knots. Their length is 50ft., their beam 8ft. 3in., and their depth 4ft. 9in. Their chief interest lies in the arrangement of the engine-room and accommodation. The machinery is amidships, and immediately aft of it is the wheel-house, which has been so designed as to give complete single-handed control of wheel, engines, and searchlight. Telegraphs also communicate with the engine-room. Forward of the engine-room is the even space with seats and lockers on either side, the seats being wide enough to be used as sleeping berths. The accommodation for officials is all arranged aft. In the stern sheets is a well-protected cockpit, fitted with a secondary steering wheel, and a twin engine-room telegraph that communicates with the wheel amidships. Forward of this is a large saloon fitted with sofa seats that can be converted into wide berths. The fuel is carried in two tanks that have a capacity of 140 gallons. Both vessels have successfully gone through their trials.

Central Gharbieh Drainage.

The Egyptian Mail reports (under date of July 2) that the portion of the Central Gharbieh Drainage Scheme which centres around Salahib, or Hamoul-Barrari as it is more commonly known, is practically completed. The great syphon, consisting of five steel pipes each 205 metres long, embedded in concrete, which will carry the Bahr-el-Tirah under the Salahib Drain, is finished. The lock through which boats will pass out of the Bahr-el-Tirah into the Drain (which is a navigable one with a depth of over three metres) is also completed. The Egyptian Delta Railway portion of the work, consisting of the provision of a steel swing bridge to carry the metals of the railway across the Drain, has been finished for some time.

The "Baltim" Station.

In connection with this drainage scheme, the *Mail* points out that the actual site for the pumping station is not at Baltim, but at or near Khasha, where Messrs. Wills and Son have erected the headquarters of the work in connection with the scheme which they have contracted to carry out. "We understand," adds the *Mail*, "that there has been some idea on the part of the Government to pitch the pumping station nearer the sea, not in the direction of Baltim, which is north-west from Khasha, but some five kilometres due north from the latter place. In such an event the refuse water brought up by the main drain, which it will be the business of the pumping station to dispose of, would have been pumped directly into the sea instead of into Lake Borrollos. This idea does not seem to have matured, however, and so far as we know the original plan of pumping into the lake will be adhered to."

Ramleh Drainage Works.

The work of draining Ramleh will be begun in about four months' time. At present the scheme is confined to the main collectors, which will eventually deal with surface water and sewage, but for the time being will only be used for rain water. Thus the continual deluges in the low-lying parts of Ramleh will soon be a thing of the past. The main scheme (says *The Egyptian Gazette*) will gradually be continued, as funds come in, until a complete system of drainage has been established.

Egypt's Oilfields.

Apropos of the theories, often advanced in the past, that the Egyptian oilfields had no future before them, and that the wells that had struck oil would not prove permanent, *Eastern Engineering* remarks: "Recent discoveries, however, suggest that the basis on which all these theories were advanced was false, and that the geology of the field was only very imperfectly understood. Some 7,000 feet of sedimentary strata have had to be added to the preconceived notions of the stratigraphy, and it is now admitted that the conditions on the shore of the Red Sea are much more similar to those in the vicinity of the Caspian Sea than was previously thought possible. At the same time, however, the indications suggest a more sporadic occurrence of oil in Egypt. The rocks, of the Miocene Age, which form the reservoir for the oil, are broken up into patches, and are liable to be invaded by water as the oil is withdrawn. Up to the present, however, every borehole which has struck oil has yielded a handsome profit before it has ceased to flow. The Miocene beds extend to a thickness of some 300 ft. as a maximum, and beneath them, it is held by some oil-well engineers, there are other rocks saturated with oil, which, when they are tapped, will yield a supply that will raise Egypt to the rank of a large oil producing country."

A Cement Substitute.

We are not accustomed to looking to Turkey for inventions, especially of a mechanical character; but the *Mechanical World* gives some particulars of a substitute for cement that is, it states, employed in Turkey, and has been found to give good results:—"When applied in exposed places, in filling crevices in waterpipes, covering joints in stone floors, in fountains, and for numerous other purposes where cement would be required. The mixture is as satisfactory in water as in exposed places, but it must be allowed to become thoroughly dry before it is submerged. It consists of slaked lime, linseed-oil, and cotton fibre. Generally a hollowed-out stone is used, although a flat, hard surface will answer, and the process is started by pouring the oil on a handful of cotton, after which the lime is dusted in. It is then kneaded until the whole is thoroughly mixed and about the consistency of dough. The more it is kneaded the better it becomes."

A New Electric Meter Device.

An electrical instrument has been developed that promises to be of considerable value to electric light and power companies, for it will enable them to sell current at two rates and to measure it at the rush and slack hours with the same meter. The device responds to a momentary slightly higher current wave than normal, and it shifts the meter from one rate of register to the other. Thus, when the lighting load is heaviest in the early evening, the meter is set to register at the high rate, but when the demand falls off after midnight, the wave impressed on the circuit shifts the meter to register at the lower rate.

TENDERS INVITED.

[*The London agent of the Egyptian Government is Sir A. L. Webb, K.C.M.G., Queen Anne's Chambers, Westminster, S.W., at whose office particulars of tenders marked (L) are to be obtained.*]

[*Further information concerning tenders marked (B) can be obtained by United Kingdom manufacturers and merchants at the Commercial Intelligence Branch of the Board of Trade, 73, Basinghall Street, London, E.C.*]

EGYPT.

Drainage Works.—Tenders are invited by the Municipality of Alexandria for the construction of a drainage system for that town. The work comprises (1) the construction of a general system of sewers, (2) the erection of a pumping station at Kaïd Bey, and (3) the construction of a main outfall into the sea. Tenders may be made for the whole or for part of the work. Dec. 8.

Brass Buckles, etc.—Tenders are invited by the Egyptian War Office for the supply of brass buckles, studs, hooks, plates, etc., for bandoliers and belts. Aug. 17 (L.).

Galvanised Sheets, etc.—Tenders are invited by the Egyptian War Office for the supply of galvanised sheets, etc. Aug. 18 (L.).

Water and Dust Carts, etc.—Tenders are invited by the Municipality of Alexandria for the supply and delivery of twelve water carts to municipal pattern, three double four-wheeled dust wagons with patent tipping gear, two sanitary carts, twenty-five three-wheeled hand dust carts, six drain carts, for removal of sewage and gully trap matter (designs required), and three machine brushes (designs required). July 28 (B.).

Bitter Oranges.—Tenders are invited at the Egyptian Ministry of Agriculture for the supply of 20,000 bitter oranges. August 15.

MONTENEGRO.

Matches.—Tenders are invited by the Administration of State Monopolies, Cettinje, for the supply of matches required during the period 1914-17. July 28.

Military Cloaks.—Tenders are invited by the Montenegrin Ministry of War, Cettinge, for the supply of 5,000 military cloaks. July 19.

BULGARIA.

Copper Wire.—Tenders are invited by the Municipality of Varna for the supply of 3 tons of copper wire for electric lighting. July 20.

SERVIA.

Brass, Steel, Iron.—Tenders are invited at the Servian War Office, Kragujevatz, for the supply of brass in bands, extra hard steel, iron, cast steel, etc. July 20.

Spades.—Tenders are invited at the Servian Ministry of War, Belgrade, for the supply of spades and similar goods. July 23.

Sacks.—Tenders are invited by the Servian Ministry of War, Belgrade, for the supply of 10,000 sacks. July 16.

NEWS FROM ALL SOURCES.

Our Belgrade Correspondent informs us that Servia intends sending delegates to the International Petroleum Congress, which takes place at Bucharest on August 13 next.

In his report for 1913 on the trade of the Piræus and district [Cd. 7,048-107] Mr. Consul Norcop says that the total indebtedness of Greece, including the new loan, amounts to £62,827,000, representing about £12 1s. per head of the inhabitants, while the annual charge for the service of the debt, including sinking fund, will amount to £1,487,000. The group issuing the new loan take it over at 87½, and the issue price is 93½, but, deducting stamp duties, the actual sum coming into the Greek Treasury will only amount to £8,560,000. Thirty years ago, when the population of Greece was less than 2,000,000, the loan of 1884, which was also of 5 per cent., was issued at 68½.

Messrs. R. J. Moss and Co., Alexandria, report that 759,020 tons of coal were imported into Egypt between January 1 and June 25, as compared with 665,925 tons in the same period of 1913.

The U.S. Consul-General in Cairo reports to his Government that sisal growing is to be undertaken in Egypt. One cultivator in Behera Province is stated to have taken up 1,000 acres for planting this fibre.

According to the *Oesterreichisch-Ungarische Konsular-Korrespondenz* (Vienna), there is a good demand in Bulgaria for bicarbonate of soda. This product is imported from Great Britain in two different qualities, at £7 5s. 0d. per ton and £6 8s. 0d. per ton of 22 casks.

Eastern Engineering reports that with the object of economising the supply of irrigation water in the Nile Delta, the ordinary discharge outlets from the canals are being replaced by pipes of dimensions suited to the areas to be irrigated.

The Biskra-Tuggurt extension of the Algerian railways has been opened to traffic.

According to the *Oesterreichisch-Ungarische Konsular-Korrespondenz* (Vienna) the following articles and products meet with a ready sale at Bourgas (Bulgaria), viz. :—Cooking utensils in enamelware, bottles, writing and packing paper, furniture, hardware, cement, glucose, wire-netting, corrugated iron. Italy is greatly increasing her importation of cables and rope, thread and cottons.

According to the May report of the Central Economic Board, Sudan Government, a report for April, received from the Bahr El Ghazal Province, states that 120 cocoa nuts were recently received from Jamaica as an experiment, but at present they show very little inclination to sprout, although the careful instructions as to their sowing sent by the grower were followed.

The construction of the road from Kirdjali to Gumurdjina is being actively pushed forward. More than 5,000 workmen are being employed, and it is hoped that the road will be completed towards the end of August.

In his inaugural address as president of the annual congress of the Royal Sanitary Institute, which is being held during this week at Blackpool, Lord Derby stated that Lancashire, through the Liverpool School of Tropical Medicine, had played a prominent part in the cure of Mediterranean Malta fever. In 1904 there were 320 cases of this disease and twelve deaths. In 1910-1911 there was not a single case, and in 1912 there were three cases.

Messrs. S. L. Behrens and Co., 16, Oxford Street, Manchester, have issued the following circular :—

"We beg to inform you that the shipping branch of the business carried on hitherto at 16, Oxford Street, under the firm of S. L. Behrens and Co., has this day been formed into a private limited company under the style of S. L. Behrens and Co. (Manchester), Limited, who will take over all pending contracts and will continue the business as before without change in the management and at the same address."

COMPANY MEETINGS.

EGYPTIAN HOTELS.

The seventeenth annual general meeting of the shareholders of The Egyptian Hotels, Ltd., was held at 11, Ironmonger Lane, E.C., on the 8th inst. Mr. E. A. Harrison presided in the unavoidable absence of Lord Claud Hamilton, the chairman of the company.

The representative of the Secretaries (Messrs. W. B. Peat and Co.) having read the notice convening the meeting and the auditors' report, the Chairman said:—

"The accounts for the year ended April 30, 1914, disclose a welcome improvement on those of the previous year, the profits of the hotels showing an increase of £7,033 13s. 8d. The season was a little late in commencing; otherwise the improvement would have been still more marked. Shepheard's Hotel was, as usual, our chief source of revenue and stands at the head of hotel business in Egypt. The hotel (including the structure, furniture and fittings) has been maintained in a high state of efficiency. Notwithstanding the increasing influx of visitors to Shepheard's Hotel the "service de cuisine" and the comfort of the clientèle have been highly satisfactory. The management reports that its efforts have met with entire approval. At Ghezireh, after deducting sums received as compensation and for the sale of old materials, a net expenditure of £6,468 4s. 3d. has been made in alterations of the property rendered necessary by the Government acquiring a portion of the Nile frontage and in altering and considerably improving the internal arrangements of the hotel. The local directors report that the expenditure has been amply justified by the results. At Hotel Semiramis, which is carried on under the company's auspices, the receipts show a marked improvement, and this has been brought about by catering for the best class of the travelling public. It has also benefited by the overflow from Shepheard's Hotel and in other ways by its association with our hotels. The larger proportion of visitors to Egypt are in the habit of making their residence there during the spring months. It should be pointed out that the climate of Egypt in November and December is delightful and pleasant. The Nile service and all the amusements are available, and those visitors who would prefer to stay in Egypt at a less crowded season of the year might be well repaid by a visit during these two months. In spite of the increased cost of food and other items, the relative percentages of cost calculated on the gross takings show a satisfactory improvement. The sinking fund for the redemption of the debentures not being in operation any longer and having served the purpose of a depreciation fund while it existed, the sum of £5,611 16s. 2d. has been charged to profit and loss account for depreciation of plant. After this charge has been made and interest on loans provided for, there remains a profit of £16,944 16s. 9d. The amount brought forward was £4,016 17s. 4d., leaving available for distribution £20,961 14s. 1d. Out of this the directors recommend the payment of a dividend of five per cent. on the Preference and ten per cent. on the Ordinary shares, absorbing the sum of £18,250. leaving a balance of £2,711 14s. 1d. The company's freehold and leasehold land and buildings stand in the balance sheet at £193,750 13s. 6d., which figure represents the original cost plus additions from time to time, but deducting large amounts received from the sale of land. A valuation obtained in connection with the new loan of £75,000 placed the value of the company's property at a figure greatly in excess of the book-value. The unsecured liabilities of the company are very small, the greater part of the sundry creditors consisting of a claim for income tax, a large portion of which will not have to be paid if the appeal to the House of Lords which is now pending is decided in our favour. The Court of Appeal recently decided the case in favour of the company, and the Crown has given notice of appeal to the House of Lords. I cannot conclude without expressing the board's high appreciation of the able manner in which the hotels have been managed by Mr. Baehler and his staff. I now beg to move:—'That the directors' report and accounts for the year ended April 30, 1914, as submitted to the shareholders, be received and adopted.'"

Mr. Charles Baehler (managing director) seconded the motion, which was carried unanimously

The chairman next moved: "That dividends of 5 per cent. on the Preference shares and 10 per cent. on the Ordinary shares of the company for the year ended April 30, 1914, as recommended by the directors in Egypt, be and the same are hereby declared payable on and after Wednesday, July 15, 1914.

This was also seconded by Mr. Baehler and unanimously agreed to.

The retiring directors, Mr. Charles Baehler and Sir William B. Peat, were re-elected, and Messrs. Turquand Youngs and Co. were re-appointed auditors.

A resolution was also passed expressing the shareholders' appreciation of Mr. Charles Baehler's management of the hotels and of the assistance rendered by his staff.

A vote of thanks to the chairman concluded the proceedings.

RUSSIAN PETROLEUM COMPANY.

Mr. Herbert Allen, presiding at the annual general meeting of this company, held on the 7th inst., said that when the company was formed four years ago it was recognised that the year 1914 would be a critical one in its existence, because they knew that this year they would have to discharge four years' accumulations of debenture interest, amounting to £72,000, besides having to meet a heavy capital outlay. As recently as twelve months ago, when the weekly production dropped to 77,000 poods, owing to the loss of four of their best wells, and the shares fell in the market to 2s., against the present price of 4s., the position looked almost hopeless. Happily, however, by the skill, energy, and patience of the management at Baku, those four wells were restored to production, and their average weekly output recovered to over 100,000 poods. This, combined with the high price of oil, had enabled them to surmount their financial difficulties and to meet that day with a great burden removed from the company's shoulders. They had long recognised that the only possibility of restoring the undertaking to a condition of real prosperity lay in deep drilling, and at the present moment they had no less than five deep wells rapidly nearing a prolific oil source. Without those deep wells they might continue a humdrum existence, and even attain a certain measure of success, but if only two or three of the deep wells come up to their hopes they might easily see the company jump into a position of great prosperity. The capital expenditure for the year had been £63,950, about two-thirds of which was on wells account. From the production and sale of oil they had made £90,664 profit on the year. Sundry items of income in London brought up the total revenue to £93,241, which was reduced by administration charges and debenture interest to £68,796. Out of this they were writing off the whole of the expenses associated with the formation of the company, amounting to £52,172, and the remaining £16,624, which was too small a sum to divide, they were setting aside to reserve. With all these preliminary expenses written off and the big accumulations of debenture interest out of the way the next balance-sheet should present a much healthier appearance. The debenture trustees had in hand a sum of about £15,000, which would shortly be applied to the purchase of debentures. For nearly a month past the whole of the Baku oilfields, including their own, had been closed down owing to a general strike of the workmen. Their financial position was by no means unsound, and the physical condition of the properties would compare favourably with that of any other on the Baku field. On 88 per cent. of the production the company paid no royalties, whilst their properties were compact and economically worked; and, with a good production, they could make a handsome profit where many companies could not pay their working expenses. The shares of the company, as of nearly all other oil companies, he agreed were speculative; were it not for that they would not find Baku people ready to pay 4s. or 5s. each for them, as they were doing just before the labour troubles.

BAKU RUSSIAN PETROLEUM.

Mr. Herbert Allen, presiding at the annual general meeting of the Baku Russian Petroleum Company, Limited, held on Wednesday, said the result of the year's operations was a profit of £106,810. The oil produced from their properties was 8½ million poods, or 140,000 tons, an average of nearly 3,000 tons per week. For the oil sold they had obtained an average price of about 42¾ kopecks per pood, or, say, 54s. per ton, which was rather better than the official average Bourse price for the year. Their profit equalled 17.61 kopecks per pood, against 6.01 kopecks in 1912, and 1.68 kopecks in 1911. Recently the price had dropped to about 35, from which the present strike had run it up again to 47½. He considered 35 kopecks a reasonable price and one at which any well-managed property should make a fair profit where the royalties were not too high. Russia possessed immense areas of rich oil lands which, in any other country, and even in Russia itself under intelligent and reasonable State regulations, would give a constantly growing production. What with royalties on crude and excise duties on refined oils the Russian Treasury took £10,000,000 sterling per annum out of the oil industry, or about £1 per ton all through. The Government seemed to discourage production in every conceivable manner. It allowed foreign oil to be imported duty free to compete with her own oil industry, but on machinery which would assist the development of her own oilfields she imposed the most prohibitive import duties. Nearly every other country admitted mining machinery free of duty. The capital expenditure in the past year had been £83,740, namely, £60,837 on lands, wells and buildings, and £22,903 on plant and machinery. Of the latter amount £17,382 was for new electric motors and oil and gas engines. Of the £60,837 laid out on the properties, no less than £54,490 was spent on wells. An attractive feature in the accounts was the substantial nature of the liquid assets, which amounted to £134,599. The liabilities had been enormously reduced in recent years, at the same time that they had written down the properties. The debenture debt was now only £100,905, or £28,075 less than it was four years ago. The Russian Government loan was now only half the original amount. On the whole, the liabilities were quite inconsiderable by comparision with the liquid assets, and altogether the company was in a sound financial position. Of the profit of £106,810 they had set aside £6,018 for debenture interest, £5,000 for taxes, £40,000 for depreciation, and £40,000 to general reserve. The remaining £15,791 was being carried forward—two-thirds, or £10,527, to the credit of the ordinary shareholders and one-third, or £5,264, to the credit of the holders of profit-sharing notes. There was no question of a dividend having been earned, even after making the most generous allowance for depreciation, and they had the money with which it could have been paid. Whatever doubts the directors might have had a month ago as to the expediency or otherwise of paying a dividend had been settled for them by the general strike throughout the Baku field which broke out on the 11th ult., and which still showed no signs of abating. Apart from the strike, they had still a somewhat heavy boring programme before them, if they were to complete all the new wells that had been started and to deepen all the old wells which were capable of being deepened. Besides this, they contemplated a considerable outlay for rotary and other drilling machinery and various innovations, which they hoped might have the effect of economising future capital expenditure, whilst expediting work and subsequently reducing production expenses. No report previously issued by the company had met with so little adverse criticism from shareholders as the present one, and in both the Press and the Stock Exchange the directors had been commended for not paying a dividend in face of the serious strike at Baku. He was sure that no Board of Directors with any sense of responsibility would have adopted any other course under similar circumstances.

Stock and Share Markets.

Bank Rate 3 per cent. (Jan. 29, 1914.)

SETTLING DAYS.

CONSOLS.
Wednesday, August 6.

STOCKS AND SHARES.
In Mining Shares the next carry-over is July 24.

Continuation Day.	Ticket Day.	Pay Day.
Mon., July 27	Tues., July 28	Wed., July 29
Tues., Aug. 11	Wed., Aug. 12	Thurs., Aug. 13

LONDON, July 9.

The market seems inclined to droop. This is a sad commentary on the state of nerves that the British public is suffering from. We were promised a boom if the Ulster question was settled and the French Loan a success. The latter has happily ended and the former looks as good as ever. Yet there is no boom, and the Stock Exchange, after having marked up prices all round has let them down again. The new issues are received languidly, but the South Indian trustee bonds were readily taken. Money continues cheap, and is likely to remain so for some months to come. Therefore, gilt-edged stocks should soon recover and may be safely bought.

Balkan Loans.

In the foreign market Paris, in spite of the immense success of the national loan, remains depressed. Berlin and Vienna are afraid of trouble with Servia, and it is said that the Servians are finding a difficulty in floating their new loan. Bulgaria has apparently concluded her arrangements with the German group. Egyptian Unified have been a good market all the week at 99¼. Bulgarians are quoted 82 and Greek Fours made up at 51¾. Hungarian Rentes have weakened to 79½ and Turkish Unified carried over at 81.

Rail Recovery.

In the Home Railway market the excellent traffic returns of the Great Western have at last had effect and the price is 115½. Midland deferred are 72 and Great Easterns have recovered to 49. The figures, taken as a whole, are reasonably good and there is plenty of room for a rise thoughout the whole list. Americans have been purchased, but there seems to be no steam behind the bull movement. Chesapeakes have been offered. The soundest stocks in the market appear to be Unions and Southern Pacific.

Rubber Dull.

Rubber shares are dull. The Malacca figures are very bad and the shares are much overvalued. Anglo-Dutch are offered on the trouble with the Government. The Ciceley dividend is cut in half but the reduced distribution will easily be paid for the current year.

Egyptian Oils Bought.

The Egyptian output was good and there has been some small buying of Anglo-Egyptian B, which are now quoted 1¼. Eastern Petroleum have also hardened to 8s., and Suez are now 8s. 6d. Spies were purchased on a good cable from the property stating that the water had been kept out of the new wells. This is very satisfactory. Mexican Eagles are steady, and Roumanian Consolidated continue to be purchased, the news being good.

Mining Relapse.

The Mining market, after having shown some signs of life, has now relapsed. Shamva report was not liked and the shares have been offered. Kyshtim, although it pays an increased dividend, disappointed the dealers. The main excitement in the Mining market has centred round the Kirkland group, in which the rig continues. We need hardly say that it is extremely dangerous to buy shares in this section, as the carrying-over facilities are practically non-existent.

Egyptians Fairly Active.

There has been a fair business doing in some sections of the Egyptian market. There seem to be always a few buyers about, but the difficulty is to find a seller. Egypt stands aloof, but Paris has been picking up a few shares and may come in a good buyer now that the national loan is out of the way. National Banks have been dealt in at 13 15-16, and Agricultural Banks have also been purchased, a fair business having been done at just under 5. Land Banks remain at 6¼, and Bank of Abyssinia at 5s. There has been some business in Delta Light Railway prefs. at 8½, and the deferred are quoted 1¼. Delta Lands have not been quite so active as they were last week, but the price remains steady round 9s. 6d. Behara have been offered, a small quantity of shares came on the market and the price dropped to 8¼. Union Foncière are now 1¼. Alexandria Water are still 12½, and Aboukir Land are called 21s. 6d. United Lands have been purchased at 1s. 9d. Salts are steady at 15s., but New Egyptian are a shade weaker at 9s. 6d. to 10s. Markets are 23s. 6d. There has been some enquiry for Khedivial Mail prefs. at 3⅝, and a few bargains have been done in the ordinary at 10s. Daira Sanieh are weak at 2s. 6d. Ginners are nominally ¾ and Charbieh Land 1¼.

Egyptian Hotels Report.

The Egyptian Hotels report is very satisfactory. These admirably managed concerns show a profit for the year of £30,651, or an increase of £7,033 on the year, and after paying debentures and London charges, and placing £5,611 to depreciation, 5 per cent. is paid on the preference, whilst the ordinary dividend is raised to 10 per cent. No one knows better than Mr. Baehler that in order to keep an hotel prosperous it is necessary that it should be up-to-date. It is therefore very satisfactory to see that he has spent out of revenue £9,981 on maintenance and £7,327 has been charged to capital account, being expenditure on buildings and plant. This money has, of course, gone in the improvement of the Ghezireh Palace. The Egyptian Hotels Company owns some of the best and most famous hotels in Egypt, and the preference shares are an admirable investment, whilst the ordinary on their present dividend look extremely attractive.

BULGARIAN FINANCES.

(FROM OUR OWN CORRESPONDENT.)

SOFIA, July 6.

The administration of the Bulgarian Public Debt has already remitted the necessary amounts to meet the sinking fund charges and interest on the various State loans for the next six months, and also for the municipal loans of Sofia and Varna. The total sum involved there, which amounts to 16,803,006.70 frs. (£672,120) has been taken exclusively from the regular Budget revenue.

The revenue receipts are steadily increasing. For the first four months of the present year the total reached 68,619,095 frs. as against 48,387,808 frs. for the same period in 1912.

COMPANY NOTES.

Deutsche Palæstina Bank.

Under the heading "Jerusalem the Golden," *The Financier* publishes a note in which it says:—The German Bank of Palestine, with headquarters in Berlin, is hardly answering the expectations of its founders, the accounts for 1913 presented last week to the shareholders showing an available surplus of only £85,622. After writing off allowances to the directors and employees, taxes and preliminary expenses—reducing the last-mentioned item to one mark—there remains a balance of £74,508, which is carried to a new reserve fund. The turnover of the institution has steadily diminished, and the commercial side of the business has practically been abandoned, the branches in the East having been closed. No man is a prophet in his own country, and the Chosen People appear to find larger profits abroad than on their own native heath.

Sucreries et Raffineries en Roumanie

The Sucreries et Raffineries of Roumania have decided to build another factory at Giurgevo on the Danube. The Roumanian Government has already consented to the sale of a plot of ground 70 hectares in extent, and the work of construction will be begun immediately. The new factory will have a capacity of 1,200 tons of beetroot a day, which it is hoped to raise to 2,000 tons. The factory will have access to the railway at two points, and beet will be brought to the works by water and road as well as by railway. If all goes well, it is hoped to start operations in the autumn.

United Tramways of Bucharest.

At the annual general meeting of the shareholders of the United Tramways of Bucharest, held on June 30, the chairman explained the causes for the poor results of last year's traffic. The horses belonging to the company had been requisitioned by the Government at the time of the mobilization of the army, and it was only when all fear of war had passed that they had been able to purchase a fresh supply and to begin to train them. Owing to this cause receipts for January had fallen by 20 per cent., but for April the decrease was only 0.89 per cent. The receipts for May showed an increase of 3¾ per cent. Up to June 20 a slight decrease compared with last year was shown, but this was due partly to bad weather and partly to the fact that the annual fair had ended on June 7 instead of on June 14, as in 1913.

NEW COMPANIES.

Castelli Carpet Company, Ltd.

A new company with the above title was registered June 27th, with a capital of £125,000 in £1 shares. The object of the company is to carry on the business of buyers, exporters and importers of, and dealers in, Turkish, Persian and other carpets, rugs, mats, linoleum, oil cloth, matting, floor coverings, etc. Minimum cash subscriptions, seven shares. First directors: F. H. King and H. I'Anson Jones, both solicitors, of 62, London-wall, E.C. Remuneration as fixed by the company. The registered office is at Salisbury House, London-wall, E.C.

Balkan States Development Trust, Limited.

A "private" company with the above title was registered July 1, by W. Webb, 27, Bessborough Street, Westminster, S.W., with a capital of £2,000, in 1,900 preference shares of £1 each and 2,000 management shares of 1s. each. The objects are to take over and turn to account any petroleum, asphalte, naphthaline, coal or oil-bearing lands, etc. The first directors are not named. W. Webb is first secretary. Remuneration, as fixed by the company.

COMPANY RESULTS, &c.

AGRICOLE ET INDUSTRIELLE D'EGYPTE.—The payment of the debenture coupons falling due July 1, July 15, and August 1, has been postponed.

ANGLO-EGYPTIAN OILFIELDS.—Gemsah, production for the week ended 6th, 2,379 tons (previous week 2,232 tons); Hurgada, production for week, 90 tons (previous week, 89 tons).

CHEMINS DE FER ECONOMIQUES DE L'EST EGYPTIEN.—Payment of dividend on 3½ per cent. debenture coupon No. 34 is announced at the Banque de Paris el des Pays Bas.

EGYPTIAN DELTA LIGHT RAILWAYS.—Receipts for ten days ended June 20 amounted to £E6,672, a decrease of £E622, as compared with the corresponding period of last year.

ETABLISSEMENT OROSDI-BACK.—The dividend proposed for 1913-14 is 14 frs. per share, as against 12 frs. for the previous period.

OTTOMAN 5 PER CENT LOAN.—The Imperial Ottoman Bank announces the payment of the bonds drawn for redemption at par of the Ottoman 5 per Cent. Loan of 1896.

OTTOMAN FOUR PER CENT. LOAN, 1894.—Payment is announced of coupon No. 41 and of 309 bonds drawn for repayment June 2.

OTTOMAN RAILWAY FROM SMYRNA TO AIDIN.—Receipts for the week ended July 3 amounted to £8,479, an increase of £241 over the corresponding period of last year.

Digitized by Google

PIRÆUS, ATHENS, AND PELOPONNESUS RAILWAY.—Receipts for the month of May amounted to 656,402 drachmai, an increase of 50,191 drachmai over the corresponding period of last year. Aggregate receipts from January 1 amounted to 3,451,242 drachmai, an increase of 352,613 drachmai over the same period of last year.

ROUMANIAN CONSOLIDATED. — Cablegram from Ploesti, dated July 6: "Moreni, Well No. 24 still flowing. Baicoi, Well No. 1 flowed 100 tons on Thursday; now shut down to complete tankage arrangements; looks very good."

RUMANISCHE A. ELEKTRIZITATS G.—The net profit for 1913 amounted to 125,539 marks, as against 71,949 marks in 1912. The dividend is fixed at 5 per cent. on the capital of a million marks belonging to the A.E.G., of Berlin.

TRAMWAYS D'ALEXANDRIE.—Receipts for May, 1914, amounted to 214,210 frs., as compared with 202,399 frs. in May, 1913. The receipts for the eight first months of the year 1913-14 amounted to 1,586,416 frs., compared with 1,524,875 frs. for the corresponding period of the preceding year, showing an increase of 61,541 frs.

TURKISH LOANS.—The Imperial Ottoman Bank announces the payment of the half-yearly coupons due July 14 and the bonds drawn for redemption at par of the Ottoman 5 per Cent. Loan of 1896, together with the coupons then due of the Four per Cent. Loan of 1901-5, Customs 1902, and 1904 Loans, also the coupons due July 14 of the Four per Cent. Loan of 1908, which are payable at the offices of the Imperial Ottoman Bank and Messrs. Stern Brothers.

NOTICE.

SOCIETE ANONYME DU BEHERA.

Notice is hereby given that an EXTRAORDINARY GENERAL MEETING of the shareholders of the SOCIETE ANONYME DU BEHERA will be held on Wednesday, the 15th July, at 4·30 p.m., at the Office of the Company, 10, Rue Adib, Alexandria, for the purpose of:—

The confirmation, in execution of article 30 of the Statutes, of the provisional resolution taken at the Extraordinary General Meeting of shareholders held on June the 22nd, 1914, concerning the Convention by which this Company acquires the whole of the Assets of the Sidi Salem Company of Egypt, in payment of the balance of the latter's debt.

The text of this Convention can be seen at the Company's Office by shareholder's wishing to acquaint themselves with it.

Every shareholder holding 20 Ordinary shares or 500 Preferred shares has the right to attend the General Meeting provided that the shares be deposited in accordance with article 24 of the Statutes.

For the SOCIETE ANONYME DU BEHERA,
THE BOARD.

Alexandria, 24th June, 1914.

(In London the shares may be deposited with the National Bank of Egypt, 3 and 4, Lothbury, E.C.)

AN APPRECIATION: By Percy F. Martin, F.R.G.S.

Considerable public attention at the present time is being directed to the kingdom of Servia, partly on account of the regrettable illness of the King—one of the most picturesque figures in Europe—and partly by reason of important pending financial arrangements in which English financiers may not improbably take a hand. As the head of the famous Kara Georgeovitch, King Peter has fully maintained the reputation of his house, a house which rightly should have suffered no interruption in its occupancy of the throne of a country whose history it had done so much to build up. No one can read of the heroic deeds of the Kara Georgeovitch, whether they be those of the great leader, Georg Czerny—surnamed Kara Georg or "Black George"—between the period of 1804 and 1813, or those of his son Alexander, between 1842 and 1858; or, yet again, of those of his grandson, the reigning King, without entertaining an intense admiration for a patriotic race possessed of great powers of endurance, pluck, and determination.

If the history of Servia has been stressful, it has likewise been intensely romantic and even pathetic; it has proved something less dreadful than Voltaire's scathing description of history in general—"qui n'est que le tableau des crimes et des malheurs."

The whole population of Servia a year ago was officially given as 5,000,000, which, if correct, would prove that the Servian race has increased to the extent of one and a-half million since 1900. Inasmuch, however, as over 70,000 males were killed or seriously wounded during the late Balkan War, these figures need revision. Assuming, however, that the number of inhabitants as stated is correct, the proportion to the square mile would not be large in view of the fact that the country now includes the whole of "Old Servia" (consisting of the greater part of the vilayets of Macedonia), the outcome of recent military operations. To secure this extra territory it has cost Servia, besides the loss of so many of her brave sons, the sum of £18,000,000.

Fully 90 per cent. of the people of Servia live in the country, the towns—of which there are but a dozen ranking as of any importance—absorbing 500,000 inhabitants at the most. Next to Belgrade, the capital, the largest town is that of Nish, with 25,000 people; Kraguyevatz, which claims a population of some 18,500, comes next; after which rank Leskovatz, with 14,300; Pozharevatz, with 13,450; Shabatz, with 12,100; Vranya, with 11,500; and Pirot, with 10,800.

The Industrious Serb.

One seldom observes an idle person in Servia; not only do the women work strenuously from dawn to long past sunset, and the children, so soon as they can toddle, are taught to do something with their small hands, but the men find continual employment in farming land, breeding cattle, and tending their vineyards. In the towns there is, perhaps, less industrial animation, which, however, is compensated for by the extreme exhilaration prevailing in political circles. Every man and every boy seems to consider himself a second Stephan Dushan, and would hardly blush for shame even if his record were as sanguinary as that of the merciless subjugator of Macedonia and Albania.

A serious drawback to the advancement of Servia is occasioned by the fact that she cannot live upon terms of amity with anyone of the different neighbours who surround her—with the Hungarians, who, just across the Danube, continually grimace at and threaten her; with the Bulgarians, with whom she was quite recently engaged in deadly war grip; with the Montenegrins, notwithstanding that the King's wife was a Montenegrin princess (Zorka, one of the six daughters of King Nicolas); with the Albanians, with the Roumanians, or with the Greeks. Although this lack of neighbourly friendliness is in no way the fault of the Servians—as they will assure you with fervour, and with many protestations of their brotherly love for all of their neighbours—the fact reflects disadvantageously upon the trade and commerce of the kingdom, which depends for much of its prosperity upon the number of pigs and the amount of the agricultural produce and animal products which it can dispose of to its neighbours, or to other foreign customers who—by reason of Servia's geographical position—can only be reached through those neighbours' territories.

With more amicable relations in existence, and with mutual interests as an incentive, Servia should become one of the more prosperous Balkan nations. Her swine are the finest to be found in the whole of Europe—the Servians declare "in the whole of the world," and they are probably right—her maize is the heaviest, her wheat is among the best, and her honey is certainly the most delicious. In all of these, and some other, products a considerably larger trade might be enjoyed if better relations could be cultivated and maintained with the neighbouring Balkan peoples, and if the inhabitants themselves thought a little less about making war and rather more about cultivating their naturally rich and productive country.

An Heroic People.

Perhaps any but a war-like sentiment could hardly be expected among a heroic race whose every national ballad is a rejoicing over some sanguinary victory, or a lament over some crushing defeat. The earliest Servian literature—bombastic and panegyrical as it is—gloats over the warlike deeds of former riotous kings and martial bishops—of exploits attributed to Kings Radoslaff, Vladislaff, Urosh, Dragutin, and of an Amazonian queen named Helena. Down through the ages of this country's rich literature the same theme prevails even during the 15th, 16th, and 17th centuries when Slavonic letters were supposed to have reached a high pitch of culture. The Serbs, who date their history as a nation from 638 A.D., show during the past twelve hundred years hardly any diminution in their spirit of pride and independence, nor of their quickness of temper and inability to brook any kind of control, while their love for making war is apparently unquenchable.

As men of affairs the Servians are almost simple, but very honourable. Commercial intercourse with other European nations has, so far, in no way contaminated them, and in the majority of transactions the word of a Servian ranks higher than the bond of a great many other people. Once a pledge is given, it is as strictly adhered to as if the promise had been legally inscribed, solemnly sealed, and duly witnessed; the Servian, as a rule, does not understand breaking his word, but he is an adept at breaking heads.

Trade with Britain.

To those living at a safe distance the Servians appear to be a most desirable people with whom to carry on business relations. And yet the amount of trade conducted between them and ourselves amounts to a very insignificant total. Moreover, it is one which is becoming less as time goes on, while commercial transactions with other nations tend to become larger. Thus we find that in the year 1910 the imports from the United Kingdom amounted to £342,631; in 1911 they dwindled to £320,028. On the other hand, substantial increases were recorded by such countries as Germany—which stands at the head both of the import and export list—Austria-Hungary, Turkey, France, and Italy. For the eight years between 1902 and 1910 Austria-Hungary provided 40 per cent. of the total Servian imports, and took nearly one-half of her exports; but later on a destructive tariff war broke out between the two neighbours, a circumstance which naturally affected the trade of both. Germany profited vastly by this misfortune, as Germany usually does when her commercial rivals fall out.

The total trade of Servia, even in abnormal times, such as have been passed through latterly, exceeds £20,000,000 annually, and of this the share allotted to Great Britain amounts to hardly £400,000, of which, as we have seen, the exports account for a little more than £320,000, the imports being insignificant in the extreme. Nevertheless the Servians are most anxious to cultivate closer business relations with us, a fact which was impressed upon me by the former Minister for Commerce and Agriculture, M. Milan Kapetanovitch, who, in the course of conversation, exclaimed, "We look towards England as we look towards the sun; but, alas! it does not shine upon us as warmly as we should wish."

Need of a Loan.

M. Kapetanovitch, as poetical in the expression of his lament as anyone of his celebrated compatriots—Vetranic-Cavcic, Karajich, or Yovanovitch—deplored the absence of better commercial ties between us, but he could offer no solution of the mystery regarding their declension. Of course, as I reminded the Minister, we have lent Servia money—have we not lent money to the whole world at some time or other? In 1897 we granted Servia a loan of £1,000,000

Digitized by Google

at the modest interest of 4 per cent., although—we should blush to own it!—the issue price was no higher than 68 per cent. We should shortly have another opportunity of granting this hard-pressed country a fresh loan, and it may be hoped—although hardly believed—that the terms will be a little less usurious.

A new loan of some kind is absolutely essential to Servia, unless national bankruptcy is to be faced. The country's public debt amounts to £26,500,000, while the revenue barely exceeds £5,300,000, and of this nearly £1,300,000 is absorbed by interest charges, or a little more than 25 per cent. of the whole budget. As the maintenance of the Army calls for a further expenditure of £1,200,000, there remains but little with which to carry on instruction, public works, and other necessary branches of government. It may be that Servia will find the provision of suitable security for her fresh borrowing somewhat difficult, and those financiers who finally consent to lend to her will naturally look shrewdly at the character of the collateral which is offered.

French Influence.

Notwithstanding past dealings with England, it is really France who has mainly financed Servia, just as—after the Treaty of Berlin had been signed—she consented to train her army and to build her railways. Servia's commercial prosperity has, indeed, been largely dependent upon French monetary aid. The Franco-Servian Bank has proved a valuable factor in the country's economic development, for, thanks to its special efforts, the two public issues of 1906 and 1909 were covered several times over upon the Paris market. The famous Creusot has made her guns, and it is to the port of Bordeaux that the great bulk of Servia's finest cattle are shipped in order to be disposed of.

Was it not in France that the young Kara Georgevitch lived out many of his days of exile, before he was called to the Servian throne, in 1903, as "King Peter I."? The French people still cherish affectionate recollections of the handsome young lieutenant who passed out of St. Cyr with such flying colours and who afterwards fought so valiantly for his friends in the war of 1870, winning at their hands the much-coveted *croix d'honneur* upon the field of battle. It was, therefore, towards France that the suffering Servians naturally turned when entering upon their great final struggle for independence; it was France, above all nations, who encouraged them, just as she had encouraged Greece upon a similar occasion, in 1697. There is, therefore, every reason why a firm and binding friendship should prevail between these two peoples, and why as strong financial connections should exist between Paris and Belgrade as have been maintained for many years past between Paris and Athens.

At the time that King Peter was called to the throne, the public expenditure in Servia had not assumed anything approaching the figures which have been attained since. For instance, the Ministry of the Interior spent £128,000 then as against £240,000 in 1911; the Ministry of Public Instruction only asked for £100,000 as against £320,000; while even the War Office expended no more than £170,000 against £400,000 demanded latterly. To-day the general expenditure has reached a prohibitive amount, and the financial position of Servia is undoubtedly serious. It had been the intention of the Government to take the situation firmly in hand, and earnest efforts were being made by the former capable Finance Minister—M. Protics—to meet the difficulties and to overcome them. Unfortunately, the Balkan War with all its attendant expenses completely upset the Minister's calculations, and Servia's share of the military operations—£13,000,000—has completely crippled her for the time being.

If, as the famous statistician Mulhall has estimated, Servia's national wealth can be valued at 4,500,000,000 dinars (say, £180,000,000), which may be accepted as no greatly exaggerated computation, the public debt would still represent far too heavy a percentage of the total national wealth. M. Luza Patchu, the Minister of Finance, fully understands the necessity of retrenchment, and he will exercise it as soon as circumstances permit. Unfortunately the time is not yet.

The Servian Budget for 1914.

(By a Correspondent in Belgrade.)

Of late years the Servian Government has devoted special attention to its budgetary policy. Two laws relative to the elaboration, voting, execution, and control of the Budget—that of 1903 being superseded by the law of 1910, now in force—have been elaborated on an entirely modern basis having for model the Continental legislation—principally that of France—which has placed the budgetary policy of the Servian kingdom upon a regular and solid basis. Instead of the theoretical budgets of the past (when the expenditure of the State took place on lines entirely different from those of the Budget submitted to Parliament) and the budgetary deficits, the budgets for the years subsequent to 1904 have not only kept up an equilibrium, but have even shown considerable surpluses. There was a surplus even in the war-year 1912, which finished with an effective surplus of 3,832,685 dns. The results of the Budget of 1913, upon which have fallen all the onerous financial burdens of two serious wars, are still unknown, as in Servia—contrary to the system prevailing in England—the accounts of the Ministry of Finance are not finally balanced until three months after the conclusion of each fiscal year, *i.e*, until April 1. However, judging by the data to hand to-day, the final accounts for the year 1913 can be awaited with confidence. They will be submitted for the approval of the Skrupshtina during the autumn session.

Notwithstanding the satisfactory outlook for the future of Servian State finance, the Minister of Finance has exercised the strictest economy in framing the Budget. In a country whose inhabitants are intoxicated with fervid patriotism, especially after two victorious wars, it can hardly be otherwise than unpopular to renounce or reduce credits that are demanded for the purposes of home-defence, but Dr. Patchu nevertheless had the courage and self-confidence to reduce within the limits of economy and the financial capacities of the country all the exaggerated requirements of the War Minister. In 1913 the Budget of the Ministry of War amounted to 30,116,312 dinars. In his original estimates for 1914 the War Minister proposed war expenditure totalling nearly 80,000,000 dinars. The Minister of Finance must have had great difficulties in reducing that sum to 54,321,359 dinars, at which it figures in the Budget for 1914. It was this which has caused a delay in the voting of the Budget which was only sanctioned on April 1, 1914, although the fiscal year should begin on January 1. The position of the Servian Minister of Finance has been all the more difficult because the Servian law does not grant to him—in the composition of the Budget—any predominant position over his colleagues. According to Servian law the Minister of Finance has, in the compilation of Budgets, equal rights with the other Ministers: they all participate conjointly in the decisions concerning the Budget, and mutually determine the amounts of various budgetary credits. Nevertheless Dr. Patchu has succeeded in reducing considerably the demands of his colleagues, which can be explained by the strong personal influence that he wields in his country as a politician and financier. Great changes have been going on in Servia during recent years, and the management of the finance of the country has, therefore, been in the hands of men fully acquainted not only with home, but also with foreign politics. Indeed, the portfolio of finance has come to be regarded as one of the most important in the Ministry, and the very personality of the Minister of Finance is sufficient guarantee that the Budget for 1914 has been framed on sound lines.

Amount of the Budget.

The Budget estimates expenditure and revenue at 214,320,670 dinars. Compared with the Budget of 1913 (which amounted to 130,764,712 dinars), this represents an increase of 84,000,000 dinars. The enormous estimated increase in national expenditure would have been extremely risky finance had not Servia, after the Treaty of Bucharest, doubled the extent of her territories and gained an increase of 60 per cent. in population. If the normal annual increase of the Budget, amounting to about 14,000,000 frs., is taken into account, it will be seen that the actual increase in the 1914 Budget over that of 1913 does not exceed 60,000,000 frs. The whole of this new expenditure has been entailed by the acquisition of the new territories by Servia.

Included in this sum is the cost of the civil and military administration, the veterans' fund, and the interest on the loan of 250,000,000 drs. It is estimated that practically the same amount (about 60,000,000 dinars) will be received from the new provinces in the form of taxes.

The principal items of expenditure under the Budget are as follows:—

	Dinars.
Ministry of War	54,321,359
State Loans	45,974,950
Ministry of Finance	25,767,888
" Education and Public Worship	14,504,336
" the Interior	7,657,926
" Agriculture, Commerce, and Labour	7,648,202
" Justice	4,052,705
" Foreign Affairs	2,583,288

The income from the principal sources of revenue accrues as follows:—

	Dinars.
Direct taxes	104,880,850
Indirect taxes	57,346,725
State Railways	25,330,000
State Posts and Telegraphs	6,322,110

As compared with the Budget of 1913, both the expenditure and the receipts of the current Budget show an increase of 84,000,000 dinars. Of this sum 60,000,000 dinars come, as already stated, from the new provinces, and the remainder represents in part the automatic increase of revenues already existing and party (5,000,000 dinars) a new so-called "Veterans" Tax—which is being collected on a special scale, proportionate to the direct taxes hitherto paid—for the purpose of meeting expenses of military invalids. This is really the only new tax imposed on Servia by the wars, and it will be borne by the taxpayer as easily as all the other taxes imposed on him. During the Balkan wars Servia gave conclusive proof not only of her military strength, but also of her financial strength. There is to-day no reason whatever to doubt that strength.

SUDSLAVISCHE BANK.

Head Office: 9, KARAGEORGE STREET, BELGRADE, SERVIA.

Branches: USKUB and MONASTIR, SERVIA.

BANKING, COMMISSION AND GENERAL AGENCY.

Servian Municipal and Industrial Loans negotiated.

CONTRACTORS TO THE SERVIAN GOVERNMENT FOR THE SUPPLY OF ARMY EQUIPMENT AND RAILWAY MATERIAL.

SHIPBROKERS AND FORWARDING AGENTS.

Economical, Financial, and Commercial Information furnished. British Manufacturers and Contractors desiring to do business with Servia invited to communicate. Correspondence in English, French, and German.

Total	8,510,508	9,524,278	11,424,915	— 2,914,407

Apropos of the Servian monopolies, the *Financial Times* observes: "For the first time the spirit monopoly, pledged as security for the loan obtained in France, appears in the accounts. The most striking fact shown by the whole account is that at the end of May there was a cash balance in the Servian Treasury of 6,510,000 francs (£260.400), whereas at the end of May last year the Finance Minister was left forlorn with the pettifogging amount of 80,270 francs (£3,210) at his disposal."

COOK'S NILE STEAMERS AND DAHABEAHS.

THOS. COOK & SON have unequalled facilities for Travellers visiting Egypt, now the premier Winter Resort of the World. Their fleet of **Fourteen Large Passenger Steamers** consists of the finest vessels on the Nile, specially built, luxuriously appointed throughout, and fitted with every modern convenience.

TOURIST SERVICE.—These large and handsomely-fitted Steel Steamers sail once a week from **Cairo** to **Assuan**, and twice a week from **Assiut** to **Assuan**, the sailings from **Cairo** beginning in November, and from **Assiut** in January.

EXPRESS SERVICE.—The Express Steamers also leave **Cairo** twice a week, the Friday departures commencing in November, and the Monday departures in December.

There is thus a Service of **Five Cook's Steamers per week** ascending the Nile to the **First Cataract** during the Season—three from **Cairo** and two from **Assiut**—calling at all points of interest on the Nile, in connection with which complete arrangements for sightseeing and excursions are made, enabling Travellers to visit, to the best advantage, all the famous

PYRAMIDS, TEMPLES, TOMBS, RUINED CITIES, etc.

SECOND CATARACT SERVICE.—In connection with the above Services there is also a Service twice weekly by First-class Steamer from the **First** to the **Second Cataract**, with through bookings to **Khartoum, the Sudan, and Uganda.**

PRIVATE STEAMERS AND DAHABEAHS. — **Thos. Cook & Son** have several small Steamers for charter at moderate rates, specially adapted to the requirements of Families, Private Parties, Sporting Parties, etc., accommodating from eight to sixteen passengers, with competent crews, and thoroughly equipped. Also a large Fleet of First-class Sailing Dahabeahs, the best on the Nile.

P & O Express Service via Brindisi.

From Charing Cross 9 p.m. every Friday.

LONDON (via Brindisi) to EGYPT in 4½ days.
LONDON (via Marseilles) to EGYPT in 5 days.
LONDON (by Sea) to EGYPT in 12 days.

For information as to general passage rates, descriptive handbooks and all information, apply at the Offices, P. & O. S. N. Company, 122, Leadenhall Street, E.C.; Northumberland Avenue, W.C., London.

Khedivial Mail Line.

FIRST-CLASS BRITISH MAIL STEAMERS.

GREECE-TURKEY MAIL SERVICE.

Shortest and most picturesque sea passage between Europe and Egypt. Fast steamers in connection with the Orient express train-de-luxe from Paris, Ostend, Vienna, Berlin, and Budapest leave Constantinople every Tuesday afternoon for Smyrna, Piræus and Alexandria. Return from Alexandria every Wednesday afternoon via same ports.

Service between TURKEY, SYRIA & EGYPT.

Fast steamers leave Constantinople every Saturday for Gallipoli, Dardanelles, Mitylene, Smyrna, Chios, Rhodes, Mersina, Alexandretta, Tripoli, Beyrout, Caiffa, Jaffa (for Jerusalem), Port Said and Alexandria. The voyage takes ten days.

Departure from Alexandria every Saturday, and from Port Said every Sunday, for above ports.

CYPRUS SERVICE.

Fast steamers weekly from Alexandria on Tuesday afternoons, and from Port Said on Wednesday mornings, for Famagusta, Larnaca, Limassol and Paphos.

SUDAN MAIL (SUMMER) SERVICE.

Steamers leave Suez Docks fortnightly on Friday, at 5 p.m., for Port Sudan, whence trains may be taken for Khartoum. Calls made at Suakim as required.

RED SEA COASTING MAIL SERVICE.

Steamers from Suez Docks every Monday evening, at 5 p.m., for Jeddah, calling one week at Tor, El-Wedj, Yambo and Jeddah; and in the following week at Jeddah, Port Sudan, Suakim, Massowah, Hodeidah, and Aden.

For information apply to the Company's London Office, 37, Bishopsgate, or at Alexandria, Constantinople and Suez. Passages may be booked at Company's Agencies at all ports called at, or from the principal Tourist Agencies.

NOTES OF THE WEEK.

Prince William has at last taken the significant step of giving utterance to his own views of the situation in Albania. They correspond closely with those already expressed in these columns. In an audience given to the Austro-Hungarian, French, German and Italian Ministers the Mpret pointed out that the Powers, after placing him on the throne, had shown little readiness to assist him in dealing with his difficulties. The Albanian problem had been complicated by the Epirote question from the outset, and the least sign of unrest elsewhere reacted on the situation in the south. Prince William declared that immediate help was imperative, and he urged the Ministers to address a final appeal to their Governments for military and financial aid. It is almost impossible that the Powers should remain deaf to this appeal, although their reply may not take the form desired by Prince William. To entrust the International Commission of Control with the task of administering Albania without military support and before the Commission has been purged of its discordant elements is merely to tinker with the problem and to add injury to the insults already meted out to the Mpret. Much as the actions of Austria-Hungary and Italy, which are largely responsible for the Albanian *impasse*, are to be condemned, it may be doubted whether the cynical indifference of Great Britain is not to be equally deprecated. If the British Government recognises the predominant interests of the two Powers in Albania to the extent of endorsing any course of action they care to adopt, it might at least refuse to be associated with a policy that has led to the humiliation of Prince William and civil war in Albania. When the Powers were called upon to deal with Crete, Austria-Hungary and Germany withdrew from the Concert, as they favoured the Turkish claims. Great Britain would have occupied a more dignified position if she had withdrawn when she found herself out of touch with the attitude of the other Powers towards Albania.

While no change has to be recorded in the situation at Durazzo, Southern Albania is developing a fresh crisis of its own. The prolonged impotence of the Albanian Government, shut up as it has been in the capital, has allowed the whole country to get out of hand. Detachments of gendarmerie under Dutch officers have done what they could to maintain a semblance of authority for the Durazzo Government, but at last they have had to fall back before the insurgents. At Koritza they were caught between the upper and nether millstones of the insurgents on the one hand and the Epirotes on the other. From the fragmentary information that has reached this country, it appears that the time for giving effect to the Corfu Convention regarding Epirus coincided with a forward movement of the insurgents along the South-Eastern frontier. The Epirotes, expecting an attack from these insurgents, resolved to anticipate matters by an advance upon Koritza. At the moment when the town was trying to come to terms with the insurgents, the Epirotes appeared before it and demanded admission for the ostensible purpose of protecting the Christian inhabitants. The request was rejected by the Dutch officers, and both Epirotes and insurgents advanced upon the town. After a struggle which, according to the Prefect of Koritza, lasted three days, the Epirotes entered the town, and the inhabitants fled, panic-stricken and destitute. The bulk seem to have reached Berat, but only to have this town captured two days later by the insurgents. Epirotes and insurgents are now overrunning Southern Albania, and one force or the other is threatening Valona.

The insurgent movement in Southern Albania is somewhat of an unknown quantity. It is claimed that it has nothing to do with the insurgents who have reduced Durazzo to such straits, but is purely Turkish. So long as a town or village protested allegiance to the Albanian Government, it seems to have been regarded as a common enemy by insurgents, Epirotes, and any other restless elements in the neighbourhood, and it is probable that the defeated inhabitants of Koritza are not quite clear in their own minds whether they owe their successive discomfitures to Epirotes or to insurgents in turn. If the latter movement is mainly Turkish—and it is stated that Turkish flags are freely displayed in the ranks—co-operation between the insurgents and the Epirotes is not likely to last long. As soon as the nominal authority of Prince William has been eliminated from the frontier districts the two forces can hardly fail to find themselves in conflict. The position in Albania will thus become more hopelessly confused, and will provide a still more pathetic monument than that already presented of the indifference and ineptitude of the Powers.

A correspondent of *The Morning Post* contributes an interesting sketch of the situation at Chimara, the

Digitized by Google

"capital" of a cluster of small villages shut in between the mountains and the sea midway between Valona and Corfu. While Albania was under the nominal suzerainty of the Sultan, Chimara, on the strength of its remoteness and inaccessibility, enjoyed substantial independence under the leadership of an hereditary chieftain of the family of Speiromilios. During the Balkan War the territory was occupied by Greek troops, but when these were withdrawn and Chimara was threatened with incorporation with Albania, the inhabitants threw in their lot with the Epirotes and secured a continuation of its special privileges under the authority of the Corfu Convention. The Albanians on the other side of the mountains which hem in Chimara care little, however, about any arrangement agreed upon at Corfu. They covet the Chimariots' possessions and are making a determined effort to seize them by force. So far Chimara, by the heroic exertions of its people, has offered a successful resistance. But the struggle is an unequal one, and unless help is forthcoming in some form or another for the Chimariots it is feared that they must go under, with the inevitable accompaniment of pillage and bloodshed. With the Epirotes once more in the field the pressure on Chimara may automatically be relieved; but provision for permanent respite from attack would seem to belong to the formidable list of Albania's unsolved problems.

It was suggested in these columns that a way out of the Albanian difficulty might be found by entrusting Roumania with the task of restoring order or of giving Prince William sufficient military support to enable him to establish his Government on a sound basis. Overtures on these lines appear to have been made of late in Bucharest, but they emanated from Austria-Hungary and Italy and not from the Concert of Europe as a whole. The Roumanian Government has accordingly allowed it to be understood that the subject would require a considerable amount of discussion before a definite answer could be given. In the first place Roumania would not move without a clear mandate from all the Great Powers. There are no ties between it and the Albanian State created by the Powers that call for the expenditure of either Roumanian treasure or Roumanian blood on behalf of the Albanian Government. On the other hand, if the task of "seeing Prince William through" were formally entrusted to Roumania with satisfactory guarantees in regard to compensation for her outlay and the maintenance of peace in the Balkans while a portion of her army were employed on the Albanian task, it is not impossible that the Roumanian Government would feel tempted to entertain a proposition so flattering to the position that the country has won for herself in the Near East.

A curious episode is reported from Belgrade. On the strength of information received by its Minister, the Austro-Hungarian community in the Servian capital convinced itself that on the night of July 12 the life of every one of their number was to be in danger. Accordingly many families took refuge at Semlin, the Hungarian town a short distance away up the Danube, while others sought protection in the Legation or at the Consulate. The night in question, however, passed off without incident. The reports as to the origin of the scare are contradictory. According to one account Baron Giesl, the Austro-Hungarian Minister at Belgrade, received information that a number of *Komitajis* had arrived in Belgrade and intended to blow up the Legation at nightfall and subsequently to attack Austro-Hungarian residents. According to another account it was two Russian anarchists who were responsible for the scare. M. Hartwig, the Russian Minister at Belgrade, died suddenly of heart failure on July 10 while paying a call at the Austro-Hungarian Legation. The alleged anarchists are said to have intended to avenge his death by blowing up the Austro-Hungarian Legation, but had considerately notified Baron Giesl that it would be wise for him to withdraw first. Baron Giesl, however, preferred to remain inside, reinforced by forty of his Nationals, and Servian police kept guard outside. The contradictory nature of the accounts points to the hollowness of the scare, but the incident is eloquent of the tension between Austria-Hungary and Servia at the present moment.

Unfortunately, the delay on the part of the Austro-Hungarian Government in concluding its investigations into the conspiracy against the life of the Archduke Franz Ferdinand tends to increase this tension between the two countries. The matter was under the consideration of the Ministerial Council, and as soon as its deliberations were concluded a section of the Vienna semi-official Press was allowed to announce that diplomatic representations on the subject were about to be made in Belgrade. The report was officially contradicted the same evening; but it is obvious that the Servian Government will take strong exception to a course of action which has the effect of allowing the Austro-Hungarian Press to keep suspended over its head the allegation of complicity or culpable neglect in regard to the plot against the Austro-Hungarian Heir-Apparent. At the same time, the Servian Government would do well to assist the Austro-Hungarian authorities in their investigations without waiting to be pressed.

A telegram from Athens reports that conversations are in progress in order to bring about a meeting between M. Venizelos, the Greek Prime Minister, and the Grand Vizier. Indeed, both statesmen may already have left for the rendezvous, which will probably be in Switzerland. It is devoutly to be hoped that this report is true. Greece has probably little liking for a single-handed conflict with Turkey—or, indeed, for a preliminary rivalry in armaments. An understanding between the two countries will be in the interests of each, and may indirectly promote better relations between all the Balkan States.

A debate in Committee of Supply in the House of Commons on the Foreign Office Vote turned mainly on British trade opportunities and the question of Government support. The discussion ranged over a wide field, but the Near and Middle East were prominent in several of the speeches. In his reply, Sir Edward Grey took up his favourite position behind the contention that in regard to the promotion of trade there is no middle course between armed intervention and a policy of *laissez faire*. It is a contention which does not hold water. In the countries concerned the Governments will often have no means of forming an opinion on the *bona fides* or value of an application except by the measure of official support it enjoys. When, in the face of other applications, supported strongly through diplomatic channels, British offers are found to be unsupported, the foible of the British Government is forgotten and the inference is formed that the applicants need not receive attention. In many instances it might be found that British interests only require that British Ambassadors and Ministers should feel that they are freed from the embargo which prevents them from showany interest in the business enterprises of British subjects.

Vosouk-ed-Dowleh, Persian Minister for Foreign Affairs, who resigned on July 1, has rejoined the Cabinet, and the Persian Government will present at least the appearance of a properly constituted body for the Shah's Coronation. The same cannot be said of the Parliament. We may hear that a quorum of members has been obtained, but it is probable that many of the elections will not bear investigation. Nor is the foreign outlook more hopeful than the domestic. The reply of the Russian Government to the recent Note presented by the Persian Minister for Foreign Affairs is stated to have been drawn up, although it was not to be communicated until after the Coronation. It is to be feared that the Persian Government will derive little satisfaction from this document. Russia virtually upholds all that her agents have done or are doing in Azerbaijan, but she is prepared to see the present Governor-General replaced by the Governor-General of Kermanshah, Farman Farma. For the rest she adopts the attitude that any good turn done to Persia requires a corresponding strengthening of the Russian hold on the north.

CONSTANTINOPLE LETTER.

(From Our Own Correspondent.)

Constantinople, July 10.

The Situation in Anatolia.

The situation in Anatolia is improving, but not as rapidly as one could wish, sporadic attacks on individual Greeks being reported from several localities. The reports of the dragomans—most of whom have returned from Smyrna—will not be published, but it is understood that all give acounts of the atrocities at Phocea, which differ in no important respect from that recently communicated to The Near East by "Lascaris." According to European witnesses of the rioting, the murders, etc., were entirely unprovoked. About fifty persons were killed, and there was, as usual, a good deal of rape. Several persons, including old, infirm, and half-witted people were tortured, and there was general pillage. At Serekeui between forty and fifty Greeks were killed; but here the circumstances were different. There had been resistance—very foolish resistance—on the part of the Greeks, and bloodshed was inevitable. Several Turks were killed. Talaat Bey recently admitted that he had asked the Greek Patriarch why the Greeks in villages threatened by bands did not scare away marauders by firing on them instead of bolting so rapidly. It would certainly appear that the rumours that the Greek coastal population had been armed to the teeth by Greek smugglers were exaggerated! It is as well; for had the Greeks been armed they would have resisted, and much loss of life would have ensued. As it was there was only resistance at Serekeui and on the outskirts of Aivali. The disturbances at Brusa seem to have been less serious than was first reported. They were the work largely of Kurds, whom persons unknown had imported into the Vilayet.

Djavid Bey's Budget Speech.

Djavid Bey's Budget speech was as eloquent and interesting as usual. He laid stress on the fact that Turkey had succeeded in waging a long war without money, and that the crops promised well. He thanked the French Government for having agreed to unloose its purse-strings and permit the quotation of the last loan on the Bourse of Paris, and referred with approval to the agreements now pending between England and Turkey, and also to that between Turkey and Germany. His Excellency will soon leave for Berlin to continue the negotiations concerning the increase of the Customs duties, the establishment of a petroleum monopoly, etc.

Railways in Anatolia.

MM. Girard and Dumas of the Régie Générale des Chemins de Fer, to which the Government, by the Franco-Turkish agreement, has granted a concession for the construction of the Samsun-Sivas railway, have left for Samsun, where they will shortly be followed by Herr Otto Kapp von Gulstein, manager of the same Society, and by Mukhtar Bey, head of the Railways Department of the Ministry of Public Works. According to a local newspaper it will not be easy to make much progress till the second instalment of the loan is issued in Paris. In that case work will begin next spring. The line, when completed, should pay well. It will traverse the fertile districts of Ladik, Mersifan, Amasia—the great apple centre of Turkey—and Tokat, all regions where there is a fairly thick population on the ground, and the Sivas plateau is a well known sheep and cattle raising centre. No projected railway promises better.

Albania: The Lion of Janina's Views.

The assassination of the Archduke Franz Ferdinand and the troubles in Albania have made pessimists, who are always numerous here, more inclined than ever to "croak" their dismal vaticinations of trouble in the Balkans. It is certain that Austro-Servian relations are somewhat strained, and that the position in Albania is growing worse and worse. The childish petulance of the Albanians, the intrigues of Servian, Greek, and Turkish partisans, and Austro-Italian rivalry, seem likely to force the luckless Mpret to abdicate, unless that ill-starred Prince can find somewhere and somehow the three or four battalions of good troops who, in the opinion of good judges, could put three times their number of insurgents to rout. Djemal Bey, the leader of the insurgents, an ex-Turkish officer, continues to give the Constantinople newspapers interesting accounts of his doings. His ally, Arif Hikmet, was one of the members of the Committee of Union and Progress in his day, and though of Albanian origin, a determined foe of the Latin Alphabet. There is a strong belief here that stories of the candidature of Burhan-ed-Din Effendi to the throne of Albania are well founded, and that this young man thinks that he will succeed where the Mpret failed. Bakkalym! Is this pale young man, brought up in Yildiz, all but a State prisoner after his father's fall and deposition, gifted with musical tastes and social graces, to play the part of a Skanderbeg or an Ali Pasha? Wonders have happened in the Near East before now; but this would be a miracle!

It must be hard for those European Albanophiles who are also Turcophiles, to make up their minds which to back of the Albanian parties these days, the Bektashi and Catholic Nationalists or the Moslem and Catholic insurgents who hoist Turkish flags and destroy Albanian emblems! Meantime, one is reminded of Ali Pasha's words to de Tocqueville when that humane Frenchman remonstrated with him for some peculiarly heinous piece of cruelty and treachery. "Young man," said the Lion of Janina, "you are very young, so I pardon you; but you do not know these people or how they must be ruled. These Greeks and Albanians, whom I govern, would for cupidity or ambition sell their fathers' bones, so I have to be executing them now and again." These may not be the exact words of Ali, but that is their general sense, and one wonders whether the old scoundrel was not partly right, and whether harder hands than those of the present occupant and existing claimants to the Albanian throne are not needed to keep order.

The Islands.

Opinions differ as to the solution of the Island question. The Italians seem destined to remain for ever in Rhodes and Stampalia, for no negotiations have been opened concerning their evacuation between the Consulta and the Porte. The expulsion of the Greek population from the Ægean coast and the substitution of Moslem immigrants, some of whom have already cut down all the vines at Karaburun and are planting potatoes on that arid promontory—Heaven help them to better knowledge of agriculture!—ought logically to render it easier for the Turks to accept the loss of Chios and Mitylene. Logic is, however, less prized in the Near East than in the Western lands, and we are not out of the wood yet.

TURKISH SENATOR'S SUSPENSION.

On Tuesday the Turkish Senate pronounced the exclusion of Mr. Georgiades, a Greek Senator, from three sittings on account of certain expressions he used on the occasion of the discussion of the Bill for the establishment of a national bank at Aidin. The event is unprecedented.

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Cairo, July 9.

Opinion on the Greco-Turkish Affair.

More than a passing interest is being taken locally in the events that are occurring in the Balkans. This is, of course, natural, considering the very large Greek colony domiciled in Egypt and the close religious and, to a certain extent, personal ties that bind the Egyptians to Turkey. In these circumstances it is interesting to note that little confidence is felt in a peaceful solution of the Greco-Turkish quarrel, and that in fact a strong conviction prevails that war is inevitable. It is firmly believed that with Turkey it is merely a case of *reculer pour mieux sauter;* in other words, that the Turks will not rest contented until they have made an effort to regain their lost territory. Whilst it is recognised that the Turks must wait until they are strong enough to take the offensive with every hope of success, it is admitted on the other hand that Greece's policy is to strike her rival before the latter is in a position to resist her, in the hope of postponing to a far-distant date the Turkish menace that will otherwise always hang over her. The strong impression exists that as soon as the "Idaho" and the "Mississippi" are taken over, Greece will find some *casus belli*, for it is recognised that when Turkey receives her Dreadnoughts there will not be the same disparity of strength between the two fleets; though, of course, there is no blinking the fact that as yet the Turks are far behind the Greeks in so far as their organisation and the efficiency of their men are concerned. The betting locally is all in favour of a war before the autumn and in the direction of the Turkish Dreadnoughts, if they start, never reaching Ottoman waters; the only obstacle that is foreseen to an early war is that pressure may be brought to bear by Europe on the Hellenic Government.

The "Wadinnil" and the Press Law.

At its last meeting but one the Council of Ministers authorised the reappearance of *El Wadinnil*, the daily paper which was suppressed in April, 1912, for having published a violent article attacking the Sudan Government for the manner in which the Annuak expedition had been carried out. Coming as it has just after the publication of the details of the protest against the Press Law made by English publicists, this action has aroused much comment, and it is being freely inferred therefrom that the repeal or the suspension of the operation of that measure has been decided upon, and further, that the other papers that had been suppressed since its re-enactment in 1910 will be allowed to reappear.

This deduction is, however, absolutely erroneous. In the first place there is no analogy whatsoever between the cases of the *Wadinnil* and of the other journals referred to. The latter were only suppressed after they had given frequent and serious offence and had received several warnings, whilst in the case of the *Wadinnil* the article which caused the trouble was the first of its kind to appear in that paper, which had in fact only just previously rendered signal service to the State by the disclosures it had made of the scandalous condition of the Alexandria Municipality. In view of these, which by comparison constitute extenuating circumstances, and of the fact that the Sudan Government, which had originally demanded the taking of drastic steps against the paper, had expressed its willingness to consider the offence as expiated, the Council of Ministers decided to allow the publication of the *Wadinnil* once more.

With regard to the deduction made, whatever modification of the existing Press Law may be contemplated in the near future, the Government's action must not be taken as an indication that the enforcement of the measure will be relaxed, nor as pretending the re-entry into the journalistic arena of the other organs that have fallen under its guillotine during the past four years. Those journals transgressed in too continued and determined a manner for any consideration to be shown to them, and there are still signs amongst certain of the existing vernacular papers that the relaxation of the present control would not have satisfactory consequences.

Extraordinary Rumours from Home.

According to the local Press, two rumours that one can only characterise as extraordinary are circulating amongst your contemporaries at home. The first is that Lord Kitchener wants to create an Egyptian Navy; the second is that in the event of the British Agent going to India, the Duke of Connaught will succeed him. One could scarcely credit the fact that the home Press had been guilty of such mis-statements if the source of information had not been quoted. Of course, neither rumour is likely to be realised, and both statements display just that ignorance of the peculiar financial and political situation of Egypt that the comments of a certain section of the British Press only too often betray.

The Question of an Anglican Bishop for Egypt.

The resignation of Bishop Blyth has again brought up the question of the position of the Anglican Church in Egypt, and considerable discussion has of late ensued on the subject in the local English colony and Press. It is conceded that perhaps there is not quite sufficient work in Egypt to occupy the time and attention of a bishop exclusively; but at the same time it is generally admitted that the Anglican Church in Egypt in general, and in Cairo in particular, requires the infusion of more life than it has shown in the past. Whether a bishop is the sole means of bringing about this desirable quickening, or whether the same end could be attained by the clergy taking a more lively and human interest in their flock, is a difficult question to decide; but one thing which strikes the layman forcibly is that much of this slackness must undoubtedly be due to the fact that the man responsible for the supreme direction of Church affairs in Egypt, the Bishop in Jerusalem, has of late years paid no visit to his Anglo-Egyptian flock, and that for confirmation and other similar purposes his place has been taken by his colleague of Khartoum, who, however, has never been able to stay any length of time in Egypt or in Cyprus owing to the great calls his own diocese makes on him.

Seeing that the Bishop in Jerusalem, on his own showing, has an ever-increasing task in Palestine, and that the Bishop in Khartoum is equally absorbed within the present limits of his vast diocese, it seems that Egypt is like to fall between two stools, and because it is felt that this community is, from an episcopal point of view, being somewhat neglected, a movement in favour of a separate bishopric periodically makes itself felt. It is to be hoped that now that it has become necessary to choose a new Bishop in Jerusalem the position of the Anglican Church in the Near East in general, and in Egypt in particular, will be studied, and that since a fund already exists, some means will be found for giving to the Anglo-Egyptian community the spiritual attention which it requires.

It may be remembered that a recent scheme for selling the site of All Saints' Church in Cairo and purchasing a new one in a more central position was held over, at Lord Kitchener's suggestion, owing to the fact that the creation of an Egyptian see was under consideration. I have reason to believe that the whole question may be the subject of discussion between his lordship and the Archbishop of Canterbury this summer.

THE ALEXANDRIA BOMBARDMENT.

"Lest We Forget," writing from Alexandria, reminds us that Saturday last was the thirty-second anniversary of the day which saw the beginning of British rule in Egypt. On that memorable day, at 7 a.m., the hours of grace which had been granted by the British Admiral to the rebel leader, Arabi Pasha, expired, and the first shot was fired in the bombardment of the forts outside Alexandria. This was in response to a signal from the "Invincible," Admiral Seymour's flagship, to the "Alexandra," which fired a shell into the recently armed earthworks of the Hospital Battery. Then followed the general signal to the fleet, "Attack the enemies' batteries," when immediate action ensued between all the ships in the positions commanding the entrance to the harbour of Alexandria. In this action the part played by the gunboat "Condor," commanded by Lord Charles Beresford, stands out prominently. The orders given to the small ships were to keep out of fire, and to watch for an opportunity. This came to the "Condor" when, just as the action began, the "Temeraire" parted her cable and got ashore. Lord Charles Beresford's ship immediately went to the rescue and towed her off, the while Fort Marabout was giving three other units a warm time. The "Condor," after seeing the "Temeraire" safe, steamed close into shore in spite of the danger from the heavy shore guns, and commenced harassing the fort and dismounting its guns with amazing dexterity. The rapidity of her movements, as well as her small size, enabled her to escape scathless, and at length, with the aid of the "Beacon," "Bittern," and "Cygnet," by which she was joined, the fort was completely silenced.

The part played by the "Condor" was immediately recognised. The Admiral had just bent on the signal for the "Monarch" to go to Fort Marabout as soon as she could be spared, when he heard a cheer from his own men. He asked the reason, and was told that the cheer was meant for the "Condor." The cheer was followed by three loud volleys from that ship, which gave the battery the *coup de grace*, and once more cheers rang out from the flagship. At this point the historic signal, "Well done, 'Condor,'" was hoisted, and the day after Beresford was presented by Captain Wilson with the flag of the fort whose guns he had silenced. It now hangs, we believe, in the museum of the Royal Naval College at Greenwich.

Those were stirring days in Alexandria, and not a few are left who can tell some thrilling tales of the "events" which followed on the bombardment. "Hell let loose" most aptly describes the state of the city at the time. Some stray shells from the ships and the rapacity of the lower classes fired the town, and the rearguard of a demoralised army vengefully completed the destructive work of conflagration and plunder. When the army evacuated the city, after threatening the Khedive in his palace, the uncontrolled mob went mad, and pillage, looting, and murder were added to the horrors of the burning city. In this connection, it is not generally known how much Lord Charles Beresford did for the restoration of order. As Provost Marshal he did yeoman's work on shore with only a handful of men to patrol the town, stop the looting, and protect the lives of those refugees who came on shore and others who had hidden themselves in the town. By preventing the fires from extending to the native quarters of the town and some of the best streets, millions of money must have been saved. One week almost sufficed for the chief of police to restore at least a semblance of order out of perfect chaos.

There was no lack of willing volunteers among the local British community to aid Lord Charles Beresford. One who particularly distinguished himself on the occasion was Mr. John Ross, who runs Mr. Robert J. Moss close for the honour of being the oldest British resident in Egypt at the present day. Mr. Ross rendered invaluable service to the British fleet before the bombardment, for which he received the warm thanks of Lord Alcester; and in the restoration of order afterwards was a prominent figure, earning the gratitude of Lord Charles Beresford. Many stories are related of the open-handed charity he dispensed to the starving refugees of various nationalities, but particularly so to a large number of unfortunate Jews, whom Lord Charles Beresford, Mr. Villiers (of *The Graphic*), and Mr. Ross found hiding in certain parts of the town, and whom they brought down to the Marina, where they were sheltered and fed for two or three days by Mr. Ross. The most interesting story, however, is that which credits Mr. Ross with a good deal of the responsibility for the bombardment itself! Readers of history will remember that the immediate cause of the bombardment was the report received by Admiral Seymour that the rebel army had mounted new guns in position after receiving orders from the French and English admirals to cease throwing up earthworks and mounting guns, under pain of immediate bombardment. This report, it is believed, was received from Mr. Ross, who supplied the two fleets with coal. Intimate with the English admiral and the officers, he kept them informed, at no little personal danger, of all that was taking place on shore and in the forts.

Few people are, we think, aware that the present British Agent and Consul-General in Egypt was on board the flagship as a simple spectator of the bombardment, but this is so. Lieutenant Kitchener, as he was then, had obtained leave from his regiment at Cyprus, and, having been invited by the admiral as a guest on board the flagship, gladly accepted, no doubt being attracted by the prospect of seeing a "scrap."

A PORT SAID PLAINT.

(From Our Own Correspondent.)

Port Said, July 6.

A petition is being drawn up by the principal tradesmen of the town, and will shortly be presented to the Governor of the Suez Canal District and the Mixed Municipal Council, calling for protection from what is regarded as a serious invasion of the legitimate interests of local traders.

For some time past tourist offices in Cairo have organised excursions to the capital from either Port Said or Suez for parties of passengers, outward or homeward bound. For a fixed figure the traveller is rushed up by special train to the capital, nourished and housed at one of the best hotels, and motored to the Pyramids and round the town, while the steamer is making the transit of the Canal. A special train bears him back to the other end of the Canal, where he rejoins his steamer. Such an excursion no doubt makes a pleasant and exciting break in the monotony of a long voyage, and the success of the scheme is indicated by its growing popularity with passing passengers. But Port Said suffers. The Indian shopkeeper, the native dealer in curios, and the hundred-and-one vendors of trifles for travellers are being gradually deprived of their only source of livelihood, as the hitherto idle, full-pocketed passenger becomes for the nonce a rushing, breathless tourist, with time only for a carriage drive from the station to the waiting steamer.

It is proposed that steps should be taken to abolish the special trains, and thus render it impossible for passengers to make the excursion within the limited time of the Canal transit. It is urged that Port Said is not the only sufferer, as passengers have not even time in Cairo to make their customary purchases, and the trade of Egypt is diminished as a consequence.

It is difficult, however, to predict a successful result of the petition. Tourist agents are undoubtedly entitled to special trains on payment of the regulation tariff, and many passengers are naturally only too glad to avail themselves of the organised facilities offered for a hasty visit to Cairo. The hardship suffered by the Port Said shopkeeper is to be regretted, but it is not likely to be remedied by an appeal to the Governor and Council, who, however much they may sympathise with the petitioners and deplore the loss of trade to the town, are practically powerless to disturb a lawfully conducted business, for which there appears to be a growing demand.

FOOTBALL IN EGYPT.

The Egyptian Mail gives an interesting account of the introduction of Association football into Egypt. It says that shortly after the arrival of the first party of English masters in Egypt Mr. R. R. Smithard, now an inspector of the Department of Technical and Commercial Education, but at that time a master at the Khedivial School, determined to try and introduce the game among the schoolboys. He mentioned the matter to Dr. Dunlop, who was then an inspector in the Ministry, and, he approving, it was decided to make a start. The first thing to do was to buy a ball, but in those days that was no easy matter. Roberts-Hughes did not then exist, and the few footballs that were in the country belonged to the regiments of the Army of Occupation and had been brought out from home. However, after a long search Mr. Smithard found a ball in a shop in the Esbekia kept by an Englishman, and, thus armed, proceeded to the Khedivial School playing fields. This was just an ordinary field, with trees growing haphazard in it, but two of these were selected, and the interested students were informed that it was the duty of some of them to kick the ball between the trees, while it was the duty of others to prevent their succeeding. All went happily for some minutes, until one boy, in performing a magnificent dash down the right wing, with his arms waving on either side of him, dashed into a tree—it may have been one of the goal-posts—with so much force that he broke an arm. Of course, the game came to an abrupt conclusion, and the feelings of Mr. Smithard and his enthusiastic colleagues can well be imagined at such a termination to their initial efforts to impart the ethics of Association football to the schoolboys of Egypt; nor were they softened the next morning when *The Bosphore Egyptien*, a paper notorious for its Anglophobe tendencies, came out with a denunciatory article on the barbarity of the new English schoolmasters, who had no sooner arrived in this country than they broke a pupil's arm *avec un lache coup de pied*. Soccer in Egypt, however, has weathered the storm of a broken arm, and the standard the game has reached in the schools here is really extraordinarily high.

SERVIAN LETTER.

(From Our Own Correspondent.)

Death of M. de Hartwig.

Belgrade, July 12.

Last Friday evening M. Nicholas de Hartwig, Russian Minister Plenipotentiary at Belgrade, called upon Baron Giesl at the Austro-Hungarian Embassy, and within a quarter of an hour of his arrival suddenly expired from an attack of apoplexy. Medical aid was promptly at hand, but it was of no avail.

Yesterday the greater part of the houses in Belgrade hung out black flags in token of mourning, and numerous special editions of the papers were issued. The Press bears testimony to the severe loss that Servia suffers through the death of a diplomatist who always showed himself her good friend and adviser, and whose advice the Servian Government always appreciated and followed.

It was thanks chiefly to M. de Hartwig's advice, and to the action of Russia, that the Balkan Alliance was effected, resulting in a briliant success and the immense expansion of Servia. It is evident that in him the Russian Government chose the right man for the place, and his loss is deeply deplored in Servian political circles.

The *Balkan* proposes the erection of a monument to him, the funds to be subscribed by the people of Servia without any official aid, and the paper opens a subscription list and heads it with a liberal donation. The semi-official *Samouprava* says that M. de Hartwig carried out Russia's friendly policy by working for Servia with his whole heart, and that his name, beloved and admired, will remain for ever engraven on the memory of the Servian people. The whole Slav race is depressed, and deplores the loss of one of the greatest sons of Russia.

Yesterday a requiem service was held at the chapel of the Russian Embassy. This morning the doors of the Embassy were opened to the public, and a constant stream of people of all ranks passed through the mortuary chamber. The body has been embalmed for conveyance to Russia; but every effort is being made to induce the relations and the Russian authorities to permit the remains to be interred here.

The King's Birthday.

To-day being King Peter's birthday, the mourning emblems have been removed, and the houses in all the leading streets are decorated with gay flags and coloured bunting. The soldiers stationed in and near Belgrade march through the streets and defile before the Royal Palace. This morning there was divine service at the Cathedral. The Metropolitan and a large number of priests officiated, and the Crown Prince, Prince George, the Cabinet Ministers, the Diplomatic Corps, the superior officers of the Army, and the principal civilians of the town attended. As is usual on such occasions, there are to-day abundant festivities in Topshidar Park, in the environs of Belgrade, and this afternoon there will be horse-racing.

It is stated in well-informed circles that in a few days King Peter will terminate his sojourn at the Vraniska Springs, and that, in accordance with the advice of his doctors, he will then go for a long period to the Ribarska Bathing Resort, which he has previously visited during many successive years. This lengthened stay at another bathing resort confirms the statement I made in the article on the Servian Regency in your issue of the 3rd inst., that if the King's inability to perform his functions were only of a temporary nature, such as an illness of short duration, it was not likely that he would delegate his power to a regent.

Albanian Refugees.

Lately many Albanian families have migrated into Servian territory, many of the refugees being wounded, and all in a state of absolute poverty. Permission to remain in Servia has been refused to the healthy, but the wounded, by order of the Servian authorities, were transported to the nearest hospitals, and the women and children were provided with food.

Reply to Austrian Press Attacks.

The continual attacks of the Austrian and Hungarian Press upon the Servian people and the Servian authorities have aroused very bitter feelings here. The Government has sent a note to its representatives abroad stating that it is clearly the aim of the Austrian and Hungarian Press to destroy Servia's moral reputation in Europe by attributing political motives to a crime committed by a misguided fanatic—a crime condemned on all sides in Servia, and which could only tend to produce an estrangement between the two neighbouring countries and place Servians resident in Austria and Hungary in a pitiable condition, and that, too, at a time when Servia was doing its utmost to improve its friendly relations with the neighbouring State. The note further says it is absurd to imagine that the Servian authorities would willingly permit such criminal proceedings to be prepared, and that it is evident it would be to Servia's greatest interest that the Serajevo crime had never been committed. These criminals were, moreover, Austro-Hungarian subjects, and in future the Servian Government will increase its vigilance in respect to any such doubtful people within its territory.

The Servian Press naturally has something to say as to the Servian point of view. The *Tribuna* says that the Catholic-Mohammedan mob, singing the national hymn, destroyed and plundered about one thousand Servian houses and shops under the eyes of the local authorities, which it considers a crime to be as much condemned as that of the two national fanatics. The *Novosti* complains of the Bosnian authorities not employing ample means to secure the safety of the Heir-Apparent and of their permitting the robbing and assassinating of Servians resident in Bosnia; and asks if such things are to be permitted because the evildoers sing the national hymn and are bearers of the Emperor's portrait. *Mali Journal* notifies that part of the late persecutions of Servians in Bosnia consisted of the plundering and damaging of Servian Orthodox churches and schools. The *Politika* states that since the Serajevo crime a number of threatening letters have been sent from Austria-Hungary to the Servian Court and Servian Ministers.

In political circles here and amongst the public the termination and result of the judicial inquiry at Serajevo is anxiously awaited, but everyone feels assured that if the inquiry is impartially carried out nothing can be established that would confirm the accusations in the Austrian and Hungarian Press or would be to the detriment of the Servian authorities.

BULGARIAN REFUGEES.

(From Our Own Correspondent.)

Sofia, July 12.

The Commission entrusted with the task of looking after the refugees had up to July 3 dealt with the cases of 13,000 families, making in all 65,465 souls. Of these 2,681 families have been settled in the neighbourhood of Soufli; 2,248 in the district of Gumurjina; 1,198 in Nevrokop; 1,799 around Dedeagatch; 1,173 in Xanthi; and the remainder in the provinces of New Bulgaria.

M. DE HARTWIG.

(From An Occasional Correspondent.)

M. de Hartwig was a type of the Russian diplomatic official of the forward school who carries out a more or less independent policy of his own creation, and is applauded or disowned by his Government in accordance with circumstances. In the earlier years of his career he was Vice-Consul at Burgas in Bulgaria, and in this capacity played a leading part in a conspiracy against Prince Alexander, who had adopted an inconveniently independent attitude towards Russia in the later period of his reign. The plot failed, and M. de Hartwig was discreetly removed to another sphere of activity. From this time dated his antipathy to Bulgaria, which greatly influenced his subsequent policy.

As Minister at Teheran he found abundant scope for his enterprising instincts, which led him to place a somewhat loose interpretation on the obligations of Russia under her agreement with Great Britain, and his activity eventually became so disconcerting to his Government as to necessitate his transference to another post.

Appointed to Belgrade, he lost no time in actively promoting a project for a combination of the Slavonic States of the Balkan Peninsula against Austria-Hungary. The plan was entirely distinct from the larger project of an alliance of all the States of the Peninsula against Turkey, with a view to the liberation of the Christian subjects of that Power, which was initiated by Mr. Venizelos in a proposal made to the Bulgarian Government in the spring of 1911. Of this M. de Hartwig and the Russian Government knew nothing until a comparatively short time before the outbreak of the war.

In the period preceding the second Balkan war M. de Hartwig did much to encourage Servian pretensions against Bulgaria. He is stated to have promised Servia the possession of the whole valley of the Vardar, and even of Salonika. His policy was far from meeting with the approval of the Russian Government, but he enjoyed the support of the forward party at St. Petersburg, which included several Grand Dukes and other important persons, and his position remained secure. His policy has had a disastrous effect on Slavonic unity in the Balkans and has extinguished the influence of Russia in Bulgaria.

THE BALKAN COMMITTEE.

The annual meeting of the Balkan Committee was held on Wednesday, Mr. Noel Buxton, M.P., presiding.

Lord Bryce, who proposed the adoption of the report, attributed the misfortunes of the Nearer East since the Treaty of Berlin to the non-enforcement of that Treaty. The second of the late wars in the Balkans was ended by the Treaty of Bucharest, which had proved a most unsatisfactory arrangement. The Balkan States should reconsider this treaty, and arrive at a better adjustment, which would remove the causes for oppression that now existed. They should also feel that their duty was to act in a manner worthy of the freedom which they had won. That counsel would be given by the Balkan Committee, and it would be the general sentiment of Englishmen if they would only concentrate their minds upon the question.

Mr. J. D. Bourchier said that since he had last addressed the Committee a deplorable situation had been created in the Balkans. At the beginning of last year, when the delegates of the victorious Balkan States were assembled in London, there were good grounds for hoping that they would contrive to make an equitable division of the conquered territories in accordance with the principle of nationalities. The Young Turk *pronunciamiento* at Constantinople followed, the war was protracted, and unhappy disputes arose among the Allies. The blame for the internecine war that followed must not be laid on one State alone; those who repudiated their engagements and offered provocation in various ways were at least as culpable as those who first drew the sword. The Treaty of Bucharest followed, an arrangement imposed by force and marked by a complete disregard of the distribution of races and even of commercial and economic considerations. That Treaty, which had now been in existence neary a year, had been productive of an incalculable amount of misery among the subjugated peoples, accompanied by migrations *en masse*. It had been followed, not by peace and tranquillity, but by feverish military preparations, involving an enormous outlay and violent efforts on the part of those who had appropriated the greater portion of the spoil to assimilate their new subjects by forcible methods. These methods, applied, as a rule, by undisciplined local officials, would only perpetrate racial enmities, exhaust the young States financially, and lead to another war.

ROUMANIAN LETTER.

(From Our Own Correspondent.)

Bucharest, July 12.

Mourning for the Late Archduke.

The Austro-Hungarian Press expresses gratification at the publication of the official Royal *communiqué* referring to the mourning in this country for the late Archduke Franz Ferdinand. As it is not customary for such a *communiqué* to be issued in regard to such cases of Court mourning, it is evident that the King and Queen wish by their action to show how intimately they join in the sorrow caused by the death of their friend. Another mark of the personal affection existing between the two Courts in spite of the political coolness, was the fact that both the King and the Queen wore Austrian uniforms at the requiem service held here.

The New Territories.

Work on the highways and railroads to connect the newly acquired territory with Roumania proper is being actively pushed forward. The Minister of Public Works, Dr. Anghelescu, and the Prime Minister, Mr. Bratiano, have left to make a tour of inspection in the newly acquired territory in connection therewith, and they will also inquire into complaints of certain irregularities in the fixing of rights regarding the ownership of land. In connection with the last point the Minister of Agriculture, M. Constantinescu, has also left, and it is the firm purpose of the Government that absolute justice shall be meted out in the new territory.

A Railway Question.

Various rumours are current regarding proposals for the construction of a railway line from the Russian frontier to the proposed Serbo-Roumanian bridge across the Danube; and naturally enough these rumours—which I am unable to check—have called forth the comment from various quarters that they are the first real result of the visit of the Tsar to Constantza. Up to the present, it is observed, Roumania has been a barrier across Russia's path to the Balkans. (Whether it is a good thing for such a barrier to be removed may probably appear doubtful to some of your readers; but just now one does not hear the question asked here.) Such a line would obviously be of great strategic importance for Russia; and the discussion of the question sheds some light upon Italy's keen desire for an independent—but not too independent—Albanian State; for the railway, if and when completed, would give Russia an easy road to Antivari.

A Frontier Proposal.

The Bulgarian Government has addressed a Note to the Roumanian Government, in which it proposes that, in order to prevent the occurrence of further frontier incidents of the kind that have been so numerous of late, the frontier posts of each country shall be set back one hundred metres from the actual frontier line. Similar proposals, I understand, have been addressed to the Servian and the Greek Governments; and in the present state of affairs a good deal could be said in favour of the suggested arrangement.

RELICS FROM A RUBBISH HEAP.

On Monday Sir Frederick G. Kenyon, Vice-President of the Egypt Exploration Fund, opened at Burlington House an exhibition of antiquities unearthed by the Fund's excavators, led by Mr. J. de M. Johnson, at Antinoe. The exhibition comprises many objects which serve to illustrate the everyday life of the town founded by Hadrian, such as shoes and boots, linen dresses, bracelets, and other ornaments, knives and spoons, glass ware, and a variety of household articles, toys, and so forth. But the most important finds made by the diggers consisted of a large number of papyri, including one large fragment containing some 600 lines of the Idylls of Theocritus, which is supposed to be part of a late 5th or 6th Century papyrus book. Some interesting Coptic fragments were also secured. Most of these treasures were recovered, as was the case at the excavations at Oxyrhynchus, carried on by Messrs. Grenfell and Hunt, from the rubbish heaps of the old city.

SALONIKA LETTER.

(From Our Own Correspondent.)

Salonika, July 11.

The Austro-Hungarian colony in this town were invited by their Vice-Consul, in the absence of the Consul-General, to assist at a requiem service for the repose of the souls of the Archduke Franz Ferdinand and his consort, to be held on Saturday morning last in the Roman Catholic Church, which service was very largely attended. We were somewhat surprised to see that neither the foreign Consuls nor the local authorities were officially represented; also to learn that no invitations had been issued to them. Usually on such occasions they all attend in full uniform, so one's curiosity was aroused. On inquiry it was explained that as the Treaty of Bucharest has not yet been formally recognised by the Great Powers the Greek position is still undefined, and that official invitations might have given rise to questions of precedence, which it is more prudent to avoid. Whether this is the true explanation we, of course, cannot say, but it does seem rather odd that the Greek flag on the White Tower was up to the truck on this occasion and on others, when all the Consulates' flags were at half-mast.

'Out of Works" Problem.

In the last Salonika letter it was said that the heads of some sixty Jewish families had been thrown out of work through the under-cutting of prices by refugees in the matter of carrying salt; and now about a thousand other workpeople have just been dismissed by the Turkish Tobacco Régie, whose monopoly has come to an end in the new Greek provinces. And so it goes on from week to week; the demand for labour daily becoming less and the consequent distress greater. I doubt that a single new house or building has been erected here since the occupation; whereas up to a couple of years ago it was almost impossible to find bricklayers, masons, and joiners free to undertake new contracts. Now the difficulty is to find work, and there are thousands out of employment—not reckoning the refugees.

The Imprisonment of a Journalist.

For an outsider to understand Greek legal procedure is a quite impossible matter; but no doubt the two or three hundred lawyers who have come here during the last few months to lighten our darkness are familiar with and revel in its intricacies. Mention was made some five or six weeks ago of the Jewish editor of the *Avanti* (a paper printed in Judeo-Spanish with the Hebrew character), who was imprisoned because he had criticised the compulsory closing of shops on non-statutory fête days, a further charge of insulting the King, whose "name day" it happened to be on this particular occasion, being tacked on to the indictments. Although the Grand Rabbi has pleaded with the authorities on this man's behalf, vouching for it that there was nothing in the article really insulting to the King (and surely the Grand Rabbi should be the better judge of his own language), and although bail to the extent of £1,000 was offered for him, this unfortunate editor is still locked up and untried.

A Socialist Case.

Another case that has just attracted considerable attention is that of two Jewish Socialists who some short time ago were condemned by the Governor-General to be deported because evidence had shown that they "had anything but amicable intentions; that under the pretext of perverted Socialist theories they imposed on the ignorance of the working classes to whom the State accords every protection by special laws; and that by their acts and teachings they, from the State's point of view, poisoned the national soul."

They appealed against this sentence, and the hearing of the appeal came on last week, when the lawyers for the accused men demanded the adjournment of the case until their clients could be present, contending that the law gave them the right to defend themselves personally. Besides, the Court having previously decided it was incompetent to order their return, and a telegram having already been sent to the Minister of Justice in Athens praying that the men should be brought back for the trial, the lawyers held that, at least, there should be a postponement until an answer had been received.

To cut a long story short, every demand of the four defending lawyers being opposed by the Procureur and rejected by the Court, one of them advanced to the bar and declared, on behalf of himself and colleagues, that, in view of this opposition, they could no longer undertake the defence of their clients; whereupon they and their witnesses put on their hats and left the Court. After their departure the case was continued, witnesses against the accused were heard, and it finally ended with the rejection of the appeal. So the accused will remain deported in Naxos. As a further little incident of the trial, one of the audience, a Mr. David Recanati, of the Socialist Federation, was arrested and sentenced to be kept in custody for twenty-four hours for having "smiled ironically during the giving of the evidence of one of the witnesses."

An official communication issued yesterday to the Press says that the allusions in the local papers to the recent arrest of Bulgarians on board the "City of Malaga" gave an "inexact and distorted account of the incident, the truth being that some subaltern police agents, ignorant of the privileges of international rights, and especially of Anglo-Greek conventions, forced their way on board the said steamer, and that these agents have been punished according to the disciplinary regulations." This communication, however, is altogether silent about the beating and treatment on board the ship of one of the Bulgarians; nor does it say whether these men were subsequently given up to the British Consul, as should have been insisted upon; it is likewise silent as to whether the beaten Bulgarian is still alive.

ROADS SACRIFICED TO HOSPITALITY.

(From Our Own Correspondent.)

Haifa, June 29.

The Turks have eagerly availed themselves of every opportunity that presented itself to show their appreciation of the services so gallantly rendered by the sailors of the German warship "Goeben" at Constantinople recently. The Turkish authorities here have therefore not neglected the opportunity to demonstrate their gratitude and admiration on the occasion of the visit of the "Goeben" to Haifa yesterday.

Acting on instructions from Constantinople, the municipality invited the officers and crew to a grand reception in their honour, which was held to-day in the beautiful gardens near Acre. The commander willingly accepted. He invited many dignitaries, both Germans and natives, to proceed with him on board the "Goeben" to Acre with the object of attending the reception. They gladly responded to the invitation, the prospect of travelling on a Dreadnought being alluring. A large number of people were, therefore, on board when the "Goeben" steamed away this morning for Acre.

The entertainment at Acre, although the first of its kind, was magnificent. It took place in the open air on the banks of the Cishon River. There Arabic hospitality was lavishly dispensed. A large variety of food was provided, and champagne was served to the officers and beer to the crew. Cigarettes were also distributed. Friendly toasts were exchanged. After lunch the commander and his gallant crew were invited to witness an interesting display of Oriental games. An interchange of cordial speeches followed. Native speakers urged the strengthening of the bonds of friendship that have hitherto existed between the German and the Turkish Governments. The commander, in reply, delivered a speech in German, which was translated into French by the Consul, and afterwards into Arabic. During these proceedings, it is affirmed, exclamations of "Vive La France!" were made by some irresponsible urchins, who, however, were immediately silenced by the people. At the close the German admiral sent a telegraphic message to the Grand Vizier expressing the thanks of himself and his crew for the very enthusiastic reception accorded to him by the authorities. The ship then returned to Haifa, and left on the same evening for Cyprus.

The municipality is to be congratulated on this departure from its hitherto rigid custom of parsimony. Indeed, so parsimonious is the municipality that it is almost incredible that a couple of hundred pounds has been lavishly spent on this reception. The sum is enormous, and such as the combined municipalities of Haifa and Acre can ill afford. As a result fears are entertained lest the roads in this locality may not be repaired for a long time to come.

THE SITUATION IN ANATOLIA.

(From a Correspondent.)

Constantinople, July 13.

A severe censorship of the Constantinople Press preventing reliable news from coming through concerning the troubles in the Aidin Province, I took an opportunity offered to visit some of the districts affected. The villages of Old and New Fokia, Serekeui, Oloujak, Dikili, Pergamos, Aivali, Edremid, some villages near the Dardanelles, Chesme, and Vourla are denuded of their Greek inhabitants, most of whom have either crossed over to Greece or taken refuge in Smyrna. Their properties are now for the most part occupied by Turkish refugees from Macedonia, whom it will be difficult to oust from possession later on. The interest in events shown by the Powers has had a good effect; and the very critical situation of a fortnight ago is now undoubtedly improving, and fears of any further outbursts of feeling on the part of the Turkish refugees against the Greeks are lessening. The authorities do not deny that massacres and isolated murders have taken place, but they hold that the case against the Turks has been much exaggerated. The fact that they admit this is so much in their favour, and now that their proposal of a mixed Commission for the exchange of properties in Macedonia and Asia Minor has been accepted and, in fact, is already being acted upon, everything points to a more peaceful future.

The International Commission of dragomans of the Embassies at Constantinople has had its little holiday, and its members, having written long reports and made various journeys into the interior, have returned to their posts at Constantinople. They visited the different scenes where massacres were stated to have been perpetrated, and were convinced by only too evident signs that people had been killed and houses burned—some with their owners inside. Whether the Embassies will be able to persuade or bring pressure to bear on the Turkish Government to pay compensation for the outrages is, however, very doubtful; for the Turks have quite as strong rights to ask the diplomatic corps to use their influence in favour of the hundreds of thousands of Mussulman refugees from the Greek, Servian, and Bulgarian new territories. Only two or three days ago a Russian and a Belgian steamer arrived crowded with Turkish refugees from Macedonia.

In the meantime many of the petty Turkish officials in the interior are conducting matters with a high hand, and European owners of property at places like Edremid, Aivali, and Pergamos, are having great difficulty in obtaining possession of their goods. The Villayet has given notice that a public auction will be held for the sale of goods left behind by Greeks in that district. Their reason for this sale is a delightful one—"to protect the interests of the creditors of the fugitives." As it is almost certain that of those who have gone nearly all have sums to receive from their Turkish clients, the official explanation is rather far-fetched. Some of the Greeks from the disturbed centres owe money to European merchants and agents in Smyrna, but it is not likely that the proceeds from the public auction will go towards settling these debts.

Another characteristic notice of the Vilayet was posted up a few days ago, giving a delay of three days to the refugees from the different districts to return to their homes and take up once more their daily occupations. Should advantage not be taken of this, the Government will be forced to install Macedonian emigrants in their homes to safeguard the tithes of the country. It is quite safe to predict that very few Greeks will return in the three days, as many have gone to Greece, and those sheltering in Smyrna have no money left with which to return, even if they dared to do so at present. It would be much more straightforward on the part of the Government to avow openly that it has decided to clear out all the Greeks from the villages on and near the coast from Smyrna to the Dardanelles and to replace them by Turks. This is evidently its policy, and if compensation were given, either in money or in grants of lands in other parts of Asia Minor, the Government would probably be justified, as it is held that the presence of so many Greeks on the coast opposite important islands in Greek possession is dangerous to the interests of Turkey. The injustice of its policy lies in the drastic manner in which the inhabitants have been unceremoniously bundled out, without any notice and almost without clothes on their backs. The loss to the country's revenue will be tremendous, and it will be a few years before the tithes resume their former total in the depopulated districts; for without exception all those driven out were industrious working people and contributed largely to the revenue. In Aivali, particularly, the returns from olive oil were very important and business until recently was flourishing. The destruction there was perhaps greater as in any other town, the property of the British Vice-Consul suffering badly from the unwelcome attentions of the rioters.

The great problem now will be what to do with the thousands of refugees in Smyrna. Many of them would like to leave for Greece, but the authorities refuse them permission. If they return to their homes they will find their crops suffering from neglect and probably harvested in cases where they were ripe. Their case is a pitiful one, and it is taxing to the full the resources of the Greek Church and benefactors to feed and clothe them.

One good sign of the abatement of the high tension existing between Greece and Turkey is the partial resumption of the local Greek steamship services. This, coming after the sudden complete withdrawal of all Greek shipping from Turkish waters, is certainly peace-like.

Other signs are not wanting that the boycott movement has reached its height, and, as it was the boycott campaign that led to the more violent one of expulsion and murder, it may be that a fair semblance of order will soon be restored. The Vilayet, acting under instructions from Constantinople, has just issued a communication setting forth that, as the incitement of the people to boycott and prevent by force all business has caused serious discord to arise between the various elements of the Ottoman nation and endangered the peace of the country, it has been decided that all suspected of preaching a boycott propaganda, publishing or circulating false news tending to rouse ill-feeling between the different races, or in any way disturbing the general peace, will be tried by court-martial and severely punished if found guilty.

THE MURDER OF CAPTAIN FAWCETT.

On Wednesday of last week the Native Assize Court at Alexandria found Abdulla Hassan guilty of the murder of Captain Samuel Fawcett, the marine superintendent of the Khedivial Mail Line at his home in Alexandria on April 27; and this week at the Alexandria Assizes he was condemned to death.

THE NEAR EAST.

THE NEAR EAST is on sale at all Bookstalls and Newsagents in the United Kingdom. Should any difficulty be experienced in obtaining the paper, readers will oblige by notifying the Manager. Abroad THE NEAR EAST may be obtained in:

PARIS. Librairie Hachette, 79, Boulevard Saint-Germain; Librairie Galignani, 224, Rue de Rivoli, and at Railway Bookstalls.
VIENNA. Goldschmiedt Brothers, Zeitungsbureau, Wollzeile, 11.
CONSTANTINOPLE. Economic Co-operative Society, Pera; Benjamin Rawe, British Oriental Bazaar; D. Marianopoulo, 280, Grande Rue de Pera; and The Nautical Bazaar, Galata.
SALONIKA. Librairie Francaise, Rue Sabri Pasha.
SMYRNA. Dem. Tzannou, Petite Rue de Rose, and F. S. McVittie.
BEYROUT. Sarrafian Brothers.
JERUSALEM. Palestine Educational Store, Jaffa Road.
CYPRUS. Cababe and Wilson, Nicosia.
CAIRO. Diemer and Company, Shepheard's Buildings; The British Library, Sharia Kasr-el-Nil; C.M.S. Bookstall, 15, Sharia Madabegh; and at Railway Bookstalls.
ALEXANDRIA. Librairie Schuler, Rue Cherif Pasha; Nacamulli and Company, 12, Rue Sesostris; Librairie Calebotta, Rue Cherif Pasha Librairie Caero, Rue Cherif Pasha; The Eclectic Bookstall; F. Diemer, Cairo Station.
PORT SAID. Charles Evans, and on board vessels in the harbour.
KHARTOUM. Sudan Stationery and Bookstore, and Victoria Bookstall
ATHENS. Eleftheroudakis and Barth, Place de la Constitution.
SOFIA. Librairie de la Cour.
BUCHAREST. Socec and Company, Calea Victoria
BELGRADE. La Librairie Internationale, 16, Rue Prince Michel.
NEW YORK. The International Bibliopole, 116, East 28th Street.

Readers in France who desire to secure THE NEAR EAST regularly are informed that any Newsagent in that country can obtain the paper for them through Messrs. Hachette, in Paris. In the same way any Newsagent in Belgium can readily obtain the paper from the Agence Dechenne, Bruxelles.

NEAR EAST BOOKSHELF.

"THE ISLES OF GREECE."*

While he was serving his country as Consul at Athens the author of this delightful volume of Ægean studies spent one of the intervals of freedom from his official duties in the island of Andros, and during the same summer holiday made brief excursions to some of the nearer Cyclades—to Syra, Naxos, Tenos, and a few others. The record of that far-off Andrian summer (Professor Irving Manatt was American Consul at Athens from 1889 to 1893) has been given to the world after many years. It was not an ill-advised undertaking. This record, however, is only about half of the book, the remainder consisting of chapters, chiefly on Ægean subjects, which were written at a later date, and three of which have already been published as magazine articles. These also are worthy of being rescued from an ill-deserved oblivion. "This book," writes Professor Irving Manatt in his preface, "owes its being to a single aim. That was to share with kindred spirits—with all true lovers of old Greece—the author's own impressions of the brave, blue Ægean." It may be granted without any hint of insincerity that the author has successfully attained his object.

In spite of a straggling and diffuse manner, the "simple record," as the author modestly calls it, has an underlying unity. Throughout the reader is conscious of the glamour of past ages. The writer has the happy knack of suggesting a scene from the past by means of a few masterly strokes. Old Greece lives still for him and the old Greek speech. "One summer in the Cyclades," he says, "should prepare even the schoolboy Philistine to enjoy his Homer and to find choice society in Plutarch. What our Greek needs is the touch of reality, the warm breath of life; undo the cerements and roll away the stone. Greek is not dead—at least, out of school!"

But the writer is not so wrapped up in antiquity that he refuses to pay any heed to the throbbing life of the present. Rather he is quick to observe any quaint or significant scene in the passing show. In Chapter XIV., entitled "A Modern Greek Pilgrimage," a visit to Tenos is described—the island that "has supplanted Holy Delos as a place of pilgrimage," and whither "to the Greater and Lesser Panegyreis, in April and August respectively, flock the Hellenes from three continents." The writer was there at the time of the Lesser Panegyreis, and he records an incident of his visit as follows:—

> In the harbour two Hellenic battleships are firing a salute as the festal procession, escorted by Hellenic "blue-jackets," pours into the little square and halts to answer the national guns with the National Hymn. The Tenian *Panegyris* is not merely a pilgrimage of the faithful, it is a patriotic demonstration. Here the Greeks of the Captivity from all the East come to kiss the soil of Free Greece; and Free Greece takes care to meet them with her best and bravest show As Athens used to send her splendid *theoriai* to Delos, so she now sends her ironclads to Tenos—and sweeter than droning liturgy, ay, sweeter than the National Hymn, to the pilgrim from afar is the music of Greek guns.

The spirit of modern Greece breathes through the words, for the war god is still worshipped in Greece as in the old days.

For the rest there is no lack of "fine confused feeding" in the holiday journal, which is packed with reminiscences of the great days of old Greece and with lively and pungent observations on island manners and customs, men and women. Nor is the seemingly trivial omitted, and the merits of the entertainment provided by island hosts and hostesses are not forgotten. Throughout the author writes with zest, and his high spirits are infectious.

In the second part the student of Greek literature will not fail to discover plenty of matter for delight and instruction. Visits to Keos and Lesbos would indeed be unprofitable without some reference to the island Muse, and the reader will find set in the narratives like precious jewels charming little dissertations on Bacchylides, Simonides, and Sappho. There is also a chapter, one of the best in the whole book, on a visit to the site of Troy. In Chapter XXVI. the history of Chios is traced from the Homeric age down to the present day. The latter part of this chapter, which was written during the recent wars, gives in some detail the "grim story" of the butchery of Chios in 1822. Some interesting extracts are quoted from Viscount Strangford's despatches at the time. Nothing can blot out the stain of that ghastly horror. But Professor Irving Manatt generalises unfairly on the character of Turkish Government, which he damns without mercy.

In fine, "Ægean Days" is a book worth the writing and worth the reading, pleasantly garrulous, learned without being dull, and a very cheerful companion.

* "Ægean Days." By J. Irving Manatt. (John Murray. 12s. net.)

AN ITALIAN VIEW OF TURKEY.†

A great Italian Empire in the future, to rival the great Roman Empire of the past, is naturally the dream of most Italians. Some of these dreamers see possibilities in the Italian influence in the Balkan States. Not so Signor Giuseppe Bevione, who, in his critical survey of the Balkan situation from an Italian point of view, acknowledges that Italy has no representative power to speak of, while England, he says, can afford to be a "looker-on," holding as she does Cyprus and the Suez Canal.

The author deals with the involved political situation in the Near East in a series of simply written, straightforward articles; and from first to last one is struck by the very fair, impartial line he adopts. In covering his wide field he emphasises the importance of the Armenian question, and notes the constant vigilance regarding it of Russia, France and Germany, as illustrated by the organised canvassing of the remotest villages that has recently been instituted by the Government of the great War Lord.

Signor Bevione discusses "The Menace of Russia," "The Arabian Peril," "The Uncoveted Land of the Empire," "The Railways," "The Schools"—where French is an essential part of the programme—all things and everything, down to the "Care of the Holy Land," and "The Return of Israel." And he complicates nothing. He pities Turkey, and deplores her lack of the sense of justice, the bribery and corruption that exist in her territory, and the hopeless, intricate maze of her totally incapable Government. He forecasts more fighting in the future, and sees no way to prevent it.

"Even Lord Cromer—with all the very best technique at his command—supposing he were made Grand Vizier, but was bound, of course, to respect the limitations of power and customs of the country, could not change the affairs of the Ottoman Empire." He would, says Signor Giuseppe Bevione, resign at the end of one year, more in anger than despair!

NEAR EAST IN PARLIAMENT.

HOUSE OF COMMONS.

Naval Missions to Turkey and Greece. July 9.

Mr. Molteno asked the First Lord of the Admiralty what had been the cost up to date of the naval missions to Greece and Turkey; upon what vote was the cost borne; and when the missions were expected to terminate.

Mr. Churchill: The two missions are paid by the countries concerned, and no part of the cost falls on the Navy votes. The usual period for which naval officers contract to serve on these missions is two years, which is sometimes extended by mutual arrangement. The existing contracts will both come under review in the ordinary course next year, and it would be premature to discuss the question of their renewal before it had been raised by the Governments concerned.

Foreign Affairs. July 10.

The House of Commons went into Committee of Supply on the Foreign Office vote last Friday. The most important references in the debate to affairs of the Near and Middle East are summarised below:—

Mr. G. Lloyd criticised the attitude of the Secretary of State for Foreign Affairs in relation to the commercial interests of this country abroad, and expressed the view that Sir Edward Grey might well have secured for British traders advantages at least equal to those secured for the traders of foreign countries by their Governments. Both from the manner in which this country treated Turkish trade and our historic associations with Turkey we had reason to believe that we should get a fair share of the railway and other concessions in that Empire. But we had not done so. All the northern railways had gone either to Russia or France. Further south, Germany had the only big railway conceded in recent years. In Anatolia we had a concession which, he believed, was going now to be shared with the Italians. The whole network of new railway construction in Syria had been acquired entirely by the French. Those interested in these enterprises alleged that the Foreign Office generally moved too late, and he thought there was some truth in that. He did not think we had got a single mile of railway in the Middle East to show as the result of the last seven or eight years' work. Nor had we got any substantial advantage of an economic character out of the Anglo-German steamer and railway agreement. Sir E. Grey had not succeeded in obtaining for British traders or industry a single thing in the Turkish Empire which would give employment to workmen in this country. As to Persia, in regard to the Mohammerah-Khorremabad Railway, the Foreign Office had come extraordinarily near to being unbusinesslike. Had we actually got that concession now, and, if so, when might construction be expected to commence?

Mr. Ponsonby said he was glad to feel that Sir E. Grey was coming to realise that our position in Persia was one that must be reviewed again. Was there any truth in the rumour that already disturbances had broken out in the district in which the oilfields were situated, and, if so, of what nature were these disturbances, and were they likely to be easily put down? Although he voted for the Government, he felt very grave misgivings that this part of the world should have been singled out for supplying a vital commodity to our Navy.

Colonel Yate drew attention to questions arising out of the construction of the Trans-Persian Railway, the object of which, he said, was to link up the Russian line in the north with the Indian line in the south. He asked the Foreign Secretary to give India a definite guarantee that if a railway was to be constructed across Persia it should be built on the Persian gauge, distinct entirely from Russia and India, so that both countries might be fairly treated in regard to the transport of their merchandise.

Mr. Aneurin Williams said that in Armenia the life of the subject was never safe. This was the responsibility of the British Government, which had strongly supported Turkey and never made an effective condition that there should be reforms. European agents should be employed there and given ample powers.

The Foreign Secretary's Reply.

Sir Edward Grey, in reply, said: As to the suggestion made by Mr. Lloyd that more active steps should have been taken to obtain railway concessions in Asia Minor, he would point out that with the exception of one enclave nearly the whole field was covered by the Russian and German spheres of influence. In the Yangtze region, where there were already considerable British railway interests, one claim was that, when there were developments, by reason of those vested interests the new railway concessions ought to be British. How was he to make good that demand in China if in Asia Minor he pushed for concessions in the regions where other countries had vested interests? They could not apply one principle in one part of the world and another principle in another. Railway concessions in Asia Minor were mapped out years ago. He would rather get commercial concessions with the good will of the country in which they were given than under diplomatic pressure. Railway concessions were, however, not the only thing. There had been a large concession in regard to arsenals given, not under diplomatic pressure, by the Turkish Government to British firms, and there were certain other concessions in regard to Asia Minor which he hoped would mature. As regarded the Anglo-German navigation agreement, he believed that not only would our position under it be intrinsically better, but that we had secured an assurance with regard to the future which we had never had before.

With regard to the Mohammerah-Khorremabad Railway, the British company still had an option, which had been prolonged owing to the survey not having been completed because of the disturbed state of the district. He was all in favour of a British concession for this railway, but not of sending a British force into Persia in order to enable the survey to be completed. Nor was he in favour of pushing British trade or concessions in any part of the world where we should be required to make a greater expenditure to protect the concessions and trade than they were worth. He had heard of no disturbances in the districts of Persia where our oil concessions were situated. He did not anticipate that that concession was going to lead to all sorts of interferences on our part in the neutral zone. It was true that the Russian Press was making unfavourable comments on this matter, but he was not surprised, since a certain section of our own Press and some of the speeches in the House had suggested that we should be led to do all sorts of things which had never been contemplated at all. The Anglo-Russian agreement and the oil concession remained exactly as they were before the Admiralty came in. Nothing that the Government had done in relation to the Persian oil agreement was likely to lead to the alarming developments which had been suggested.

In regard to affairs in Armenia, the Turkish Government had been setting to work in a way which showed a genuine desire on their part to get good European inspectors, and, having got them, to obtain really good work out of them. Those inspectors were already discussing with the Turkish Government a scheme of good government.

Anglo-Persian Oil Contract. July 13.

Mr. Fred Hall asked whether there was a maximum price which the Admiralty would be called on to pay the Anglo-Persian Oil Co. for their supplies of oil under the sliding scale; if so, what was that maximum price?

Mr. Churchill: As I have already stated, it is not the practice or in the public interest that the price should be disclosed.

Mr. Hall: Is there a maximum price or not? If there is a loss on the by-products, does it naturally increase the price of the oil, and if it does not, how is the loss made up?

The Speaker: The hon. member must give notice of that question.

Situation in Albania. July 14.

Mr. Aubrey Herbert asked with reference to the reported occupation of Koritza and another place whether the occupation had been accompanied by considerable violence and cruelty; whether the Greek Government had taken any steps to prevent the organising and arming of the force operating in Epirus; and whether steps could be taken to prevent such outrages as were reported.

Mr. Acland: My information is limited to a report received from the British delegate on the International Commission in Albania that Koritza has been occupied by a body described as composed of insurgents and Epirotes acting in concert. His Majesty's Chargé d'Affaires at Athens states that the Greek Government have urged the Epirotes to evacuate Koritza should the International Commission so desire, but I am not aware what effect this recommendation may have had.

Persian Gulf Medal.

Mr. Wheler asked whether the First Lord of the Admiralty could now state when the medal for general services in operations carried out in the Persian Gulf in the years 1909-12 would be granted.

Dr. Macnamara (Parliamentary Secretary): A medal is being struck and will shortly be available for distribution.

Replying to Major Anstruther Gray, Dr. Macnamara stated that he hoped the medal would be issued this year.

The Mediterranean Fleet. July 15.

Mr. Middlemore asked the First Lord of the Admiralty whether, in view of the admitted necessity that we should remain the independent guardians of our own important interests in the Mediterranean, he would state the material standard which was aimed at by the Board in determining our naval requirements in those waters.

Mr. Churchill: In introducing the Estimates for this year I stated the actual naval strength to which we proposed to work in the Mediterranean, and I indicated that this was based on a variety of considerations, some of which belong to the domain of State policy. I am not prepared, in answer to a question, to discuss these considerations.

Greece and Albania.

Mr. Edmund Harvey asked whether the attention of the Foreign Office had been called to a photo taken in Koritza in April of this year showing a group of insurgent prisoners wearing Greek uniforms, and whether the attention of the Greek Government had been called to the use being made of Greek troops in Southern Albania.

Mr. Acland: I have heard of the existence of photographs which would appear to be sufficiently explained by the presence of Greek deserters among the Epirote forces. The Greek Government have withdrawn their troops, and have disclaimed any share in, or responsibility for, recent events in Epirus.

OFF THE BEATEN TRACK.

The Macedonian Granada.

SKOLPJE (Uskub).

How easy it would be to write "Uskub of the Turks" in the same vein as Spanish chroniclers, even of to-day, write "Granada de los Moros"! The snow-capped mountains are there—the Shar Range, where stand the romantic Sierra Nevada—the fruitful Vardar plain is the fertile *vega*, and where the Alhambra tops its hill, a citadel (Alcazar?) looks out over the river towards the Christian quarters, and losing itself in winding alleys, drops down through the bazaars into a valley of huts, mosques, minarets, and cypress trees, to climb anon a hill naked except for its Moslem tombstones, and crowned with a holy man's shimmering white tomb.

Past.

How similar likewise the history of the two cities! Coming down from Belgrade, and soon after entering the valley of the Vardar—desolate now, with burnt homesteads and shelled villages—a blood-red moon, short of its fullness by a few days only, rose over the plain of Kumanovo, and I could hear the hissing and exploding of the shells, and followed the headlong flight of the beaten army as it surged southwards to Uskub. Even so did the Moors for a last time make a stand in the *vega* against the victorious knights of Ferdinand and Isabel, and, defeated, flee to protect their worthless Boabdil behind the stout walls of Granada. Here the thread of similarity ceases. For Uskub is not fortified. So the demoralised Turks halted not. Arriving at Uskub, they threw down their arms; others, again, were disarmed by the Consular Kavasses; the old cry arose, "The enemy is upon us!" and the stream of fugitives flowed on down the Vardar, behind a screen of protecting hills. The victorious Serbs came into the town, and thus was Kossovo avenged. So also was the disaster at Guadalete avenged by the Catholic kings seven hundred years later when they captured the pomegranate and engraved it on their escutcheon.

Present.

The thread of similarity is taken up again, but only to insist on the misfortunes of the defeated and the fortunes of the victorious. There is no priceless library of wise writings to be burnt at Uskub by a genial Ximenez, but the antagonism between races and creeds is as strong to-day as it was in the beginning of the sixteenth century, for no farther has the world advanced in the last forty decades. The Spaniards reconsecrated the churches which under the Moslems had been mosques, but left places of worship for the followers of Mohammed. The same has happened at Uskub. That church on the hill, beside the citadel, has, it is true, been abandoned, its fount of ablutions in the courtyard having been used for watering horses. But from the mosques in the valley the muezzin still calls to prayer, and the Faithful, their numbers dolefully depleted, obey the summons. But in the courts the founts are sadly silent, and few are the impassive idlers on the benches which surround them. Alone with a friend I sat and watched the shadows deepen. Two children played innocently, now and again eyeing us guardedly with their big black eyes, afraid lest they were being watched; doves cooed their monotonous love songs as they would coo them again on the morrow; peace—and then twilight.

So likewise must have been the beginning of the end in Granada. The Moors fled from the shadows of their beloved Alhambra, and crossed the seas to build up Tetu'an. Then they were expelled, lock, stock, and barrel, and the muezzin's cry was heard no more. The first act of the exodus has begun already in Servian Macedonia; in Greek Macedonia, I am told, the curtain has risen over the second and final act. For there are not three acts in this tragedy of peoples and creeds, and soon the "Uskub of the Turks" will be but an *último sospiro*—a last sigh—and lizards will whisk among the stones of the few monuments left to recall to future generations the victories of yesterday.

Future.

Leaving Uskub for Skoplje (they are one and the same, except in point of time) we are faced with problems that never beset Isabel and her councillors. For Macedonia is, and has doubtless ever been, a seething cauldron of races, each of which, having asserted in turn its right by the might of conquest, must of a necessity rule with an iron hand. The Turks, it can be taken for granted, are leaving the country; they will vanish unless serious steps are taken to retain them, and with them, most likely, will vanish the cultivation of opium. The Albanians, not a *quantité négligeable* in Servian Macedonia, will in all probability wander homewards; the Vlachs will continue in their passive rôle as sheep and goat herds, the Greeks and Spanish Jews as traders, whereas the Bulgars and Serbs will remain to exploit the natural fertility of New Servia. I shall not discuss here the proportions between the Bulgarian and Servian inhabitants of New Servia, nor which of the two countries carried on the most successful campaign of propaganda before the war, but what I do wish to emphasise is that the future of this part of hapless Macedonia depends on the co-operation and good feeling between the two principal elements which form the bulk of the population. There is another theory, namely, let the Bulgars go, and let the country be populated by southern Slavs from the Austrian provinces. So, also, thought the Spanish conquerors of Granada; but the *vega* of to-day is nothing as compared with the *vega* of yore. Besides, I was unable to discern any great desire on the part of Bosnians, Croats, etc., to settle in Macedonia—at present at least, considering that everything is unsettled, taxation high, the administrative machinery imperfect, money leaving the country, trade dead, the problem of Salonika unsolved, and race hatred bitter.

The future of Macedonia (under present conditions) depends, therefore, emphatically on co-operation between Bulgars and Serbs. Failing this, I foresee desolation in New Servia, and a general exodus, etc., of the strong Bulgarian element without the advent of new blood. But let us hope, for the country's sake, that it will be otherwise. To talk of a Serbo-Bulgarian *rapprochement* at the present time, either in Macedonia or in Belgrade and Sofia, means folly, but possibly it will come—some day, when a formula of compromise will have been found, and it will then create a prosperous Macedonia possessing its own port in Salonika, and its capital and distributing centre at Skoplje. As for Monastir, it is doomed beyond remedy, come what may.

C. R.

GOOD TEMPLARS IN PALESTINE.

A Good Templar Lodge was established at Beyrout on May 14, the members being native gentlemen. It is named "Purity" Lodge, and works in the Arabic language. It was organised by Demetrius Domian, of Jerusalem. The Chief Templar is Dr. Alexander Bey Baroudy; the Vice-Templar is Dr. Najib Badaoui; the Secretary is Khalil Abi-Mourad; and the Lodge Deputy is Dr. Najib Arbily. The parent Good Templar Lodge in Palestine is the "Mount Zion" Lodge, which was instituted on Mount Zion twelve years ago by Ald. Joseph Malins, of England, when touring the world as International Chief Templar.

TANGIER TO TEHERAN.

A correspondent in Roumania writes: "It is not generally known, but when the late Archduke Franz Ferdinand visited this country in 1909 an attempt on his life was planned by international criminals, but was happily discovered in time. It had been intended originally that the Archduke should visit Bucharest, but owing to the Austrian police getting wind of the proposed attempt this plan was changed, and the Royal guests remained all the time at Sinaia. On the afternoon of July 13, during an excursion which King Carol and his guest made together, an Italian named Francesco de Felice was arrested, and on him were found a revolver and some documents which proved that he and two others had planned an attempt on the life of the Archduke. Felice, seizing an opportunity when his guards' attention was distracted, was able to commit suicide, while his two accomplices made good their escape across the frontier in a motor car that they had kept ready for emergencies in the woods."

***

Persia, one of the most recent countries to receive that priceless boon—a Constitution, has been and apparently still is holding a General Election. It may be doubted whether the elections would have taken place at all just yet had it not been for the Coronation of the new Shah, which is timed to take place next week. But the Mejliss, or at least a quorum of sixty-nine of its 136 members, is a constitutional necessity for the purposes of the Coronation Oath. Hitherto only forty members have been returned, and from the progress of the elections throughout the country it seems at least possible that the requisite number will not have been elected by Coronation day, July 21. Persia's warmest friends would hesitate to state that the country was ripe for a Constitution in 1906, and since then progress, if anything, seems to have been retrograde. The members so far returned seem to be mainly of Clerical and Reactionary tendencies, but, as the correspondent of *The Times* at Teheran points out, it is most difficult accurately to gauge the progress of the campaign. It is at least evident that elections in many cases have been "made," and for those frauds detected several must have escaped notice. I see that one autocrat, the Governor of Ardistan, scorning any attempt at dissimulation, boldly sent in 1,000 voting papers filled in in the same handwriting. The authorities felt bound to reject the whole batch, resenting such a flagrant insult to their intelligence. The Persian post is notorious for delays, but it is instructive to learn that the printed instructions for holding elections dispatched from Teheran on April 18, presumably "on swift camels," only arrived at Kerman on June 21; while at Birjand, in Seistan-Kain, at the moment of writing the dispatches have not yet come to hand.

***

I have just been reading in the *Journal* of the British Chamber of Commerce of Turkey and the Balkan States a short article which shows how bitter Turk and Greek feel towards one another just now. It tells first how a Turkish daily paper of some standing, in one of its leading articles, attributes the high price of onions in Constantinople to "a trust . . . formed by Greek grocers, who are exploiting the Mussulman population with a view to remitting their enormous profits in this household commodity to Greece for the benefit of the fleet." One would have thought that the patriotic Ottoman might have "dished" the patriotic Greek grocer by presenting the money that he would otherwise have spent upon onions to his own Fleet Fund. Presumably, however, the succulent root is too tempting to be resisted; but I imagine it must bring tears to the eyes of the exploited Moslem population who yield to its compelling charm.

***

That, however, is only one side of the picture. The other side shows that even the progressive Greek can be childish on occasions. For the *Journal* goes on to tell of a Greek member of the Chamber, resident in London, who in March last (on being asked to pay his subscription for the year 1913) wrote to say that he did not wish to continue his membership, and a month later wrote again stating that he wished to discontinue his membership, as he only required "to be a member of impartial institutions the object of which is only the benefit of commerce and not propaganda." He added that he was calling the attention of other Greek members of the Chamber, who he hoped would follow his example. The observation about "propaganda" was due to a misunderstanding of English apparently; and the Chamber shows itself quite capable of protecting itself from such childish charges. But somehow the idea of a Greek, however good a commercial man he may be, objecting to the introduction of politics into *any* publication—so long only as such criticisms as may be advanced are favourable to Hellas—strikes me as rather delicious. For if ever there was a keen politician it is surely the Hellene.

CORSAIR.

LETTERS TO THE EDITOR.

The columns of THE NEAR EAST *are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of* THE NEAR EAST.

Letters intended for publication MUST be accompanied by the writer's full name and address, not necessarily for publication, but as an evidence of good faith. They should be worded as briefly as possible and must be written on one side of the paper only.

TURKEY AND GREECE.

To the Editor of THE NEAR EAST.

SIR,—This Turco-Greek business appears very ugly. Looking over back numbers of THE NEAR EAST, I find this crisis to have been foreseen long ago in all its details.

Consequent on the Balkan war and the aggrandisement of Bulgaria, Servia, and Greece, it was surmised that a large Turkish population would be displaced and cause economical disturbance to the Turkish provinces of Asia. This has happened, and the horrors of it are only to be imagined by those who have read of the misery of the same land at the first advent of the Turks into Europe or Asia. So far, therefore, there is nothing to be said. Some day the conqueror must be conquered, especially when he has not learned not to abuse his conquest.

There are, however, two elements in the present situation which require consideration. The Turk as a governor remains as rotten to-day as he has ever been, but the Greek is, if anything, a bigger "rotter," because by nature he is unstable and by religion an ignorant fanatic, totally unfit to co-operate in the regeneration of the East. In these circumstances what is to be done? A large Turkish population has been forced to emigrate from Thrace and Macedonia, and so it is no wonder that a Greek population should be desired to vacate the Ottoman territory. This may be a fresh *casus belli*, if you like, but let it be so.

What is of greater concern for the world at large is to see an end to these recurring troubles; but as no Turkish consolidation would be permitted in the event of her smashing Greece, and as the extension of Greece's influence in the East would not further civilisation or peace, a war between the two countries would give no result. On the other hand, the Arabs are sick and tired of the wily Turk as a ruler, and the five million Greeks still residing in Turkey are a cancerous growth, which is eating her heart away.

Yet the Turk must live somewhere, and if anywhere it is in what is left of Turkey in Europe and in Asia Minor under his own flag.

Therefore, the only solution would be for Turkey to divide itself into a number of federated States, giving all the Greeks within the country the option of emigrating to Greece, or anywhere they like, or taking the oath of allegiance to the State they are in. Those States should each have a European adviser of the nation it likes best. The present Ottoman Empire is no good to either Moslems or Christians.

The Khalifate should return to the Arabs, and be by election as at its inception, with the understanding that a proportionate chance be given for an occasional Shia Khalif to be elected, and the seat of the Khalifate should be in Medina.

Failing some such arrangement Turkey and Greece must come to blows, and as both are fanatical there will be no end to the strife, while the population on both sides will suffer greatly both in struggle and in the matter of taxation.

My reasons for advocating such a solution are:—1. The Turk is an incapable and incorrigible ruler, and is no longer to be taken seriously as a conqueror. 2. The Greek has all traditions, past and present, against him as an Imperialist. 3. The population of both countries is too poor and backward to allow of much arming. 4. Five millions of Greeks cannot be suffered to remain deriving their living in Turkey while hating and undermining its people openly and secretly. They must be loyal or go out. 5. Incessant denunciation of the Turkish rulers and their people is becoming quite a disease.—Yours truly,

KARA COSHMAR.

Constantinople, July 7, 1914.

ITALY AND TRIPOLI.

To the Editor of THE NEAR EAST.

SIR,—Surely your Cairo correspondent is in error in supposing that, when Turkey made peace with Italy, Tripoli became the property of the latter.

By the Treaty of Lausanne Turkey agreed to withdraw her troops and to give no material assistance nor encouragement to the Arabs. Turkey did not cede Tripoli to Italy, but left the Arabs independent.

In Cyrenaica Italy has been unable either by bribery or by force of arms to make good her claim of annexation.

All our sympathy should be on the side of the freedom-loving followers of the Senussi. They are making a heroic resistance against the overwhelming forces of a nation which is alien alike in race and religion.

Since the British occupation of Egypt the most correct and cordial relations have existed between the Senussi and the Egyptian Government.

Let us hope, therefore, that the latter will continue to adopt a sympathetic attitude towards this gallant people.—Yours, etc.,

C. F. DIXON-JOHNSON.

Croft-on-Tees, Darlington, July 14, 1914.

THE PRESS ON THE NEAR EAST.

Mr. Venizelos on the Crisis.

An interesting account of an interview with Mr. Venizelos, by Mr. J. B. Brandeth, the special correspondent of *The Financial Times*, was published in the issue of that paper of July 8. Referring to the mixed Commission of Turks and Greeks to prepare an exchange of population, the Greek Prime Minister stated that "there is a great difference between the voluntary emigration of the Moslems from Greek territory in Macedonia and the compulsory exodus of the Greeks from Thrace and Asia Minor." We quote below the further remarks of Mr. Venizelos on the same thorny problem:—

It is totally at variance with the facts to assert that 200,000 Moslems had to leave Macedonia to escape persecution from the Greek authorities. When Ghalib Bey, the Turkish Minister in Athens, made representations to me on the subject of the alleged persecution of Moslems in Macedonia I strongly urged him to go and investigate the facts for himself. He did so, and on his return from Macedonia he admitted that both before and since the period of disarmament (the population of Macedonia all possessed arms until recently) there had been no ill-treatment or persecution of Moslems, but he related a number of cases of ill-treatment and bastinadoing of Moslems while the disarmament was going on. We immediately took steps to punish all Greek officials or warrant officers found guilty of harsh treatment during these disarmament operations, but the result of Ghalib Bey's inquiry shows there is no real foundation for all the stories related in the Turkish Press of persecution of Moslems by Greeks. Not only so, but the property of the Moslem emigrants has been carefully respected by the Greek authorities. Nobody has been allowed to take possession of the houses or land in cases where they were left unoccupied by the departed Moslems. The Turkish emigrants freely took away all their movable goods and chattels. The Greeks in Thrace and Asia Minor, on the other hand, witnessed the wilful destruction and pillage of their property, and in thousands of cases reached Greek territory without even shirts to their backs.

The Anglo-Turkish Agreement.

In the issue of *Truth* of July 8 a view is expressed regarding the Anglo-Turkish Agreement which must have occurred to many who have considered the question. We quote below:—

Seeing what we have done during the past one hundred years to police the Persian Gulf in the interests of the world's commerce, Sir Edward Grey is right to insist on the preservation of the *status quo* in those waters, but how it can be preserved by an agreement with the Turks passes my understanding. The Turks have no inclination, because they have no power, to interfere with us, and whether they agree or disagree with what we do or do not do is not of the smallest consequence, one way or another, either to themselves or to any one else. What the new agreement unfortunately does do is to recognise the hitherto more than dubious sovereignty of Turkey over the Arab coast of the Persian Gulf littoral, and this may open up some future loophole for a foreign Power in alliance with Turkey to interfere in Gulf politics. What makes matters worse is that the Foreign Office has agreed to pay for this worthless agreement by consenting to a 4 per cent. increase of the Turkish Customs duty, which will now be raised from 11 to 15 per cent.

Intervention in Southern Albania.

An able review of the situation in Albania is given in an article, under the heading "The Albanian Anarchy," which is contributed by "A Correspondent" to *The Economist* (July 11). Referring to the Epirote question, the writer says:—

In calling upon the peaceable Orthodox Epirotes to throw in their lot with their traditional enemies, the Powers have certainly incurred the responsibility of seeing that life is made possible for them under the new conditions. Self-interest also dictates that they should see to that; for if no protection is given to the Christians of Albania, we shall have here an open sore in international politics that may lead at any time to a raging fever. Already the Autonomous Government has been recognised by the Government of the Bret in an agreement made at Corfu, which concedes to the Orthodox districts, including Chimara, the guarantees necessary for liberty and safety. But little do the Mohammedan Tosces care for a paper signed at Corfu. Guarantees are good, but they are useless without some organised force to keep the peace between Christian and Mohammedan. Wasted by three years of war, the Orthodox districts are too weak and too poor to maintain such a force themselves. To save these unfortunate places from being overwhelmed by the anarchy of Albania, it is necessary that their autonomy should be upheld from without by the appointment of an international Governor, for instance, and the provision of an organised force for their protection, or by the provision of money with which to maintain such a force. The arrangement might well be made so as to maintain the sovereignty of whatever Government there may be at Durazzo. Now that annexation to Greece has been prohibited, that seems the only alternative. The Powers might consider the money well spent if it solved the worst difficulty of the many involved in Albania. It would be a premium of fire insurance against a fresh conflagration, and the nearer these conflagrations are to the Adriatic the more dangerous are they to Western Europe.

The Defence of Chimara.

"A Correspondent" contributes to *The Morning Post* (July 14) an interesting article entitled "Chimara at War." A graphic description is given of the way in which the struggle of the Chimariotes with the Mohammedan Albanians is being carried on. We quote below:—

The Turkish armies were gone and the Greek armies too. Released from all control, urged by their traditional hostility for the Christian villages, moved by envy of the vines and olives of the gardens of Chimara, embittered, it may well be, by the overthrow of the Mohammedan domination, the Albanian tribesmen collected in overwhelming numbers around the passes, and began, and still carry on, a determined campaign against the Christian villages within. In defending themselves against this attack the Chimariotes have one great asset in the personality of their present chief, Colonel Spiro Speiromilios. Banished from his birthplace as a boy by the Turks, he returned thither on the overthrow of the Turkish power, to organise the defence of his people. He has been prepared for the task by long service in the Greek Army and by ten years spent as a leader of guerillas in Macedonia. Of commanding presence and great personal strength, a swordsman and a shot, astute in council, ready in jest, and warm of heart, he is a born leader of men, cast in the mould of Garibaldi. Led by him, day and night the Chimariotes are guarding their passes and the summits of their defending range against the Albanian bands. In each village the men of fighting age are divided into two bodies, which take turn, a day on guard in the hills and a day at work in the village. The women carry up food and water to the posts. The schoolmaster's rifle is hung behind him in school, and every other day is a whole holiday, while he goes on guard upon the hills. Two little old mountain guns, one placed to command each pass, are the chief's greatest treasures, but their battery-commanders complain that when the skirmishing begins they are left to serve them alone: the gunners drift forward into the firing line.

The Ruling Turk.

A well-balanced survey of the Turkish governing class is given in an article in *The Times* (July 14) by its Constantinople correspondent. He says of its present leaders:—

In the new leaders of the governing class are found men of a type different from that of the majority of their followers. Most of the chief "Ittihadjis" (Unionists) are Rumeliots. Some are of Jewish or crypto-Jewish origin; others have been influenced by Jewish Salonika, the Mecca of the Turkish revolutionary, now in infidel hands. Their chief weaknesses are their lack of experience; their Oriental worship of force; the traditional Ottoman arbitrariness, supplemented by revolutionary intolerance, which leads them to regard opposition as a form of rebellion and criticism unsweetened by flattery as a proof of hostility. The national fear of responsibility clung to them during their first experiments in government, and led them to adopt singular and often transparent disguises which they have not altogether doffed. Their friends have done them a disservice by insisting too emphatically on the nobility of their ideals. Their enemies have insisted too strongly on the "strange" contrast between their libertarian precepts and their often arbitrary practice. Avid of power rather than wealth, capable of a high degree of patriotic idealism combined with what purists may regard as very materialistic political methods, they surpass most of their compatriots in courage and persistence.

Bulgaria and Robert College.

Everyman (July 10) publishes an article on "The Liberation of Macedonia," by Mr. David Starr Jordan, who has recently traversed Macedonia and Bulgaria from the Danube to the Ægean, and has seen something of the aftermath of war during his journey. Referring to Bulgaria, he says:—

The Bulgarians have accomplished most, blundered most, and lost most in the Balkan Wars. For the reason that they are now most humble, they seem to offer most hope for the future. The influence of Robert College, the American School at Constantinople, is stronger in Bulgaria than anywhere else, and this influence, cast always for good will and good order, is the strongest force working for peace in the Balkans. But there can never be settled quiet until the civil authority everywhere dominates the military and until customs-unions and co-operation in business cause these people to realise that one fate befalls them all, and that the welfare of each nation is bound up in the welfare of its neighbours.

PERSONAL & SOCIAL

CALENDAR OF THE WEEK.

Showing Concordance of the Gregorian, Julian, Moslem, and Jewish dates.

Gregorian. New style.	Julian. Old style.	—	Moslem.	Jewish.
1914. July.	1914. July.		1332. Shaban	5674 Tamuz
17	4	Friday	23	23
18	5	Saturday	24	24
19	6	Sunday	25	25
20	7	Monday	26	26
21	8	Tuesday	27	27
22	9	Wednesday	28	28
23	10	Thursday	29	29

Tuesday, Shaban 27, is the birthday of his Majesty Sultan Ahmed Shah, of Persia, who was born in 1314 (January, 1898), and attains his majority.

Wednesday, Shaban 28, is the birthday of H.I.H. Osman Fuad Effendi, the younger son of H.I.H. Mehmed Salah-ed-Din Effendi and great nephew of the Sultan, and Thursday, Shaban 29, is the birthday of his elder brother, H.I.H. Ahmed Nihad Effendi.

Monday is the birthday of H.R.H. the Diadoch of Greece.

To-day, Shaban 23, is the anniversary of the wedding of H.H. the Khedive to H.H. the Khedivah, Princess Ikbal Hanum.

Thursday is the birthday of H.R.H. Prince Elie of Parma, uncle of H.R.H. the Crown Prince of Bulgaria.

At the Russian Church in Welbeck Street, on Sunday morning a "Te Deum" was sung at the conclusion of the morning service in connection with the King of Servia's birthday. The Very Rev. Eugene Smirnoff officiated, and the Russian choir attending Drury Lane Theatre Royal took part in the service. Among the congregation were H.I.M. the Empress Marie Féodorovna of Russia, H.M. the Dowager Queen Olga of the Hellenes, the Grand Duke Michael of Russia, the *personnel* of the Russian Embassy, H.E. the Greek Minister, attended by M. A. Rizo-Rhangabe, first secretary; H. E. the Rumanian Minister, H.E. the Servian Minister, attended by M. A. V. Georgevitch and M. V. M. Petrovitch, secretaries; M. Chedo Mijatovitch, formerly Servian Minister at the Court of St. James's; Madame Grouitch, wife of the Permanent Under Secretary for Foreign Affairs; M. W. Tomanowsky, M. Alexandre Nelidoff, and a number of members of the Russian colony. The members of the Diplomatic Corps were in uniform and wore their orders and decorations.

By command of his Majesty the King the Hon. Sir Arthur Walsh, Master of the Ceremonies, called upon H.E. the Servian Minister, M. Mathéas Boshkovitch, on Sunday, at the Legation in Queen's Gate, and offered his Majesty's congratulations on the occasion of the anniversary of the birthday of the King of Servia. His Excellency held a reception of the Servian colony at the Legation, and congratulatory messages were sent to H.M. King Peter.

The King and Queen, the Queen of the Hellenes and Princess Eirene of Greece, Princess Frederick Charles of Hesse, Prince Philip of Hesse, Prince Wolfgang of Hesse, and Prince Christopher of the Hellenes visited Queen Alexandra at Marlborough House on Tuesday and remained to luncheon. The occasion was in the nature of a farewell party for the Dowager Queen Olga of the Hellenes, whose stay with Queen Alexandra ended on Wednesday.

The Dowager Queen Olga of the Hellenes left London en route for Greece on Wednesday.

Princess Louis of Battenberg, who has been staying at Corfu for the last few weeks, has returned to the First Sea Lord's residence, The Mall.

Our Bucharest Correspondent writes (July 11):—H.M. King Carol left Bucharest on Tuesday last to take up his summer residence at Sinaia. H.M. Queen Elizabeth, travelling from Constantza, met his Majesty at Ploesti, from which place they continued the journey together. On Thursday the King and Queen made a motor excursion as far as Brassov (Cronstadt), in Transylvania, remaining there about an hour. This is the first time their Majesties have visited Cronstadt for two years. Prince Ferdinand and Princess Marie, with their children, left Bucharest on the following day. They will remain in Sinaia until they go on their annual visit to the Princess's mother at Tegernsee.

H.R.H. Crown Prince of the Hellenes, accompanied by H.R.H. Prince Paul and his aide-de-camp, Captain Vassos, left Athens on Wednesday to join H.M. Queen Sophie at Eastbourne.

Our Bucharest Correspondent informs us that H.R.H. Princess Elisabeth, accompanied by her companion, Miss Milne, arrived at Sinaia on Saturday morning from Berlin, where she had been staying for a day or two with her brother, Prince Charles, who is attached to one of the Guards regiments.

Earl Kitchener was amongst the guests at the dance given by the Marchioness of Salisbury on Thursday night, last week, at 20, Arlington Street.

Lord Kitchener was amongst the guests of the Duke and Duchess of Wellington at dinner at Apsley House, Hyde Park Corner, on Monday night.

Sir Francis Wingate, Sirdar of the Egyptian Army, arrived on Saturday from London at Dunbar, where he will stay for two months. Despite an arduous year's work in the Sudan, he is in the best of health.

Sir Louis Mallet, H.B.M. Ambassador in Constantinople, left on Monday night for England on two months' leave. Mr. Beaumont, Counsellor of the Embassy, is acting as Chargé d'Affaires during the absence of his chief.

The High Commissioner of Cyprus, Sir Hamilton Goold-Adams, and Lady Goold-Adams motored to Larnaca on Monday from their summer residence at Mount Troodos, arriving there in the evening. They were met by Admiral Sir A. Berkeley Milne, whose guests they will be during their stay. The battle-cruiser "Inflexible" fired a salute. The admiral gave an "At Home" on Monday afternoon on board the "Inflexible," to which the foreign consuls and residents, and the Government officials and their wives were invited. The cruiser "Gloucester" has arrived at Larnaca.

It is semi-officially announced in Athens that arrangements are being made for a meeting between Mr. Venizelos, the Greek Premier, and the Turkish Grand Vizier to discuss the questions at issue between the two countries.

H.H. the Turkish Ambassador called at the Foreign Office on Wednesday afternoon.

H.H. Hakki Pasha called on H.H. the Turkish Ambassador on Wednesday.

MASPERO FRÈRES LTD
CAIRE EGYPTE
CIGARETTES EGYPTIENNES

Raif Bey, Councillor of the Turkish Embassy, has returned to town from Paris.

Mme. Mishu, the wife of H.E. the Roumanian Minister, has left London for the Continent.

Mr. Take Jonescu and Mme. Jonescu have arrived at the Ritz Hotel.

Mme. Grouitch, the wife of the Servian Permanent Under-Secretary for Foreign Affairs, has arrived in London from Paris on a short visit. At the end of this week Mme. Grouitch leaves for Switzerland, afterwards returning to Belgrade.

Major T. A. Cubitt, D.S.O., 114th Battery Royal Field Artillery at Farnborough, has been appointed officer commanding troops and Deputy-Commissioner in the Somaliland Protectorate.

The Teheran correspondent of *The Times* telegraphed, under date July 12, that Vosouk-ed-Dowleh, Persian Minister for Foreign Affairs, who resigned on July 1, had rejoined the Cabinet.

Major-General C. J. Hawker, who is organising the Ottoman Gendarmerie in the Trebizond and Erzeroum region, and has recently been making a tour to Erzeroum, Bitlis and Van, has now left Trebizond for Constantinople. He will shortly be coming home on leave, when his address will be 11, Buckingham Palace Gardens.

Dr. Engel Bey, Director of the Statistical Department at the Egyptian Ministry of Public Health, left last week for Europe on leave. On his return to Egypt he will remain for two months in the service of the Government, at the end of which he will retire on pension.

His Excellency Mohamed Heddaya Bey, Governor of the Suez Canal District, embarked at Port Said on Saturday week for Naples in the North German Lloyd s.s. "Prince Ludwig," on three months' leave of absence.

WHERE TO STAY.

LAUSANNE-OUCHY (Switzerland).

SAVOY HOTEL.
Near the lake, with splendid park.

CECIL HOTEL.
In the town and 5 minutes from the station.

Two First-class Family Hotels.
High-class Cuisine. French Chef.
J. SUMSER, Manager-Proprietor.

Sofia (Bulgaria).
GRAND HOTEL BULGARIE
(opposite the Royal Palace).
First-class Hotel. Entirely renovated and beautifully situated in the centre of the city, near Post Office, Theatre, Museums, Banks, etc. Electric Light, Central heating. Baths. Garage. Telephone. According to *The Egyptian Gazette*, John Price Bey, Inspector of the Government Buildings Department, although he attained the age limit of sixty years on March 28, 1913, is to be retained in the service of the Egyptian Government until April 10, 1916, when he will have completed thirty years' service.

Mr. Powell, Inspector of the Ministry of Finance, Mr. Harold Sheridan, of the Public Health Department, and Mr. Davidson, of the Higher School of Agriculture at Giza, Egypt, have each been awarded the prize of £E50 for having successfully passed the recent examination in advanced Arabic.

Mr. W. A. Stewart, of the Arts and Crafts Department of the Khedivial Technical School, Cairo, left Egypt for Europe last week. He intends first of all to visit Spain, where he will spend some time in studying Moorish remains at Granada, where he hopes to make sketches of examples of Mohammedan art to be seen there.

Mr. and Mrs. Hugh E. Poynter and Mr. F. Cowdry, of the Ottoman Public Debt, have arrived in London on their return from the Far East, *en route* to Constantinople.

According to *The Egyptian Gazette*, the airman, M. Marc Bonnier, who was recently in Cairo and Alexandria, has received the fourth class of the Order of the Mejidieh from the Sultan in recognition of his gift of a flying machine to the Turkish army.

Mr. Max Fischer, who has recently acquired the Cairo *Sphinx*, has been paying a short visit to London, and leaves for Paris to-morrow. He expects to return to Cairo about the middle of September.

Miss N. Griffiths, late of *The Egyptian Mail*, has been appointed editress of *The Sphinx*, and will take up her duties in the autumn.

Mr. Bernie Mansfield, late editor of *The Egyptian Morning News*, is now in Yorkshire, having definitely severed his connection with the paper.

Our Bucharest Correspondent writes (July 11):—A deputation of the 5th Rosiori Regiment, of which the Tsar was lately made Hon. Colonel, will leave on July 17 in order to present H.I.M. with the uniform of the regiment. The deputation will be presented to the Tsar by Mr. Diamandi, the Roumanian Minister in St. Petersburg.

Mr. Maiorescu and Madame Maiorescu are expected to return here at the end of the present holiday season, as the former wishes to take part in the work of the Constituent Commission. The health of both is now announced to be all that can be desired.

To-morrow is the seventy-seventh birthday of Mr. Peter Carp, the former leader of the Conservative Party. It is also St. Peter's Day in the Orthodox Calendar, so that the aged statesman celebrates his birthday and nameday at the same time. The most prominent members of the Conservative Party wishing to congratulate their former leader asked him whether he would receive a deputation. Mr. Carp's answer was: "Yes, certainly; then you can see how I know how to trample on old age!"

The German airman, Herr Albert Friederich, who flew from Berlin to Sofia, has arrived here on his Rumpler machine. He is the guest for a few days of the members of the Military Flying Corps, after which he continues his journey to Constantinople.

Captain Leonard Kirke-Smith, D.S.O., the Royal Scots, attached to the Egyptian Army, was married in Holy Trinity Church, Brompton, on Tuesday, to Vera, daughter of the late Captain and Mrs. C. H. Hicks, and granddaughter of Hicks Pasha and Mrs. Hicks, of Grindleford, Camberley. The church was decorated with palms and white flowers, and the Rev. A. W. Gough, the vicar, with the Rev. Godfrey Smith, brother of the bridegroom, officiated. The bride was given away by her uncle, Mr. A. L. Marriott.

A marriage has been arranged between Ronald J. W. Gervers, fourth son of Mr. and Mrs. Francis T. Gervers, of Amat, Ardgay, Ross-shire, N.B., and 7, Sloane Street, and Mary Edmee Kitchener, second daughter of the late General Sir Walter Kitchener, K.C.B., late Governor of the Bermudas.

The marriage of Mr. Arthur Hugh-Jones, of the Ministry of Finance, Egypt, and Miss Dalsibella Eden will take place at the Parish Church of Temple Cowley on July 29.

The marriage took place on July 8, at the British Vice-Consulate, Hamadan, Persia, of Mr. Roderick William Gray, son of the late Mr. Charles Forsyth Gray, of Marsala, Sicily, and Miss Gladys May Long, daughter of Mr. and Mrs. W. H. Long, of Devizes.

We regret to have to record the sad news of the death last Saturday of Lady Hardinge, who, as our readers are probably aware, was closely associated with Persian life during the years 1896-98, when Lord Hardinge was First Secretary and later Chargé d'Affaires at H.M.'s Legation in Teheran. The qualities of heart and quickness of understanding which distinguished Lady Hardinge not only endeared her to the European community of the capital, in whose life she filled so large a part, but earned her the respect and love of a wide circle of Persian friends. For her the barriers which are said to exist between East and West had no existence, and the Persians, who are a warm-hearted race, were quick to respond. To those who had the privilege of knowing her in the daily round of their work in the intimate circle of the Legation the charm of her manner and companionship were an ever-abiding joy. Love and understanding were her gifts to life, and in her the world loses a rare and brave personality.

A memorial service will be held in London to-morrow for M. de Hartwig.

The funeral of M. de Hartwig, whose death is announced by our Belgrade Correspondent, took place in Belgrade on Tuesday. The ceremony was of a most imposing character. All the troops of the Belgrade Garrison lined the streets through which the procession passed. After a solemn funeral service, at which the Metropolitan, assisted by the higher clergy, officiated, the body was placed on a gun-carriage, which was followed by the Crown Prince and Prince George, Mr. Pasitch, the Premier, and the Ministers, the Diplomatic Corps, the members of the late Minister's family, a large number of officers and representatives of many corporations, including some in the new territories. Both sides of the streets were crowded with people, who waited patiently all the forenoon in a scorching sun. The funeral was in every sense a military one, even to the salute fired over the grave.

A Cyprus correspondent writes: The German flagship "Goeben" visited Famagusta on June 30, and Larnaca on July 2, and Admiral Souchon and the officers were entertained by Consul Pierides at a garden party which was attended by the élite of Larnaca.

The British fleet was expected to arrive in Cyprus waters on July 10. The flagship and five ships go to Larnaca, three ships to Limassol, one to Paphos, and 14 destroyers to Famagusta.

Fifteen torpedo destroyers accompanied by the "Blenheim" will arrive in Alexandria on the 20th instant, and the following ships will arrive on the 22nd:—"Inflexible," "Indefatigable," "Warrior," "Black Prince," "Dublin," "Chatham," "Weymouth," "Glasgow." The squadron will remain until the 28th.

APPOINTMENTS AND PROMOTIONS.

Our Bucharest Correspondent writes (July 11):—Mr. Ristisch, the Servian Minister in Bucharest, who has been promoted to Rome, will leave Bucharest to-morrow (Sunday) for Belgrade, where he will stay for a short period before taking up his new post. Until the arrival of his successor, M. Gavrilovitch, the Legation will be in charge of the First Secretary, M. Foti Stanciovitch.

During the interval between the departure from Egypt of Sir Gaston Maspero and the taking over of his duties by his successor, the functions of the Director-General of the Antiquities Department will be performed by Mr. Daressy, the general secretary of the Museum.

H.M. King Ferdinand on Saturday received Mr. Naoum, the newly appointed Greek Minister in Sofia, who presented his credentials

M. Passaroff, the newly appointed Bulgarian Minister at Athens, has presented his credentials to H.M. King Constantine.

WHERE TO STAY.

Cairo's Hotels de Luxe.

SHEPHEARD'S HOTEL.

FRIDAY, JULY 17, 1914.

A STORMY PETREL.

The sudden death of M. de Hartwig, Russian Minister in Belgrade, removes from the diplomatic world the personification of the restlessness that is characteristic of Russian foreign policy. Wherever he had served his country abroad M. Hartwig had contrived to make his presence felt and remembered. To the diplomatic school which is content to be a transfer agency for the views and communications of two Governments he was a complete stranger. M. Hartwig always conceived it to be his duty to adopt a forward policy on behalf of Russia, and it did not seem to trouble him if he found himself even a long way ahead of the instructions and wishes of his own Government. In the early part of his career he had thrown himself with zest into the intrigues which led to the kidnapping of Prince Alexander of Bulgaria. For the part he then played he was not forgiven by the Bulgarians, and the antipathy which he entertained for the country from that time bore fruit during the last few years. His first important appointment was to Teheran, where he was credited with having prompted the Shah Mohammed Ali's policy of hostility to the constitutional movement. He supported Colonel Liakhoff in the bombardment of the Mejliss, and during the three years' tenure of his post established in Persia the Russian régime which has done so much to counteract the spirit of the Anglo-Russian Convention and to intensify the troubles of the Persian Government. When M. Hartwig was transferred to Belgrade he found wider scope for his activities, and set himself at once to foster an anti-Austrian combination of the Slav States under Russia's ægis. His purpose was admittedly to play Russia's game, although he may have been convinced that in so doing he was promoting the interests of Servia, Bulgaria, and Montenegro. There was, however, no altruism in M. Hartwig's diplomacy. The league of Slav States which he was anxious to establish was directed primarily against Austria-Hungary; it had little or no reference to the betterment of the conditions under which a Slav population was living in the European provinces of Turkey. Before M. Hartwig's scheme could mature it was absorbed in the greater scheme of a Balkan alliance directed against Turkey. In this movement the Russian Minister to Belgrade played no part. He had given no thought to Greece or Roumania in elaborating his own project, and the Balkan Alliance, which originated with Greece, was a *fait accompli* before M. Hartwig was brought into touch with it.

Although M. Hartwig's plans did not materialize in the way which he had proposed, he had the satisfaction of knowing that his work in Belgrade had paved the way for the Balkan Alliance. His championship of the Servian cause probably gave as much heart to the Servian Government as the subsequent victories of the Servian arms in the two Balkan wars gave to the nation at large. He stiffened Servian diplomacy in a way that neither King Peter nor any Servian statesman could have done single-handed. In the negotiations with Bulgaria that preceded the outbreak of the second Balkan war it is probable that the Russian Minister was in no small degree responsible for the stubbornness of the Servian attitude. Although prepared to bring the two chief Slav States into line for his own ends, he would have no hesitation in indulging his antipathy towards Bulgaria when it came to a disagreement between the two countries. By the time the Treaty of Bucharest was signed the Servian Government was conscious enough of its own strength to adopt of its own accord a policy towards Austria-Hungary that did credit to its mentor. But while that policy might satisfy the *amour propre* of the Servians, it may be doubted whether it was altogether in the interests of the Balkans as a whole. So long as M. Hartwig remained in Belgrade it would have been difficult for the olive branch to have been extended between Austria-Hungary and Servia. When he left it was anticipated in some quarters that his next post would be at the head of the Russian Foreign Office. If such a change had been made at a time of tension between Austria-Hungary and Russia, it might have enhanced materially the anxiety of Europe. M. Hartwig, however, may have been statesman enough to have realized how far he could carry his active furtherance of Russian interests without risk to European peace. In Belgrade he is supposed to have gone further than M. Sazonoff felt justified in supporting him; but M. Hartwig enjoyed powerful backing in St. Petersburg, and so far prevailed as to keep his post despite his Foreign Minister. His sudden death—by the irony of fate in the Austro-Hungarian Legation in Belgrade, where he succumbed to heart failure—removes a dangerous element from European politics. Russia has reason to regret the loss of an able and zealous patriot, but other countries will be glad to see Russian diplomacy in the Balkans now enter upon a less aggressive stage.

M. Hartwig's death has taken place at a moment of critical importance in the relations between Servia and Austria-Hungary. The shadow of the Serajevo crime rests over the two countries, and the difficulty experienced in Vienna in tracing the ramifications of the conspiracy tends to increase the tension between them. If M. Hartwig's influence over the Servian Government were as great as it is represented to have been, there is ground for hoping that the removal of that influence will promote the cause of peace in the Balkans. The Russian Minister's interests and ambitions lay in Europe, and he could not fail to attract the attention of the Servian Government in the same direction. Believing as we do that the interests of the Balkan States lie in the concentration of their attention upon the Balkans, while maintaining a correct and, if possible, friendly attitude towards the Great Powers, we should welcome the deliverance of the Servian Government from any influence which tended to make it untrue to itself. Not only should it be possible to establish correct relations between Servia and Austria-Hungary without sacrificing the *amour propre* of the former, but the Servian Government should also be able to placate Bulgarian feeling without any immediate sacrifice of territory. The treatment of its Bulgarian subjects can be so modified as to disarm criticism without impairing the safety of the State, and with the additional advantage of sowing the seeds of loyalty among a section of its subjects that may otherwise prove a serious thorn in its flesh. The more there is to estrange the Balkan States one from another, the greater the merit of the respective Governments if they overcome these influences, and resolutely refuse to prejudice the interests of the Balkans as a whole for the gratification of personal spite.

NOTES AND NEWS.

NEAR EASTERN EXCHANGES.

On the dates given the rate of exchange ruling in the undermentioned centres on London was:—

Alexandria.....	July 16..	97⅛—⅜ p.t.
Athens	July 13..	25·16 drs.
Bucharest	July 16..	25·56½—25·66½ lei.
Constantinople ..	July 16..	109¼—110 pi.
Sofia	July 13..	27·12—27·20 leva.
Teheran	July 15..	55·85 krans

Devonshire Square,
London, E.C.

I referred last week to the new departure made by The Near East in printing several pages, in addition to its usual number, solely devoted to one or other of the Balkan States. Last week some details were given of the financial progress of Servia; this week a similar space is devoted to Bulgaria. Whatever diplomatic mistakes robbed Bulgaria of the fruits of her hard-won Balkan victories, the country has resolutely set to work to consolidate her finances and to digest her new dominions. A significant sign of commercial virility is shown by the news, which we publish in another column, that Sofia now definitely has her own Stock Exchange; another is the haste with which new issues, even at a substantial premium, have been subscribed. Bulgaria certainly has this advantage over Servia and Greece, that while they may have secured far larger accessions of territory as the result of their efforts, she is far more compact. Servia and Greece may ultimately find, to put it brutally, that they have bitten off more than they can chew. Bulgaria has already succeeded in assimilating her new provinces, and from all accounts, owing to her good understanding with Turkey, is likely to have less trouble with her Moslem subjects than the other Balkan States.

***

Whether Bulgaria has been wise in increasing her national indebtedness to the extent of £20,000,000 yet remains to be seen. A loan well spent may prove of enormous value to a country, but Bulgaria's National Debt last December already amounted to £23,355,000, a heavy burden for a comparatively small country. Bulgaria, however, is in urgent need of funds, and the major portion of the new loan will be devoted to railway and port construction. From the international point of view the very large influence which Germany acquires in Bulgaria by means of the loan is of first-class importance. Perhaps the wish was father to the thought, but there seems to have been no ground for the statement made in various quarters that an Anglo-French syndicate offered to lend the money required.

***

A Bucharest correspondent writes that the Chamber of Commerce intends to establish a species of Roumanian Stubbs, "whereby information as to the financial soundness of any firm may be obtained." Books containing fifty and twenty-five coupons are to be issued at the price of 50 and 25 frs. respectively, and the request for information will only be complied with when written on one of these coupons. Information of a general character such as addresses of buyers of any particular line of goods, details with regard to cost of transport, Customs tariffs, prices, etc., will, as hitherto, be supplied by the Chamber of Commerce gratis. This new departure may be taken as a healthy sign of the increasing prosperity of Roumania. The natural conclusion to be drawn is that the officials of the Chamber of Commerce have been so swamped with inquiries that they are not afraid of checking the flow by charging a small fee.

***

The gentle art of copying or simulating private trade-marks is so widespread and overt in many parts of the Near East that I notice without very much surprise that certain enterprising people in Egypt have flown at even higher game. In the *Journal Officiel* of the Egyptian Government a warning is issued to the effect that a large amount of jewellery is being offered for sale as being marked with the Government Assay Office stamps, but that it is in reality stamped with private marks, which carry no official guarantee. The trouble seems to be that the peccant private marks have a general resemblance to the Government marks. The warning is all very well, but would it not be better to take vigorous measures against dealers who stock and sell jewellery which is obviously intended to delude the ignorant or careless purchaser?

***

Suleiman Bey Nassif, who has been paying a visit to London in connection with the disposal of oil concessions in Turkey, informs me that he has for the last two or three years been carrying out successful experiments with the cultivation of Egyptian cotton in various districts of Palestine, particularly in the Jordan Valley. The experiments have succeeded both as regards the yield and the quality of the cotton, which has fetched the same prices as those obtained for the indigenous article. The average yield per feddan last year was between three and four cantars, and had it not been for a visitation of the boll worm, the average would easily have reached five cantars.

***

The Egyptian Government Bulletin for June 30 gives the first estimate of the condition of this year's cotton crop. It is somewhat ominous that, while Lancashire cotton spinners are seriously considering the proposal of working short time until the end of September, the outlook in Egypt should be less satisfactory than last year. For Lower Egypt the estimate is 2 per cent. below the condition which should give a probable yield equal to the average for the last ten years. For Upper Egypt it is 8 per cent. below. On June 30, 1913, the estimates were respectively 3 and 7 per cent. above. The report further states that the supply of water has been adequate, and the difference in condition is solely due to the cold weather experienced in April. The hot weather recently experienced has not had any appreciable effect on the lateness of the crop, except in the Sharkia Province. Cotton worm has appeared all over the Delta, but, thanks to the very complete egg-destroying arrangements, little damage has been done. In fact, growers are very optimistic, and should the present favourable climatic conditions continue, it is hoped to make up much of the leeway lost during the earlier months of the year.

***

I notice that the Egyptian Government experts scored heavily over the Alexandria Produce Association in their respective estimates of last year's cotton crop. Arrivals of the old crop in Alexandria have already exceeded 7,600,000 cantars, as compared with 7,453,110 at this period last year, and everything points to new records being set up, as there are still two months to run before the season closes. There is always a good deal of rivalry between the Government experts and the Alexandria statisticians on the subject of the crop, and when the Agricultural Department estimated the 1913 yield at a figure 7 per cent. higher than the Alexandria Produce Association some sneers of "exaggerated optimism" were to be heard. However, the Government has fully vindicated its figures, and pessimists will henceforth be more chary of lifting up their voices.

***

The United States Consul at Smyrna, Mr. G. E. Horton, reports that 200,000 lbs. of shoe polish is consumed annually in his district. This does not surprise me. In fact, I should not be surprised to learn that Smyrna itself used double that quantity; for one of my most vivid recollections of the place is of the enormous number of shoeblacks who thronged the streets, quays, and cafés. That, however, is a detail. What I want to point out is that seven-eighths of the polish used is imported, and that the Consul, while pointing out that most of it comes from Germany, France, and Austria, expresses the opinion that "American shoe polish will also find a sale in this market, providing prices are reasonable." If this be so, British makers should have at least as good a chance as their American competitors, especially as the Consul reports that English "Blanco" holds its own in spite of competition on the part of a locally produced article.

***

Djavid Bey's Budget speech in the Turkish Chamber on July 6, a full report of which will be found on page 393, was, as usual, full of optimism, but some extraordinary figures were revealed. Revenue for the current year is estimated in round figures at £T34,000,000, of which £T15,000,000 is earmarked for the service of the Public Debt, annuities on various temporary advances, life pensions, etc. The actual sum devoted to life pensions, £T3,373,000, exceeds the combined total of the sums provided for Public Instruction, Public Works, Commerce and Agriculture, Sanitary Administration, Police, Ministry for Foreign Affairs, Ministry of Justice, and the Customs Administration. About £T10,000,000 is devoted to military penditure—£T1,300,000 to the Navy, and £T6,000,000 to the Army—so that once the £T15,000,000 required for the services of the Debt and pensions is added only about 8 or 9 millions is left for all other expenses. However, Djavid Bey does not despair, and although he cheerfully looks forward to largely increased deficits during the next few years, he is equally convinced that the sums which the Government intends to spend on railways and other improvements in Asia Minor must ultimately enormously increase the Budget receipts.

Constantinople Business Letter

(From Our Own Trade Correspondent.)

Constantinople, July 11.

Great Britain's Trade with Turkey.

In continuation of the subject of my last week's letter, in which I referred particularly to certain enumerated articles which, notwithstanding the decrease in the total exports from Great Britain to Turkey during 1913, as compared with the two preceding years, according to the first volume of the Board of Trade publication entitled "Annual Statement of the Trade of the United Kingdom with Foreign Countries for the Year 1913 compared with the Four Preceding Years," still continue to show an upward tendency, as promised in my last letter I now append a list of enumerated articles in which there has been a decrease during the same period :—

Articles.	1909.	1910.	1911.
	£	£	£
Arms, ammunition, military, & naval stores	21,696	86,619	10,883
Cement	6,743	15,103	5,500
Chemicals :—			
Aluminous sulphates	1,930	1,958	1,199
Muriate of ammonia	8,344	6,651	6,348
Soda compounds	5,080	5,643	4,194
Soda, bicarbonate	2,543	2,182	2,109
Soda, caustic	9,645	11,361	5,919
Total of soda compounds	23,386	23,752	17,052
Unenumerated	4,226	7,187	4,128
Total of chemicals	47,725	62,039	41,858
Coal, total of	320,728	322,601	297,164
Cotton yarn, bleached and dyed	219,901	207,553	194,207
Cotton yarn, total of	523,501	437,314	440,227
Cotton piece goods, unbleached	996,070	1,775,139	859,220
Cotton piece goods, other sorts	1,297,198	1,594,359	1,101,809
Cotton piece goods, coloured cottons	215,087	181,439	132,269
Cotton piece goods, total of	4,382,629	5,416,362	4,261,881
Cotton Manufactures—			
Lace and nett	36,244	42,640	25,279
Thread for sewing	119,243	126,417	116,089
Unenumerated	157,124	201,934	162,890
Fish cured, haddocks	1,295	3,351	2,898
Glass manufactures	548	3,157	298
Hardware, other than hollow-ware	10,601	13,975	7,288
Jute piece goods	52,304	38,380	18,045
Machinery—			
Prime movers, rail locomotives	112	37,131	3,569
Prime agricultural	13,422	29,525	9,696
Prime unenumerated	59,966	85,253	57,674
Metals—			
Copper	114,566	142,987	65,177
Oil, cotton-seed	72,526	33,110	35,592
Oils, total of seed	90,741	61,136	60,164
Oil cloth for floor coverings	25,852	32,417	20, 832
Saddlery and harness	25,594	1,372	2,866
Ships, new hull and fittings	8,150	33,110	3,641
Ships, machinery	650	18,605	3,723
Silk, broad stuffs	18,358	24,245	15,227
Woollen yarn	3,721	9,461	3,122
Woollen and Worsted Manufactures—			
Woollen tissues, heavy broad	226,244	231,416	123,909
Woollen tissues, heavy narrow	3,266	3,338	1,404
Woollen tissues, light broad, all wool	41,603	26,890	14,057
Woollen tissues, light broad, mixed	51,320	54,834	21,558
Woollen tissues, light narrow, all wool	4,702	3,545	1,810
Woollen tissues, light narrow, mixed	9,630	10,721	6,848
Woollen tissues, total of woollen tissues	398,443	414,148	244,697
Woollen tissues, worsted tissues	66,828	66,280	54,106
Woollen tissues, worsted tissues, broad, mixed	21,834	25,544	10,825
Woollen tissues, stuffs, mixed	71,122	98,334	49,427
Woollen tissues, total of worsted tissues	170,448	220,808	119,188
Woollen tissues, carpets, not being rugs	12,177	14,177	7,722

Imports into Great Britain from Turkey.

I give below a list of the enumerated articles of import into Great Britain from Turkey, with comparison over five years :—

Duty Free Goods.	1909.	1911.	1913.
	£	£	£
Bladder and sausage casings	4,789	1,886	7,999
Chemicals, boracite	22,119	30,120	36,453
Corn and grain, etc.—			
Wheat	18,601	131,564	11,261
Barley	759,237	1,397,443	893,853
Oats	124,056	102,399	12,837
Beans	102,004	72,820	4,667
Maize	6,503	43,977	12,969
Corn and grain, etc.	14,141	35,260	19,627
Rice	14,845	3,500	360
Rice meal and dust	3,618	14,039	25,143
Cotton, raw	187,558	174,140	308,736
Drugs, opium	12,126	6,908	7,367
Drugs, unenumerated	4,321	5,607	3,106
Dye stuffs, unenumerated	209,640	119,264	160,304
Dye stuffs, valonia	2,172	305	—
Tanning substances	3,760	3,220	750
Eggs	2,186	7,706	3,912
Fruit—			
Nuts (almonds)	38,607	50,108	42,396
Other nuts used as fruit	221,259	240,864	258,953
Oranges	147,198	35,926	292,944
Dried dates	1,840	1,382	1,207
Gum, arabic	51,897	37,387	35,407
Gum, unenumerated	53,880	30,321	54,652
Leather, undressed	20,919	36,704	32,610
Liquorice	14,304	15,927	13,336
Locust beans	4,095	3,572	4,866
Manures, bones	—	7,634	4,333
Metals and ores—	719	793	1,795
Antimony	45,831	—	78
Copper, old	10	—	2,657

Tobacco, unmanufactured			
Wine in casks			
Parcels post (goods free of duty)			

Madkour Pasha on the Trade of Egypt.

The Egyptian Gazette publishes the following translation of a speech delivered by Abdul-Khalik Pasha Madkour, Chairman of the Egyptian Chamber of Commerce, at the French Congress for Chambers of Commerce held in Paris lately. After a short reference to the recently inaugurated Egyptian Chamber of Commerce Madkour Pasha said :—

"The greater part of our national wealth comes from agriculture which is, in our country, helped by a temperate climate, by a remarkable fertility of land, and by an excellent system of irrigation. This system enables us to preserve a great quantity of the Nile water which previously flowed uselessly into the Mediterranean, and to save our land from both the evils of sterility and overflow. It is true that the economical situation of Egypt has suffered a great deal in consequence of the crisis of 1907, but this is only temporary and passing. Big enterprising firms are always welcomed in Egypt, and they enjoy the confidence they deserve from the inhabitants of the country. Egyptian trade is at present more healthy than before; after declining for some time business has now regained its former activity. Our exports have increased in value, and we have begun to take care of our own interests and to profit by the lessons of the crisis. We have already established schools of commerce and financial syndicates, and created the Chamber of Commerce which I represent here, which has taken upon itself the protection of the economic interests of natives and foreigners alike. There is also a new scheme for the creation of agricultural co-operative societies, under discussion in our Legislative Assembly. We hope that all our new efforts will bear fruit, and the charges imputed to us—wrongly or rightly—by certain people will vanish."

Greek Currants.

Two recently published Consular reports deal with the production of currants in Greece. The report on the trade of Zante for 1913 makes the following observations upon the position of the Privileged Company to Protect the Production and Trade in Currants :—

As was mentioned in the last report from this district, a question had arisen in 1912 between currant growers and the Chartered Company concerning the application of the retention law, and a serious agitation was engendered among the growers of Morea, who clamoured against what they considered an abuse of privilege. The disputed point related to the right given to the company by the charter of determining at the beginning of each currant year the amount available for export and the proportionate levy of retention in kind or in cash. This was settled by the Court of Appeal at Athens, whose judicial decision required the company to increase the amount on which retention in kind would be leviable from 20,000 to 26,000 tons. The step taken by the Government on the plea of safeguarding public interests was greatly resented by the company.

As has frequently been pointed out, the levy of 35 per cent. (40 per cent. in Zante) on all exported currants as retention duty aims solely at reducing the export to marketable requirements, and for this purpose retention in kind or cash is regulated in proportion to the size of the year's crop. But in the process the company obviously looks primarily after its own interests, and frequent dissensions are consequently the result. As already explained in previous reports, in dealing with a large crop retention has to be taken mostly, if not wholly, in kind, which places the company in a disadvantageous position, as it burdens itself with an unmarketable commodity, which it disposes of for wine and spirit making at a price greatly inferior to the cost of the fruit; while with a small crop, in which case there is no need of curtailing exportation, the company recovers possible losses and profits by enforcing cash payments. As a matter of fact, it is stated that the result of the company's business in 1912 was so unsatisfactory, owing to the Government's intervention above stated, that no dividend was apportioned among the shareholders. The Government, having apparently acknowledged that the step it had taken was contrary to the provisions of the charter, was induced last year to pass a Bill in the Chamber for the payment of 800,000 dr. (£32,000) to the company as an indemnity for the loss sustained by the shareholders.

The 1913 report for Patras, just issued, states that the total estimated currant crop for the year is 161,450 tons, against 170,000 tons in 1912. The actual crop is estimated at 151,450 tons, to which is added stock on hand amounting to 10,000 tons. The crop was generally fully up to the average quality, with the exception of Gulf and Cephalonia fruit, which was in great part rain-damaged. Prices throughout the season have ruled steady for the finer and choice growths, but latterly there has been a decline of about 1s. per cwt, in Pyrgos and provincial. From August 24, 1913, when shipments of new currants commence, to end of February, 1914, the principal exports to various countries, as compared with the same period last year, have been :—

	From August 24 to end of February— 1913. Tons.		1914. Tons.
London	23,400	.....	24,100
Liverpool	25,600	.....	26,400
Other British ports	8,000	.....	7,300
United States	10,800	.....	10,950

Roumanian Oilfields.

A British Consular report says that the petroleum industry of Roumania continues to flourish. The production of crude oil in 1913 may have been below expectation owing to the war and insufficiency of transport, but it reached 1,900,000 tons, against 1,807,000 tons in the preceding year and 1,625,000 tons in 1911. Since 1906 Roumania has doubled her output of petroleum, and she is now the chief oil-producing country of the world after the United States, Russia, and Mexico. There should, moreover, be a marked increase in the output once the new pipelines at present under construction from Baicoi to Constantza have been completed.

Ottoman Finance.

Djavid Bey's Budget Speech.

A Reuter message from Constantinople dated July 8, reports that Djavid Bey's Budget speech in the Chamber of Deputies was warmly applauded, and that the Chamber decided that his statement of the financial position should be posted throughout the Empire.

Dealing with the provision for the current financial year (thirty-four million pounds Turkish, in round figures), Djavid Bey observed that the most important part of that sum is destined to the Public Debt, the Budget of which figures out at fifteen millions, including annuities on various temporary advances, life pensions, etc. Continuing, the Minister declared that, although it has not been possible thus far to obtain a balanced Budget, it has been possible to amortise an important portion of the Public Debt during the last quinquennium. Neither the war, nor the financial crisis, nor the insurrections, prevented the Government from punctually observing its obligations without in the least bringing distrust upon its credit. This conscientious attitude on the part of the Government should be added to the factors which facilitated the conclusion of the great loan. Djavid Bey went on to observe that the general total of the loans concluded since 1908 reached the figure of £T40,700,000, distributed as follows:—£T4,700,000 in 1908, £T7,000,000 in 1909, £T7,000,000 in 1911, and £T22,000,000 in 1914. The portion of this debt amortised during the last five years amounted to £T9,000,000, which, deducted from the general total, leaves £T31,700,000 to be provided for.

The total debt in circulation to-day figures out at £T149,543,000, including the loans for the Hodeidah-Sanaa Railway, Soma-Panderma, etc., of about thirteen millions. Djavid Bey is not alarmed at these huge figures. In the matter of loans, he remarked, everything depended on the use made of them. He went on to speak of the sum provided for life-pensions, which likewise appeared in the Budget of the Public Debt, and totalled the sum of £T3,373,000 or one-tenth of the receipts of the Treasury. The total credits granted for life-pensions exceed the united totals of the Budgets of Public Instruction, Public Works, Commerce and Agriculture, Sanitary Administration, Police, Ministry of Foreign Affairs, Ministry of Justice and Customs Administration. The Government, he added, was occupying itself seriously with this matter, regarding it as a social question, the solution of which becomes an urgent necessity. He intends proposing the formation, during the Parliamentary recess, of a commission composed of members of Parliament, councillors of the Court of Cassation, etc., for the purpose of examining the question and drafting a Bill to be submitted to the next session of the Chamber.

The Minister then dealt with the expenditure. New charges, he said, have to be met, as a result of the late wars, £T100,000 being allocated for the settling of refugees, and £T5,000 on account of repairs to prisons. The military expenditure is made up as follows:—Ministry of Marine, £T1,300.000, in round figures; Ministry of War, £T6,000,000; military factories, £T450,000; gendarmerie, £T2,200,000—total about ten millions, or one-third of the total revenue of the Empire. By adding to that total the fifteen millions swallowed up by the Public Debt and the Pensions Fund, military expenditure and the Budget of the Public Debt figure out at twenty-five millions. There remains, therefore, for the expenses of the other Ministries, some eight to nine million pounds.

The Ministry of War, continued Djavid Bey, had effected this year an appreciable saving in expenses, obtained on the one hand by the loss of the European provinces, and, on the other hand, by a spirit of economy. All the expenses included in the War Office Budget, as well as in that of the Navy, are nothing but ordinary charges. Besides the thirty-four millions provided for the expenses of the various departments of State, the Government will be compelled to incur certain other expenditure. Thus the counter-value of various orders placed abroad will have to be met, "pari passu," as they are delivered. A portion of the orders placed by the War Office and the Navy will only be completed during the present financial year (1914-15), and it will be necesary to add the amount of the same to the estimates of the present Budget. When ordering the Dreadnought "Reshadieh" the Government concluded an arrangement in virtue of which it paid £T133,000 every three months. A sum of £T490,000 will be paid this year towards the cost of that vessel, which will not be entirely wiped out until some years after the delivery of the ship. With regard to the Dreadnought "Sultan Osman," acquired on the product of the sale of Treasury bills to the Périer Bank, the payments will be reimbursed with the delivery of the ship. A monthly payment of £T80,000 will be made on account of the Dreadnought "Fatih." The payment of these monthly instalments has been assumed by the Committee of Public Subscription for the increase of the Navy, and the Minister had no doubt of the Committee's being able to meet those payments regularly up to end of the year. The Minister then spoke of the estimated increase in the revenues, the creation of new sources of income, and put the deficit at two millions, though with certain prospective revenues, such as the reduction in the Budget of the Public Debt of from £T500,000 to £T600,000. Next year, on account of the contributions from the Balkan States, coupled with the lessening of charges on temporary advances, the deficit would be brought down to one million pounds, while the deficit would disappear if the total general expenses on account of annuities for Treasury bonds were excluded.

As regards the future, even should equilibrium in the Budget be assured this year, it must not be taken for granted that expenditure will remain the same in succeeding Budgets. Next year, said the Minister, the deficit will attain five millions, which he explained as follows:—The revenue known as the "hisse-i-iane," amounting to £T850,000, will have to be surrendered to the special Budgets of the vilayets; a further increase in expenditure of half-a-million pounds will be necessary for the payment of the second annuity of the big loan, besides charges on account of interest and sinking fund for the second portion of the loan which will be issued at the end of the current year. This deficit the Minister anticipates could be met partly by the natural increase in the revenues and partly by the receipts from the projected new taxes, increase of the import duty, etc. On the other hand, the Government will be compelled to conclude, in the space of about ten years, various financial operations in favour of public works and armaments. The building of new railway lines in Anatolia and Syria will necessitate an extraordinary outlay of sixty million pounds. Harbour works will absorb three millions, and irrigation works in Mesopotamia and Adana seven millions. Thus the extraordinary expenses for public works will attain the sum of eighty millions. These works will be carried out in eight to ten years, and the sum of four millions will have to be subscribed in the Budget for the service of these loans. There will also be the annuities of the loans required to meet the extraordinary expenses of the War Office and of the Naval Department.

The Ministry of War, continued the Minister, is compelled to incur those expenses for the reconstruction of fortifications and the completing of armaments as a result of the recent Balkan wars. The extraordinary expenses of the Ministry of War for the next four to five years will reach fifteen million pounds, while the amount of the Ministry of Marine is placed at eight millions. The grand total of extraordinary expenses will thus exceed one hundred million pounds, for which an annuity of about five million pounds will have to be added to the Budget of the Public Debt. These fresh charges will bring up to £42,000,000 the total of the credits appearing in the ordinary Budget of the Empire. This sum will expand to £50,000,000, with the expenses necessary for the reorganisation of the Ministries and the reforms to be introduced in the different branches of the Administration. These figures, Djavid Bey added, did not disquiet him, inasmuch as irrigation works and the building of railways will produce, as a natural consequence, an immediate and important increase in the receipts of the Treasury.

BANKING AT SALONIKA.

(From Our Own Correspondent.)

Salonika, July 11.

I learn, from a source said to be trustworthy, that a group of English capitalists are about to submit to the Government a scheme for founding an exclusively Greek bank here, with branches at Kavalla and Serres; which institution would also aid in the carrying out of different public works in Macedonia, etc. In connection therewith it is also said that a certain Mr. Leonidas, manager of the Khartoum branch of the Banque d'Athènes, and who is at the head of a group of capitalists, has already resigned his post and will shortly arrive here.

If this bank be formed, our municipality may possibly succeed in getting from it the million or two needed to carry out their big schemes for the improvement of the town; but for the moment the more pressing question is to borrow the comparatively trifling sum of £20,000 to pay for the house and grounds presented by the town to his Majesty King Constantine; the interest offered being, we hear, 5 per cent.

NEWS FROM ALL SOURCES.

Our Belgrade correspondent writes:—The launch on the Danube, at Regensburg, of the first of the Bavarian Lloyd's ships has created great interest in the commercial population of Belgrade, and as the society intends to eventually have a fleet of fifty ships, the commercial intercourse with Germany and with Roumania will be greatly facilitated.

The Municipality of Uskub intends to erect a municipal slaughterhouse at Uskub and has forwarded the drawings and plans to the Servian Minister of Public Works, and the building will be at once begun, and special attention will be given to the hygienic arrangements.

According to the *Handelsmuseum* (Vienna) Aden, in spite of its proximity to Jibuti and other fairly important ports, still holds a preponderating position in the trade for cottons. From 1909 to 1912, the importation of cotton thread rose from Rs. 1,900,000 to Rs. 2,700,000; that of unbleached cottons from Rs. 10,600,000 to Rs. 18,200,000; that of white cottons from Rs. 1,360,000 to Rs. 2,400,000; and in the case of printed cottons from Rs. 3,600,000 to Rs. 4,900,000. Cottons participate to the extent of a third in the total import trade of Aden.

A report on the condition of German shipping during the first half of the current year states that in the Levant trade, in spite of very low rates, competition is keener than ever.

Not long ago (says Reuter's St. Petersburg correspondent) M. Brodsky, the Kieff millionaire, purchased a quantity of land in Palestine for the settlement of Jewish families expelled from Kieff. In connection with his initiative, a Jewish Plantation Company has been formed in Kieff to develop the scheme on business lines.

CONGRESSES IN BUCHAREST.

Our Bucharest Correspondent writes:—The Roumanian Ministry of Commerce has invited 25 States to send delegates to the General Meeting of the International Petroleum Commission which is to be held in Bucharest from September 26 till October 2 next. The countries invited are Great Britain, Germany, Austria-Hungary, Bulgaria, United States, France, Italy, Japan, Holland, Russia, Servia, Sweden, Switzerland, Belgium, Spain, Norway, Argentina, Mexico, Greece, Denmark, Portugal, Turkey, Egypt, and Canada.

The International Commission will hold its meeting at the same time as the International Congress of Boring Experts, which meets from September 27 to October 1.

Near East Markets.

SPECIAL REPORTS.

(From Our Own Correspondent.)

Bucharest. July 12.

The rains have practically ceased throughout the country, though local thunder showers are still reported here and there. If the present fine weather holds, the reaping of the wheat can be taken in hand. From many quarters it is announced that the wheat has recovered from the ill effects of the excessive rains, and a medium crop (say, about 30 million hectolitres, equal to 82½ million bushels) is looked for, but the actual result can only be known when threshing is completed. The appearance of the barley and oats is more than satisfactory. Husk crops, such as peas and beans, look splendid, and the maize is equally promising.

The following information is compiled from the weekly bulletin received at the London offices of the Imperial Ottoman Bank from its correspondents in the Near East:—

Janina. July 3.

The following are extracts from the report for the first six months of 1914:—

During the past six months business has been slack.

The trade in manufactured goods has been extremely inactive. The business done has been limited to the importation of a few absolutely necessary articles. This inactivity is the result mainly of the large stocks, which merchants have on their hands, imported during the latter six months of 1913, and which they have not been able to dispose of owing to the political disorders. These events have led to the severing of communications with the principal localities, such as Argyrokastro, Berat, Delvino, Erseka, Leskovrk, Premeti, and Tepedelini, which drew supplies regularly and exclusively from our market. No amelioration is possible until the old stocks are exhausted. But in spite of the political situation, which does not inspire confidence and has made merchants reluctant to place orders in Europe, the trading community maintains a sound position.

Biledjik. June 30.

The following are extracts from the report for the first six months of 1914:—

The frequent rains during May and June have reduced the opium crop in the plains to 60 per cent. below that of last year. Fears are entertained, even with regard to the crop of the hills. The quality of the produce will, it is expected, leave much to be desired. It is expected that the cocoon crop will not be more than half that of last year, in view of the many checks which it has sustained owing to the bad weather.

The rains have equally endangered the prospects of the cereal crops, and have seriously delayed harvest in many districts. The planting of tobacco, however, was carried out under good weather conditions.

Exports have been small during the six months. The great floods have done much damage.

GRECO-EGYPTIAN COMMERCIAL TREATY.

The Cairo correspondent of *The Times* telegraphs that Tuesday's *Journal Officiel* contains the text of an agreement prolonging the Greco-Egyptian commercial treaty expiring on the 16th inst. until April 16, 1915, when it is expected a new treaty will be signed.

The agreement contains the following modifications:—(1) The inclusion of salt amongst the commodities hitherto expressly excluded by the working of the treaty; (2) the abolition or reduction in favour of Greece of the duty levied on tobacco from other States; (3) Egypt without prejudice to the treaty regains complete liberty of action regarding the institution of a tobacco monopoly, the introduction of tobacco cultivation, and the eventual increase of duties.

A special notification by the Finance Ministry provides for the levying of duty till April 16, 1915, on tobacco of Greek origin on the basis of the tariff existing anterior to January 4, 1914, when the new duties were introduced.

PRODUCE REPORT.

London, July 16.

Sugar.

The beet market opened with a steady tone this week, and quotations have gradually improved from 1d. to 1½d., but in the same way this advance was lost, and at the time of writing the market is closing quiet, with sales for Aug. at 9s. 5½d., Sept. 9s. 6d., Oct.-Dec. 9s. 6d., Jan.-Mar. 9s. 8d., and May 9s. 10½d., f.o.b. Hamburg.

Refined sugar has been very strong, with good business for English kinds at full rates to 1½d. advance, and foreign maintaining a firmer tone, with prices for old crop showing an advance of 1d. Quotations for July, first marks, 11s. 6¾d.; Aug., 11s. 7½d.; Oct.-Dec., 11s. 6¾d.; Jan.-Mar., 11s. 8¼d., f.o.b. Hamburg.

Coffee.

The market has been active this week and the supplies that were offered at auctions met with a steady demand. Costa Rica middlings went at 82s. 6d., fine bold 88s., East Indian small sold at 62s. to 65s., low middling to good middling 65s. 6d. to 72s., bold 70s. to 79s. The speculative market continues inactive, and prices are 3d. to 4½d. down: July, 41s. 4½d.; Sept., 42s. 1½d.; Dec. sold at 43s. 1½d. and March 43s. 10½d.

Seeds.

There has been little doing in the market this week. Linseed opened very firm and slightly dearer in the beginning, but gradually a quieter tone prevailed, closing for London-Calcutta spot at 50s. 6d.; July-Aug., 50s. 9d. to 51s. 3d.; Aug.-Sept., 51s. 4½d. to 51s. 9d.; Sept.-Oct., 52s.; Oct.-Nov., 52s. 3d. Rape-seed is steady but very quiet. Brown Cawnpore, July-Aug., offered at 50s. 3d.; yellow Ferozepore, 48s. 9d.; and Guzerat ditto, 55s. 6d. Cotton-seed is inactive. London-Egyptian, July offered £8 3s. 9d., Aug. £8 5s., and Nov.-Jan. £8 8s. 9d. per ton. The market for canary-seed is firm for all descriptions, with stocks in very narrow compass. In view of new crop offers transactions are of quite a retail character.

Oilcakes, etc.

Linseed cakes: In consequence of the decline in oil the market is well supported, but the trade generally is rather quiet. Quotations are unchanged. Cotton cakes: Egyptian continue to come along freely, and with a slight falling off in the consumptive demand values are barely as strong, although not quotably lower. Maize germ meal: White African is only quoted for shipment and at unattractive prices, but English makes, although sparingly offered, may be bought on fairly reasonable terms of £6 to £6 2s. 6d. per ton. Locust beans remain scarce at prices £6 5s. for whole and £6 15s. for kibbled.

Corn.

Wheat: Owing to absence of demand values are in buyers' favour. Choice white Karrachee, afloat, offered 36s. 1½d., or Sept.-Oct. 36s. 3d. Maize is firm for European, but 1½d. to 3d. lower for others. Galatz-Foxanian, July, is quoted 26s., and Danubian, July, 25s. 1½d. Barley is offered at 1½d. to 3d. lower: South Russian, July, 23s. 6d.; July-Aug., 22s. 9d.; Aug. (old style), 22s. 1½d. Oats are firm and dearer.

SUDAN PRODUCE.

Dates.—According to a Berber Province report for May quite one-third of the date crop on Angeri Island (Abu Hamed District) is said to be a total failure; in the case of another one-third the branches are either deformed or the dates have fallen off, and the remaining one-third will be of poor quality.

Berseem Hegazi (Lucerne Grass).—A Dongola Province report for May states that it is reported that arrangements are being made to collect a large amount of berseem hegazi (seed from acclimatized crops growing on Morowe Garden lands). This seed will be sold to natives, many of whom are most anxious to start this excellent fodder crop on their own lands. In the course of a few years it is hoped that berseem hegazi will be one of the general fodder crops of this Province.

TRADE OF DURAZZO.

The Venice Chamber of Commerce publishes some interesting figures giving the value of the import and export trade passing through the port of Durazzo. The total commerce of the port in 1913 reached the value of 9,985,785 lire (£399,431). The value of the imports (7,942,377 lire) greatly exceeded that of the exports (2,043,009 lire).

Austria-Hungary heads the list with a total trade of 5,287,699 lire, an increase for the year of 50 per cent.; Italy comes second with a total of 2,638,505 lire; and Great Britain third with 1,021,124 lire.

APPLES IN EGYPT.

A recently issued U.S. Consular report states that limited quantities of American apples are regularly imported into Egypt. The exact amount cannot be given, as customs statistics are not detailed in this respect. Under the heading "Other Fresh Fruits," Egyptian customs returns for 1913 credit the United States with 37,295 pounds of fruit valued at £472. This item unquestionably covers apples. The actual importations, however, are larger. Shipments are forwarded by Italian houses via Naples and Genoa, and in consequence are credited to Italy. A few small shipments also go via Liverpool. There appear to be no special requirements as regards packing.

TURKISH MOHAIR AND WOOL.

The following information is taken from the current issue of the *Journal* of the British Chamber of Commerce in Constantinople. As to mohair it is stated that "an early clip was anticipated, but, owing to the cold spell which swept over the country in April, a stop was put to all clipping operations, and we were well into May before the new hair made its appearance on this market. The first arrivals were not satisfactory, the hair being very coarse, but there was an improvement later on, and buying became very brisk. Considerable purchases for forward delivery were made, and during the past fortnight some very large transactions have taken place, over 5,000 bales having changed hands, for a portion of which extreme prices were paid. For good Turkey average there is no demand, nor is there likely to be any business in this class until holders show a disposition to meet buyers as regards price. The position of the raw material is strong, and there is every prospect of a steady and continuous trade if prices are not inflated."

With regard to wool, the *Journal* says:—"A very large turnover has taken place in sheep's wool, but the bulk of the purchases made are for local consumption. The Government contracts were given out at higher prices than usual, and, there being several syndicates, competition has been keen and prices have advanced. The quotation for Anatolian wool to-day is from 8 piastres to 8 and 5 paras per oke, and at this price American buyers are not disposed to operate, notwithstanding that wool is now imported duty-free into the United States."

SYRIA'S GROWING TRADE IN GLUE.

The glue trade of Aleppo is assuming more importance from year to year, caused by the great increase in the local manufacture of furniture of European pattern, says an American Consular report. Formerly the people of the country were satisfied with a few chairs and divans very simply fashioned and combining a limited number of whole pieces of timber, whereas at present there is a growing demand for various other articles that the scarcity of suitable material requires shall be made mostly of veneered parts. This necessitates the use of ever-increasing quantities of glue, about all of which is manufactured in Aleppo and the neighbouring city of Hama.

There is one factory in Aleppo that produces about 12,000 pounds annually, which represents but a portion of the local consumption. Two qualities are made—one that is clear, and a dark quality. The Hama product is more adhesive and is also made in two qualities, clear and dark. It is all made from old leathers, principally shoe soles, but it is said the Hama glue is better because of certain qualities in the water used in its manufacture at that place.

EGYPTIAN COTTON MARKET

(From Our Own Correspondent.)

Alexandria, July 10.

After having dropped considerably, prices are now up again as a result of the appearance of the cotton worm. The recovery in American cotton has also been a factor in bringing about a rise in prices. Meanwhile speculators are becoming more numerous and the exports are considerable. The futures market will probably depend upon industrial conditions, which are hardly encouraging just now. Notwithstanding contrary reports, conditions for the Egyptian crop are satisfactory.

Cotton seed is rising.

Messrs. Davies, Benachi and Co., of Liverpool, have received the following telegram from Alexandria, dated Wednesday:—

Market steady. November, 18⅜, January, 18⅛. Exchange, three months' date, 97½.

Steamers Sailed.

July 4.—"Bosnian." July 11.—"Orange Prince," Manchester.

LIVERPOOL REPORT.

Messrs. Reynolds and Gibson telegraph:—Egyptian spot cotton has been neglected during the past week, and the amount of business put through has been very slight. Estimated sales are only 1,100 bales, as against 1,600 bales last week. Trade reports continue uniformly bad; and as consumers will not commit themselves to purchases till yarn orders are booked, it seems useless to look for an improved demand until trade prospects brighten. Prices have been rather irregular. Outside this there has been no predominant feature in the week's trading. Quotations are unchanged, except fine and extra fine, in all growths, which are reduced five points.

MANCHESTER MARKET.

(From Our Own Correspondent.)

Manchester, July 15.

No increase of activity in the market during the past week can be recorded, and again demand has been of a dragging character and sellers have met with no encouragement whatever. Nothing has occurred to stimulate buyers to place orders on a freer scale. The present depression is undoubtedly due to overtrading in the past, and undoubtedly the chief markets of the world are over-supplied in goods manufactured from raw cotton. The process of waiting until stocks are reduced is not pleasant, but it seems absolutely necessary that this should be done before a fresh buying movement can set in. In numerous directions the output of yarn and cloth is being lessened, and it is quite expected that in American spinning organised short time will be arranged. The inquiry in piece goods for export has run on small lots to meet urgent wants and buyers have been in no mood to purchase for distant delivery. There is no improvement in the advices coming through from Egypt and the Levant. The conditions on the other side do not seem to be at all favourable. Goods continue to be held back in Manchester owing to the inability of export houses to take deliveries. Occasional lines have been put through for India, chiefly in well-known makes, but workable offers have been comparatively scarce. The news from China has not been at all encouraging and business from day to day has dragged. The South American outlets continue to give retail support. Manufacturers of cloth as a body are quite unable to obtain relief, and in certain sections severe depression exists. Loud complaints are to be met with from makers of coloured woven goods and sateens. Printing cloths are also doing very badly. Fresh orders are wanted by makers of T-cloths and Mexicans. American yarns for home consumption have moved off in odd lots at irregular rates. Coarse numbers have been rather pressed for sale. The production is far from being at full stretch. A quiet feeling has prevailed in shipping bundles. Bolton spinnings have been fairly steady, but no active buying has transpired.

COTTON PRODUCTS AWARDS.

In connection with the International Cotton, Fibres and Other Tropical Agricultural Products Exhibition, held in London from June 24 to July 9, the British Cotton Growing Association presented a Silver Trophy and three Silver cups for competition, and the awards have now been made. In Class "A," the Silver Trophy for the best general exhibit of various varieties of cotton shown by any Government Department of Agriculture of any British Colony or Protectorate or of Egypt, or the Anglo-Egyptian Sudan, such exhibit to have been grown during 1913 or 1914, on any farm or farms under Government supervision, was awarded to the Government Agricultural Department of Southern Nigeria. The Sudan Government Agricultural Department was very highly commended.

In Class "B," the Silver Cup for the Anglo-Egyptian Sudan for the best type of cotton grown on any farm or plantation during the years 1913 or 1914, is awarded to Mr. C. H. Neville, for American quality cotton. Salim Bashur is very highly commended for Assili cotton. The highly commended are:—Abdul Aziz Yehia, for Assili cotton; Gwadwala Haboosha for Assili cotton; and Capato Estates for Affifi cotton. Mr. Geo. Alexander is commended for Affifi cotton.

OPIUM MARKET.

Messrs. Barker Brothers, Smyrna, report for week ending July 3:—Owing to heavy torrential rains, over all the opium producing districts, we have to report a material large deficit in this year's yield, the estimates of which now vary from 5,500 to 6,500 cases. In consequence, prices this week have advanced by leaps and bounds, and to-day the nominal quotations for 11 per cent. and 11½ per cent. are 16s. and 17s. respectively, with few sellers and many buyers. The sales in all amount to 72 cases, commencing at 14s. 9d. to 15s. 6d., and ending 16s. to 17s. The general opinion is that very soon we shall be quoting 19s. to 20s. for 11 per cent. goods. The arrivals number 408 cases against 472 at same date last year.

Engineering Notes.

Mining in Trebizond.

A recently issued Consular report on the vilayet of Trebizond states that there are numerous mineral deposits in this consular district, both near the coast and in the interior, and it is especially rich in copper. Silver-lead, zinc, iron and manganese are also met with. So long as the district remains without railways and roads, mines in the interior, at any rate, have only a problematic value. Local mine owners have usually an exaggerated idea of the value of their properties, and expect to be able to sell straight off for a large lump sum rather than give an option for a certain period to enable the necessary preliminary work to be done. The possibilities of the district appear to be known to British mining engineers, who are often met with. There are in the Vilayet thirty-one mines with firmans, of which, however, owing to lack of capital, exhaustion of the veins or low prices in Europe, only four are being worked. Research permits have been issued in connection with forty-three other mines. A British company is carrying on research work at a group of mines near Tireboli. Up to the present most of the mining enterprises in the Vilayet seem to have resulted in loss of money. There is a silver-lead mine at Aralana, between Off and Surmeneh, which is said to be rich and has been worked. At present the question of ownership is in dispute and it is lying idle.

A Mechanical Plough.

That agriculturists in the Near East are realising the advantages of mechanical contrivances for cultivating the soil is proved by the readiness with which the well-to-do proprietor or farmer adopts such machines. But the average agriculturist is deterred from following suit by the comparatively high price of such machines, and often the proved unsuitability of some for local work. We have often described in these columns mechanical ploughing sets, which, from our long experience of agricultural conditions and needs in the Near East, we considered suitable, and often reminded British manufacturers that the qualities of a mechanical plough which would be suitable for those regions, and which would meet with a great demand there, are: the possession of sufficient power; the ability to operate on heavy as well as on light land and also on stiff gradients; suitability for small fields; portability and low cost of working; simplicity of control and as low in price as possible. In recent agricultural shows we have noticed mechanical ploughs complying with the above requirements, but, so far as we know, most of them have not been brought to the attention of buyers in the Near East. A new type, however, which attracted considerable notice will interest agriculturists there

Light and Well-governed Machine.

In appearance it is a two-furrow plough, with its water-cooled motor in front of the two driving and supporting wheels, while the control levers are by the guiding shafts. This machine requires no skilled mechanic to handle it. The labourer who guides a horse-plough may equally well drive this one, as the single-cylinder engine is governed and has an automatic ignition with a fixed firing point, so that all the ploughman has to do is to start the engine and steer the plough. It is stated that this mechanical plough, under normal conditions, can do its work at 4s. 6d. per acre, including labour, depreciation, maintenance, and repairs, while its cost is £130 for a two-furrow machine, which weighs 14 cwt. (560 okes). It is, therefore, within the means of the average small farmer, and as an adaptation of a hand-plough to power will appeal to him. It is made either as a single-furrow or double-furrow machine. With it, it is stated, three acres a day can be ploughed in eight working hours. When the plough is not in use in the fields the engine can be used for all kinds of belt-driving, such as grinding, pumping, chaff-cutting, etc., so that in wet or fine weather the machine need not be idle. This machine is only 3 ft. in height over all and 2 ft. 4 ins. in width. It is, therefore, very well adapted for ploughing between trees, vineyards, etc., where ploughing with horses is unsuitable.

A Small Motor Boat for Greece.

Another proof of the preference given to motor boats of British construction throughout the Near East, which we have often drawn attention to in these columns, is a recently completed seaworthy vessel of an attractive design, which is to be used for carrying passengers, fruit, olives, etc., in Greece. She is of robust proportions, 40ft. in length, 10ft. 6in. moulded beam, and 4ft. 5in. moulded depth, and is constructed with a flat keel, having a large outside false keel, which gives clearance to the propeller and rudder when she takes the ground. A 45 h.p. four-cylinder motor is installed, driving a three-bladed propeller through an epicyclic reverse gear and clutch. A feature of the design is the arrangement made for the protection of passengers in rough water. Two substantial hoods are fitted and battened seats are worked all round the boat. Steering is by means of a tiller, the wooden rudder being hung on the transom, from which it depends entirely. Another feature, which increases the usefulness of the boat, is the towing arrangement, a large galvanized iron towing rail being fitted aft of the cockpit, with a towing hook amidships. The hull is planked with red wood, ¾in. thick, and the timbers are of American elm, spaced 6ins. apart from centre to centre, a number of frames of English oak being spaced where required. In the trials out to sea the boat was found to be particularly dry in a sea-way, and generally suitable for the work for which she was designed.

"Victoria" Turbo-pumps.

Water! Water! is the general cry at this time of the year in almost every country in the Near East; for, indeed, the life of those essentially agricultural countries, irrigation, is sadly neglected. Thousands of acres depend for the water supply upon heavy wooden wheels, or other archaic contrivances, by which the water is raised from river or wells, and led through rickety wooden conduits. It is the usual method of obtaining water for irrigation. This anachronism is not generally due to lack of means, but rather to ignorance of the existence of more efficient methods, and more often to the disheartening effect of the disappointments of other proprietors who failed in their irrigation schemes through the choice of unsuitable pumps or unskilful calculations of the required work.

Pumps of the simplest possible kinds are the most suitable for either irrigation or water supply in the Near East. And as water for irrigation is often obtained from muddy rivers, or other sources containing solid matter, a pump capable of hard work is indispensable for that purpose. A really serviceable pump for the Near East is the "Victoria" turbo-pump, and especially the "Quick Runner" type of Messrs. Boving and Company, of Union Court, Old Broad Street, London, E.C. An important feature of Messrs. Boving's pumps is that each pump is specially designed for the actual conditions under which it will be required to work, the designers rightly believing that the old idea of simply using one standard size pump for a given head and speed is not consistent with modern needs of economic working. They have, therefore, divided their pumps into three distinct groups; the first group dealing with small to moderate quantities for effective heads up to 80 ft., the second group, the "Quick Runner" pumps, dealing with larger quantities against heads up to 60 ft., and the third group dealing with moderate quantities against heads up to 120 ft. Proprietors in the Near East, with the assistance of a very interesting and concise booklet, issued by Messrs. Boving and Co., will be able to select for themselves the pump that they specially need; for there are in it dimensions, sketches, and tables showing heads of water, quantities per minute and power required, so that it is an easy task, even for the unskilful, to select the size of pump required.

The Engineering Editor of "The Near East" will always be pleased to answer inquiries from readers respecting any machinery or appliances described in these pages.

AMERICAN MACHINERY FOR EGYPT.

According to *The Egyptian Gazette*, Mr. Lyster, who is attached to the Drainage and Irrigation Service of the Behera Province, has received permission from the Government to visit Australia during his forthcoming furlough in order to inspect the working of the American machinery in that continent for deepening and repairing drains with a view to introducing this machinery into Egypt. Extra leave is to be given to Mr. Lyster for this purpose, and he will also have his expenses paid between Adelaide and the places in South Australia that he will visit in the pursuit of the above-mentioned objects.

TENDERS INVITED.

EGYPT.

[*The London agent of the Egyptian Government is Sir A. L. Webb, K.C.M.G., Queen Anne's Chambers, Westminster, S.W., at whose office particulars of tenders marked (L) are to be obtained.*]

Paving Stones and Bondstones.—Tenders are invited by the Ports and Lights Administration, Alexandria, for the supply of 6,500 square metres of paving stones and 350 square metres of bondstones. Sept. 1.

Office Supplies.—Tenders are invited by the Railways and Telegraphs Administration, Cairo, for the supply of office supplies. Oct. 1 (L).

Span Bridges.—The Ministry of Public Works invites tenders for the supply, transport, and erection of three swing span bridges and four lift span bridges. Tenders to be sent to Director-General, Central Gharbia Drainage Projects, 3, Soliman Pasha Street, Cairo. September 30.

Diaries.—Tenders are invited by the Egyptian Ministry of Finance for the supply of 3,050 diaries (1,500 in Arabic, 700 in English, and 850 in French). August 1. (B.)

Ghafir Clothing.—Tenders are invited at the Ministry of the Interior, Cairo, for the supply of 34,000 suits of Ghafir clothing for the Stores Department. August 15. (L.)

BULGARIA.

Steamer.—Tenders are invited by the Bulgarian Commercial Steam Navigation Company, Varna, for the supply of a passenger and goods steamer of 2,500 tons. Sept. 7.

"A tunnel under the Danube is under consideration by the Roumanian Government to form a connection with its newly acquired territory," says the *Engineer*. "A bridge was first considered, but as no protected site was to be found, military precautions forced the abandonment of the projects. The proposed tunnel will have heavily fortified terminals."

Our Port Said Correspondent writes (July 8):—"It is announced on good authority that a contract has been signed for the transport of 1,200,000 tons of manganese ore from Abou Zenima in the Red Sea, to Antwerp and Rotterdam, at the rate of 120,000 tons a year, during the next ten years.

Shipping Intelligence.

ROUMANIA AND THE DARDANELLES.

(From Our Own Correspondent.)

Bucharest, July 12.

The action of Russia and Roumania with regard to the Dardanelles is welcomed and supported in this country by both steamship owners and grain and timber exporters. In Russia, I am informed, these interests have forwarded a statement to the Minister of Commerce setting forth the losses and difficulties inflicted of late by the constant closing of the Straits to merchant vessels.

GERMANY'S EASTERN TRADE

(From Our Own Correspondent.)

Port Said, July 8.

Some striking figures are issued this week by the Suez Canal Company, showing the remarkable expansion of German shipping interests in Eastern waters.

When the Canal was opened the proportion of transits by steamers under the German flag was 1 per cent. of the total.

In 1882 the figure had risen to 3 per cent., notably by the inauguration of the Hansa Line. A few years later the North German Lloyd and the Hamburg American steamers made their first passages under mail contracts, to be followed later by the German East African Line to South Africa and the German Australian Company to Australia.

During the 1891-1895 period the proportion of transits under the German flag had risen to 7.5 per cent., which figure was doubled in the period 1895-1913, the record of 16.7 per cent. being attained last year.

The following table of tonnage under the German flag passed through the Canal during the past decade shows a remarkably steady increase, the tonnage of 1913 having risen to practically double that of 1903:—

1903	1,773,200
1904	1,969,500
1905	2,113,400
1906	2,115,500
1907	2,253,600
1908	2,310,500
1909	2,381,600
1910	2,563,700
1911	2,790,900
1912	3,025,400
1913	3,352,200

NEW P. & O. STEAMERS.

Orders have been placed for two steamers for the P. and O. Company's India, China, and Australia mail and passenger services, one with Messrs. Caird and Co., of Greenock, the other with Messrs. Harland and Wolff, of Belfast. These vessels will have a gross register of 15,500 tons, and will be propelled by two sets of quadruple expansion reciprocating engines, developing 18,000 horse-power.

A steamer of 1,000 tons register is at present building for outport service in the company's Eastern trade. This vessel will have Singapore for her headquarters. She is to be named the "Mata Hari."

ITALIAN ENTERPRISE.

A new shipping service with Dedeagatch has been opened by an Italian company, the Marittima Italiana. Every other Monday one of the steamers belonging to the company will call at Dedeagatch to pick up passengers and cargo for Constantinople and Odessa; while every other Saturday a call will be made to pick up passengers and cargo destined for Karala, Salonika, the Pirœus, and Italian ports.

NETHERLANDS AND EGYPT.

H.M. Consul-General at Rotterdam (Mr. E. G. B. Maxse, C.M.G.) reports that the Bergen Line of the Furness Maritime and Armament Agency intends to start a monthly service of steamers next August from Rotterdam to Alexandria viâ Antwerp. On the return voyage the steamers will call at Sfax, Tunis, Bône, Oran, and/or Algiers.

H.M. Consul-General adds that the contracts which most of the Alexandria shipping agents have with the Mediterranean Syndicate expire on January 1, 1915, and it is therefore considered advisable to start this service some time before that date, so that it may be well established before entering into competition with the lines belonging to the syndicate.

THE PORT OF CONSTANTINOPLE.

The Liverpool *Journal of Commerce* publishes the findings of the Commission which sat under the presidency of Suleiman el Bustani Effendi, the Ottoman Minister of Commerce, to investigate the deficiencies of the port of Constantinople, after consultation with the several Chambers of Commerce, the International Chamber of Shipping, native and foreign merchants, shipping and insurance agents.

Its findings and recommendations are summed up under the following five headings:—(1) Insufficiency of quay space; (2) insufficient Customs depots and warehouses; (3) absence of Customs depots for transit goods; (4) insufficient numbers of lighters and their bad condition; (5) insufficient mooring buoys in the harbour. These five points are developed at very considerable length. In regard to the quays, the report points out that the total length of the quays on the Galata side is 758 metres, while that of the Stamboul quays is 369 metres, of which only 280 metres are affected to the Customs service. On the Galata side vessels moor broadside on, and the quay space is thus often entirely taken up, to the detriment of lighters loaded with goods discharged from steamers moored in the harbour, which lighters cannot get alongside the quays. On the Stamboul side the conditions are even more unsatisfactory, as, with a smaller quay frontage, ships are only able to moor stern on, and the number of steamers is such that pontoons on to which they discharge, together with the lighters containing goods discharged from other steamers in the port, have to wait for indefinite periods to get alongside the Customs House in the narrow space between the steamers. The report admits that lighters often remain undischarged for five and six weeks, and for rarely less than two or three weeks. The Commission recommends the lengthening of the Stamboul quays, and insists upon the necessity of negotiations being entered into at once. It also recommends the immediate removal of the vegetable and fruit markets at the western end of the Stamboul quays with a view to the utilisation of this space by the Custom House. The Commission approves and recommends the immediate and progressive execution of the Quay Company's projects for the erection of depots and bonded warehouses both in Stamboul and Galata. It also desires the immediate installation of a temporary warehouse in Stamboul, and the opening of the warehouse, now exclusively used for carpets, for the reception of goods of all kinds. Owing to the absence of transit depots in the capital or on the Bosphorus, the transit trade of Constantinople is threatened.

The Commission recommends the immediate promulgation of a law which it has drafted regulating the working of the Lightermen's Corporation, the lighting of the port by electricity, thus facilitating the police surveillance and the navigation of lighters by night. It also desires to see the immediate execution of a programme of the harbour authorities for the increase of the harbour buoys.

COMPANY MEETING.

EGYPTIAN DELTA LIGHT RAILWAYS.

The annual general meeting of the Egyptian Delta Light Railways, Ltd., was held on the 13th inst., at Winchester House, E.C., Sir William Edmund Garstin, G.C.M.G. (Chairman of the company), presiding.

The Secretary (Mr. F. J. Horne) having read the notice convening the meeting and the auditor's report, the Chairman said *inter alia*: In my last year's speech I expressed the hope that our negotiations with the Government of Egypt regarding certain proposed changes in our concession would be completed before I again addressed you. That hope, has been fulfilled, and the new contract with the Government has been signed. In order that you may appreciate the position now secured to this company, and exhibited in the accounts presented to you, it is, perhaps, necessary for me to remind you that in the past, owing to want of funds and inability to raise them, it has frequently been impossible for us to consider extensions of our operations. You are also aware that in the past we have always regarded with some anxiety the possibility of our being called upon by the Government to incur such expenditure on the upkeep of portions of our property as might have seriously interfered with the continuance of satisfactory dividends to the shareholders. A great part of our reserves was invested in our property, and this was in danger of being eventually lost to the company. Further, some of our investments showed a serious depreciation below the values at which they stood in the company's books. I hope to-day to explain to you how the foregoing difficulties have disappeared, owing to the modifications of the terms of our contract, as recently accorded to us by the Government of Egypt. These modifications took effect from April 1, 1913, and, with one exception, their effect is included in the accounts which I am about to review. We had three main concessions from the Government, one for the light lines, another for the Cairo Quarry lines, and a third for the Cairo Helouan Railway and its dependencies. We have sold the Helouan Railway and its dependencies to the Government. We have secured permission to remove the Cairo Quarry lines, and, pending their removal, to treat them as a part of our light line system. We are consequently now left with only one concession—namely, that for the light railways. Our modified concession is indeterminate, with the power of purchase reserved to the Government. The advantages to us in the change from determinate to indeterminate concessions are that we are thereby relieved from the necessity of making heavy sinking fund contributions from revenue. These amounted approximately to £16,700 per annum. Further, we obtain the release for expenditure on extensions and additions of the accumulations of these sinking funds, amounting on the 1st of April, 1913, to nearly £170,000. In the event of the Government's ever deciding to exercise its right of purchasing our undertaking, the advantage to us of the modified concession over the old one is very great. Instead of the purchase being possible in the year 1927 at a very uncertain price it can now only be effected on and after the 1st of April, 1938, at a price sufficient to repay our share and Debenture holders in full, and also to recoup our reserve funds to the full extent that they have been invested in the property. We are compelled by our new conditions to expend 64 per cent. of our gross annual earnings on the upkeep of our property until this has been brought up to a standard approved by the Government. No one year, however, can be charged with anything beyond this percentage, and any excess over it will be carried to a suspense account, to be met by reduced expenditure in subsequent years. The foregoing, with an increase of from 40 per cent. to 50 per cent. in the Government participation in our surplus profits —after 5 per cent. has been earned for our shareholders—are the main alterations in our new concession. Another change that you have agreed to is one between the company and the Debenture holders—namely, that the rate of interest on the Debentures shall be increased from 4 per cent. to 5 per cent., in consideration of the abandonment by the Debenture holders of their right to repayment, at par, in the year 1947. The Helouan Railway, which has been the principal cause of anxiety to us in recent years, disappears altogether from our accounts, although we have continued to work it throughout the year and shall probably continue to do so until the 1st of October next. As a result of the working of this line and its dependencies we made a profit for the year of £6,262, and we should have been justified in taking this, or, at any rate, a great part of it as an addition to our profits for the year. Your Board have, however, decided to set this balance aside, in order to meet the indemnities which will be payable to the staff of this line when their services are dispensed with on the transfer of the line to the Government. It has also been considered advisable to guard against the possibility of any deficiency in the working of this line during the current half-year, which is the slack period for railway traffic in Egypt. As a consequence of the change in the nature of our concession, our contributions to the sinking funds for the redemption of our Debenture and share capital, as well as that to the statutory reserve, cease, and accordingly disappear. The accumulations of these funds are now available for expenditure on extensions and additions. This is not entirely shown in the figure given against "Construction reserve" in the company's balance-sheet, as the loss incurred on the sale of the Helouan Railway has been charged thereto, and been credited to capital. Similarly, the loss on the removal of the Cairo Quarry Lines will be dealt with in the current year. I include both of these in the term "Book adjustment." This is necessary in order to avoid exhibiting any loss of capital. To provide for the possible exercise of its rights by the Government—to purchase our undertaking—our entire construction account now gives place to the total amount of an inventory, agreed upon between the Egyptian Government and ourselves. This inventory becomes the basis of the purchase price. The figures agreed upon, as a starting point on the 1st April, 1913, included our entire expenditure on capital account, of whatever nature—whether from share capital, Debentures, reserves or other moneys. Year by year this figure will be increased or decreased by debit or credit operations on capital account, and a reconciliation of the total will be effected with the Government. The next point I come to is the charge to revenue of 64 per cent. of our gross earnings. You will observe from the revenue account that this charge, as applied to last year, leaves us with an unspent balance of £9,112. This must in no sense be regarded as a saving, for, in the same way as excess expenditure over the 64 per cent. is arranged for, so short expenditure will be held available for the next year or for subsequent years. You must, however, regard it as satisfactory in showing a substantial sum over and above the cost of our ordinary maintenance and one which is likely to become available for improvements towards that standard of efficiency which is required of us by the Government and which it is so greatly to our own interests to attain. The only remaining point to be referred to is the increased participation of the Government in our profits. Instead of some £5,100, or 40 per cent., the Government receives from us on this occasion the sum, approximately, of £6,350, or 50 per cent. A sum of £7,000 was paid to our late agent and general manager on his retirement. We have been fortunate enough to secure the services of Mr. G. E. Lillie, C.E. Mr. Lillie has had over twenty years' experience on Indian railways, and recently held the responsible positions of deputy-manager, Eastern Bengal State Railway, and deputy-Chairman of the Bombay Port Trust. He took up his duties in Egypt on the 1st February last. We have every reason to be satisfied with our choice. He has lost no time in making himself thoroughly acquainted with his duties, and I feel confident that in the future our satisfaction with his services will increase. The other gratuity which I have to mention is a sum of £1,000 paid to our managing director, Major W. I. le Breton, in recognition of his special services and the time spent by him in Egypt in carrying through the very long and difficult negotiations between our company and the Government. We have now available for capital expenditure about £250,000. We carry forward in our accounts the sum £24,693. We carry forward as available for expenditure on revenue account £9,112. We have written down our investments and met special charges and provisions from reserve and we retain a balance on this account of £4,859. We have got rid of the Helouan Railway, which gave us a return of 1¼ per cent. on our capital, and of the Quarry lines, which did not cover their working expenses, and from these we receive £102,500 which, invested in our light lines, should give us a return of 5 per cent. We have saved on our sinking and statutory reserve funds' annual contributions more than sufficient to cover the temporary increase in our revenue expenditure and the increase in the interest on our Debentures. The accounts of the previous years have included the Helouan Railway and its dependencies, and our earnings are correspondingly reduced by the exclusion of these items from the accounts under review. Taking the receipts for the light lines only, we find, however, that there has been a satisfactory increase of £8,197 in our coaching traffic, and of £8,773 in our goods traffic. Further, there was an augmentation of £1,500 in our sundry earnings, giving a total increase over the previous year of £18,470. If we go back further, we find that during the last five years our light line earnings have shown an average annual growth of £13,000. Our actual working expenses for the year have amounted to 60.44 per cent. of our gross earnings, as against 60.15 per cent. in the previous year. The net result of the year's working is a profit of £58,122 13s. 4d., and the Board have recommended the payment of a 5 per cent. dividend on the Preference shares, which will absorb £52,039, leaving £6,083 13s. 4d. to be added to the balance brought forward from last year, making a total of £24,693 11s. 2d. to be carried forward to the current year. We have to bear in mind that, in the current year, our fixed charges will be increased by the extra payment of, say, £5,800 on account of Debenture interest, and, further, that in this year we may derive little, if any, advantage from the expenditure to be incurred on extensions and on improved facilities of working. Meanwhile we have every reason to be grateful to the Egyptian Government for the generous manner in which it has met our advances, and for the broad view it has taken of the services that our railway system, if encouraged, may render to Egypt. I now move, "That the report of the directors, dated June 26, 1914, together with the statement of accounts and balance-sheet for the year ended March 31, 1914, be and they are hereby approved, confirmed and adopted."

Sir Charles William Fremantle, K.C.B. (Deputy-Chairman), seconded the resolution, which was carried unanimously.

The Chairman next proposed: "That a dividend of five per cent. for the year ended March 31, 1914, on the Preference share capital of the company be and it is hereby declared to be paid to the holders of Preference shares standing on the registers of the company at June 25, 1914, and to the holders of Preference share warrants to bearer."

His Excellency Scander Pasha Fahmy seconded the motion, which was unanimously agreed to.

Sir Charles William Fremantle, Mr. W. Home and Mr. W. Pelizaeus, the retiring directors, were re-elected, and Messrs. Meredith and Co. were reappointed auditors.

A hearty vote of thanks to the Chairman concluded the meeting.

ROYAL EXCHANGE ASSURANCE CORPORATION.

Stock and Share Markets.

Bank Rate 3 per cent. (Jan. 29, 1914.)

SETTLING DAYS.

CONSOLS.
Wednesday, August 6.

STOCKS AND SHARES.

In Mining Shares the next carry-over is July 24.

Continuation Day.	Ticket Day.	Pay Day.
Mon., July 27	Tues., July 28	Wed., July 29
Tues., Aug. 11	Wed., Aug. 12	Thurs., Aug. 13

LONDON, July 16.

The market is stagnant. There are no buyers, and no one can sell any quantity of stock because the jobbers refuse to put shares upon their books. Perhaps when the Ulster question is settled business will wake up. But it must be admitted that the financial position abroad does not make for cheerful markets.

New Issues.

New issues go very badly. The public refused to apply for the Greater Winnipeg Water scheme. Clearly, they will not touch any Canadian enterprise at the moment. The Tweefontein Colliery is a successful undertaking, and the offer of shares will probably be taken by those interested in the concern. The South Brazil Electric would appeal to no one. But the Broken Hill Proprietary debentures seem a well-secured mortgage and offer a high yield.

Cheap Money.

Money is cheap, fine paper being done at 2⅛. This is so much below the bank rate that the Bank of England will probably be compelled to reduce its rate in order to retain its hold on the market.

In the Foreign market the failure in Berlin, although small, was disquieting. The financial position in Vienna is very bad, but well-informed people do not consider that there is any chance of war breaking out. There has been some steady buying of Egyptian Unified at 99⅜. The 3½ per cent. preferred are quoted 89, and the inscribed 84. Small blocks of Turkish Ottoman Defence have been picked up at 95, and a little business has been done in the 3½ Egyptian Tributes at 85. Turkish Fours are 81, and Bulgarians are quoted at 82. Mexicans have improved on the news that peace is assured. The Bulgarian loan has now been settled and will be issued in Berlin very shortly.

Rails Steady.

In the Home Railway market prices are steady. Great Westerns are hard at 115, but there has been some selling of Great Central preference, as the figures show that this railway has only earned enough to pay on the 1889. Great Eastern look cheap in view of the traffic returns, but Undergrounds have been sold on the fear that the omnibuses will be heavily taxed.

Yankees Depressed.

The Yankee market is depressed. Baltimores have been offered. The railway is doing badly. One of its subsidiaries has gone into the hands of a receiver, and the bonus shares to be distributed by the Union Pacific will tend to further weaken the market. There is nothing to go for in Yankees except the crop, which is good.

Rubbers Barely Steady.

Rubbers are barely steady. Rubana report showed a decreased dividend, and Tali Ayer, which belongs to the same group, also cut its distribution to 10 per cent. But both companies are likely to maintain their rates for the current year, and the shares are, therefore, reasonably priced.

Oils Dull.

The Oil market is dull. Standard Oil have reduced prices throughout America, and have cut the fuel rates on the Continent by 10s. a ton. Consequently both Shell and Royal Dutch have been offered. In spite of very good news from Spies and an increased production, the share market did not respond. The Egyptian market is dull. Anglo-Egyptian B are a shade over par. Suez are only 7s. 9d., and Eastern Petroleum are also weaker.

Mines Idle.

The Mining market is idle. The Tanganyika report was not liked, and the shares have been offered with great persistence. The good news in regard to Wit Deep only affected the market very slightly. Russians have been supported, but the Canadian group have declined to buy any shares, and as a result this rig has died down for the moment.

Egyptians Fairly Steady.

The Egyptian market has been fairly steady, but, of course, at this time of the year Alexandria and Cairo do very little business, and such trading as has been done has been mainly between Paris, Brussels, and London. National Banks have been dealt in at a fraction over 14, and Agricultural Banks have gradually hardened up to 5. There has been some buying of the deferred at 280. Land Banks are steady at 6¼, and the deferred have been purchased at 39. Bank of Abyssinia remain at 5s. Delta Light Railway prefs. have been done at 8 ex dividend, and the deferred have been inquired for at 1½. The buying in Delta Lands has ceased, and the share is weaker at 9s. A small block of Behera have been offered without finding any purchaser, and the quotation is now 8. The preference are 4¼. Union Foncière have been dealt in at 1. Alexandria Water remain steady at 12½. There is some business in Aboukir Land at 21s. United Lands have weakened to 1s. 7½d. Sidi Salem are nominally 6s. and Trusts 5s. There have been a few blocks of Salts offered and pressed for sale, with the result that the price has weakened to 14s. 3d. The demand for New Egyptians has died out, and the shares have therefore declined to 9s. 6d. Markets are dull at 21s., but there are a few buyers about of Khedivial Mail prefs. at 3¾, and small parcels of the ordinary have changed hands at 10s. 6d. Daira Sanieh at 3s. and Ginners are nominally ¾, whilst Gharbieh Land are 1½. On the whole, the tone of the market is reasonably good considering the time of year, and it is not easy to find sellers willing to accept present prices.

Miscellaneous.

In the Miscellaneous market the Marconi report is admittedly very bad. The profits have fallen over £290,000, and if they cannot be increased during the current year it is doubtful whether any dividend could be paid on the increased capital. There has been very heavy selling of shares, and a committee has been formed in Dublin to agitate for a more complete statement of accounts.

COMPANY NOTES.

B.R.W. Syndicate, Limited.

A "private" company with the above title was registered on July 9, by C. R. Enever, Broad Street House, E.C., with a capital of £240, in £1 shares. The objects of the company are: To acquire and turn to account any oil-bearing or other lands in Egypt or elsewhere, to carry on the business of petroleum and oil refiners and dealers, ship and barge owners, wharfingers, etc. The first directors (to number not less than two nor more than five) are to be appointed by the subscribers.

British Tobacco Company of Turkey.

Following the general meeting of the British Tobacco Company of Turkey, Limited, on July 23 an extraordinary meeting will be held, when there will be submitted a resolution for the voluntary winding-up of the company and the appointment of a liquidator.

Limassol Land Company, Ltd.

A "private" company with the above title was registered on July 10 by E. B. Michell, Wyke, near Bruton, with a capital of £500 in £1 shares. The objects of the company are: To acquire and turn to account lands, buildings, waterworks, trees and real and personal property in Cyprus, and to adopt an agreement with R. L. N. Michell and E. B. Michell. The directors are to number not less than two nor more than five. E. B. Michell is one of the first. Qualification, twenty-five shares. The registered office is at Wyke, near Bruton, Somerset.

ALEXANDRIA NOTES.

(FROM OUR OWN CORRESPONDENT.)
ALEXANDRIA, July 10.

Share Market.

Our market becomes less and less active. As a result of the stagnation, we are still shipping to London the gold that is coming in from the interior.

Sidi Salem Estates.

As a result of its inability to pay the Société de Behera the instalments due on the purchase price of 14,000 feddans, the Board is faced by the possibility of having to make over the assets of the Sidi Salem to the Behera, upon certain conditions.

The Khedivial Bourse.

The Alexandria Municipality has just exercised its option on the Khedivial Bourse at the price of £E65,000. This sum will be set aside by the Municipality from the proceeds of the forthcoming loan of £500,000 at 4 per cent., which will be issued probably on the London market. Meanwhile, the shares of the Société de la Bourse Khediviale, which were quoted at 21½, are in demand at 22, but there are no sellers.

New Company.

The Council of Ministers has just approved of the constitution of a company, entitled "Société d'avances Commerciales."

Sucreries et Ruffinerie.

The fall in the price of sugar, which at one time was as low as 30 frs. the hundred kilos, has had an unfavourable influence on the results of the working of the Société des Sucreries et de la Raffinerie d'Egypte. The profits for the last financial year amounted to 2,043,659 frs. as compared with 3,484,658 frs. the previous year; and this is hardly enough to pay the interest on the debentures. Another result of the cheapness of sugar was the placing in store of large quantities of sugar; rather than depreciate the price, the company preferred to keep part of its production in reserve; and thus the value of stock, which was 328,000 frs. in October, 1912, amounted to 10,773,000 frs. This naturally reacted unfavourably on the receipts, and the company was forced to get advances from the bankers. The National Bank of Egypt advanced it a sum of 7,636,371 frs. at the close of the financial year. The company's debentures, as a result, have fallen to 255 frs., and preference shares and ordinary shares, which get no dividend this year, are down 41 frs. and 39 frs., respectively.

Compagnie d'Entreprises Commerciales en Egypte.

This company, which has a capital of 800,000 frs., is principally concerned with the import of chemical manures and metal goods. For the last three years it has paid a dividend of 12½ per cent.

EGYPTIAN BANKING COMBINE.

It is stated (says *The Egyptian Gazette*) that the Banque Française d'Egypte and the Banque Hypothecaire Franco-Egyptienne have just joined together in a single banking company, with a capital of twenty million francs, under the management of Count Cressaty, who has already been chairman of the two banks. The new banking company will bear the name of the Banque Française d'Egypte. This news has not yet been officially confirmed.

COMPANY RESULTS, &c.

ANGLO-EGYPTIAN OILFIELDS.—Gemsah production for the past week 2,400 tons (last 2,469 tons), of which Hurgada 89 tons (last 90 tons).

ANGLO-PERSIAN OIL CO.—The transfer books in respect of the cumulative six per cent. participating preference shares, will be closed from July 17 to July 30 (both days inclusive) for the purpose of preparing dividend warrants payable on July 31 for half-year ended March 31.

ANGLO-ROUMANIAN OIL.—Production for week ended 10th inst., 382 tons. Bordeni well No. 24, after recovery pick Wednesday, restarted flowing; continues intermittently.

CHEMINS DE FER DE LA BASSE-EGYPTE.—Payment is announced of a dividend at the rate of 25 frs. per share on the new preference shares.

EGYPTIAN DELTA LIGHT RAILWAYS.—Dividend No. 28, bearer warrant coupon No. 25 on the Preference share capital will be payable on and after July 14 at the National Bank of Egypt.

EGYPTIAN MARKETS.—Receipts for week ended July 2 amounted to £740, an increase of £9 over the corresponding period of last year. Aggregate receipts to date amounted to £28,398, a decrease of £1,561.

ORIENTAL CARPET MANUFACTUTERS.—At the general meeting a final dividend of 6 per cent. was declared, making, together with the interim dividend of 10 per cent. already paid, a total distribution of 16 per cent. for the year 1913. Payment of such dividend may be obtained on and after July 20 on presentation of Coupon No. 10.

OTTOMAN RAILWAY FROM SMYRNA TO AIDIN.—Receipts for the week ended July 11 amounted to £8,015, as against £8,658 during the corresponding period of last year.

TRAIAN ROUMANIA OIL.—Production for week ended 11th inst., 351 tons.

MONTENEGRO BOND REDEMPTION.

Messrs. Boulton Brothers and Co. announce that, in carrying out the operation of the sinking fund of the Government of Montenegro Five per Cent. loan, 128 bonds have been purchased in open market on behalf of the Government at a price below par, which, with the coupons belonging to the bonds from January 1, 1915, to July 1, 1947, have been cancelled.

NATIONAL BANK OF ROUMANIA.

BULGARIA'S OUTLOOK TO-DAY.

(From a Sofia Correspondent.)

On Saturday last (July 11) the newly appointed Greek Ambassador in Sofia, M. Naoum, handed his credentials to Tsar Ferdinand, after a diplomatic breach of more than a year since the outbreak of the second Balkan war of unhappy memory. Relations with Turkey, Roumania, and Servia—Montenegro is a *quantité négligeable* in the politics and sentiments of the Bulgarians—had already been restored, and now, with the renewal of diplomatic relations with Greece, we can say that Bulgaria is on speaking terms with all her neighbours—with those who have so lately been her friends and her foes—even though the speaking may occasionally take the form of vigorous shouting.

A long time, however, must elapse before one can hope to indulge in intimate confidences or friendly chats with these same neighbours. That is a superfluous proof of the fact that "the only acceptable political balance in the Balkans" (guaranteed by the Bucharest hallmark) by no means affords a panacea for our troubles.

The remark of Professor Miliukoff, the leader of the Russian Constitutional-Democratic Party—the "Cadets"—who stated in the Duma that "the fire in the Balkans will smoulder under the ashes until the Bucharest Peace Treaty of 1913 is revised," not only carries its meaning as a winged word, but contains for every one acquainted with the Balkan situation all the force of a political programme, the realisation of which is a cause worthy of the labour of all generous men.

The revision of the Bucharest Treaty is indeed the unwritten programme of the present Bulgarian Cabinet, and it will in all probability be the programme of each succeeding Bulgarian Cabinet until it is attained. The differences that will arise will only be with regard to the means by which this end is to be compassed: one point of divergence may be regarded as certain and fixed for some considerable time—as to the more or less peaceful manner in which the revision of the Bucharest stipulations is to be secured. Different shades of opinion will come into play, for instance on the question whether the result is to be sought by leaning towards the Triple Alliance or by supporting the Triple Entente.

There is one question to which an answer must be found in the immediate future: that is, whether Bulgaria is to look forward to an era of peaceful progress. Only those who desire "peace at any price" will maintain that the Bulgarian people can for long remain content with the present state of affairs. To avoid misunderstandings it is important to contradict at once any such optimistic statement. English public opinion, which is always willing to give a hearing to complaints of misrule, oppression of minorities, and lawlessness in the Balkan region, will at last realise that the new masters in Macedonia have introduced methods of government that must call forth a protest from every right-thinking man. The Balkan horrors still remain, and with them the Balkan danger. The Oriental question is, unhappily, still there, and its solution at the hands of civilized Europe cannot much longer be deferred.

The Bulgarian Press chronicles the martyrdom of the men of its race in Servian and Greek Macedonia. An echo of the Bulgarian complaints, which are only too well founded, must sooner or later reach the heart of Britain. The Near East will perform a just and righteous work if it continues to act as mediator and intercessor for those who have been duped in the Balkans.

AN APPEAL.

The following appeal to "the friends of peace, progress, and modern civilisation," has been issued by the Ligue international de la Paix et de la Liberté (SectionBulgare):—

Honorable Monsieur,

Permettez-nous de vous adresser quelques paroles explicatives, quelques cris de détresse . .

Nous, les Pacifistes bulgares, nous vous prions de bien vouloir employer une partie de vos forces, physiques, intellectuelles et morales, pour nous assurer la possibilité de remplir notre vrai devoir humain en travaillant exclusivement pour la paix et le progrès de l'humanité.

Et voici comment nous envisageons cette question, que nous connaissons très bien, et nous attendons naturellement votre aimable réponse.

Il n'est pas besoin de grandes preuves pour démontrer que la situation créée dans les Balkans par les derniers événements repose sur une iniquité. Si la rectification faite à Bucarest sur la carte des Balkans avait été appuyée sur des bases solides, c'est-à-dire sur l'ethnographie, sur le principe des nationalités et sur l'étendue des sacrifices faits par chacun des belligérants, la situation serait tout autre. Les froissements d'amour-propre se seraient vite apaisés et la paix et l'union fédérative se seraient vite rétablis d'elles-mêmes.

Or si le monde civilisé veut que le sang dans les Balkans cesse de couler, il faut qu'il impose la révision du traité de Bucarest. Il faut que les régions où les Bulgares sont une masse compacte soient rendues à l'humanité, à la Bulgarie, qui a supporté le poids entier de la guerre contre la Turquie, et dont l'unique tort est d'avoir essayé de se défendre, après que les Grecs eurent lâchement massacré la garnison bulgare de Salonique, après que les Serbes eurent envahi et dévasté la Macédoine bulgare et après que ces barbares modernes, Grecs et Serbes, eurent fait cause commune pour la destruction inattendue de cette malheureuse province!

A cette révision du traité de Bucarest, ce sont les Bulgares, les Turcs, les Koutzovalaques, les Albanais, qui ont intérêt, parce qu'ils reconquerront ainsi leurs droits à la vie qui, hélas! leur manquent encore au vingtième siècle. C'est également dans l'intérêt de la civilisation et de l'humanité, sensible à la bienfaisance et au droit de l'homme moderne, que la révision s'impose.

Mais Serbes et Grecs y ont aussi intérêt parce qu'ils ne seront pas obligés de dénationaliser les tribus étrangères au moyen de représailles sanglantes qui provoquent des mutineries et même des révoltes parfaitement justifiables.

En présence de la situation actuelle la Serbie et la Grèce n'auront jamais la paix: leur avenir sera désormais de plus en plus ébranlé, et elles-mêmes se ressentiront de la grande injustice qui a été commise à Bucarest. La Serbie et la Grèce seront toujours le théâtre de massacres, parce que les Bulgares affirment leur volonté légitime de rester Bulgares comme les Français restent Français, comme les Allemands restent Allemands, etc.

Si les Grecs et les Serbes, assombris par le cannibalisme, se comportent envers leurs nouveaux sujets comme de vrais barbares, le monde civilisé, humain a le droit, et même le devoir, de supprimer le plutôt possible un tel régime qui compromet la civilisation, la paix et le progrès de l'Europe moderne toute entière.

L'humanité devra demander la révision du traité de Bucarest, non pas pour le bon plaisir de la Bulgarie, mais pour le très légitime triomphe de la justice et de la liberté.

Que le sang cesse de couler, disent les pacifistes et les humanistes, et que les Macédoniens, Bulgares, Turcs ou Koutzovalaques dont se composent exclusivement la nouvelle Serbie et la nouvelle Grèce, puissent enfin obtenir leur droit à l'existence, qui ne doit pas être refusé à aucun individu humain au XX-ème siècle! Qu'on donne enfin l'autonomie à la Macédoine infortunée comme on l'a gracieusement donnée à l'Albanie!

A vrai dire le gouvernement bulgare désire éviter toute aventure dans les questions étrangères, afin de pouvoir se consacrer entièrement à fortifier sa politique intérieure; donner au peuple, par une période de paix fructueuse, la liberté d'exploiter les richesses naturelles du pays et d'assurer son progrès économique et social, quoique, grâce au ressort et à l'énergie des habitants, le pays n'a pas trop ressenti le douloureux contrecoup de la guerre, et en ce qui concerne l'agriculture, le commerce et l'industrie ce sont là toujours les éléments de sa prospérité continuelle.

Le peuple bulgare ne voudrait plus la guerre destructive, c'est vrai, mais il n'est pas moins vrai que tout crime, même international, ne doit pas rester impuni! Sans une juste correction des traités balkaniques, la nation bulgare croirait toujours à une lâche trahison, préparée d'avance par ses "alliés" et ses "amis"! . . . et trouverait, naturellement, les moyens de punir les traîtres . . . Car personne ne peut avoir le droit de disposer impunément des biens et de la vie d'autrui!

Nous adressons cet appel spécialement à nos confrères pacifistes, grands défenseurs du droit international et de la vérité évidente et nous les prions d'exiger la révision et un juste arrangement des affaires balkaniques, en faveur de la paix durable, soit par les Grandes Puissances, soit par la Troisième Conférence de la Paix. C'est le seul moyen d'appaiser les Balkans et l'Europe elle-même.

Choumen (Bulgarie), le 24 mai 1914.

Le Président: Y. Beyazow, Professeur.

Le Secrétaire: K. Taftacron, Commerçant.

BUSINESS ACTIVITY IN BULGARIA.

Stock Exchange Opened.

(From Our Own Correspondent.)

Sofia, July 12.

Bulgaria now has her own Stock Exchange. The need of such an institution in a modern State has long been apparent, but it was only quite recently that a strong committee was formed to undertake the preliminary work. The proposal met with a ready response from the business world of Sofia and firms representing in all 200,000,000 frs. (£8,000,000) have agreed to support the project. The position of the Stock Exchange will become even stronger when the provincial banks take their share in the enterprise.

The value of the imports for the first half of the month of June amounted to 16,500,000 frs. (£660,000), and exports, chiefly of food stuffs, to 12,500,000 frs. (£500,000).

The trade returns with Turkey for 1913, which have just been issued, show that in spite of the wars commerce was extremely active. Exports from Bulgaria to Turkey, consisting in the main of foodstuffs and cattle, reached a figure of 16,971,362 frs. (£680,000), and imports from Turkey totalled 13,424,033 frs. (£540,000).

Negotiations are on foot for facilitating the export of flour and wheat from Bulgaria to Albania. The Governments of the two countries have been approached and arrangements have been made with the Bulgarian Steamship Company to place one of its vessels on the Albanian route.

The Ministry of Commerce and Agriculture has received an application from a British company asking for the ratification of a concession originally granted by the Turkish Government to work the oil deposits between Feri and Dedeagatch. It is intended to start operations immediately the necessary permission has been obtained.

Increase of Bank's Capital.

At the extraordinary general meeting of the shareholders of the General Bank of Bulgaria held last Wednesday under the presidency of Mr. Bousquet, former representative of the French shareholders, it was decided to increase the capital of the Bank from 5,000,000 to 15,000,000 frs. (£200,000 to £600,800).

The Girdap Bank has decided to issue 10,000 new 100 franc shares at the price of 125 frs., in order to increase its capital from 2,000,000 frs. (£80,000) to 3,000,000 frs. In three days' time applications were received for 46,000 shares, and in order possibly to satisfy the public, the directors decided to issue an additional 10,000 shares.

The Bank of Sofia has also decided to increase its capital from 1,000,000 frs. (£40,000) to 2,000,000 by the issue of 10,000 new 100 franc shares at the price of 120 frs. The subscription lists for the opening of a new bank at Sofia, to be called the "Scontova Banka," closed yesterday. The capital issued consists of 2,000,000 frs. (£80,000) in 20,000 100 franc shares.

The Bulgaria Insurance Company, which has its headquarters at Rustchuk, has issued 5,000 additional 100 franc shares at the price of 500 frs. The shares even at this high premium were immediately taken up by the public and the company has therefore been enabled not only to increase its capital by 500,000 frs. (£20,000), but has been able to place a sum of 2,000,000 frs. (£80,000) to reserve.

TRADE OF BULGARIA.

The report on the trade of Bulgaria for the years 1912-13, prepared by the Vice-Consul, Mr. W. B. Heard, is published this week, and makes interesting reading. It states that the import trade was more active than ever during the first six months of 1912. There was increased demand for almost every class of foreign goods, while exports also showed a considerable advance over the corresponding figures of the previous year. Industry was flourishing and the building trade, in particular, showed great activity. As commerce generally reaches its highest development in the autumn, everything pointed to the trade figures of 1912 exceeding by a substantial amount the record figures of 1911. In September, however, the political horizon became clouded, which immediately produced a depressing effect on trade. Orders were stopped and credit was curtailed. With the order for a general mobilisation the foreign trade of the country was almost entirely arrested. Railways were employed exclusively for military purposes, and goods lay for months in the Customs depôts of the ports. The bulk of the commercial and industrial employés were called out for military service, and many branches of commerce were almost entirely suspended.

A Good Harvest.

On September 2 a moratorium was declared which eased the situation of creditors, but made money very hard to obtain and almost put a stop to banking operations. The harvest, which had been gathered before the outbreak of the war, was, fortunately, good, which greatly assisted the country to support the economic strain entailed by the war. Certain classes of industry were kept busy all through the year in supplying clothing and equipment for the army, but such industries as were not so employed were obliged largely to suspend work.

No trade figures for 1913 are as yet available, but it is natural to anticipate that they will have dropped to a very low level. During most of the year the Dardanelles was closed and the traffic through Servia was wholly or partially suspended. The Danube river traffic, however, except for a short period during the second war, continued throughout the year. It was only towards the close of 1913 that trade began to show some signs of revival. The situation of the commercial and industrial classes, however, is not as unfavourable as might be expected. Owing to the cessation of imports, merchants were able to clear off their old stocks at remunerative prices, and are now rapidly replenishing them. Certain industries ceased work until the end of the war and undoubtedly suffered loss. Others, however, such as those producing leather and woven materials, were actively at work all through in supplying equipment for the army as in 1912.

The Agio.

Since the expiry of the moratorium there has been nothing in the shape of a commercial crisis. Not more than two or three important firms went into liquidation, though there have been a number of minor failures. The rate of exchange, which was only 1½ per cent. at the beginning of the first war, had risen to 22½ per cent. at the close of 1913. This sudden rise was due to payments falling due abroad on the expiry of the moratorium, at a time when the National Bank, and, to a lesser extent, foreign banks, established in Bulgaria, had almost exhausted their credits abroad. It may be mentioned, however, that the agio has since steadily fallen owing to the "syndicalisation" of the National Bank with other local banks and to the export of cereals, which has placed money to the credit of Bulgaria abroad.

As to the economic situation the report says:—The most important economic loss suffered by Bulgaria as a result of her two wars was that of human lives, of which some 55,000 are said to have been sacrificed. Her high birth-rate, however, will, in course of time, compensate for this calamity.

The cession of territory to Roumania (2,827 square miles with a population of 260,000), and that one of the richest districts of the kingdom, is another serious economic loss. On the other hand, the acquisition of West Thrace, with its rich tobacco growing districts and its harbours on the Ægean, should in time prove an advantageous exchange for the territory lost to Roumania. The new territories, comprising the districts of Dedeagatch, Gumuljina, Xanthi, Nevrokop, Petritch, Strumitza, etc., contained in Turkish times a population estimated at 656,000. These regions, which have been sorely tried and in part depopulated during the recent wars, are being settled, so far as possible, with Bulgarian refugees from Macedonia, of whom there are over 100,000 in the country, and £200,000 have already been set aside for this purpose. The economic condition of the Bulgarian population is sound and prosperous. The harvests of 1912-13 were well above the average, and every branch of agriculture has advanced with rapid strides of late years. In 1913 the crops were reaped by the women and those men who were unfit for military service with complete success. Owing to the shortage of rolling-stock and the low prices of cereals prevailing abroad, but little grain had been exported up to the end of the year. The export of these accumulated stocks will greatly ease the economic and financial situation.

THE BULGARIAN LOAN.

Negotiations Concluded.

(From Our Own Correspondent.)

Sofia, July 12.

The negotiations for the loan of 500,000,000 frs. (£20,000,000) with a group of German banks, headed by the Discontogesellschaft, were brought to a conclusion last Sunday, when the Government, after a thorough examination of the proposals, authorized Mr. Tontcheff, Minister of Finance, to sign the agreement, which was duly done on Thursday. It now only remains for the Sobranje to ratify the contract when the first instalment of 120,000,000 frs. (£4,800,000) will be paid over to the Government. The Opposition in the Chamber is strongly opposed to the loan, and the debate, which begins to-morrow, will be spirited, but it is not expected that the Government will experience any difficulty in securing a majority.

The guarantees to which I have already referred comprise the surplus revenue of the tobacco "banderole" and the "merrurieh," or tax on the export of tobacco. The privileges, including the construction of the Haskovo-Porto Lagos railway and port together with a share in the exploitation of the State coalfields at Pernik and Bobov-Dol, near Douponitza, have already been mentioned. To develop the mines a company will be formed, of which the German banks will supply 70 per cent. of the capital and the Bulgarian National Bank and the Bulgarian Agricultural Bank 30 per cent.

THE NATIONAL LIBRARY.

A Centre of Bulgarian Culture.

The National Library was founded in the year 1878. At first it merely served as a reading-room, with a very modest equipment, the majority of the books being received as donations from various individuals—Russian and Bulgarian.

Since June 5, 1879, however, the library has been a State institution, under the control of the Ministry of Education; and since that time it has aimed at becoming the centre of Bulgarian intellectual culture.

The library received a great impulse in 1897 by the law decreeing that every publisher must send to the library four copies of each work published by him. Two of these copies remain in the National Library in Sofia, and the other two are forwarded to the National Library at Philippopolis. Infractions of the law are punishable by a fine of 250 frs. (£10). In accordance with this law the library issues every three months a special report giving particulars of all works received during the preceding quarter.

Four Sections.

The present organisation of the National Library is based on the Education Law of February 18, 1909. It is divided into four sections dealing (1) with MSS. and archives; (2) with Bulgarian printed books and books both in Bulgarian and in foreign languages dealing with the Bulgarian peoples; (3) with foreign printed books; (4) with Oriental subjects.

At the end of 1913 the section for MSS. and archives contained 826 manuscripts and ancient printed books, the majority of which consist of ecclesiastical and secular documents written on parchment in Old Bulgarian and other Slavonic languages. These manuscripts are the most precious monuments in existence of Old Bulgarian intellectual culture. Of these, 605 have been described by Dr. B. Zoneff, Professor at Sofia University, in a special catalogue published by the library in 1910, which is itself one of the most valuable philological works produced in Bulgaria. The remaining 221 manuscripts are briefly described in the Library Year-Book for 1912-13.

The collection of manuscripts is steadily increasing in number. The aim of the directors of this section has been to collect everything dealing with the literary memorials of Bulgaria's past. It is incumbent on them to study these memorials thoroughly, to describe them, and to place them at the disposal of scientific investigators.

The second section fulfils a dual function. On the one hand, it deals with the collection of all books published in Bulgaria, which, by virtue of the law already referred to, are sent to the library. On the other hand, it collects all books, in whatever language they appear and wherever published, which refer to the history of the Balkan peoples, to their political and social struggles, to the geography and ethnography of the Peninsula, and to the economic conditions of its inhabitants.

It may safely be asserted that the library possesses at the present time a very considerable portion of all the works that have appeared on these subjects. This section has charge also of the editing and publishing of the quarterly report on home publications. To the section for foreign publications is allotted the task of collecting books in foreign languages which are of permanent interest.

Oriental Section.

The Oriental section collects and studies ancient Turkish, Arabic, and Persian manuscripts, dealing with the former Ottoman rule in Bulgaria. It also has charge of all ancient and modern Turkish books, which contain any reference to the history, politics, etc., of Turkey in the Balkan Peninsula. In addition to recent Turkish publications, this section possesses at present 3,869 ancient Turkish, Arabic and Persian manuscripts, the greater portion of which are written on parchment.

The library receives copies of all Bulgarian periodicals, and also of all the most important European journals, newspapers, and reviews. In 1913 the number of periodicals received was ninety-seven, of which ten were in English.

The total number of books in the National Library at the end of 1913 was 93,702 volumes; the periodicals numbered 1,924, in 22,602 volumes. These figures do not include the manuscripts and Oriental works—the latter partly manuscript and partly old printed books. The number of these amounts to 3,869 volumes.

The National Library is managed by a director (Mr. A. Zlatanhoff), who is assisted by a chief librarian (M. S. Tschilingiroff), two librarians (Messrs. P. V. Thodoroff and Vladimir Thodoroff), and staff of supervisors, clerks, assistants and attendants—in all twenty persons.

THE NATIONAL ETHNOGRAPHICAL MUSEUM IN SOFIA.

The National Ethnographical Museum in Sofia was founded in the year 1906. It possesses several collections of genuine national ethnographical materials, such as metal articles of adornment, ancient weapons, national costumes (especially peasant costumes), national embroidery, various implements used in the national industries, collections of plants and herbs employed as popular remedies, etc.

In this museum there is a historial section in which are gathered together written documents and materials for Bulgarian history since the Renaissance of the Bulgarian people.

The collections of the museum, more especially the costumes of the people and the national embroideries, make a strong impression on the visitor by the multiplicity of their styles and of the variety and richness of their colouring.

Quite recently important additions to these collections have been made in the shape of new materials procured during the Balkan war from Bulgarian districts which remain under Greek or Servian rule. Many of these are women's costumes from the districts of Serres, Salonika, Vodena, Kortcha, Monastir, Ochrida, Krushevo, Dibra, Tetovo, Gostivar, Uskub, Kumanovo, Kratovo, Kotchana, and Shtip.

These national costumes represent the dresses worn by the Bulgarian women of the South-West, and are the most important among those of the Peninsula in respect of richness of colours and ornamentation.

Particularly striking are the very ancient specimens of embroidery from the same districts, many representing styles of work of which examples are now practically unobtainable. Their distinguishing features are delicacy of stitching, fine execution, and marvellously beautiful composition in design and colouring. Such, for example, are the embroidered headdresses which were worn by the women about fifty years ago, some embroidered in pure silk, others in wool. These new acquisitions by the museum form a valuable contribution to the materials for the study of Bulgarian national culture.

When one reflects that every portion of the dress and the ornamentation, even to the colours with which the materials for the clothes and embroideries are dyed, has been produced and worked by the women themselves, it is impossible to deny that the articles in question afford conclusive proof of the creative industry and the high artistic feeling of the Bulgarian women.

BUSINESS OPENINGS.

The following remarks concerning Bulgaria and the possibilities it offers to enterprise are extracted from an interesting article contributed to *The Electrical Review* recently by a correspondent who had just returned from the Balkans. It will be seen that they bear out all that our own correspondent has written regarding the openings for business offered by the country :—

One of the countries which, in my opinion, is going a long way towards commercial development, and that, in spite of the recent war, is Bulgaria. On all sides one heard, from Ministers and others, how earnestly Bulgaria wished to get in closer touch commercially with Great Britain. . . . King Ferdinand himself, a very astute and able man, takes a keen interest in all propositions of commercial enterprise, and is by no means inaccessible where undertakings of some importance are proposed.

Until recently, many important contracts for mechanical and electrical accessories were given to inexperienced local tradesmen, frequently jobbing Jews, who had the greatest difficulty, owing to their ignorance of the markets, in carrying out the contracts satisfactorily. There are opportunities and facilities for obtaining concessions for building generating stations and giving supply to many growing towns of 50,000 to 60,000 inhabitants. The concessions would probably carry with them a monopoly for wiring. All such work would be in the hands of the supply company, and there is little doubt that current for lighting could be supplied at a rate that would prove attractive to all classes of the inhabitants, who at present pay exorbitant prices for petroleum fuel, imported under a heavy tax. That there would be very little difficulty in inducing the public to adopt electric lighting is shown in Sofia, where almost every cottage or hut is lighted by electricity, and in this advantage of civilisation they are certainly ahead of London. The cloth-making industry is a growing one, particularly at Sliven, a town of 30,000 inhabitants, and manufacturers to whom I spoke expressed their willingness to adopt electric power if it could be brought to the town.

There is at present no great competition for Bulgarian Government contracts, and there should be opportunities for enterprising agents for both mechanical and electrical accessories.

RAILWAYS AND PORTS.

We extract the following from the Consular report on the trade of Bulgaria which has just been issued :—The port of Bourgas, during and since the war, has been greatly congested, owing to the lack of rolling-stock to transport the accumulated merchandise. Under such circumstances the warehousing accommodation is altogether insufficient, and goods stored on the quays have been greatly damaged by wet. Large orders for rolling-stock are to be given in the future, as the requirements for grain transport alone can hardly be met under present conditions.

Railway and port construction was suspended during 1913 owing to the war. It is proposed to commence the following lines in 1914. Radomir-Dubnitza (48 miles) and Shumla-Karnobat (66 miles) in Old Bulgaria. In the new territories a line following the trace Mikhaelovo-Haskovo-Mastanli-Kirjali-Nanli Keui-Porto Lagos, which will connect up with the present railway system at the first-named place is being actively surveyed. By the construction of a bridge over the Danube, which the Bulgarian Government desires to see built either at Nikopol or Svishtov (Sistova), it is hoped that a trunk line starting from this point and running in a southerly direction via Tirnovo, Stara Zagora, Mikhaelovo and thence to Porto Lagos may provide an artery for the commerce flowing from Bulgaria, Roumania, Russia and Eastern Europe. The estimated cost of the new section Mikhaelovo-Porto Lagos (175 kiloms.) is between £1,000,000 and £1,500,000. It is to be built by contract in four sections, and there will be two tunnels of 2,500 and 2,000 metres respectively. It is hoped that in time Porto Lagos may become a Mediterranean port of the first class. At the outset, upwards of £1,000,000 is to be expended, and the construction is to be put up to public tender. It is said that the harbour is to lie somewhat to the south-east of the present town. It is probable that a special loan will be contracted to cover the expenses of the various projects above enumerated, and it is to be anticipated that the contracts will be allotted in the quarters from which the money is forthcoming.

As regards Dedeagatch, this port has lost the importance which would have been attached to it had the treaty of London not been set aside by Turkey, and it is not intended to construct a harbour there. The inconvenience of railway communications passing through Turkish territory is obvious. The place will accordingly remain an open roadstead as heretofore. As freights for Dedeagatch are high, owing to its unprotected position, it seems doubtful if it will secure much of the seaborne trade now passing through Varna and Bourgas. When Porto Lagos, however, is fully developed, this harbour should prove the principal *debouché* for the trade of Bulgaria.

COOK'S NILE STEAMERS AND DAHABEAHS.

THOS. COOK & SON have unequalled facilities for Travellers visiting Egypt, now the premier Winter Resort of the World. Their fleet of **Fourteen Large Passenger Steamers** consists of the finest vessels on the Nile, specially built, luxuriously appointed throughout, and fitted with every modern convenience.

TOURIST SERVICE.—These large and handsomely-fitted Steel Steamers sail once a week from **Cairo** to **Assuan**, and twice a week from **Assiut** to **Assuan**, the sailings from **Cairo** beginning in November, and from **Assiut** in January.

EXPRESS SERVICE.—The Express Steamers also leave **Cairo** twice a week, the Friday departures commencing in November, and the Monday departures in December.

There is thus a Service of **Five Cook's Steamers per week** ascending the Nile to the **First Cataract** during the Season—three from **Cairo** and two from **Assiut**—calling at all points of interest on the Nile, in connection with which complete arrangements for sightseeing and excursions are made, enabling Travellers to visit, to the best advantage, all the famous

PYRAMIDS, TEMPLES, TOMBS, RUINED CITIES, etc.

SECOND CATARACT SERVICE.—In connection with the above Services there is also a Service twice weekly by First-class Steamer from the **First** to the **Second Cataract**, with through bookings to **Khartoum, the Sudan, and Uganda.**

PRIVATE STEAMERS AND DAHABEAHS. — **Thos. Cook & Son** have several small Steamers for charter at moderate rates, specially adapted to the requirements of Families, Private Parties, Sporting Parties, etc., accommodating from eight to sixteen passengers, with competent crews, and thoroughly equipped. Also a large Fleet of First-class Sailing Dahabeahs, the best on the Nile.

NOTES OF THE WEEK.

The echoes of the Serajevo pistol shots are being rapidly lost in the noisy Press campaign of recrimination and abuse which is being conducted on either bank of the Save. The Austro-Hungarian batteries are the most numerous, and produce denunciations of Servia and all her works in an amusing variety of tongues and types. The presses of Belgrade, far from being overwhelmed or abashed, have even loaded their columns with Latin type, as invective, thus immortalized, carries further into the understanding of the West than when printed in the Kyrillic character. It is possible that the situation will exhaust itself in this vituperation. On the other hand, crowds have been known to gain courage from their own shouting, and the Servia accused of complicity in the assassinations of 1914 is not, in her own opinion at least, the same Servia which failed to fight the Dual Monarchy when thirty years of occupation were terminated by the annexation of Bosnia and the Herzegovina to the Hapsburg Crown. Perhaps it is more to the point that in the eyes of the Ballplatz the Russia of to-day is a very different neighbour to the recently defeated and uneasy State which could be safely ignored by Austria-Hungary in 1908. The Press campaign is deplorable—in Austria-Hungary, at any rate, it could be stopped were Authority to desire its termination. That it is allowed to go on seems to indicate that Authority wishes to do something which can only be done under cover of the storm which it permits to rage. The contemplated step is believed to be a demand for an inquiry on the part of the Servian Government, together with certain undertakings for the future, and much will depend upon the wording of the phrases in which it is to be couched.

It is in this demand for future good behaviour—as understood in Vienna—that especial danger lies, as such a demand can only be directed against the doctrine of "Greater Servia" which is so attractive to many Southern Slavs on both sides of the Save. Briefly put, the supporters of this policy advocate "fusion" with Montenegro and the conquest not only of Bosnia and the Hertzegovina, annexed by the Hapsburgs in 1908, but also of the kingdoms of Croatia, Slavonia, and Dalmatia. Of these, part of the two former has been since 1526 under the sway of the Hapsburgs, who conquered the rest from the Turks at the end of the seventeenth century. Dalmatia was finally acquired by Austria a hundred years ago after the brief Napoleonic domination which shortly succeeded to centuries of Venetian rule. The "Greater Servians" affect to consider King Peter's realm as being the Sardinia of the Danube, and look upon the Servian and Croatian lands under the Hapsburgs as another Lombard artichoke to be won from them leaf by leaf. The historical analogy is carried further, and these Servian "Piedmontese" fully expect that St. Petersburg will play the part of the Tuileries in "rescuing" Hungarian Croats and Austrian Serbs from their present Sovereign. Such being the ambition of the "Greater Servians," it is obvious that the Dual Monarchy is justified in viewing it with suspicion, and in demanding that it should not be put forward as an official programme by a State desirous of maintaining friendly relations.

We have touched at some length upon the historical aspect of this question because during the recent wars in the Balkans the passing dominations of ephemeral mediæval conquerors were solemnly advanced by diplomatists as being valid reasons for the retention of this town or that province. In the case of Greater Servianism, however, history is against the Slavonic pretensions. Even Dushan, who ruled from Skoplje, never reigned in Zagrab or Dalmatia, and any historically minded Austrian can recall the years during which the eagles of his time-honoured dynasty flew from the battlements of Belgrade, and can point to the Servian territorial title justly borne by his Emperor, which is far older than the revived kingship of Obrenovitch or Karageorgevitch. Moreover, it must be remembered that a great many of those whom the "greater Servians seek to rescue" are Roman Catholic Croats, who have shown recently at Serajevo that they prefer the keys of Saint Peter and their own Catholic Sovereign to the Crown of King Peter, an Orthodox and, in their eyes, schismatic prince.

But the matter does not end here. Politics in the Balkans are still as closely intermixed as the various races used to be before the minorities began to suffer. If Vienna has its hands full with Belgrade it is obvious that it cannot continue to strike a balance in Albania with Italy. The mere fact that "Albania" as a sphere of influence for either Power is fast crumbling out of sight appears to incommode neither contestant and to concern the rest of Europe not at all. As far as can be

Digitized by Google

seen, Mr. Zographos, now a deputy of the Hellenic Parliament, finds his autonomous Epirus growing again under his feet, more self-assertive, more truculent, and more intolerant than of old. Mr. Voussios, once disowned and disavowed after failure, is Prefect of conquered Albanian Koritza, and other Greeks are swarming northward even to Berat, where Epirote-Greek and Ottoman flags fly side by side in curious conjunction. They are restrained from seizing Valona, not by the armed might of the Mpret appointed by Europe, but by the well-founded fear that Italian guns might open fire. So far as can be seen, the Convention of Corfu, the last act of Europe on behalf of the Albania she called to the ills and hazards of mortal existence, is treated as if already null and void, and the famous southern frontier of Albania bids fair to rival the transitory glories of the Enos-Midia Line in the swiftness of its passage into past History.

The reported naval and military movements of Italy, if true, seem to point to an intention on the part of the Roman Government to take precautions against any advance of Greek influence under Epirote banners in the south, and also to place itself in a position to benefit promptly and largely from the preoccupation of its Austro-Hungarian allies with Servia. The lethargy of Europe finds its own excuse in the theory that Albania is the affair of the Adriatic Powers. Would the absorption of that anarchical area by a single Adriatic Power disturb the somnolence of the Concert. The Albanians are likely to find Italian occupation infinitely preferable to the savage rule of the Epirotes or to forcible subjection to their Orthodox Slav neighbours, but is it desirable in the interests of Europe, of the balance of Power, and of all the hoary formulæ in which diplomatists have found comfort and inspiration in the past, to have another Great Power figuring as a Balkan State, a Power, moreover, which can appeal to history, if she wishes to adopt Balkan diplomatic methods, to justify any territorial acquisition she may desire to make in that part of the world?

It is possible that the eagerness of Greece to settle her difficulties with the Porte is as much prompted by a desire to be free to face her new danger from the north-west as by the necessity for persuading the Turks to cease from persecuting their Ottoman Greek population. Mr. Venizelos has left Athens with the intention of meeting the Grand Vizier in some neutral capital, and much is hoped from the Conversations which are expected to take place in Brussels. The Porte, however, has no pressing need to come to terms with Greece, and it is possible that a price will be asked for putting an end to the persecutions which Athenian public opinion will not allow the Hellenic Prime Minister to pay. The vindictive treatment of Anatolian Greeks by Moslem neighbours, and even by officials, tends to become endemic. Peace is restored in one district, but is almost immediately followed by a recrudescence of boycott or massacre in another. The Turks seem to be determined to get rid of their Greeks. While acquainted with the springs of this policy, and comprehending the arguments urged in its favour, we can only deplore the methods by which it is being carried out. We reprobate the atrocities perpetrated upon Orthodox Greeks by Moslem Turks along the Ægean littoral of Anatolia every whit as strongly as we condemn those perpetrated upon Moslem Albanians by Orthodox Epirotes in Northern Epirus. It is, moreover, but a sorry farce of Parliamentary "liberty of debate" which permits Greek deputies in the Ottoman Chamber to be threatened in public for words spoken in that privileged place, and it is a sign of very evil omen that Senator Georgiades Effendi should be threatened with death, even in an anonymous letter, in the very Senate House itself, because he has advocated the cause of the unpopular minority which he represents.

In Bulgaria the Loan Bill has been passed by the Sobranje amid scenes of considerable disorder, and we detail on another page the remarkable negotiations which preceded the definite adoption of the Berlin proposals. It appears that political considerations played an even greater part in the history of this loan than has been usual of late in the Balkans, and that the Government of Sofia has, at a certain financial cost to the country, emphasized its complete independence of all attempts at foreign dictation. The long-drawn State trial has achieved its object in wearying public opinion of its subject matter, and it appears not unlikely that the accused ex-Ministers will be amnestied in a more or less direct manner. As we have repeatedly pointed out, an amnesty of an accused man does not clear his reputation as satisfactorily as a verdict of not guilty, although it frees him from the legal consequences of acts of which his opponents can fairly continue to believe him guilty. In the present complicated condition of Bulgarian internal politics it is not unlikely that such unsatisfactory half-measures might possibly fit in with the schemes of some party politicians.

The continual frontier incidents, often involving loss of life, which are occurring along the new Bulgarian boundaries against both Servia and Roumania are irritating reminders that Bulgaria is chafing under the Treaty of Bucharest, and that international self-control is sometimes lacking when wanted most. Frontier incidents do not tend to neighbourliness, but they are excusable except where the frontier is shown by a fence or paling. Such erections are eagerly set up to check smuggling or the passage of field vermin. Why should not the comparatively short Dobruja frontier be emphasized by a barbed-wire fence? It would at least prevent the frontier guards of either side from "straying" over the mystic line, and so giving rise to rifle-shooting, funerals, diplomatic representations, and international uneasiness. It is a good sign, however, that the Governments concerned should have agreed to withdraw their military posts to a reasonable distance from the actual frontier-line.

Once more a Kajar Prince has been crowned Shah-in-Shah in Persia, and now Sultan Ahmed Shah, the seventh sovereign of his house, is King in fact as well as in name of Iran, and the long Regency which has lasted since his father was dethroned five years ago, is at an end. The circumstances of the Coronation, though partly tragic, were not without a touch of humour. The tragedy lay in the fact that the Coronation took place under the shade of a foreign occupation, and that the newly crowned King's birthplace is now looked upon as the capital of a foreign province. The humour of the situation lies in the necessity for reviving the defunct Mejliss to witness the now necessary oath to uphold the Constitution, as months of General Election have failed to produce a legislative or ceremonial quorum of the new Mejliss. Like Napoleon in Notre Dame, Sultan Ahmed Shah placed his crown upon his own head, and, amid ceremonies and symbols of ancient majesty and military might, was acclaimed by the Ulema in ecclesiastical Arabic. We wish his Imperial Majesty well, and trust that during his reign Persia will once more be able to stand on her own feet, that the ancient virtues of his people will revive, and that the deep-rooted vices which afflict his realm will wither from his Court. It is also to be hoped that the young Shah's first taste of constitutional government will not take the shape of a Cabinet crisis, as he is already faced with the resignation of his Treasurer-General. According to *The Times*, M. Mornard has definitely decided to leave at once for Europe, as his accumulations of leave will carry him up to the date of the expiry of his contract.

The outgoing Treasurer-General takes a gloomy view of the financial outlook in Persia, and believes a certain measure of foreign financial control over the Treasury to be essential. Without this he considers that it may prove impossible to restore the authority of the central Government so as to cope with that tendency to decentralization which interferes so fatally with the collection of taxes by the Treasury. We regret that Sultan Ahmed Shah should be so drastically reminded of his financial difficulties at such a moment, and sincerely hope that a successor may be found who will make the Persian Treasury the means for restoring the financial and territorial integrity of his dominions.

CONSTANTINOPLE LETTER.

(From Our Own Correspondent.)

Constantinople, July 18.

Talaat Bey's Task.

Order does not seem to have been altogether restored in the Smyrna region. The Turkish Press is allowed to publish news that Greeks have been recently murdered at Nympheo, Turbali, Kara Bunar, and other places near Smyrna, and the unlucky affair at Keusten Ada, where a party of soldiers landed to arrest "armed smugglers," and seem to have shot a good few of the harmless tenants of the British proprietor of the island, who were, if armed at all, only provided with the legal shot gun. It is reported here that there were several Hellenes among the victims of this last trouble, which is here ascribed to some officers who found time hang heavy on their hands, and had been misinformed by evilly disposed persons. The British Chargé d'Affaires has drawn the attention of the Porte to this affair, and urged a prompt inquiry, which certainly seems to have been opened without loss of time. Talaat Bey remains confident that he will be able to suppress any further trouble, and the attention that the Turkish Press has recently directed to the continued murder of stray Greeks gives rise to the view that the Government is now anxious to prepare the public for severe action against Moslem fanatics or landgrabbers, who have not been daunted by the sentences hitherto inflicted. It is to be hoped that this is the case, the more so as there have been ugly rumours about to the effect that the Committee party somewhat resents Talaat Bey's policy, and might replace him by Hadji Adil Bey. But while this is probably true of the extremist wing it does not appear certain that the bulk of the Committee has in any way lost confidence in the sturdy Minister, who seems to thrive on hard work. It is true that his relations with Hadji Adil are not as good as they once were. The latter is practically king of Adrianople just now, and being a man soured and disappointed by reverses, has undoubtedly let the affairs of his province go to seed. No civil inspector has yet been able to undertake a proper inspection in his wide domains, where, according to many Moslems, certain officials, having made not a little money out of the Greek emigrants, are now lining their purses at the expense of the Moslem immigrants.

The Immigrant Problem.

As regards the latter, it appears that the negotiations between the Government and a European group for the formation of a company which would instal the immigrants in their new homes under business-like conditions have broken down after months of pourparlers. As there are no more funds for the maintenance of muhadjirs at the public expense the Government now proposes to revert to an old scheme and enlist the co-operation of the Public Debt Administration, which has a very good staff in the provinces, and could undoubtedly give the authorities great assistance. But it is said in some quarters that the "colonisation" of Anatolia will be entrusted to the soldiers, who, acting on the maxim that there is nothing like leather, will doubtless plant the refugees in places of strategic importance rather than of known fertility and salubrity. A considerable number of Balkan refugees have of late been transported to Syria, where they are not likely to thrive. The history of the Circassian colonies, sent thither in the late 'seventies and early 'eighties, is an example of the bad results of colonisation inspired by purely military aims. Of these people an enormous majority died; and though the fittest have survived, and have founded fairly flourishing colonies at Jerash and elsewhere, it was "more by luck than good guidance" that any survived their terrible hardships in an eminently unsuitable climate.

The Gendarmerie.

General Hawker Pasha has returned from Armenia on his way home on leave, and has been for some days in Constantinople. The reorganisation of the Gendarmerie makes good progress in the Eastern Provinces, but the courts do not always assist it by their sentences. Thus, not so long ago a gendarme, who beat the Greek owner of a factory at Trebizond into a jelly, and nearly killed the luckless man—whose only fault was that he was unable to produce a workman who was "wanted," it being meal-time—received a sentence of only three months' imprisonment; while another who, in a moment of irritation no doubt, made use of a blasphemous expression that displeased his fellow-Moslems got two years. It is to be hoped that the new British Adviser to the Ministry of Justice will in time be able to remedy the condition of the up-country courts, which leaves much to be desired. One common abuse is the detention of persons accused of crime against whom no evidence can be discovered. Cases are known in which men who have pleaded not guilty, and against whom there is no evidence whatever, have been kept in prison for months "pending inquiries." This is surely a grave judicial abuse.

A Foolish Manifesto.

Some feeling has been caused by Enver Pasha's latest manifesto, which is in reality a puff of the *Gudj Derneghi*, or Society for the Promotion of Military Preparation. In this manifesto the Pasha inveighs against the "degeneracy" of the café-haunting Turks of to-day, and declares that their ancestors, those men "who passed day and night on horseback playing *Djerid* and discharging arrows over hill and dale," would blush for their descendants. No more unfair statement could have received an official imprimatur. The great majority, nine-tenths, of the Turks are hardy country folk, who have other things to do than to sit in cafés. Uncomplaining, patient creatures, they do not deserve to be accused of degeneracy. If there has been any falling off it has been in the governing class, to whom the Pasha's strictures might have been suitably addressed. Nor is the Turk who possesses a sense of humour—a very large number do—quite favourably impressed by the theatrical fustian which adorns so much of the manifesto. The only nocturnal archer of whom Turkish history tells was Nasr-ed-Din Hodja, who shot his own night-shirt on the clothes line, having taken it for a burglar, and next day exclaimed when he beheld it, "Thanks be to Allah that I was not inside it when I fired!"—a bull which is famous to this day in Anatolia.

TURKISH INCOME-TAX PROPOSALS.

The Board of Trade *Journal* publishes some interesting information regarding Turkish income-tax proposals, which is taken from the report of H.M. Consul at Constantinople (Mr. A. T. Waugh) on the trade of his district in 1913, which will shortly be issued. This report states that negotiations are pending for the application to foreign residents in Turkey of a new law levying a kind of income-tax, at a rate calculated to amount to about 4 per cent. Hitherto foreign residents have been, by treaty and usage exempt from all direct taxation, except on real property held by them.

PLIGHT OF ANATOLIAN GREEKS.

The Dragomans Commission.

An occasional correspondent writes from Smyrna, under date July 15, as follows:—

As a consequence of the events at Phocea and Chesme, which resulted in a wholesale exodus of some 50,000 native Greeks, who fled to the neighbouring islands of Chios and Mytilene, a commission, consisting of the Dragomans attached to the Constantinople Embassies, visited Smyrna and the surrounding districts with a view to holding an inquiry on the spot and reporting to their respective Governments. Talaat Bey also spent some time here, and stringent orders were issued for the protection of the Greeks still remaining in the country. It is regrettable, however, to record that notwithstanding the drastic orders of the Government, the Moslem population continues to enforce a severe boycott and to persevere in a policy of intimidation against the Greeks. Of the thousands who have migrated, few have ventured to return, and those still remaining are systematically prevented from leaving the towns and villages, to collect their ripening crops.

Keusten is a small islet about six miles long by two broad, lying in the Bay at some fifteen miles distance from Smyrna. Its population normally is about 3,000, entirely Greeks. Last month, the bulk of this population fled, a handful of men remaining to protect the two villages in the island. Regaining confidence, in consequence of the measures adopted by the Government, some three hundred returned during the last fortnight to their homes.

In the afternoon of the 10th instant, a body of eighty gendarmes, accompanied by some seventy bashi-bozuks, suddenly landed at three points on the island and commenced a regular *battue*. Some of the villagers on the hillside were driven into a gully, and were butchered in cold blood. The victims, fifteen in all, were old residents of the island, one being an old man of eighty. Three of the other victims were fishermen who had come over from Vourla for the day. A panic set in, caused by the firing of several hundred shots, and the remaining inhabitants rushed to the village for shelter.

A Night of Suspense.

Fortunately for these people, a French resident from Smyrna, Mr. E. H. Giraud, owns a summer residence a few hundred yards from the village, and his young wife was in residence for the summer with her three children. This lady promptly opened her doors and offered shelter to the panic stricken Greeks, taking in 218 men, women and children. With her guard, an Albanian, she hoisted the French flag over her grounds and determined to protect the islanders who had crowded her house and grounds. When the gendarmes reached the village, the officer in charge went to the house and insisted on the Greeks returning to the village, but Mrs. Giraud absolutely refused to consider this request, the more so that the poor natives implored her protection. The night was passed in great suspense, the Turks looting the village and also violating two unfortunate young women who had been found in the fields. There is little doubt that, but for the nerve and courage displayed by Mrs. Giraud, a general massacre would have resulted.

On the news reaching Smyrna, prompt steps were immediately taken for the protection of the islanders, who still refuse to believe in the assurances received from the Vali, and will not, as yet, leave their shelter. This unfortunate incident has created a very painful impression. The Government have sent a commission to endeavour to trace the guilty.

Another correspondent, writing also from Smyrna on the same subject, says:—

Turkey, under the auspices of the Committee of Union and Progress, the famous body of "Young Turks" who were going to regenerate the country and restore its bygone glories, is fast lapsing into barbarism. The covering cloak of progress in the capital may blind those who see Turkey only in Constantinople, but it can never conceal the facts from those who live in the interior or in Smyrna. The misdeeds of the Committee are only too apparent to those who have been born and reared in these parts, although perhaps not to the dragomans of the Embassies who took their departure from the centre of trouble only too soon for the peace of mind and safety of a few more hundred defenceless people. No doubt they went away happy in the belief that their presence for a few days had struck such terror into the hearts of those responsible for the late outrages that murders and violations were things of the past; instead of which the offenders were only biding their time.

"English Island."

Scarcely had the representatives of the Triple Entente stepped on board the Constantinople-bound steamer when another revolting massacre was perpetrated at Keusten Island, or, as it is generally called, English Island, at the entrance to the Gulf of Smyrna. What made the massacre more hideous than the usual Turkish blood-letting was that it was committed entirely by soldiers under an officer specially sent over to the island from the fort with explicit orders to shoot down the men. It is needless to add that rape was added to the other crimes perpetrated by the soldiers.

In all, it has been proved that fifteen men working peacefully in their fields were seized, bound, and shot down. Their bodies were left on the ground and afterwards buried by the villagers. Bad as this massacre was, it would have been ten times worse had it not been for the heroic conduct of a young Englishwoman, Mrs. E. H. Giraud, a member of the Whittall family of Smyrna. As soon as the massacre began she opened her doors to everyone, and sheltered practically the whole remaining population of the island—some 200 souls. Even after the arrival of the British Vice-Consul she remained on the island to guarantee, as far as it lay in her power, the safety of the villagers.

The whole of the island is owned by a British subject, and the British Vice-Consul lost no time in proceeding to the scene of the massacre and verifying the facts. The Governor, of course, held the usual abortive inquiry, promising that he would hang the guilty soldiers, but the telegraph line from Smyrna to the fort comes in conveniently in such cases, and no doubt the usual warning message preceded the Governor's visit.

"Suicide of Turkey."

It is mockery on the part of a well-known newspaper correspondent to wire that Talaat Bey has successfully taken the matter in hand and allayed the bitter racial feelings. Talaat Bey may be the Minister of the Interior, but where expulsion, murder, and plundering of the Greeks are concerned, the Governor of Smyrna has the majority of the Committee behind him, and he is fully aware of it. What he does not appear to be aware of is that he is rapidly ruining the wealthy province of Aidin and assisting in the suicide of Turkey. It is true that for generations the end of the Turkish Empire has been foretold, and the same correspondent who informed the British public that the critical situation had been smoothed over not long ago, wrote that Turkey had only five more years to live, so that any further prophecy regarding Turkey's disappearance may be laughed at; but can the Powers look on for ever at such misgovernment and incapacity for ruling without intervention?

One point stands out prominently in the miserable affair of English Island, and it is a disgrace to the British Government. The presence of only one British warship at Vourla would have certainly prevented any trouble on the island. At the time of the massacres at Phocea the British colony in Smyrna met and delegated three of its leading members to approach the Consul-General and request the presence of a British warship to protect British interests. The request was refused, and the Turks, interpreting the refusal either as a friendly sign or as weakness, continued their anti-Christian policy. There is not the slightest particle of doubt that no massacre would have been committed had even a British torpedo-boat been at Vourla. Let those responsible for the movements of our warships criticize this statement as much as they like, but the hard fact remains. It is not too late yet for a British warship to be sent to Smyrna. Those who think the troubles are over are mistaken, and if a powerful squadron of British ships can be sent to Greek waters, where their presence is not required, what is to prevent the Admiralty from sending a cruiser to protect the important British interests vested in Smyrna and the vilayet of Aidin?

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Cairo, July 16.

The Fourteenth of July Festivities.

The French National Fête was celebrated in traditional style this week. True, there was no "Bruix" in Alexandria to contribute its quota of officers and tars to the pleasure-seeking crowds of the capital and stimulate the general enthusiasm in the remarkable manner recorded last year. Nevertheless, the proceedings throughout were characterised by a spirit of good-humoured camaraderie, in the display of which our Gallic friends have become veritable past-masters. The eventful day opened with the usual receptions at the French Agency and Consulate, where patriotic speeches were exchanged between the diplomatic and consular representatives of the Quai d'Orsay and the Députés de la Nation. A pleasing feature of the morning's proceedings was the visit paid to the French Agency by the Greek Boy Scouts.

In the evening the usual fête was given in the Esbekia Gardens, which were decorated and illuminated in a highly artistic manner. The fête opened with a parade, in which the British, French, Greek, and Italian Boy Scouts played a prominent part. A British regimental band shared with an Egyptian military one the musical honours of the evening, and its efforts were evidently much appreciated by the dense, cosmopolitan crowd which, in the intervals that it snatched from the attractions of the free variety and cinematograph entertainments and of the gambling tables, paraded through the grounds. On the official tribune M. Defrance received his special guests, amongst whom were T.E. Adly Pasha Yaghen and Mohammed Pasha Moheb, representing the Egyptian Government, and T.H. Princes Ahmed Fuad and Aziz Hassan. The fête came to an end at a late hour with a grand display of fireworks. Once again it was noticeable how friendly the relations between the British and French colonies were, and how remarkably the members fraternised.

The White Nile Dam.

The recent decision of the Council of Ministers in connection with the construction of the White Nile dam, at an approximate cost of £900,000, has naturally raised a question as to the manner in which the money for this enterprise is to be provided, since the expenditure is to be borne entirely by Egypt. The local Press has stated in a most authoritative manner that the Government, with the consent of the Public Debt Commission, has arranged a loan for the total amount with the National Bank of Egypt at 3½ to 4 per cent. In view of the peculiar position in which Egypt is placed in regard to the contracting of loans, there appeared to be something incorrect about this statement. I have accordingly made inquiries, and am in a position to state that no loan whatsoever has been arranged or will, indeed, be necessary.

In the first place, the work of construction will take at least three years, and the cost will be spread over the entire period, so that in any case the whole £900,000 will not be required in one lump sum. Moreover, the Government intends to pay for the work out of current reserve as far as possible. The only outside assistance that will be sought will be the temporary overdraft which the Government sometimes obtains from the National Bank of Egypt to help it carry on during the intermediate period before the taxes come in in the autumn. That overdraft may have to be slightly increased to meet the extra call on the Exchequer during those few months, but the entire amount will, as usual, be liquidated during the following autumn and winter.

Sir Gaston Maspero.

At the time when Sir Gaston Maspero's retirement was announced it was persistently said that this step was brought about owing to a disagreement with Lord Kitchener. The eminent Director-General of Antiquities, however, in a series of interviews, denied the truth of this, pointing out that he had received a letter of thanks for his services, and asserting that he was retiring solely and simply because of his ill-health and overwork. To the general surprise, he has this week accorded an interview to a local European journal, wherein he ventures to criticise Lord Kitchener for his interference in certain administrative matters connected with the Antiquities Service and for his proposal to bring the statue of Rameses II. to Cairo. It is a very great pity that Sir Gaston should have unburdened himself in this manner on the eve of his departure, and should thereby have removed the excellent impression which prevailed.

Greco-Egyptian Commercial Treaty.

On Saturday last H.E. Adly Pasha Yaghen, Minister of Foreign Affairs, and Mr. Verenikis, Acting Greek Agent, signed on behalf of their Governments a Note prolonging until April 16, 1915, the Commercial Treaty between their two countries, which would have expired to-day. Monday night's *Journal Officiel* contained the text of the note, which makes one or two slight modifications in the original agreement, and also a declaration made by the Ministry of Finance with regard to the basis on which duty on Greek tobacco is to be levied. In the first place, the special rebate of P.T.2 per kilogramme on the duty levied on tobacco coming from other countries, especially the Balkan States, will henceforward not be granted to tobacco of Greek origin; secondly, Egypt is accorded complete liberty of action in so far as the creation of a monopoly, the introduction of tobacco cultivation into this country, and any increase in the import duties are concerned (under the treaty Greece could denounce the agreement if any step was taken by Egypt in connection with the above-mentioned three questions), and, thirdly, salt is now included amongst the commodities which, failing any special arrangement, were excluded from the operation of the treaty. The Ministry of Finance's notification cancels its announcement on May 27 last that tobacco of Greek origin would, after to-day's date, be subject to the new import duties introduced by the decree published on January 3, 1914. All such tobacco will pay duty on the basis of the tariff in force previous to that date. The reason the treaty is prolonged for only nine months is that the decision to raise the tobacco duties was taken and the question of introducing tobacco cultivation was raised too near the date of expiry of the treaty to allow for the adequate discussion of the points at issue, or for their local study. The nine months will provide the interval necessary to the accomplishment of these and other formalities, and will, also, cause the operation of whatever new convention is made to coincide with the opening of the financial year. Nevertheless, it would be unwise to assume that the Egyptian Government has decided to introduce the cultivation of tobacco into Egypt; the only important point is, that it has entirely regained its liberty of action in the matter.

The Murder of Captain Fawcett.

The trial of Abdulla Hassan, the native accused of the murder of Captain Fawcett, marine superintendent of the Khedivial Mail Line, which was reported in The Near East of May 8, was concluded on Tuesday last. The details which were given at the time were confirmed in the course of the hearing. Evidence was forthcoming that a man answering to the accused's description, and limping, as he did, had been seen leaving the murdered man's house. Abdulla Hassan could give no good account of his movements on the night of the crime, nor could any proof be obtained of his story of the manner in which he had come by his injuries. Moreover, the footprints on the premises corresponded in every detail with his, and his 'galabea," stained with blood, was found hidden in a jar on his own roof, for which he could give no satisfactory explanation. Finally, a woman who had seen

Obtainable from all leading Grocers and Druggists in Egypt and the Levant.

Digitized by Google

a man limping away from the house at the time of the murder and the deceased man's cook, who had seen his master's assailant, picked Abdulla Hassan out from a group. Under these circumstances, the Court considered his guilt established, and sent his dossier, according to custom, on Thursday to the Mufti of Alexandria. The latter, having signified that there was no reason why the law should not take its ordinary course—or, as a matter of fact, having given his acquiescence by his silence—the Assize Court condemned Abdulla Hassan to death on Tuesday. The murderer will no doubt appeal to the Cassation Court, as he did once before, when he was similarly convicted of murder. On that occasion he was accused of murdering a rich notable and his wife in Alexandria, and the Cassation Court quashed the conviction. From the judgment of the Assize Court, it appears that Abdulla Hassan did not commit the murder single-handed, and that his accomplices, who cannot be traced, got away, his injuries having prevented him from following them until after the district had been alarmed. The police and the Parquet are certainly deserving of congratulation for the clever manner in which they laid their hands on Abdulla Hassan and pieced together the evidence against him.

ENGLISHMAN MURDERED IN EGYPT.

CAIRO, July 14.

In the year 1897 an Englishman named Wilson and his servant were murdered in the Behera Province, and a native, Mohammed Hassan Abou Shaklak, was accused of the crime. Shaklak, however, managed to effect his escape from prison on September 3, 1897, before he had been brought to trial, and was condemned to death in default.

After a lapse of nearly seventeen years he has been rearrested in the province of Sharkia, and will be brought before the Parquet when the papers relating to the case have been unearthed from the prison archives.—Reuter.

AN ENGLISHMAN IN ALBANIA.

Mr. Jack Heaton-Armstrong, whose brother, Captain Heaton-Armstrong, is private secretary to the Mpret, has returned to London, after a stay of several weeks in Albania, during which period he accompanied the loyalist force of Prenk Bib Doda on its march from Allessio towards Durazzo until it went home. Mr. Heaton-Armstrong commanded Prenk Bib Doda's artillery, consisting of one Austrian mountain gun, and the story which he gave to a Press representative of the march has its amusing features. Prenk Bib Doda, who is a Mirdite chief, and, according to Mr. Heaton-Armstrong, a most polished gentleman, set out from Allessio at the head of about 1,000 of his own tribe and an equal number of Malissori, to go to the relief of Prince William, then, and now, besieged in his capital. The first objective was the rebel stronghold of Ishmi, 30 kilometres south. It took the tribesmen a week to cover the distance, and before the seven days elapsed the commissariat had completely disappeared. However, a few shells from the mountain gun cleared the rebels out of the town.

"It was curious," says Mr. Heaton-Armstrong, "how the gun was a sort of fetish to the Albanians. The rebels would never stand shell fire, while our own men would run to me for the gun on the slightest excuse. My eye-glass was an object of great interest to them. They believed it was essential to the working of the gun, and I did not dispel the illusion, but kept the glass in my eye whenever an Albanian was in sight. Every emotion the Albanian experiences is expressed in wild shooting—sad or glad, angry or elated, he fires off his rifle, and the consequences are sometimes disconcerting when he is on the warpath. It is dangerous to stray from the camp. Anyone doing so immediately becomes the object of intermittent target practice—not that the Albanian really aims at his objective, for, as far as I could see, he merely points his rifle in the direction of the enemy or the target, and fires as rapidly as he can. They believe the more noise they make the higher is the estimation of their numbers and ferocity in the minds of the enemy, and they carry out this whole-heartedly, but one could not get them to advance against trenches. At Malcuchi, where the force ultimately disbanded, a few shells from the gun cleared the rebels out of their positions, but our men remained in the valley, expending thousands of rounds of ammunition in mere noise. Mr. Heaton-Armstrong determined to get the gun to Durazzo by sea after Prenk Bib Doda's levies dispersed in a panic from no apparent cause, and after great difficulties succeeded. Of the position in Durazzo Mr. Heaton-Armstrong says:—"Prince William and his officers have, I think, made Durazzo quite secure against further attack, but the manner in which the Powers have left him unaided is shameful. The Dutch officers are really magnificent fellows, and Prince William has been very plucky. I believe the fact that he boarded the Italian warship has created a bad impression in Europe, but everyone in Durazzo knows that he had no intention of leaving Durazzo, but went to see his wife and children safe, and at once returned. It is, I think, obvious that Prince William can do nothing without European troops, and a couple of thousand disciplined men would suffice to restore order in the whole country."

PORT SAID NOTES.

(FROM OUR OWN CORRESPONDENT.)

PORT SAID, July 15.

The Mediterranean Squadron.

Thirteen British destroyers, with the attendant cruiser, H.M.S. "Blenheim," part of the Mediterranean Squadron, arrived here from Cyprus on the morning of the 13th instant, and will remain about a week for coaling and re-provisioning.

Quatorze Juillet.

The anniversary of the fall of the Bastille was celebrated in Port Said yesterday by the French colony with marked enthusiasm, the day being observed as one of feasting and revelry, in which all classes and races joined. Streets were profusely decorated with bunting, and illuminated in the evening by tri-coloured lights and fairy lamps. An extensive programme commenced on the night of the thirteenth by a ball at the Casino Palace Hotel, organized by the Committee, and on the morning of the fourteenth the French Consul received the colony. Boat racing and other aquatic sports took place in the afternoon, and a magnificent display of fireworks, with a procession of illuminated boats and a variety of popular amusements, completed a long and successful day of merrymaking.

MR. LLOYD GEORGE ON THE SUDAN.

Mr. Lloyd George made an interesting reference to the Sudan in the course of the speech which he delivered as the chief guest at the Lord Mayor's banquet to the bankers and merchants of the City of London on last Friday evening at the Mansion House. He said:—

I had an indication the other day of the kind of use that is being made of British capital in the way of developing the world. I remember meeting a few years ago Sir Reginald Wingate, one of the most interesting men it has ever been my privilege to meet, one of those men helping to make the Empire really great, and he told me—he was talking about the Sudan, which he was governing—and he said: "There it is; millions of acres of desert, and you could make a garden of it." Shortly afterwards I heard that he had taken a tract of desert, irrigated it, planted a few thousand acres of cotton, and produced the best cotton that had ever been sent to Lancashire—amongst the best—and I am glad to see a distinguished Lancashire gentleman who confirms me. The next thing was they came along and asked us to help them to develop a huge tract of 5,000,000 acres of Delta between two branches of the Nile. We furnished them with three millions of money for the purpose. At the present moment, with the exception of that oasis, all the rest is a scorching, sandy, sapless desert. Sir Reginald told me there would be five million acres in the course of a few years of the best cotton-growing land in the whole world—British capital turning it into garden.

EXCAVATIONS AT ABYDOS.

A lecture was delivered on July 15 at Burlington House by Professor Naville on the results of last winter's excavations at the pool of Abydos. Abydos, he said, was chiefly a religious city, the residence of a god venerated throughout the whole of Egypt, Osiris. Osiris was a god who died, and the most famous of his tombs was that of Abydos, which was said to contain his head. It was the wish to find this tomb which induced them to excavate. Digging revealed a construction consisting of an enclosure wall absolutely symmetrical on both sides, three naves separated by huge granite pillars, a ceiling made of enormous granite blocks, a huge pool with basins for washing the feet, staircases leading to the water, and a middle platform forming an island. By the side was a hall, probably forming the tomb of Osiris. There were also cells round the pool about two metres in height and width. They were without any ornamentation, which was a characteristic of old construction. The building was neither tomb nor temple. It was a hydraulic construction. Was it likely that such a cyclopean building was raised merely for infiltration water? Was there some communication with the Nile? It seemed probable that the old Egyptians knew very well the laws of the rise and fall of the Nile. They knew also of the existence of what is now called the subterranean Nile, which flowed under the desert, and which engineers now tried to utilise for the irrigation of the country. Was the water supposed to have a curative effect, and did the people come to the cells to have their health restored?

LETTER FROM ATHENS.

(From Our Own Correspondent.)

Athens, July 15.

The Mixed Commission.

The political outlook is less threatening, but the storm clouds have not yet dispersed. And in spite of Turkish professions of friendship, even of cordiality, it is impossible to believe that there will be a definite improvement until the question of the Islands has once and for all been settled. In spite of the refusal contained in the last Turkish Note to repatriate those Greek inhabitants of towns who had been forced to emigrate, the Government has lost no time in appointing its delegates to the Mixed Commission appointed to value the properties which are to be exchanged. The Commission, which is sitting at Smyrna, has already begun its work, without waiting for the arrival of the arbitrator that Switzerland has been asked to supply.

Suspicion of the C.U.P.

The impression still prevails that the Young Turks are set on throwing dust in the eyes of the Greeks until they are in a position to adopt a different attitude. In support of these misgivings, it is pointed out that while all this talk about the exchange of emigrants is in progress massacres and persecutions are still going on in Asia Minor, and it seems that the officials dismissed by the Ottoman Minister of the Interior for complicity in outrages have been appointed to other, and better, positions. In view of these facts and of the declarations of Midhat Shukri Pasha, the Secretary of the C.U.P., that Turkey is now engaged in a "life-and-death duel" with Greece, there can be little confidence in Ottoman professions of amity.

Mr. Venizelos and the Grand Vizier.

The Prime Minister anxious to put an end to an intolerable situation, has willingly accepted the mediation of certain foreign diplomatists to bring about a meeting between himself and the Grand Vizier. If certain details can be settled Mr. Venizelos will probably leave here to-morrow, and it is expected that the meeting, if it takes place, will be either at Brussels or Lausanne.

Naval Activity.

The light cruiser "Helli," one of the warships purchased from the United States, arrived in the Bay of Phaleron on Sunday. The vessel, which is destined to become the flagship of the light cruiser squadron, received an enthusiastic welcome from the crowds which had gathered to greet her. Last week a number of sailors left for the United States to take over the battleship "Mississippi," which has been rechristened "Kilkis." On Saturday a full crew left Greece to take over the second American battleship "Idaho," which is now in an Italian port, and will probably be taken over by Greece either in a French or English port. As soon as the two battleships have been thoroughly overhauled and cleaned they will leave for Greece, where they are expected to arrive about the middle of August. When once the concentration is complete the whole fleet will leave for manœuvres in the Ægean. Altogether three battleships, three armoured cruisers, twenty-two torpedo-boat destroyers, and two submarines will take part.

Cost of Living.

Apart from warlike preparations the most important event of the week has been a general strike of railway, gas, and tramway employees. Happily the strike only lasted two days, and was more in the nature of a protest against the very high cost of living and the lack of housing accommodation than anything else. In fact, if house rents go on increasing at the present rate, Athens will ultimately be inhabited by two classes only—millionaires and beggars.

THE OLDEST CITY IN EUROPE.

The oldest city in the Eastern Hemisphere is to be found in Asia, but in Europe there is also a city, uncovered by the spade and mattock, which is almost as old as Babylon, and which was throbbing with busy life and prosperous activity in the Stone Age, five thousand years ago and more.

The destruction of Herculaneum and Pompeii, overwhelmed under the ashes of Vesuvius, is well known. Yet thousands of years before that this city in the Grecian Archipelago was buried in the same manner, with its inhabitants, their tools, and their domestic utensils.

North of Candia there rises up out of the sea a small group of islands encircling a bay of immense depth, and it was there that discoveries were made, chiefly in Santorin and Therasia. The islands lie, as it were, in the form of a horseshoe, enclosing the bay, from the waters of which rise their almost unscalable cliffs, covered with deep layers of a pumice of dazzling brightness. Beneath this pumice lay buried the oldest city in Europe. From time immemorial the pumice has been dug out for building purposes, but the workers contented themselves with cutting up the topmost of the volcanic layers, avoiding the lower strata, which appeared to be mixed with innumerable stony masses. These, on closer examination, eventually proved to be the house walls of the city.

One of the largest dwellings uncovered consists of six rooms of unequal size, the most spacious being about 18 ft. by 15 ft., and one wall runs round a court of 24 ft. in length with a single opening into it. The walls are formed of a series of big and little blocks of uncut lava, laid together without any mortar, the interstices being filled with a kind of red ashes. Between the blocks long twisted branches of the olive tree are spread, still covered with bark, but the wood has become nearly black as if burnt, and crumbles to powder at the slightest touch. There are windows and several openings into the rooms. In every case the roof—the ashes of which have been found scattered inside the room—has been constructed of wood, and appears to have been supported by a round block of lava buried in the floor.

The remains give every indication that the inhabitants were unexpectedly overwhelmed by the volcanic outburst, which buried the city more than 300 ft. deep. The great yellow jars of earthenware are still filled with barley, coriander, peas, aniseed, and other grains which cannot be recognised. In the storehouses heaps of barley are piled up against the walls. But not one scrap of metal or bronze has been found—not even the trace of a nail in the pieces of wood which had formed the roof. The absence of any metal except gold is complete. The tools and weapons are all made of flint, lava, and obsidian, the last-mentioned being a volcanic product—sometimes volcanic glass—that is still used by peons in Peru for making scissors.

From the discoveries made some years ago it is evident that this unknown people knew how to grind barley in handmills and how to make it into bread, how to press oil from the olives and wine from the grape, how to weave cloth and other stuffs, and how to rear cattle and milch kine.

Geologists have endeavoured to piece together the history of the terrible disaster which so long ago blotted out an whole race. Where the islands of Santorin, Therasia, Aspronisi, and the others of this little group now lie there was then a great island, but the centre of it was being gradually undermined by volcanic forces, the igneous matter of which had some two thousand years previously united together and formed the island. Many volcanic catastrophes have done their devastating work, yet none can equal in violence the gigantic upheaval which made the Bay of Santorin. All the middle of the island must have suddenly given way and been entirely engulfed, leaving but a narrow rim of land, through the northern end of which the sea dashed in and filled up the hollow. Instead of a mountainous cone 5,000 ft. high, there is now the bay of that depth, surrounded by precipitous cliffs, close to which great ships may safely anchor. The disaster must have come in the twinkling of the eye, since the remains found in the city prove that there was no time to carry away or remove anything in any of the many houses. The eruption of pumice stone must have immediately preceded the sinking of the land, for the tufa covering the adjacent slopes is cut through by subsequent streams of lava.

Older than Athens, older than the re-discovered city of Minos and the Minotaur in Crete, the city of Therasia is the most ancient known in Europe.

BULGARIAN LETTER.

(From Our Own Correspondent.)

Sofia, July 19.

The New Loan.

Just a week ago Mr. Toncheff, the Minister of Finance, signed (in its final form) the agreement with the German banks regarding the loan. On the eve of the conclusion of the loan a communiqué was issued by the Russian Legation here, and signed by the Legation Secretary, M. Sabler, in which it is stated that the French banks are now ready to grant a loan to Bulgaria without the guarantee of Russia, without industrial concessions, and in general on more favourable terms than those granted by the German banks. Public opinion here strongly condemns this action of the Russian Legation, and it is pretty broadly hinted that not only M. Sabler, but also M. Savinsky, the Minister himself, should be removed.

The State Trial.

A tendency is noticeable in Government circles to put an end to the State trial, which is now regarded as a purely political question. Two alternatives are canvassed: first, that the Chamber should quash the proceedings on the ground of illegality; second, that supplementary clauses should be introduced into the Amnesty Bill.

Threatening Tsar Ferdinand.

Bony Georgieff, one of the assassins of Mr. Stambuloff, and now in Russian employ in Constantinople, has sent King Ferdinand a letter threatening him with death on account of the disasters resulting from the second Balkan War. Report has it that the letter is written in blood—but whose is not stated.

Memorial to Sir E. Grey.

The Dobruja Society has addressed to Sir Edward Grey a memorial, in which an appeal is made to Great Britain to take an interest in the lot of those Bulgarians who have fallen under the Roumanian yoke; and who, yesterday free citizens, are to-day deprived of religious, civil, and political rights and liberties. The provisions of the special law for the Dobruja, which aim at depriving the population of its land, are pointed out, and the memorial concludes:—

Such a short statement of the "legal" régime instituted by Roumania in the lands that formerly belonged to Bulgaria suffices to show how the unfortunate population of those lands, accustomed for the past thirty-six years to the enjoyment of public liberty under a democratic government, is now unexpectedly subjected to a mediæval régime, with the object of depriving it of its nationality and robbing it of its property. Civilised Europe of the twentieth century will not allow one of its members to perpetrate such an outrage upon humanity and ethics. The official declarations of Roumania regarding tolerance are not enough; the past shows that she has not fulfilled her engagements, even those undertaken by the Berlin Treaty. Guarantees are necessary, and guarantees of the most effective kind.

The Chamber and the Loan.

Last Wednesday's sittings of the Sobranje were remarkable in many ways. The police guard in front of the building was reinforced, and the public were admitted only after a strict examination of their tickets. Rumours were rife that there would be trouble for the Government if it persisted in retaining power in spite of the known hostility of Russia; the Opposition appeared to be anxious to face a trial of strength; and it was stated that three of the Opposition leaders had been attending consultations at the Russian Legation, where a list of members for a new Cabinet had been drawn up, and that a loan within a week had been guaranteed to this Cabinet.

Finally, the sitting was opened, and the President of the Chamber announced the debate on the Loan agreement. The leaders of the Radicals and the "Broad" Socialists condemned the loan, and declared that the present Cabinet, having by the treaties of Bucharest and Constantinople given Bulgarian soil to foreigners, would now bring the foreigners into Bulgaria itself. Next, the leader of the "Narrow" Socialists spoke. He condemned the bourgeois opposition for becoming the tools of a foreign Power, and thereupon such uproar arose that the President had to suspend the sitting. On the resumption of business Dr. Radoslavoff rose to speak, but the Opposition would not allow it. They shouted, hurled books and inkstands about, upset the desks, chased the stenographers from the Chamber, and generally created a violent scene. Thereupon there followed another adjournment.

On the sitting being resumed, the Government put the stenographers in their midst, and defended them (by force) against the Opposition's attacks. The agreement was read; the President put it to the vote; it was adopted by the solid vote of the Government party; and the Chamber rose at once. The Opposition was aghast. But last Friday the King ratified the contract by Royal Ukase. The loan is, therefore, an accomplished fact.

NOTES FROM ROUMANIA.

(From Our Own Correspondent.)

Bucharest, July 18.

Volunteers for Albania.

An interesting scene was witnessed at the Gare du Nord by those who happened to be there last Wednesday evening, when 250 more Roumanian and Albanian Volunteers, commanded by Colonel Christescu and other Roumanian officers, left for Durazzo. Most of the volunteers were wearing their full Roumanian field service uniforms, but the regular headgear was replaced by a white polo cap, decorated with the Albanian arms in front and a Roumanian tricolour ribbon at the side. The party was accompanied by the Albanian Red Cross ladies; and it was given a most enthusiastic send-off by many members of the Albanian colony.

This was only one of many parties which are to be despatched daily, the intention being to send, if possible, 5,000 men, that being the number of troops that Roumania was asked to furnish, but had to refuse (officially) for various political reasons. Most of the expenses of the journey, the pay of the men, etc., have been subscribed by the Albanian colony here; but only sufficient funds are in hand to pay the rank and file (2 francs daily) until they arrive at Durazzo. Thereafter, if one may trust the word of an Austrian Volunteer who returned disgusted, their welfare is problematical. According to the statements of the Austrian referred to, nothing but a little tobacco had been provided for the Volunteers arriving, and they were all in a state of semi-starvation.

Peasant Marriages.

A question which is receiving some attention from the authorities is that of the number of peasants who live together as man and wife without troubling to go through the marriage ceremony. In order to effect an improvement in this respect the regulations were simplified as far as possible, but this has not yet produced the desired effect.

In the Prahova district the Préfect, M. J. D. Agaru, has been working hard to undo the evil. Not long ago he persuaded sixty pairs to enter the bonds of legal matrimony, and last Sunday he added thirty-two other pairs. His son and daughter stood sponsors for the whole of the happy brides and grooms, and his wife presented each of the women with a national costume.

FLOODS IN BULGARIA.

According to a Reuter's message from Sofia, dated Wednesday, torrential rains which have fallen the last few days have caused floods in certain districts, especially in Jambol, Lom, Razgrad, and Eskijumaya, where hitherto over a hundred bodies have been recovered. The number of victims is stated to be much greater than this. Considerable damage has been done, being estimated at many millions of francs. Steps have been taken to organise relief for the sufferers.

THE EXPANSION OF SERVIA.

In a note recently published in the Daily Consular and Trade Reports the U.S. Consul at Belgrade (Mr. Lewis W. Haskell) writes:—Before the recent wars with Turkey and Bulgaria Servia was divided into eighteen districts. The area of the country was 18,644 square miles, with a population of 2,911,701. Servia acquired, as a result of the wars, territory to the extent of 14,668 square miles, with a population of 1,481,614. The total area of the country to-day is, therefore, 33,312 square miles, with a total population of 4,393,315. The new territory has been divided into twelve administrative districts, making a total of thirty administrative districts in the whole country.

NEAR EAST IN PARLIAMENT.

HOUSE OF COMMONS.

The Persian Coronation.

July 16.

Sir G. Scott Robertson asked the Secretary for Foreign Affairs whether he had official information to the effect that the coronation of the Shah of Persia had been, or might be, postponed from July 21 to September 18; and, if so, whether the reasons for this change were political or financial; and whether it was possible for a quorum of the Mejliss to be elected by July 21.

Sir E. Grey: The answer to the first part of the question is in the negative. As to the last part, I am unable to express an opinion.

Replying to further questions by Sir G. Scott Robertson, Sir E. Grey said he agreed that there was great financial anxiety in regard to Persia. A sound financial position was at the bottom of everything. If the financial position was unsound there was every cause for anxiety.

Armenian Inspectors.

Mr. King asked whether the European inspectors appointed to Armenia would report to their respective Governments, and whether any reports received by the Foreign Office from inspectors in Armenia would be published.

Sir Edward Grey: The Inspectors-General will naturally report to the Turkish Government, by whom they are appointed.

Persian Oilfield Production.

Answering a question put by Mr. Gwynne, Mr. Churchill said: The Anglo-Persian Oil Company already has a large production of oil. Part of this is now being taken by the Admiralty. The supply contract which has now been entered into provides for gradual increases of supplies during the next three years, at the end of which period the further development is expected to be completed. The company will then be in a position, in addition to meeting contract obligations with other customers, to provide the average quantity expected to be required by the Admiralty, and also to make larger supplies if the Admiralty should decide to exercise the contract option of increasing the quantity.

Egyptian Wireless Station.

Answering a question by Major Archer-Shee, Mr. Hobhouse, the Postmaster-General, said: The arrangement for establishing direct communication between Egypt and India, which was explained to the House on March 2, in reply to a question by Mr. Walter Guinness, necessitated some delay in connection with the acquisition of fresh sites in Egypt and India. The new sites for the Indian station have not as yet been formally accepted by the company. Work has been proceeding for some time on the construction of the masts for the English station, and the construction of the foundations for masts of the Egyptian station is about to be commenced. Material has also been, or is on the point of being sent out for the masts of the East African, Indian, and Singapore stations.

Sudan Loan Bill.

July 17.

The Government of the Sudan Loan Bill passed through Committee and was afterwards read a third time.

The Situation at Durazzo.

July 20.

Replying to Sir J. D. Rees, who asked for information regarding the situation at Durazzo, Mr. Acland said: Durazzo is still invested by the insurgents, but has been for some time free from active attack. Rear-Admiral Troubridge is present with two of his Majesty's ships, and has orders to co-operate with the foreign men-of-war in providing for the personal security of the Prince, his officials, and all European non-combatants should occasion arise.

The Trans-Persian Railway.

Colonel Yate asked the Secretary for Foreign Affairs whether he would refer the question of the proposed railway across Persia to the Government of India for their opinion as to whether a change of gauge, made at the southern boundary of the Russian sphere in Persia, would better fulfil strategic requirements and at the same time offer greater commercial advantages to Indian trade than were offered by the proposed railway on the Russian gauge right through from the North to the boundary of the British sphere at or near Bundar Abbas on the Persian Gulf in the South.

Mr. Acland: The point as to break of gauge was originally considered with the Government of India, and the decision come to was in accordance with their views. The whole question of the railway continues, as a matter of course, to be considered in consultation with the Government of India in all its bearings.

The Agreement of Corfu.

Mr. Shirley Benn asked whether the Epirote Government of M. Zographos had ever adhered to the agreement of Corfu.

Mr. Acland: The agreement concluded with the International Commission in Albania was accepted by M. Zographos on behalf of the Epirote Provisional Government, but I regret to state that it has since been practically repudiated by the other Epirotes.

The Position of Col. Doulis.

Mr. Shirley Benn asked whether the Greek Government proposed to hold M. Doulis, commander of the Epirote forces, responsible for past massacres of Albanians.

Mr. Acland: Colonel Doulis has been struck off the list of the officers of the Greek Army. He is, therefore, no longer responsible to the Greek Government.

Replying to further questions, put by Mr. Gretton and Mr. Shirley Benn, Mr. Acland stated that the creation of an autonomous Albania State rested on a resolution adopted at a meeting of the Ambassadors' Conference over which his right hon. friend, the Foreign Secretary, presided. The proceedings of that conference were not embodied in any formal document, and the occasion to sign an agreement did not, therefore, arise. To avoid misunderstanding he might add that the Ambassadors' Conference acted simply as a means of keeping the Governments of the countries there represented in close touch with one another, and that their resolutions were simply the records of the points upon which these Governments were in agreement. A report had reached him that the Servians had crossed the Albanian frontier, but he had no confirmation of it.

Britain and Persia.

July 21.

Mr. Ponsonby asked whether any reply had been sent by his Majesty's Government or the Russian Government to the Memorandum handed to the British and Russian representatives at Teheran by the Persian Government in June last.

Sir E. Grey: I can only answer for the British Government. So far as concerns them the answer is in the negative. There is no object in our making a reply to the Memorandum of the Persian Government which, although a copy was communicated to his Majesty's Government, was addressed to the Russian Government.

Turkish Bands at Phocea.

In reply to Mr. Noel Buxton, who asked for information relating to an attack by Turkish bands upon the Greek population of Phocea,

Sir E. Grey said he had information from his Majesty's Consul-General at Smyrna that such an attack was made on the 12th ult. in circumstances of barbarity. Many refugees were saved through the protection afforded them by M. Sartiaux and his companions, and others were towed over to Mytilene by an English launch. He had no information as to any special measures of relief.

In reply to a further question by Mr. Noel Buxton whether he would publish reports on recent atrocities against Greeks in Asia Minor,

Sir E. Grey said: Recent occurrences in Asia Minor do not, I am glad to think, represent a normal state of affairs, and if the reports which deal with them were made public I should, in justice, feel obliged to take a like course in regard to reports dealing with maltreatment of Moslems in the territories recently annexed from Turkey. I am doubtful whether any useful purpose would be served by giving official publicity to a state of affairs which is, I trust, temporary, and in regard to which it is impossible to strike a balance of culpability.

Unrest in Persia.

Sir G. Scott Robertson asked the Secretary of State for Foreign Affairs whether he was aware of the position on the Baghdad-Kermanshah Road, where £120,000 worth of British goods were held up owing to the unrest, while Russian goods from the north flowed in uninterruptedly.

Sir E. Grey said that some days ago he pointed out to the Russian Government that in the interests of the open door for trade the Russian Consul at Kermanshah ought to be instructed to support the Persian Governor-General in measures to keep the road open. The Russian Government had promised to send such instructions.

In reply to further questions,

Sir E. Grey said that the Government were ready to advance funds for the payment of the gendarmerie, which, he trusted, would enable that force to keep order in Fars and Kerman. He saw no reason to fear danger to the Anglo-Persian Oil Company's works. It was impossible to discuss various hypothetical contingencies. He could only contemplate the most probable contingency, which was, he thought, that if the tribes felt it to be to their interest to keep order and to see the pipe-line was not interfered with no measures on our part would be necessary. The independence and integrity of Persia, as explained by him on the Foreign Office Vote, had been on both sides the basis of all conversations, whether this year or previously, and the Russian Government had repeatedly disclaimed any intention of annexing any part of Persian territory. The question of the collection of taxes in Persia by Russian officials was brought by the Foreign Office to the notice of the Russian Government last month, and a reply had been received to the effect that the collection of taxes by Russian Consuls had occurred in the case of Russian subjects and Russian protected persons, and that these revenues had been paid into the Russian bank, but that an account was kept of all sums collected by Russian Consuls, and nothing was taken from the Persian Treasury.

NEAR EAST BOOKSHELF.

ANARCHIC ALBANIA.*

Mr. Wadham Peacock compares the Principality of the Mpret to a foundling, and assuredly events are showing that the poor little State, mutilated on all its landward frontiers and with many of its people massacred by their neighbours, is indeed suffering the ill-treatment and neglect traditionally supposed to be accorded to a "nobody's child." He provides his readers with a variety of sketches of life in and near Scutari, or Skodra, and some chapters devoted to history and modern politics. The author at one time held an official position in the British Consulate in the old Albanian capital, and proves himself to have been an observant and discriminating visitor. Some of his chapters were written as self-contained articles for contribution to the periodical Press, consequently there is no particular thread of consecutive narrative through those which deal with local life and manners. The latter part of the book, however, is an interesting essay upon the political and religious conditions which affect the new State and the historical events which preceded and led up to its formation. Mr. Peacock criticizes the various proposals put forward by omnivorous Balkan Allies for the frontiers of Albania when they found to their intense disgust that Europe was insisting upon its formation, and points out how unfairly the Shkipetars were treated. He touches upon the curious custom, which has given so much trouble in the past and is still so sedulously cherished in interested quarters, of submerging a man's race in his religion. Thus a Moslem Gheg was looked upon as a conquered Turk, an Orthodox Tosk was claimed as a Greek by the Government of Athens, and the Northern Catholics were persecuted by their Orthodox invaders for the double crime of being neither Slavs nor members of an Eastern Church. Mr. Peacock tells a delightful story in this connection of a Catholic chief in the North who surprised a Turkish officer by refusing to be treated as a Rayah, a thing he and his had never been in Albania under the Turks. The author in another chapter explains the meaning of this position, so curious in a Christian subject of the Padishah, and points out that none of the numerous races which at one time or another have claimed overlordship of Albania ever really conquered the hill country or held it down. Consequently the Albanian mountaineers retained their immemorial independence, their language, and their peculiar customs but little affected by the successive ethnic waves which surged amid the foot hills of their mountain fastnesses. The Albanian language, which, in spite of the sneers of those who affect to despise it as an unlettered jargon, appears to trace from a remote antiquity, and has been preserved by oral tradition only, as it has been until lately a disputed point whether the Roman, the Greek, or the Arabic alphabet should be used for writing the sounds of Shkipetar. Political and ecclesiastical influences favoured the two latter scripts, but Albanian nationalism has resolutely looked to the West, and, as a protest against detested tyrannies, has adopted the Roman alphabet. Mr. Peacock devotes considerable space to this interesting phase of Albanian development, and reproduces specimens of the Greco-Shkipetar and Arabo-Shkipetar alphabets.

The book, based as it is on personal experience, gives much assistance to those who seek to understand the complexities of the Albanian situation, and goes far to correct the suggestion, which is so widely propagated by ambitious neighbours, that the Northern Albanian is a kind of Serb, while his Southern brother is a sort of Greek. The Albanian is a distinct race, perhaps the oldest in Europe, and as a Balkan people has every right to its share of the Balkans.

NEAR EAST BOOK NOTES.

We have received a copy of the May issue of "Al-Kulliyeh," the journal of the Syrian Protestant College, which contains, along with many other interesting articles, a full report of Lord Bryce's address delivered to members of the college on May 2.

The current number of the Palestine Exploration Fund's *Quarterly Statement* is of considerable interest. It contains, in addition to the usual notes on the society's doings and an account of the annual meeting, a report on "The Survey of Sinai and South Palestine," by Captain S. F. Newcombe; "The Jewish Quarters in Ancient Rome," by Signor Pietro Romanelli; and "Coincidences of Hebrew and Cuneiform Literature," by Mr. Joseph Offord.

Messrs. Macmillan will publish shortly "The Financial System of the United Kingdom," by Henry Higgs, C.B., Inspector-General of the Egyptian Finance Department. The intricacies of our national system of finance are examined and explained in detail.

BOOKS RECEIVED.

The Valley of the Kings, by Marmaduke Pickthall; *The Cliff End*, by Edward C. Booth; *The Lore of the Wanderer*, by George Goodchild; *The Comments of Bagshot*, by J. A. Spender; *The Mistress of Bonaventure*, by Harold Bindloss; and *The Children of Light*, by Florence Converse. (The Wayfarer's Library. Dent and Sons. 1s. net each volume.)

NEW MAP.

The new map issued at 8s. by Messrs. Edward Stanford, of the Near East, shows the new frontiers, and is thoroughly up to date in the matter of railways, even those sections of the Baghdad line which were opened only a few weeks ago being indicated. Some of the projected lines both in Europe and Asia are also marked, but there are one or two omissions. The map is useful and clearly coloured, and is well adapted for office or library use. The map is on a scale of nearly forty miles to the inch on a sheet 43 by 31 ins.

THE NEAR EAST.

THE NEAR EAST is on sale at all Bookstalls and Newsagents in the United Kingdom. Should any difficulty be experienced in obtaining the paper, readers will oblige by notifying the Manager. Abroad THE NEAR EAST may be obtained in:

PARIS. Librairie Hachette, 79, Boulevard Saint-Germain; Librairie Galignani, 224, Rue de Rivoli, and at Railway Bookstalls.

VIENNA. Goldschmiedt Brothers, Zeitungsbureau, Wollzeile, 11.

CONSTANTINOPLE. Economic Co-operative Society, Pera; Benjamin Rawa, British Oriental Bazaar; D. Marianopoulo, 280, Grande Rue de Pera; and The Nautical Bazaar, Galata.

SALONIKA. Librairie Francaise, Rue Sabri Pasha.

SMYRNA. Dem. Tzannou, Petite Rue de Rose, and F. S. McVittie.

BEYROUT. Sarrafian Brothers.

JERUSALEM. Palestine Educational Store, Jaffa Road.

CYPRUS. Cababe and Wilson, Nicosia.

CAIRO. Diemer and Company, Shepheard's Buildings; The British Library, Sharia Kasr-el-Nil; C.M.S. Bookstall, 15, Sharia Madabegh; and at Railway Bookstalls.

ALEXANDRIA. Librairie Schuler, Rue Cherif Pasha; Nacamulli and Company, 12, Rue Secostris; Librairie Calebotta, Rue Cherif Pasha Librairie Cauro, Rue Cherif Pasha; The Eclectic Bookstall; F. Diemer, Cairo Station.

PORT SAID. Charles Evans, and on board vessels in the harbour.

KHARTOUM. Sudan Stationery and Bookstore, and Victoria Bookstall

ATHENS. Eleftheroudakis and Barth, Place de la Constitution.

SOFIA. Librairie de la Cour.

BUCHAREST. Socec and Company, Calea Victoria

BELGRADE. La Librairie Internationale, 16, Rue Prince Michel.

NEW YORK. The International Bibliopole, 118, East 28th Street.

Readers in France who desire to secure THE NEAR EAST regularly are informed that any Newsagent in that country can obtain the paper for them through Messrs. Hachette, in Paris. In the same way any Newsagent in Belgium can readily obtain the paper from the Agence Dechenne, Bruxelles.

THE PRESS ON THE NEAR EAST.

Austria and Servia.

The Morning Post for July 21 contains an interesting leading article on "The Situation in the Near East," in which the high tension between Austria-Hungary and Servia and its wider effects are dealt with. We quote below:—

There seems to be a school of politicians at Vienna and Budapest that would like to conquer and annex Servia. If that were to be attempted there would be grave uneasiness in Europe. The Russian Government would hardly remain indifferent to an attack on Servia. Italy would not like it. A war between Austria-Hungary and Servia would thus probably bring Russia into the field. If Germany then did not remain neutral, France, as Russia's ally, could hardly be indifferent. Italy would hardly assist Austria-Hungary in a war of which the purpose would be to assert for Austria-Hungary a preponderating influence in the Balkan lands. Thus, if Austro-Hungarian statesmen adopt the policy of an attack on Servia they will be doing their best to provoke the long-dreaded European war in conditions not favourable to the Triple Alliance, for Austria-Hungary would have to employ a part of her forces against Servia, to station another part to watch Italy, and have only the balance to pit against Russia. Germany, with little help from Austria-Hungary, would have to meet the assault of Russia, with which would be combined a struggle on her Western border with France.

Another view of the same subject is given by *The Daily Graphic* (July 21) in a note under the heading, "The Servian Provocation." We quote below:—

Austrian public opinion is naturally excited by the monstrous crime of Serajevo. Its anger has been aggravated by the callous posture of Belgrade, and the encouragement it has found among the fire-eaters of St. Petersburg. It is possible—we hope, indeed, it is true—that the conspiracy of Prinzip and Caprinovitch had no abettors in Servia; but if the Serbs wished to act with the most elementary "correctitude" and civility it was their duty, from the moment they found suspicion settling upon them, to make energetic public and official repudiation of the crime. If, moreover, they had spontaneously offered to assist the Austrian Government in tracking out its organisers and abettors they would only have performed a neighbourly duty, and would have vastly enhanced their reputation in the eyes of Europe. Instead of that they have passed over the crime, committed by a Serb in the interests of Serb megalomania, with a cynical shrug of the shoulders. The Government has made no repudiation and offered no assistance. On the contrary, the Belgrade Press, including the semi-official organ, have sought in every hole and corner for extenuating circumstances.

Russia in Azerbaijan.

The Manchester Guardian, which, as our readers are aware, has consistently deprecated the aggression of Russia in Northern Persia, severely condemns, in an article entitled "The Outlook in Persia," that country's latest invasion of Persian sovereignty. The following is an extract:—

Not content with keeping the gendarmerie out of her own sphere, Russia is determined to prevent its doing any work even in the neutral sphere. She has impounded the whole surplus of the Northern Customs, amounting to over £40,000, on which the Persian Government had counted to pay the gendarmerie, to the satisfaction of certain probably unjust claims by Russian subjects, and to an increase of the Persian Cossack Police which the Persian Government has never sanctioned. Sir Edward Grey's answer to that is that we will lend money to Persia to pay her gendarmerie. Why should we have to lend what Russia has stolen? Stolen is the word, for Russia has no business to be handling the revenues of Persia at all. Sir Edward Grey says that what the Russians have told him is that they have collected no taxes from anyone in Persia except from Russian subjects and persons under the protection of Russia. For them to put him off with a bare-faced lie like that shows gross lack of the respect that is due to a British Secretary of State. The Russians are collecting the whole of the Northern Customs. They are also collecting and, what is more, keeping the whole of the taxes of the province of Azerbaijan, the wealthiest and most populous in Persia. M. Mornard (the successor of Mr. Shuster), it seems from a letter that we published on Monday last, asked the Russian Bank to collect the taxes for him because he could not do it himself without the support of the Russians at Tabriz. He forgot to add that the money should be remitted to the Persian Treasury, and in fact it never has been. Is that consistent with the Anglo-Russian Convention which guaranteed the independence of Persia? Or even with common honesty or decent feeling? Sir Edward Grey has the facts. Let him say exactly what he as a man of honour thinks of such conduct. And let him announce further that in lending Persia money to pay for the gendarmerie he will treat the amount of the loan as a debt due to us by Russia. A little frankness for once in our negotiations with Russia would enormously increase both Russian and Persian respect for us.

Egyptian Finances.

An interesting (though belated) review of Lord Kitchener's Report for 1913 is contributed to *The Morning Post* by "A Correspondent." With reference to the new financial policy of the Government the article says:—

Rumours as to this momentous departure on the financial side of our policy in Egypt have, indeed, not been wanting, and there have been Press strictures on "Extravagance in Egypt"—a phrase long fallen into disuse, save by allusion to the days of Ismail. This and other points which may arise when the new taxation takes shape must be left for future comment. That the interest, and perhaps the unkindly interest, of Europe will be excited is far from unlikely. Foreigners have so large a stake in the continued prosperity of Egypt that they can hardly be left out of any fresh scheme of contributions. Nor can our relations with, and our hold on, the native population escape some additional strain. Of their ability and willingness to help in the discharge of liabilities incurred, and to be incurred, mainly in their behalf, there is probably little present knowledge. It may, indeed, be a new doctrine to the fellah that the Government can ever be short of money, and still a newer one that progress brings burdens for himself as well as benefits. The investigations which must be made to provide a trustworthy basis for the measures ahead will involve anxious labour for the rest of this year. To sum up, then, the situation is one for marking time—words which form the heading of this article. They are meant to comprise deep study of the facts, the husbanding of resources already available, and careful preparation for the next advance. Here is, in its way, true work for a mind with the habit of operations of war, for some of the issues involved may develop dangers.

Foreign Intrigues in Albania.

The Nation has an interesting note on the troubles in Albania. We quote below:—

It is fairly clear that there has been some collusion among all these invaders and rebels. Greeks and Servians both encouraged the Moslem rebels, who are mainly under Turkish leadership. They then used the successes of these rebels as a pretext for their own advance, on the plea that they must march in to protect the Christians. Prince William, meanwhile, whose kingdom has shrunk to the port of Durazzo, has made a last solemn appeal to the Powers for money and men. The Powers, declining themselves to send troops, are said to have invited Roumania to do so—a singular proposal, which she has rejected, though apparently in terms which have encouraged the Powers to repeat their suggestion. The whole episode seems comical at a distance, but on the spot it wears a different aspect. The country is being ruined and devastated with fire and sword, and hatreds, to which the Albanians were comparative strangers, have been fostered by foreign intrigue. The only plausible theory is that Austria and Italy are indifferent to the failure of a European work, because they desire to divide and hold the country themselves.

The Governance of Albania.

Mr. Lucien Wolf, in his article in *The Graphic* (July 18), under the heading "The Ireland of the Balkans," strongly recommends international intervention in Albania:—

Europe has taken Albania into her keeping, and she is responsible for the destinies of the State. She cannot shuffle out of her obligation, and since the men, money, and brains for the adequate discharge of them cannot be found elsewhere, she must supply them. There is really no alternative except anarchy in one form or another, and that would prove much more costly to Europe in the long run than direct intervention now. Of course, the present scheme would have to be abandoned. There must be no more Christian princes brought in from outside without the genuine consent of the people, and no pretence of immediate self-government. The expedient of a prince has been discredited, and it is futile even to talk of self-government to a people who have yet to learn the first principles of orderly government, and who, as they are at present advised, have no respect for anything except force. The appearance of Europe at Durazzo in the tangible form of a High Commissioner—preferably a distinguished soldier—backed by an efficient international force, would act like a charm. The fact that the new Government was not Albanian, but frankly European, would at once reassure the religious minorities. But such a Government should not be conceived as permanent. Its mission should be, in the first place, to pacify the country, and in the second place to train it in the art of self-government.

Expenditure on Armaments by Turkey.

The Financier (July 18) concludes a review of Djavid Bey's Budget speech by remarking:—

It is an ambitious programme, but undoubtedly its most satisfactory feature is that of the hundred millions which it is proposed to spend four-fifths will be devoted to useful public works, most of a reproductive kind. Attention will be concentrated on the development of Turkey's vast territory in Asia, possibly with the happiest economic results. If only peace can be preserved the new Ottoman Empire should be stronger and wealthier than the old. And, after all, the best way to preserve peace is to prevent Turkey from relapsing into a state of naval and military impotency, which would render her peculiarly vulnerable and liable to attack. For that reason the projected expenditure on armaments must be regarded as a precautionary measure calculated to ensure peace and prosperity.

Articles to Note.

LETTERS TO THE EDITOR.

The columns of THE NEAR EAST *are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of* THE NEAR EAST.

Letters intended for publication MUST be accompanied by the writer's full name and address, not necessarily for publication, but as an evidence of good faith. They should be worded as briefly as possible and must be written on one side of the paper only.

AN APPEAL TO THE BRITISH PRESS.

To the Editor of THE NEAR EAST.

Sir,—As long as Greece retains Chios and Mytilene mutual jealousy and suspicion would be ever rampant, and as long as Turkey ill-treats the Greeks in Asia Minor no one would believe her, notwithstanding her determination to carry out these proposals and reforms to their very letter. By ill-treating the Greeks, Turkey not only embitters the relation between herself and Greece, but also runs the risk of forfeiting the sympathy of Europe. Unless Turkey governs her rayahs to the satisfaction of her Christian neighbours, she cannot expect Greece or any other Christian Power to treat its Moslem subjects with equity. If Greece is compelled to draw the sword on account of the ill-treatment meted out to her subjects in Asia Minor, Turkey would be a delinquent not only before Europe but also before Islam. Suffice it to say that the wanton ill-treatment and expulsion of the Greeks is detrimental to the empire both from the political and commercial point of view. However, I appeal to the "Ottoman Association" and the British Press, especially to *The Times* and THE NEAR EAST, to exert their influence in bringing about an amicable settlement between these two rivals.
—Yours, etc.,

H. HAMID.

Calicut, India, June 25.

A POINT OF PRIVILEGE.

To the Editor of THE NEAR EAST.

Sir,—I notice in your issue of the 10th inst. that a meeting of the "Balkan Committee" was held at the House of Commons recently, and I should like to know if any other committee—say, of Suffragettes—would be entitled to the same privilege and honour?—Yours faithfully,

Smyrna, July 17.

EQUALITY.

AFTERMATH OF BALKAN WAR.

To the Editor of THE NEAR EAST.

Sir,—Permit me to reply to a letter which appeared in your journal of the 19th ult. In this letter, signed "A. L. Kennedy," an amazing assertion is made—namely: Each country of South-Eastern Europe is now, "in consequence of the war," breathing a fuller, freer, national life. Mr. A. L. Kennedy may be blissfully ignorant of the existing conditions of the country, but those who look a little deeper into things, and we who have a practical connection with the International Labour movement, know, that your correspondent's statements are erroneous and ought not to pass unchallenged. Doubtless it is pleasant to roam in the realm of sentiment, but I fear this will not help the hungry and the maimed refuse of the Balkan War. First, the Balkan War was from the outset a fight for territorial aggrandisement. Only yesterday I was confirmed in this belief by a Servian who has been through the wars. Apart from altruistic ideals the people have not got, and cannot get, anything out of the wars, and the Servian almoet cursed the day he took up arms. The second Balkan War has shown to the world what a thin veneer of civilization covers the brute beast in man, lurking amongst half-moralising races, professing Christianity. During the last twenty-four months of the twentieth century rapine and murder have been rampant only a few hours' journey from the French and English capitals. The time has come to throw convention aside. Humanity has suffered, and is furthermore threatened. Last October I sent a letter to the Press in which I expressed the opinion that the independence of Albania was insisted upon by certain Powers solely in order that the peace of 1913 should not be lasting.

From recent official reports of the financial position of Bulgaria much may be deduced, but the recent detailed account given in *L'Humanité*, and quoted in THE NEAR EAST, of the position of the Balkan workers affords an insight into the actual state of affairs. In the article in question the writer says:—"The working day is now extended from one to three hours and salaries are 30 per cent. lower than they were before the war. Out of 216 trades, twenty-six record an additional one hour per day; in fifty-five cases the hours are increased by two per diem, in eight cases for three hours, in eighteen for four hours, and in fifty-one for over four hours. . . . Prices have increased by 50 per cent. and 100 per cent., and 'real' wages are falling rapidly. . . . . The conditions of work and of life of the Servian workpeople are barbarous and insufferable." These bare facts need only to be stated. They are not, however, likely to be without effect on the workers of other countries, and the British worker, whose own recollection of the after effects of the South African War accepts the recital of events in Bulgaria and Servia as true.

Further support is given to the above statement by a more recent article in our London "Labour Journal." I need only quote part as follows:—"In Servia and Bulgaria a warning has been issued telling men to keep away. In all industries unemployment is exceedingly high, hours are longer, except in the timber trade. Very little is done at the same time. Prices of food, etc., are increasing, and are now 50 to 100 per cent. higher than at normal times." The mass of the people are in dire need, and these are the victors. And your corrspondent says "the people are daily breathing a fuller and freer life." Further he says—"Men in the Balkans, as elsewhere, will still lay down their lives for an ideal." Does Mr. Kennedy seriously suggest there can be any high ideal in and about savage warfare? No, war is futile and foolish, and the people are beginning to realise this, and the part that has been assigned to them in playing the war game during the last decade. I do not believe the masses want a violent revolution, but the rulers in the Chancelleries appear to be doing their best (unconsciously) to force it. They should take a warning by the revolt of and linking up of Labour groups everywhere, in which coloured labour will eventually join. The rulers should take the advice given in an article in THE NEAR EAST of the 19th ult., which had the significant heading: "Commerce, not Conquest."—Yours, etc.,

MARGARET ROBINSON.

20, Sutherland Place, W., July 15, 1914.

TANGIER TO TEHERAN.

The recent address delivered by a member of the Cyprus Legislative Council to the King of the Hellenes assuring His Majesty that he reigned in the hearts of all Greek Cypriotes, is a remarkable example of the deterioration of Greek style. To me its wording seems to smack of the Byzantine Court, or even of Persian influence, and the whole address appears to be in questionable taste. I do not refer, of course, to the honourable member's action in doing what he has done in view of the position which he holds. I merely think it unkind of him to have subjected His Hellenic Majesty to such treatment.

***

The Cyprus Government, acting under the Antiquities Law of 1905, has declared that certain ancient buildings have been placed under its protection. These date chiefly from the days of the Lusignans and of the Venetian occupation, and the action of the High Commissioner is a welcome reminder that "antiquities" need not necessarily be pre-Christian, and that Cyprus is particularly rich in mediæval monuments of great beauty, many of which are in a remarkably fine state of preservation. It is to be hoped that the protection to be accorded by the Law will not be on paper only, and that sufficient funds will be forthcoming for the proper maintenance of these buildings. No, I pray you, do not instantly say Cyprus cannot afford to preserve ruins, and advocate their immediate sale as building material. Cyprus is in need of visitors—and the money they bring—and visitors are wonderfully attracted by picturesque memorials of the past, particularly if they be well-kept and are made readily accessible. I trust that this step on the part of the Government may be the first of many in the direction of opening up the island to the moneyed tourist.

***

I am very glad to learn, from the questions put in the House of Commons last week by Mr. Wheler and Major Anstruther Gray, and the answers given by Dr. Macnamara, that the medals for service in the Persian Gulf in the years 1909-1912 will probably be issued this year. By the way, would it not be possible to include last year's service also in the period counting? The Admiralty seems to be waking up to such good purpose that I should think this may at least be hoped for. Service up the Gulf, as was pointed out at the time of the loss of the Pelorus's cutter, is not only trying by reason of the heat, but also accompanied by a good deal of risk, thanks to the survival of the old piratical spirit along the Gulf's rocky coasts; and the officers and men of the Navy who put in time there usually deserve at least as much recognition as they receive from their grateful country.

***

A correspondent has been writing to *The Clarion* in order (apparently) to pour ridicule upon an Egyptian paper which wishes to see the Fellah cultivate habits of thrift. He seems to object to the idea of the fellaheen endeavouring to free themselves from debt, and the thought that they should pay their taxes rather than let the burden fall on their fellow peasants is likewise painful to him. On such subjects he is, of course, entitled to his own views. But as he is at pains to inform the world that he is "a resident in Egypt of over twelve years," he might be more careful about his use of native words. He writes: "The *Fellaheen* is not considered by the ruling authorities as having much sense, but *he* has sense," etc., etc. Why not use either the singular or the plural in both cases?

CORSAIR.

THE PERSIAN CORONATION.

SULTAN AHMED SHAH KAJAR.

Rumours have been current of late to the effect that the Coronation of the Shah-in-Shah would have to be postponed owing to the impossibility of securing a quorum of the Mejliss, before which His Majesty might take the oath required by the Persian Constitution. Such a postponement would have been unfortunate for several reasons, not the least cogent—in a land which still pays heed to omens—being that it might quite well have given rise to the belief that the Coronation would never take place at all! Fortunately, however, the difficulty was overcome by the simple expedient of drawing upon the members of the old Mejliss, and on Tuesday the event long looked forward to by the Persians took place, with much impressive ceremonial and amidst many demonstrations of enthusiasm on the part of the young Shah's subjects.

Shortly after nine o'clock in the morning the Regent, H.H. Nasir-ul-Mulk, proceeded to the Mejliss. At half-past nine the young Shah drove thither in State procession in a glass coach drawn by eight white horses. He was escorted by gendarmes, Bakhtiaris, police, and Cossacks; and the commandants of the gendarmerie, the Governor of Teheran, and two prominent Bakhtiari chiefs formed his immediate guard. His carriage was followed by many others, in which were the Vali Ahd (heir to the throne) and other Royal Princes, the Premier, and the Cabinet Ministers. The route throughout was gaily decorated and guarded by troops and police.

"Parliament Square," says *The Times* Teheran correspondent, "presented a brilliant appearance as the various officials and envoys and their suites drove up to the gate of the Mejliss. Inside the Baharistan garden Persian Ministers, courtiers, and Deputies in State robes strolled about beneath trees through which might be caught glimpses of the blue domes and minarets of the neighbouring mosque, or made their way into the building to await in the cool rooms the arrival of the Royal procession. The sound of the distant cannon, followed by the arrival of the Regent, caused the company to take up their places in the hall of the Mejliss. The semi-circular seats gradually filled up."

The Taking of the Oath.

It was about ten o'clock when the Shah arrived and entered the Chamber, where there were assembled on the right of the daïs the clergy, on the left the Royal Princes, and below the Cabinet and State officials, then the Deputies in their places, and in the gallery opposite the daïs the foreign representatives and Persian notabilities. In the side galleries were foreign ladies and the Press respectively. The Shah advanced to a table placed in front of the platform from which the Deputies usually address the House, placed his hand on a copy of the Koran which lay on the table, and, with the Regent standing by him on his left, pronounced the oath required by the Constitution. He then bowed to the company and retired, the whole ceremony having occupied only a few minutes.

The following is the account of the subsequent proceedings as given by the correspondent of *The Times*:—

"The Shah next proceeded to the neighbouring Sipah-Salar Mosque, where the Ulama (Convocation) and the principal ecclesiastical dignitaries were assembled. Here he returned thanks and offered prayers to Allah for the prosperity of his country and his reign. After the service the Shah returned to the Palace by a more circuitous route past the gate of the British Legation and down the Avenue of Ambassadors.

The Peacock Throne.

"All this was but preliminary to the real ceremony of the Coronation, which was held late in the afternoon in the Palace, after the heat of the day was over. The ceremony in point of actual duration was almost as short as that of the morning. The envoys, Ministers, and officers of the Court assembled at four o'clock in the large hall adjoining the Throne Room. . . . Towards five o'clock a move was made to the Throne Room, the ecclesiastical dignitaries grouping themselves round the Peacock Throne, upon which a chair had been placed for his Majesty. Four Princes entered early, bearing the regalia—Prince Itizad-es-Sultaneh the sword, Prince Musrat-es-Sultaneh the shield, Prince Yamin-ed-Dowleh the mace, and Prince Azad-us-Sultaneh the Royal bow and arrows. The Kaianian crown and the Nadir aigrette were placed on a gold tray in front of the Throne. The foreign envoys were posted in a recess to the right of the Throne, and down the length of the hall, which is about 120 ft. long, were ranged representatives of the Ministries. On one side of the entrance to the hall stood a group of prominent merchants, the chiefs of guilds, who are always accorded an honourable place in memory of the part played by them in the history of the Constitution.

The Coronation.

"At five o'clock the Shah, preceded by the Minister of the Crown and Chamberlains of the Court, entered the hall, followed by the Regent, the Valiahd, Ala-es-Sultaneh, and the other Ministers. Having mounted the Throne, he removed the astrakhan hat, with a small aigrette, which he was wearing, and the Regent then handed the crown to his Majesty, who placed it upon his own head, supporting it first with one hand and then with the other, while the Ulama acclaimed him King, intoning in sonorous, guttural tones the Arabic formula. The crown, which is the same as that used at the time of Nadir Shah, is exceedingly heavy, so that after three or four minutes his Majesty removed it and placed on his head another astrakhan hat surmounted by the great Nadir aigrette set with the huge diamond known as the Darya-i-Nur (Sea of Light), brought from Delhi and sister stone to the famous Koh-i-Nur."

This concluded the ceremony of the Coronation, and the Shah withdrew to the Ivory Room for a short rest. A little later, however, he gave audience to the Diplomatic Corps, and here subsequently the Regent officially took leave of his Majesty and of the envoys. It is interesting to note that earlier in the day the Russian Minister had a special audience of the Regent, to whom he presented the Tsar's portrait set with diamonds.

EVENTS IN ALBANIA.

The Hon. Aubrey Herbert, M.P., has communicated intelligence which he has received from the Rev. Mr. Tsilka and from the Mayor of Valona as to the events in Southern Albania. Many of the deplorable details contained in this information are confirmed from other sources, and there is little doubt that the supineness of Europe has sacrificed a considerable area of Albania to the depredations of Moslem insurgents and Epirote invaders. Both of Mr. Herbert's informants state that some hundred thousand homeless Albanian refugees from Koritza, Klisura, Tepeleni, Kolonia, and Frasheri, who are congregated in the vicinity of Valona or have taken to the hills in the Voyusa district, are in a wholly destitute condition. Both correspondents assert that Greek regular troops are concerned in the Epirote invasion, and appeal for European intervention. According to other reports there are some 20,000 refugees in Valona and its environs. The sanitary condition of these unfortunate people is very bad, and the arrange-

To-day is the birthday of H.R.H. the Duchess of Saxe-Meiningen, sister to the Queen of the Hellenes.

To-day is the birthday of H.I.H. Ahmed Nihad Effendi, son of H.I.H. Mehmed Salah-ed-Din Effendi, and grand-nephew of the Sultan.

To-morrow will be the birthday of H.R.H. the Duchess of Connaught.

To-morrow will be the anniversary of the wedding in 1902 of H.R.H. Prince Mirko of Montenegro to Mlle. Nathalie Constantinovitch, a relative of the last Obrenovitch King of Servia.

Monday is the birthday of the Princess Militza of Montenegro, now the wife of H.I.H. the Grand Duke Peter Nicolaievitch of Russia.

Tuesday will be the anniversary of the wedding of T.R.H. the Crown Prince and Crown Princess of Montenegro in 1899.

Tuesday is the birthday of H.I.H. Ertogrul Effendi, son of H.I.H. Burhan-ed-Din Effendi, and grand-nephew of the Sultan.

H.H. the Khedive of Egypt arrived at Constantinople on Wednesday and landed at his residence on the Bosphorus.

It is announced from Belgrade that H.M. King Peter will remain at Vranja for about a week longer, after which his Majesty will go to Ribaska-Bania, where he will stay till the end of this month.

The sons of the Khedive arrived at Essen last week to pay a visit to the Krupp works.

By command of the King, the Hon. Sir Arthur Walsh, Master of the Ceremonies, called upon the Persian Minister at the Legation on Tuesday morning, and offered his Majesty's congratulations on the occasion of the coronation of the Shah. The full text of the King's message was immediately cabled by the Minister to his Sovereign. Among the callers were the Prime Minister, the Secretary of State for Foreign Affairs, the Lord Chancellor, and Colonel Sir Douglas Dawson, Comptroller in the Lord Chamberlain's Department.

The Teheran Correspondent of *The Times* reports that the Russian and British Ministers had audience of the Shah on Sunday and presented the letters accrediting them as Special Envoys at the Coronation and also the presents from their Monarchs to the Shah. The Tsar's present is a silver-gilt samovar with accessories. That of the King consists of two large silver-gilt urns in the style of the Louis XVI. period.

H.E. the Persian Minister held a large official reception at the Legation on Tuesday night. The outside of the building was brilliantly illuminated, and the hall, grand staircase, and salons were decorated with roses and masses of lilies arranged in Oriental vases with lotus flowers brought specially from Egypt for the occasion. Among the guests were his Excellency Amir Jang Bakhtiari Il-Begi of Bakhtiari, the French Ambassador, the Russian Ambassador, the Spanish Ambassador and Madame Merry del Val, the Turkish Ambassador, the American Ambassador and Mrs. Page, the Argentine Minister and Madame Dominguez, the Bulgarian Minister, the Chilean Minister and Madame Edwards, the Greek Minister and Madame Gennadius, the Netherlands Minister and Madame de Marees van Swinderen, the Minister for Panama and Madame M. Valdis, the Roumanian Minister, the Servian Minister, the Siamese Minister, the Swiss Minister and Mlle. Carlin and Mlle. H. Carlin, Señor Don Jacinto L. Villegas and Mlle. Villegas, the Belgian Charge d'Affaires, the Danish Chargé d'Affaires, Lieut.-Colonel Vicomte de la Panouse (French Embassy), M. Charles Roux, Major M. Renner, Military Attaché to the German Embassy, Korvetten Kapitän E. von Müller (German Embassy), M. and Madame A. Rizo-Rhangabé, Major Count E. Greppi, Mr. Yoshida, Colonel Inagaki, Captain Baron Abo, M. Johan Wilhelm Michelet, the Norwegian Chargé d'Affaires, the Peruvian Chargé d'Affaires, Captain Lieutenant Joao Manuel de Carvalho, M. W. Tomanowsky, Lieutenant-General Yermoloff, Lieutenant-Colonel Julio Vicens and Madame Vicens, M. and Madame Ch. Paravicini, Raif Bey (Councillor of the Turkish Embassy), Mr. and Mrs. Laughlin, Commander Powers Symington, Lieutenant-Colonel George O. Squier, Señor Don Frederico R. Vidiella. There were also present several members of the Cabinet, the Foreign Office, and his Majesty's Household, with their ladies.

H.M. the Queen and H.R.H. Princess Mary have paid this week a private visit to the exhibition of antiquities discovered at Meroë, in the Sudan, which is being held at the rooms of the Society of Antiquaries under the auspices of the Institute of Archæology of the University of Liverpool. They were received by Lord Derby, Professor J. Garstang, who has directed the excavations, and members of the committee. They were shown round the rooms by Professor Garstang and remained about half an hour. Shortly afterwards Lord Kitchener visited the exhibition.

According to a Reuter's message from Berlin, a telegram to the *Lokalanzeiger* from Bayreuth states that H.M. the King of Bulgaria, who yesterday signified his intention of going to Bayreuth on July 25 for the Wagner festival, to-day sent a message announcing that, owing to the uncertainty of the political situation, he would be unable to leave his kingdom at present, but hoped that the situation would be cleared sufficiently to enable him to be present at the final Festspiele in August.

The Turkish Ambassador will be at home to-day (Friday), from four to six o'clock, to members of the Turkish colony and friends of Turkey on the occasion of the anniversary of the proclamation of the Constitution for Turkey.

Prince S. Cantacuzene has arrived at Claridge's Hotel.

Field-Marshal Earl Kitchener was amongst those invited to the State Ball on Thursday last week.

Prince Antoine Bibesco, Secretary of the Roumanian Legation, has left London for St. Moritz.

Sir Gerard and Lady Lowther were included in a party who paid a visit of inspection to the Hampstead Garden Suburb on Thursday last week.

Sir Gerard Lowther is going to Vichy early in August and will afterwards proceed to Switzerland, where he will be accompanied by Lady Lowther. They return to London in September for the autumn and winter.

Lord Lamington, Sir Alfred Paget, and Sir Walter Lawrence accepted invitations to the meeting and dinner of the Ottoman Association, which was held last evening at the Café Monico, under the presidency of the Earl of Denbigh.

Mr. Venizelos left Athens at noon on Tuesday for Munich where he remains for a few days before proceeding to Brussels. The meeting with the Grand Vizier is to take place in Brussels in the middle of next week.

Lieutenant-General Sir John Maxwell, the Hon. Aubrey and Mrs. Herbert, Mr. D. G. Hogarth, and Mr. Howard Carter were amongst the guests entertained last week-end by the Earl and Countess of Carnarvon, at Highclere Castle.

According to *The Egyptian Gazette*, Major-General the Hon. Julian Byng, whose residence at Kasr el Doubar has been taken over by the Imperial Ottoman High Commissioner, has acquired the house near the Anglo-American Hospital, Gezira, which was recently vacated by Dr. Graham.

Mlle. Madjaroff, the daughter of H.E. the Bulgarian Minister, has arrived in London from Sofia.

The marriage took place on Tuesday at the Votivkirche, Vienna, of Major-General Sir Rudolf Baron von Slatin Pasha, G.C.V.O., K.C.M.G., C.B., Inspector-General of the Sudan, to Baroness Alice von Ramberg, only daughter of the late General Baron von Ramberg and of Baroness Ottilie von Ramberg (née Countess of Breda). The ceremony took place very quietly in the presence of a few friends. The bride and bridegroom will take up their residence in Khartoum after a short honeymoon.

Sir Richard and Lady Crawford left Constantinople on July 16, proceeding to Berlin and Paris, whence they have now arrived in London.

Sir Roper and Lady Parkington have left Green Street, Park Lane, for Harrogate.

H.E. the Hellenic Minister and Mme. Gennadius were present at Mr. Burdett-Coutts' garden party given on Thursday afternoon last week at Holly Lodge, Highgate.

Mme. Grouitch, the wife of the Permanent Under-Secretary for Foreign Affairs in Belgrade, who was for a long time Servian Chargé d'Affaires in London, left London last Friday for Paris and Switzerland, and later will proceed to Belgrade.

Mme. Gennadius, the wife of the Hellenic Minister, gave a small *matinée musicale* at the Legation last Friday afternoon.

Sir Ronald and Lady Lane are among those taking the "cure" at Buxton.

Mr. R. W. Graves, C.M.G., has left Constantinople for England.

H. E. Djevad Bey, the newly appointed Ottoman Minister in Belgrade, left Constantinople on the 16th inst. for his new post.

Judge Halton, of the Egyptian Mixed Tribunal, is at present in this country on leave.

The *Cyprus Gazette* announces that the King has been graciously pleased, on the occasion of his Majesty's birthday, to confer the Companionship of the Imperial Service Order on Mr. H. A. S. Utidjian, Translator of State Documents.

Djemal Pasha, the Turkish Minister of Marine, left Paris last Friday evening by the Orient express on his way to Vienna.

Digitized by Google

Ismail Pasha Abaza, whose return to politics was recorded by our Cairo Correspondent two weeks ago, has been elected to the Egyptian Assembly at a by-election.

Mr. W. A. Russell, King's Advocate, Cyprus, has been granted six weeks' vacation leave from June 27, 1914.

Sir C. R. Tyser, Chief Justice of Cyprus, has been granted two months and eight days' vacation leave, and one month and eleven days' half-pay leave from June 28, 1914.

Moheb Pasha, the Minister of Wakfs, is leaving Egypt to-day to join his family at Constantinople.

It is stated that Saad Pasha Zaghloul, who left Alexandria recently to take a cure in Austria, afterwards intends to proceed to England with a view to raising the question of making the Minister of Wakfs responsible to the Legislative Assembly.

The marriage took place very quietly at Alexandria on the 10th inst. of Mr. Wilner, head of the Alexandria Municipality's Legal Department, and Miss Sophy Botti, daughter of the late Professor Botti, Conservator of the Alexandria Museum.

The marriage arranged between Leon, eldest son of the late Mr. P. L. Argenti and Mrs. Argenti, of 16, Hyde Park Terrace, and Helen (Nelly), daughter of the late Mr. Stephen Zarifi and Mrs. Stephen Zarifi, will take place shortly in Marseilles.

Our Constantinople correspondent writes (July 18):—The marriage took place on Monday at All Saints' Church, Moda, Constantinople, of Mr. Edward Leonard La Fontaine, son of Mr. and Mrs. Sydney La Fontaine, of Bournabat, Smyrna, and Miss Eileen Helen Whittall, daughter of Mr. and Mrs. Edwin Whittall, of Constantinople, in the presence of a large number of friends. The British colony, official and unofficial, was largely represented. The service was fully choral, and the officiating clergy were the Rev. Canon Whitehouse, Chaplain of the British Embassy, uncle of the bride, and the Rev. W. Alan Gardner, Chaplain to the British Legation at Athens, brother-in-law to the bride. The charming and pretty bride was given away by her father, and her brother, Mr. Rowland Whittall, was best man. The bridesmaids were the little Misses Sheela and Edie Whittall, sisters to the bride, and her small nephew and niece, Wilfrid and Phyllis Gardner. After the ceremony Mr. and Mrs. Whittall held a reception in their beautiful house and garden at Moda. The house was beautifully decorated, and the playing of an excellent band in the grounds added greatly to the pleasure of all present. Mr. and Mrs. Edward La Fontaine left in the afternoon for Mr. Whittall's country house at Alemdagh to spend a few days there before leaving for their future home in Canada. Numerous and handsome presents, including many cheques, were received by the bride and bridegroom.

The marriage took place on Saturday at Holy Trinity, Brompton, of Captain Hugh Ince Webb-Bowen, the Royal Welsh Fusiliers (attached Headquarters Staff, Egyptian Army), eldest son of the late Mr. T. T. Webb-Bowen, Chief Constable of Pembrokeshire, South Wales, and Miss Flora McDougal, daughter of the late Mr. Thomas McDougal, of Raeshaw, Heriot, Midlothian. A reception was afterwards held at the Hans Crescent Hotel.

The marriage will take place in September between Thomas E. S. Armstrong, Customs, Egypt, eldest son of the late Edward Armstrong, and grandson of the late Thomas Armstrong, of Farney Castle, County Tipperary, Ireland, and Nesta Evelyn Dorothea, youngest child of Mrs. Cowper, of Chideock, Dorset, and Frank Cowper, M.A., late of Lisle Court, Isle of Wight.

Mr. D. Rees, Reuter's representative and Lloyd's agent in Cairo, left Alexandria for England by the Italian steamer early last week.

Mr. H. P. Kingham of the National Bank of Turkey is leaving Constantinople for the Engadine towards the end of the month.

Mr. Cookson, Manager of the Anglo-Egyptian Bank, left Cairo early last week for England. Mr. Cookson is retiring, having spent a great number of years as manager of the bank, and worked with great energy and success for its prosperity.

A Requiem Mass for M. Hartwig, the Russian Minister at Belgrade, was held at the Russian Church in Welbeck Street at eleven o'clock on last Saturday morning. The Very Rev. Eugene Smirnoff, the Priest of the Russian Embassy, officiated. Among the congregation were the Russian Ambassador, attended by M. W. Tomanowsky; M. Gabriel Wolkoff, M. Alexandre Nelidoff, M. B. de Siebert, and Lieut.-General Yermoloff Military Attaché, the staff of the Russian Consulate, M. Mathéas Boshkovitch, the Servian Minister, attended by M. Alexandre V Georgévitch, and M. Voislav M. Petrovitch.

Mr. W. H. G. Werndel, Reuter's correspondent in Constantinople, is leaving this week for Bad Gastein, Austria, where he will be joined by Mrs. Werndel; he will later proceed to England. In his absence he will be replaced at Constantinople by Mr. J. Maloney, Reuter's Teheran correspondent.

Lord and Lady Oranmore and Browne have returned to 12, Cavendish Place from Barsskimming, Mauchline.

Dr. Donald A. Coles, and Mrs. Coles of the English Hospital at Haifa have arrived in London accompanied by Mrs. Dudley Baxter and Miss Gipps, who, we regret to state, have both had to retire into nursing homes.

Dr. David M. Beddoe, of Cairo, is spending a holiday fishing in Wales.

Captain G. C. Hall, Traffic Manager of the Egyptian State Railways, is on leave. During his absence Mr. C. A. Muntz, Deputy Traffic Manager, will perform his duties.

General Sherif Pasha has announced that he has now severed his connection with the Turkish Parti de l'Entente Liberal, and with his former colleagues, Colonel Sadik Bey, Ismail Bey, the former Deputy for Gumurjina, and Pertew Tewfik Bey.

Our Bucharest Correspondent informs us that on July 11 the Roumanian Minister of Agriculture, M. Constantinescu, formally opened at Burdugein, the large slaughter house, which actually been open since March.

Mr. J. E. Rodocanachi, a member of the well known firm of merchants, has been admitted to the Freedom of the City of London through the Fishmongers' Company.

Major-General Inigo Jones, C.V.O., C.B., whose death after an operation for appendicitis occurred on Monday, served with the 2nd Scots Guards in the Sudan Expedition of 1885 at Suakin, receiving the medal with clasp and the Khedive's Star. A memorial service is to be held to-day at noon in the Guards' Chapel.

The death is announced at Alexandria, of Count Joseph Debanne, the Diplomatic Agent and Consul-General of Brazil, in Egypt.

Mr. Richard Davey Boase, M.R.C.S., L.R.C.P., who formerly practised in Luxor, and died intestate in London recently, left £1,639.

The death is announced of Mr. Thomas A. Kime, who was for a long time honorary secretary of the Alexandria Amateur Sports Club. He died at Campo Cesare suddenly from angina pectoris.

Mme. Nina Phocas gave her postponed recital at the Bechstein Hall recently. Mme. Phocas, who is a teacher of singing at the Athens Conservatoire and a Greek, included in her programme some modern Greek songs, and also sang some unaccompanied folk-songs collected from the peasantry of her native country.

APPOINTMENTS AND PROMOTIONS.

Our Bucharest Correspondent writes (July 18):—The reports regarding the probability of Count Czernin, the Austro-Hungarian Minister here, being transferred appear to be unfounded. He arrived in Vienna last Tuesday, and his leave will last till about the middle of September. Then he is expected to return to Bucharest.

A correspondent in Constantinople writes: It is rumoured here that M. Korostovetz, the Russian Minister at Teheran, is to be appointed to Belgrade in succession to M. de Hartwig. Should this rumour prove true, the appointment would be a most interesting one, for M. Korostovetz belongs to the Isvolski school, not to the Sazonoff school.

The Cyprus Gazette announces the appointment of Mr. Stanley Fisher, Puisne Judge, to act as Chief Justice of the Supreme Court of Cyprus, and Mr. J. R. Holmes, President, District Court, Nicosia, to act as Puisne Judge of the Supreme Court of Cyprus.

Admiral Sir A. Berkeley Milne has been appointed to succeed Admiral Sir Richard Poore as Commander-in-Chief on the Nore Station, and Admiral Sir Henry B. Jackson to succeed Admiral Sir Berkeley Milne as Commander-in-Chief on the Mediterranean Station, both to date August 29.

Rear-Admiral Henry Loftus Tottenham has been appointed to be Admiral-Superintendent of Malta Dockyard, in succession to Rear-Admiral Carden.

Captain G. M. Ponsonby, Royal Inniskilling Fusiliers, has been appointed for duty with the Egyptian Army.

The Inspectors of the Egyptian Ministry of the Interior have been allotted the following provinces:—Miralai Dumreicher Bey, Gharbia and Behera; Messrs. Olpherts and Roberts, Girga and Assiut; Welles Bey, Menufia, Galiubia, and Damietta; Mr. Graves, Giza, Beni Suef, Minia, and Fayum; Mr. Davidson, Keneh and Aswân. Three inspectors, Cobbe Bey and Messrs. Hazel and Macnaghten, are on leave.

Mr. Petros Delyannis, the newly appointed Secretary to the Greek Legation, has arrived in London and entered upon his duties.

Mr. Langa-Rashcanu, Councillor of the Roumanian Legation in Constantinople, who has been acting as Director of the Cabinet of the Minister of Foreign Affairs, is recalled to his post.

Mr. Contzescu, Councillor of the Roumanian Legation at Paris, is appointed Director of the Cabinet of the Minister of Foreign Affairs.

Mr. André A. Popovici, Secretary of Legation on the staff of the Roumanian Foreign Office, is transferred to the Roumanian Legation in Paris.

M. Zaripol, attaché of the Roumanian Legation at Madrid is transferred in the same capacity to Brussels.

Mr. Philip Nogga, the Albanian Minister of Finance, has been appointed Minister for Foreign Affairs *vice* Mufid Bey Libohova, who had been acting in that capacity during the absence abroad of Turkhan Pasha, the Grand Vizier.

Our Bucharest Correspondent informs us that Mr. Eugene Puzanoff has been nominated Russian Vice-Consul at Sulina.

DOMESTIC ANNOUNCEMENTS.

The charge for Announcements under this Heading is 3s. for three lines and 1s. per line afterwards. Minimum charge, 3s. All announcements must be authenticated with the name and address of sender.

BIRTH.

FAWKES.—On July 15, at 21, Lansdown Place, Cheltenham, the wife of Rupert E. F. Fawkes, Sudan Civil Service, of a daughter.

OBITUARY.

MR. FRANK C. HASELDEN.

We regret to announce the death, which took place at East Lymden, Ticehurst, on Sunday last, of Mr. Frank Charles Haselden, who succumbed to an illness of fourteen months' duration. Mr. Haselden was one of the oldest members of the British mercantile community in Alexandria, where he was very popular. He first established himself in business in Alexandria in 1868, and afterwards entered into partnership with the late Mr. Moberly Bell. In 1882 Mr. Haselden rendered valuable service as guide and interpreter when Capt. (now Lord Charles) Beresford took possession of Alexandria after the bombardment. He was a member of the Intelligence Department, and was specially charged with the duty of watching the movements of the rebel leader, Arabi. After the battle of Tel-el-Kebir Mr. Haselden accompanied Sir Evelyn Wood in the advance up country to Kafr-el-Dawar, where the native forces surrendered; and for his services on this occasion he received the British war medal. When Mr. Bell left Egypt in 1891 Mr. Haselden carried on business under the style of Haselden and Co., the firm acting as agents for the P. and O. Co. and for Sir John Aird and Co. "Frank," as he was popularly known, took a keen interest in racing, and was one of the moving spirits of the local sporting and athletic clubs. He is survived by a widow.

Deep regret has been expressed at the death of Mr. Frederick Noel Paton, Director-General of Commercial Intelligence to the Government of India, which has occurred at Edinburgh. Mr. Paton was the second son of Sir Noel Paton, and was born in 1861. Educated at Edinburgh Academy and Edinburgh University, he took up the study of art in London, and became an illustrator. Later, he edited Chaucer's works for the Canterbury Poets Series, and published a novel entitled "Body and Soul" and other works. He became English Secretary in the Turkish Embassy in London, and afterwards secretary to Sir Edgar Vincent in Constantinople. He travelled extensively in Turkey, Egypt, the Balkans, and other countries, and went through the unknown country of Hadramaut, in Southern Arabia, shortly before the Theodore Bent Expedition. In 1894 he visited India to negotiate with regard to contraband on the Aden frontier. Later he resigned his appointment with Sir Edgar Vincent and took up a commercial career in India, becoming secretary of the Bombay Chamber of Commerce.

At the exhibition of the Egypt Exploration Fund on Wednesday Mr. J. de M. Johnson gave a description of the methods employed in discovery of papyri in Egypt. Mr. Johnson said that the Greco-Roman period in Egypt, with which he was dealing, covered a little more than a thousand years. The earliest Greek papyrus they had found was a marriage contract of the date 311-310 B.C., and the latest dated from 710 A.D. There were various methods of obtaining papyri. They were found in rubbish mounds pure and simple which covered in buildings. They were found in buildings which were partly filled up with rubbish, and they were also found in buildings which had never been used as places for rubbish, but which had simply collapsed. Some valuable discoveries had been made in cemeteries, since it was often the custom to bury with the dead copies of the works of their favourite authors. It was in this way that the Bodley Homer was discovered. It was the custom of the Egyptians in early times to convert the dead body into a kind of portrait statue, but in the Ptolemaic age more attention was paid to the decorations of the coverings of the corpse. Of these there were five sections, and at first only cloth was used. In the third century before Christ, however, it became the custom to use strips of papyrus for the purpose. Several strips of used papyrus were glued together, and a solid surface was obtained to receive the paint. They had been able to remove the paint, and had revealed the writing underneath. By that means they had recovered valuable additions to the history and literature of the country. The earliest complete papyrus recovered by this method was a contract dated 300 B.C.

FRIDAY, JULY 24, 1914.

A BISHOPRIC FOR EGYPT.

At the present moment, when the approaching resignation of Bishop Blyth is stirring interest in Near Eastern circles, the natural question will arise in many minds, in what way does it affect the Egyptian Bishopric? It is well-known that Bishop Blyth has always strenuously advocated the formation of a separate Bishopric for Egypt, though some people think that it is only on account of his advancing age and inability to travel as actively as before. In 1899 a circular issued with an appeal for funds stated that "The increased responsibility which the whole country now feels for Egypt must be felt also in a real degree by the National Church. It is proposed, therefore, to raise the sum of £20,000 for the purpose of providing the stipend and expenses of a Bishop, who shall undertake the oversight of the whole work of the Church of England in Egypt and the Sudan. . . . In the event of a division in the jurisdiction of the Bishopric in Jerusalem, the sum now to be raised will form the endowment of an independent Bishopric. This appeal is made with the full consent and approval of Bishop Blyth, who has long been desirous of such a development of Church work in Egypt." This was signed by Archbishops Temple of Canterbury and Maclagan of York, the then Bishops of London, Durham, Lincoln, Salisbury, Ely, and others, both churchmen and laymen, whose names gave great weight to the scheme. Both Archbishop Benson (the reviver of the Jerusalem Bishopric) and Archbishop Temple were firm supporters of the scheme, and had it been possible, financially, to carry it earlier, it would probably have been founded in Archbishop Temple's day. As it is, it has suffered the fate of most postponed things; and the indifference of many in Egypt has retarded it also. About £16,000 towards the endowment of the Bishopric has been collected by Bishop Blyth and others, and all sources of income have not yet been tapped.

A good many reasons have been urged against a separate Bishopric for Egypt. There are many who think it would be setting too much of a national seal upon the British position in Egypt. Others say that the English-speaking population there is chiefly migratory, and so in no way our responsibility. Others cite the laxity of residents in Church matters: is it any use trying to help those who do not care enough to help themselves? What could a Bishop do more than the clergy are doing now? Is it wise to introduce into the present muddle an ecclesiastical official whose high position marks him out for notice, and whose failure will be, therefore, all the more lamentable? Shallow as such objections appear under examination, they are urged quite in good faith, and do carry some weight, even with thoughtful people. But to say that, because isolated clergy have not achieved very much, a Bishop must fail is, of course, absurd; and though the population of Egypt may be chiefly migratory, considered numerically it must still be fed, and it is the minority that really matters—the minority that resides there. Equally unpractical is the contention about helping those who help themselves. A doctor who went on that principle would very soon find his practice on the wane. To those who have any experience of Near Eastern politics the objection of seeming to set a national seal on our occupation of Egypt is just worth considering. Religion and politics are so grievously entwined in the Near East that it is hard for an Eastern to grasp their absolute separation in English work. Looking around him on the squabbles, rivalries, and racial jealousies and aims that distort much so-called religious work of other nations, the Eastern may be excused for thinking that English work must be the same. A few odd clergy here and there in Egypt can do no harm in his eyes, but what about a Bishop with his enlarged powers? Eastern susceptibilities are so easily upset, say the wiseacres at home, we cannot be too careful. But one of the chief reasons for the Egyptian Bishopric is just that national one. We have a State religion, and it should go side by side with our Government. We know it is not a political force, as it is in some countries, but it is a great restraining, binding, and uplifting force. Englishmen who go abroad are, as a rule, a sober, restrained, and high-living set. With religious support they might be something even finer, and as essentially English, in Egypt. Apart from our neglected responsibilities in this direction, there is the effect of such indifference upon the Moslem population that we have been called to govern. The one thing a Moslem, bad or good, cannot understand is indifference to religion; his own religion is part of his daily life. In the striking words of the Khedive Ismail to the present Bishop in Jerusalem, "The man who is truest to his own religion makes the best subject or the best settler that a prince can have."

The Sudan Bishopric is now a splendid fact, and under the right Bishop (as Bishop Gwynne most emphatically is), the Church's work has proved no obstacle to the civil administration, but rather the reverse. It is not possible to merge the Bishoprics of the Sudan and of Egypt for various reasons, the two most cogent being that the Governments of the two countries are different, and the two Bishoprics must, therefore, be differently constituted, and the two endowment funds have been raised for separate Bishoprics. Moreover, while Egypt is still denied her own Bishop, it is easier and quicker to visit Egypt from Jerusalem than from Khartoum.

Nothing could have been more lamentable than the state of the English Church in Palestine in 1887, when the Bishopric in Jerusalem was revived on a new basis after five years' interregnum; the separation of unit from unit, the carelessness in Church matters, the open proselytism from Eastern Churches, the undignified position of the native clergy, all constituted a most remarkable muddle, to say the least of it. "Saints' days are obsolete!" said a missionary (his excuse, by the way, for not observing Ascension Day). "I don't believe in my Orders, and I certainly don't believe in yours!" said another, vexed at some exercise of the Episcopal veto. Battles of the past are merely memories to-day; but the whole condition and outlook of the English Church in Palestine has changed. What is possible in Palestine and Syria is possible in Egypt also. The various chaplaincies, permanent, itinerating, or for "the season," which Bishop Blyth has started or promoted in Egypt, could be linked together and extended; much fruitless effort could be utilized. Instead of recurrent squabbles, rivalries, or bored indifference, there might be a solid, coherent Church organization under lawful rule, the fitting complement to a fine civil administration. A Bishop seated at Alexandria (the old ecclesiastical capital of Egypt, and now the centre of its commercial wealth and influence, thus obviating any difficulty arising from his residence at Cairo, which is the seat of civil rule, Christian and Moslem), would slowly, but surely, draw together the scattered threads of Church effort in Egypt. A difficult and uphill task certainly, but not impossible of achievement by a Bishop who was anything of a statesman, a Churchman, and, above all, perhaps, a gentleman.

NEAR EASTERN EXCHANGES.

On the dates given the rate of exchange ruling in the undermentioned centres on London was:—

Alexandria.....	July 23..	97⅜—⅞ p.t.
Athens.....	July 20..	25·15 drs.
Bucharest.....	July 23..	25·58½—25·68¾ lei.
Constantinople ..	July 23..	109½—110 pi.
Sofia.....	July 20..	27·12—27·20 leva.
Teheran.....	July 22..	55·85 krans

Devonshire Square,
London, E.C.

The summary, which will be found on another page, of a paper read by Mr. Sofiano, of the British Chamber of Commerce of Turkey and the Balkan States, giving an account of a recent visit to Northern Persia, reveals a very serious state of affairs. Of course, there is no secret of the somewhat elastic construction which Russia puts on the term "zone of influence," but it does come somewhat as a shock to learn that Russia has so far absorbed the country that various articles, particularly cotton and woollen goods, which less than fifteen years ago were imported exclusively from England, are now imported to the extent of 80 per cent. by Russia. No doubt, as Mr. Sofiano is at pains to point out, a good deal of Russian success is due to transport facilities, but that does not mean that England need surrender a valuable market without a struggle. The British flag all the world over stands for the "open door," and even the Anglo-Russian Convention, which, while theoretically preserving the integrity of Persia, practically divided the country into spheres of influence, did not provide, if the bull may be allowed me, that Northern Persia should be transformed into a Russian "mare clausum." It is essential then for his Majesty's Government to do something, and the easiest way would be, it appears, to improve the postal facilities.

***

Ludicrous though it may seem, nearly all British and Continental wholesale trade with Northern Persia is carried on by the post. I remember being told that even the British Legation in Teheran procured all the little luxuries of life, even to a piano, through the post. But such methods are extremely costly, and make competition with Russian goods almost impossible. The rates for parcels to Julfa, whence, mind you, fresh expenses have to be incurred, are 3s. 7d. to 3s. 9d. per 11 lbs. This, if the cost of packing be added, works out at about £50 a ton. The rate on parcels from Germany is 2 marks per 11 lbs., or about half the English charge. Admittedly the rail journey across Europe is costly, but for that very reason could not Mr. Hobhouse see his way to adopting some such plan as that proposed by Mr. Sofiano and coming to an agreement with the Cunard S.S. Company? I have been in conversation with the Cunard authorities, and they inform me that they have a regular monthly, not bi-monthly, freight service to Batoum. The vessels, which sometimes touch at Constantinople, take about four weeks on the single voyage; but even so the cost of conveying parcels would be very much lower than that charged by the post office. When once at Batoum, which is on the railway, there should be no difficulty in forwarding the parcels as heretofore to Julfa. Such a measure, temporary solution though it may be, would prove of inestimable value to British trade in Northern Persia, and would also probably leave a profit to the Government.

***

So, once again, the road between Khanakin and Kermanshah is "officially declared to be unsafe," and as a result British trade is suffering badly and likely to suffer still worse. Reuter's correspondent in Baghdad, who forwards the news, reports that six thousand loads of British goods, valued at some £180,000, are hung up at Khanakin, and though he adds that "Russian goods are arriving at Kermanshah from the northern route," that is but cold comfort for the British trader. In fact, it only aggravates the situation; for not only does it lead to unpleasant comparisons between Russia's prestige and our own in Persia, but in view of what occurs elsewhere, it seems likely that Russian goods may eventually drive ours out of yet another Persian market, not by merit but by (comparatively) prompt and regular delivery. Is it possible that there is more in the report than meets the eye? The route has, of course, very often been "unsafe" in the past, but in view of Russian methods of "fostering" her own trade one cannot help wondering whether she could not make the Khanakin—Kermanshah road safe if she wished to do so!

***

The Imperial Ottoman Docks, Arsenals, and Naval Constructions Company, Ltd., which has been formed under the auspices of Sir W. G. Armstrong, Whitworth and Company, Ltd., and Vickers, Ltd., to equip and work the existing docks, arsenals, and workshops belonging to the Ottoman Government in the Golden Horn, and to construct a floating dock to be placed in the Gulf of Ismid, invites subscriptions for an issue of £600,000 5½ per cent. guaranteed bonds at the price of 94 per cent. This issue constitutes in reality a small Turkish Government loan, for while the bonds are a direct obligation of the company, they are unconditionally guaranteed as to principal and interest by the Imperial Ottoman Government, being specifically secured by the assignment of an annuity payable from the tithe revenues of the Vilayet of Sivas. These revenues will be collected by the Administration of the Ottoman Public Debt, and while they are subject to a prior charge of £57,800 per annum in connection with the 1909 loan, they show more than sufficient margin for the service of the present issue, having averaged over £200,000 for the last three years. The bonds form part of an authorised issue of £1,100,000, and are repayable on or before November, 1943, by means of a cumulative sinking fund of 1½ per cent., commencing forthwith and to be applied by means of half-yearly drawings at par or purchase below par. Without allowing for profit on redemption, the yield works out at about 5¾ per cent., which, considering the security given, makes the present issue a very satisfactory investment.

Apart from the bonds now offered, the capital of the Imperial Ottoman Docks, Arsenals, and Naval Constructions Company, Ltd., is £250,000. The Turkish Government has agreed that the company shall have free of charge the full and exclusive use of the whole of the existing docks, arsenals, and workshops situated on the Golden Horn, together with the land necessary for the company's undertaking, and for the construction of the floating dock and other works in the Gulf of Ismid. The company is at liberty to undertake repairs and construction work for merchant shipping when their plant is not occupied with naval work. As the annual tonnage making use of the Port of Constantinople amounts to something like 16,000,000 tons, this side of the company's work may prove of very great importance. The Armstrong, Whitworth, and Vickers groups, with the Fairfield Shipbuilding Company, are already engaged in the modernisation of the Spanish Navy and dockyards at Ferrol and Cartagena, and are supervising the construction of ships for the Russian Black Sea Fleet at Nicolaieff, so that the work at present in hand under the control of this powerful combination is enormous.

***

From extracts from the forthcoming report of H.M. Consul at Constantinople, given in the Board of Trade's *Journal*, I learn that the Ottoman Government wishes to promulgate a law providing for the registration in Turkey of foreign limited liability companies, and is negotiating on the subject with other Powers. I am not at all surprised, for Turkey has been the happy hunting ground for a number of years of a good many companies the reverse of desirable. Particularly has this been the case with regard to insurance companies; and it is therefore not surprising to learn that one of the objects of the new law is to impose upon all foreign insurance companies carrying on business in Turkey the deposit of security. The sums mentioned in the Consul's report—£5,000 for fire and life and £2,000 for any other branch of insurance business, with a maximum of £12,000 for any one company—do not strike me as being excessive. And I imagine that the reputable companies, though they may regard the depositing of such security as being slightly *infra dig.*, will, on the whole, welcome the change. Certainly legislation on some such lines is, as the Consul observes, "urgently required in the interest of bona-fide insurance business as much as in the interests of the native population."

***

I learn that the negotiations for the construction and working of a harbour at Kavalla which have been in progress for some time past between the Greek Government and a French firm have broken down, chiefly because the latter has—to put the point frankly—been asking for too much. The history of the negotiations is not uninteresting. Begun when Kavalla was still Turkish, they were naturally broken off when war was declared, but were resumed very soon after the return of peace, the Greeks apparently desiring to give the work to the firm that had been studying the subject for some time. This was no doubt good policy, but, as I have said before, the French firm has proved rather greedy, and the result is that the Greek Government has politely, but firmly, terminated the negotiations.

Constantinople Business Letter

(From Our Own Trade Correspondent.)

Constantinople, July 18.

Great Britain's Trade with Turkey.

According to the Board of Trade returns for the month of June, 1914, the total exchange of enumerated articles between the two countries amounted to £605,167 during that month, as compared with £574,373 during the corresponding month in 1913, and £594,147 in 1912. While this is not such a good showing as during the previous month, and decreases occur in the enumerated imports into Great Britain from Turkey, notwithstanding the stagnation of this market and the huge stocks on hand, the enumerated exports are still greater than during the corresponding months of the two preceding years.

The total enumerated imports from Turkey into the United Kingdom during the month of June, 1914, amounted to £81,976, as compared with £101,119 during the corresponding month of 1913, and £96,119 in 1912. The shipments of barley amounted to only £4,810 during June, 1914, as compared with £57,389 during the same month in 1912. The shipments of other cereals are represented by wheat, and amount to £2,500. The shipments of mohair amounted to £65,945 during June, 1914, as compared with £82,601 during the same month in 1913, and £27,725 in 1912; those of wool amounted to a paltry £435, as compared with £7,752 in 1913, and £5,554 in 1912. The shipments of raisins were £8,286 in June 1914, as compared with £7,853 in 1913.

As regards the enumerated exports to Turkey during the month of June, 1914, these almost without exception show increases, and amount to £523,191, as compared with £473,254 during the corresponding month in 1913 and £498,028 in 1912. The shipments of cotton piece goods amounted to £393,449 during the month under consideration, as compared with £383,375 in 1913 and £366,228 in 1912. The shipment of cotton yarns show a drop from £64,762 in 1912 and £40,496 in 1913 to £26,294 in 1914. All the other enumerated exports show increases. The shipments of coal amounted to £50,896 during June, 1914, as compared with £10,378 during the same month in 1913 and £19,444 in 1912. The shipments of woollen tissues amounted to £23.364 during June, 1914, compared with £16,006 during the corresponding month in 1913 and £19,646 in 1912; those of worsted tissues to £10,016 in June, 1914, as compared with £9,332 in 1913 and £8,885 in 1912. The shipments of wrought copper amounted to £9,341 in 1914, as compared with £6,312 during the month of June, 1913, and £10,700 in 1912; those of tin to £6,853, as compared with £4,549 in 1913 and £3,954 in 1912. The shipments of bags and sacks amounted to £2,978 during the month of June, 1914, as compared with £2,806 during the corresponding month in 1913 and £4,409 in 1912.

A survey of the total enumerated exchanges during the first half-year of 1914, compared with the same period of the two preceding years, gives the following results:—1914, £4,223,412; 1913, £3,272,173; 1912, £3,839,648. During this period all the enumerated exports to Turkey show marked increases as compared with 1913, and, with but few exceptions, the same result obtains as compared with 1912, the totals being £3,461,683 for 1914, as compared with £2,495,778 during the corresponding period in 1913 and £2,873,084 in 1912. The total exports of cotton piece goods during the first half-year ended June, 1914, amount to £2,622,897, as compared with £2,045,652 during the corresponding period in 1913 and £2,105,978 in 1912, and are little more than £100,000 less than in 1911, which was the record year. The shipments of cotton yarns amount to £228,867 to June, 1914, as compared with £210,937 during the same period in 1913, but are £85,000 less than in 1912, when owing to the Italo-Turkish war Italian goods were kept off the market. The shipments of coal to June, 1914, amount to £239,599, as compared with £59,410 during the same period of 1913 and £116,446 in 1912. The shipments of woollen tissue amount to £167,410, as compared with £78,739 during the six months ended June, 1913 and £148,439 during the same period in 1912; those of worsted tissues amount to £89,420, as compared with £46,320 to June, 1913, and £85,423 during the same period in 1912. The shipments of wrought copper to date amount to £55,928, as compared with £18,565 in 1913 and £62,437 in 1912; those of tin to £34,576, as compared with £21,359 in 1913 and a like amount in 1912. The shipments of bags and sacks to the end of June, 1914, amount to £22,986, as compared with £14,796 in 1913 and £18,639 in 1912.

The total enumerated imports into Great Britain from Turkey during the first six months of 1914 are £761,729, as compared with £776,395 during the same period in 1913 and £966,564 in 1912. Considering that the latter year was the record year for Turkey's exports to the United Kingdom, this is not an unsatisfactory showing. The shipments of barley, which amount to £237,742 to date, are only slightly behind those of last year to the same date, but are £330,000 less than during 1912. The total shipments of wheat amount to only £7,292, as compared with £79,285 in 1912, while those of oats are £21,804, as compared with £15,268 in 1912. On the other hand, the shipments of raisins amount to £122,288 to June, 1914, as compared with £91,014 during the corresponding period in 1913 and £32,297 in 1912. The shipments of mohair amount to £311,451 to date, as compared with £331,663 in 1913 and £171,080 in 1912; those of wool to £60,634, as compared with £95,693 during 1913 and £90,234 in 1912.

Prizes Offered for Plans.

A competition is opened by the Prefecture for plans for a monumental fountain to be erected on the St. Sophia Sultan Ahmed Square. Competitors may be of any nationality and domicile. Plans, or models in stone, cement, or plaster, must reach the Prefecture not later than October 14, 1914. A premium of £200 will be awarded to the design taking first place, the design placed second will receive £80, and that placed third £40. Those desirous of taking part can obtain from the Prefecture of the City for Ps.20 (3s. 4d.) the programme which has been prepared for the competition.

Adjudication for Silver-Lead Mine.

The Council of State has approved the project authorising the Government to put up to auction the silver-lead ore mines known as Bulgar-Maaden in the vicinity of Bulgar Dagh in the Taurus range. The date of the adjudication will, it is expected, shortly be made known.

Sale of Old Metal.

Ten thousand (?) tons of scrap iron in the Admiralty dockyards will be sold by public auction. The provisional hour of closing will be at 2 p.m. on August 20, and the final a week later at the same hour. For further details apply to the "Direction des immeubles domaniaux, Ministère des Finances," each day at 2 p.m.

Lighters in the Port.

Notwithstanding the recent strict orders that all lighters in the port were to be towed from one point to another, for some few days back the harbour has taken on its old aspect, and sailing and bumping races, accompanied by furious yells, dear to the heart of the Constantinople lighterman, accompanied by reflections regarding the maternal ancestry of one and the paternal resting-place of the other, are the order of the day, without a thought for the safety of the goods carried.

LAMP OIL IN TURKEY.

A recent Austrian Consular report gives the following particulars regarding lamp oil prices in Asiatic Turkey during 1913:—"At the beginning of the year prices were rather high—namely, about 54 piastres per case, this falling to 45-47 piastres during the summer. Numerous middlemen placed large orders at these lower prices, anticipating the advance which usually takes place with the coming of winter. At the end of the year, however, the price was still 47 piastres, and the middlemen were obliged to dispose of the oil at that figure in order to avoid further accumulation of warehouse charges. The lamp oil sold in Turkey in Asia is mostly of Russian, American and Roumanian origin.

IMPERIAL OTTOMAN BANK.

The New Inspector-General.

(From Our Own Correspondent.)

Beyrout, July 11.

A farewell entertainment or "vin d'honneur" was given on Thursday afternoon, July 9, for Mr. Hanemoglou, the late manager of the Imperial Ottoman Bank in Beyrout, who has been promoted to the post of Inspector-General at Constantinople. The fine offices of the bank were lent for the occasion, and to this the managers of private and public banks and the heads of the leading commercial and shipping firms were invited. After a few speeches reflecting the general esteem and regard in which the able and popular manager is held, Mr. Hanemoglou replied. His characteristic speech touched upon economic matters of supreme importance to the trade of the country. He warmly praised the business morality of the trading community of Beyrout, the commercial distributing centre of Syria. He wished, he said, before leaving Beyrout to proclaim that Syrian commerce was well above the reputation that had been made for it. The reproaches that had been directed against it emanated from people who had a superficial knowledge thereof, and who had sought, in their relations with Beyrout, to outfinesse its merchants. Those ill-advised people had reaped defeat, and their wounded pride had led them to indulge in recriminations against the Beyroutines, whilst they should have honestly confessed their initial mistake. Those, however, who, like himself, had not sought devious ways, but had trusted to the honesty and commercial sense of the Beyroutine, had had occasion to note with the utmost satisfaction that the trade of this country was worthy of every confidence.

Beyrout Chamber of Commerce.

Two other subjects of great public interest were dealt with briefly, but clearly and sympathetically, in the concluding part of his speech. He said that he was quitting the town without seeing the blossoming of a plant that he had tended with devoted care. He entrusted it to them in the hope that they would not let it fade away. He meant the Chamber of Commerce. Similar institutions in all the great commercial centres had rendered and were still rendering inestimable services. In order to fulfil the task it had set itself it needed their whole-hearted support. It was their spokesman with the Government and with foreign countries as well. Through it they might raise their voice to defend their interests. The Committee of the Chamber was composed of men of integrity and capable of devotion to the general good.

It was the earnestness of these collaborators that had induced him to accept the presidency of the Chamber. These men deserved all their confidence, and, if they did not grudge it, would be able to raise the prestige of their commerce, defend it and make it prosper. Among the works undertaken by their Chamber of Commerce was one of supreme interest to the future of their market. The steps already taken with a view to linking Beyrout, through a standard gauge line, with the Rayak-Aleppo system, and, in the not distant future, with the Rayak-Egyptian frontier, required to be actively followed up. They had, no doubt, heard that the gentlemen whom this Chamber delegated to Constantinople with a petition for a modest branch line to link up Beyrout with Tripoli had succeeded in reviving the greater question of linking Beyrout with Rayak through the tunnel of Hammana. This was the ideal line on which the future prosperity of Beyrout depended. The errors of the past had, unfortunately, deprived them of this full measure of prosperity. Beyrout would have been today one of the great ports of the Mediterranean had it not been for the gross blunder of men who lacked far-sightedness and breadth of vision, and who sacrificed the future to satisfy immediate and unworthy ends. It was imperative to redeem such a mistake and to prevent their commerce and their properties from being ruined in the future.

Mr. Hanemoglou is leaving to-day by the Khedivial steamer for Constantinople.

Trade with Northern Persia.

Difficulties of the British Trader.

By the courtesy of the British Chamber of Commerce of Turkey and the Balkan States we have obtained a copy of a report read at the quarterly meeting held on July 8 at Constantinople. The writer, Mr. A. Sofiano, a member of the Board, gives the result of his observations in Northern Persia, and the conclusions he arrives at are of such vital importance to British trade that we wish specially to draw the attention of the Postmaster-General to the suggestions made.

The following are extracts from the report in question :—

"During the last few years a great deal has been heard about 'zones of influence,' but without having visited Tabriz, I could never have imagined to what an extent this seemingly empty phrase could be practically applied. The Russians, to do them justice, do not leave you a moment in doubt as to their definition of the phrase, so much so, that even when you arrive in Tabriz, the capital of North Persia, you still remain under the impression that you are still in Russia! The road connecting the frontier with the town has been built by Russia; guard-houses held by Russian Cossacks are to be seen at regular intervals; and at Tabriz itself Russian soldiers, fully armed, move about incessantly. The result is that you begin to realize the true significance of the term, 'a zone of influence,' as understood by Russia.

"The bazaars—and, by the way, until quite recently, no shops existed in Tabriz outside the bazaars—were, of course, of great interest to me, as I wanted to verify the great progress made by Russian commerce in the north of Persia. Although I was to a certain extent prepared, *I was, nevertheless, astounded to find how completely Russian goods of all classes had driven out foreign competition, both British and Continental.*

"I can state with certainty that prints, Mexicans and yarns, which less than fifteen years ago were imported exclusively from England, are now imported to the extent of 80 per cent. from Russia. As regards tinned goods, matches and sugar, I should think that this percentage is an under rather than an over estimate. It is only in woollen and silk goods that Russian commerce does not seem to have made any great strides. This does not mean, however, that Russian manufacturers do not export woollen and silk goods to Persia, because, as a matter of fact, the proprietor of one of the best retail shops selling cotton, woollen and silk goods assured me that all the firm's goods, without exception, came from Russia.

Russian Methods.

"My next object was to analyse the causes of Russia's phenomenal increase of trade in Northern Persia, which has proved so detrimental to British and Continental trade, and, furthermore, to study the steps which would have to be taken to place British trade on a more favourable footing.

"The first question is generally answered by pointing to the advantages of transport which the Russian manufacturer has over his competitors. This, however, is not sufficient to account for the fact that Russian sugar sells in Persia at about half the price at which it is retailed in the country of origin.

"The Russian manufacturers can already make use of the railway up to Julfa, a town on the Persian frontier, 230 km. from Tabriz; and as the Russians are working hard on the extension of the line, which offers no engineering difficulties, the two towns will almost certainly be linked up by rail within a year. On the other hand, the British manufacturer has only the caravan route from Trebizond. It was only natural that Russia should take full advantage of her proximity, but she has gone further than this : she has systematically worked to make the Trebizond route *as expensive and irregular as possible*, and has succeeded so well that at present goods take anything from one to three months to reach Tabriz and, even supposing camels be found—not always an easy matter—the cost of transport is something over £35 per ton weight.

"In order to achieve this result, the Russians have not followed a haphazard policy, but have carried out their plans in a businesslike and systematic way. The means employed to raise the price of transport on the caravan route were : irregularity in the service, and a reduction in the quantity of goods available for the owners of the camels carrying between Trebizond and Tabriz, and vice-versa. This was easily obtained by permitting the free transit of tea through Russia, via Batoum, to Persia, and also the free transit of carpets from Persia to Batoum. These articles do not clash with Russian commercial interests, and, as large quantities are regularly exported and imported, the effect on the caravan trade can be readily grasped. No other goods are allowed free transit into Persia, via Batoum, and if sent must pay the Russian duty.

"As a result of the high cost and uncertainty of transport via Trebizond, the parcel post service has developed to an extent not anticipated at the time of its inception; to-day, incredible though it may seem, the bulk of the British and Continental wholesale export trade with Northern Persia is carried by parcel post!

"Parcels from England to Persia cost 3s. 7d. to 3s. 9d. per 11 lbs., to which must be added cost of packing at 1s., and this because, as a rule, it is necessary to pack in tin or wooden boxes. We, therefore, arrive at a cost of about £50 per ton. This is considerably dearer than £35 per ton via Trebizond, but in most cases it is preferred owing to speed and, what is more important, regularity. It must be noted that the British Post Office charges on parcels extend only to Julfa on the Persian frontier; there parcels are either taken in charge by the consignees or their representatives, to be forwarded at their expense to their final destination in the interior, or else the Persian Post Office forwards them to Tabriz at the rate of 8½d. per parcel, equivalent to about £8 per ton. In the case of a contract of 2,000 parcels per annum, there is a reduction of 2½d. per parcel, and the cost can be still further reduced to about 4d. per parcel if the consignee himself takes charge of his parcels at Julfa and re-forwards them by carrier. Parcels from Germany to Julfa cost 2 marks per 11 lbs., or about half what they cost from England.

Recommendations.

"Having examined the advantages of Russian over British trade in Northern Persia, we will proceed to discuss some means for helping our commerce to regain its lost position. The first, and most important of these, is : *the reduction in the cost of transport.*

"The parcel post charges are much too high, and as possibly this is caused by the long rail journey through Germany and Russia, I made inquiries with the object of finding a cheaper route. I was authoritatively assured that the Cunard S.S. Co. has now a regular service, at least twice monthly, from Liverpool to Batoum. Thus, if there are no insuperable difficulties, it ought to be possible to institute a cheap parcel post service to North Persia via Batoum. The British Post Office can, I feel sure, do this, and by charging about 1s. 9d. per 11 lbs., it would help British trade immensely, and incidentally make a reasonable profit. Of course, I only suggest a cheap parcel post service as a provisional means of sending goods. For a permanent and effective aid much more radical steps must be taken, namely, the construction of a railway through a country which allows of the free transit of goods to Persia. I do not pretend to be competent regarding the tracé of this line, but in talking over the matter with well-informed friends, I was given to understand that a line from Rizeh, near Trebizond, through Erzeroum would be the easiest to build and would at the same time tap a very rich country. I believe there are some political difficulties in the way, but there are no reasons why they should not be overcome.

"In conclusion I will only state that I am firmly convinced that British trade with Northern Persia has dwindled owing to the difficulties (not merely casual) and dearness of transport, and that the only means of regaining our hold on this market is by finding some means of doing away with the disadvantages under which we labour. This can only be done if the matter is taken up energetically in the proper quarters. In the first place, *a cheap parcel post service is a crying necessity.*"

ROUMANIAN TRADE IN 1913.

In his report for the year 1913, Major Baldwin, H.M. Consul-General at Galatz, says that the period was one of extreme anxiety for the commercial and industrial community of Roumania. At its commencement the country was suffering from the effects of the war between the neighbouring States. Foreign banks had restricted their credits, and this, together with the withdrawal of their deposits by a nervous public, had forced the local banks to strengthen their reserves by calling in loans and refusing to make fresh advances. The constant fear of the re-closing of the Dardanelles rendered the financial crisis still more acute. The export of grain was held up owing to the lack of ships and to the high freight rates; consequently there was a scarcity of foreign bills, and considerable quantities of gold had to be exported to meet liabilities abroad. The result was that money and credit became almost unobtainable and trade suffered in all its branches.

A temporary improvement followed the termination of the first Balkan war in May, but with the outbreak of the conflict between the Allies a few weeks later the whole economic life of the country was once more thrown into confusion. Even after the termination of the war and the signing of the treaty of Bucharest matters improved but slowly. The prolongation of the Græco-Turkish conflict hindered the export of grain, as Greek shipping, which is an important factor in the Danube trade, could not pass the Dardanelles. The return of the troops was moreover marked by the outbreak of cholera, and trade, both internal and foreign, was impeded by the stringent measures which had to be taken to prevent the spread of the disease. At the same time the continued dearness of money abroad compelled the local banks to husband their resources and prevented them from giving to trade and industry the assistance of which they were in need. Now, however, things are beginning to approach their normal condition. The harvest has been good and the weather conditions of the autumn and winter have been very favourable to a heavy crop in the present year. Money has become cheaper abroad, confidence has been restored, and the banks are pursuing a liberal credit policy towards merchants and manufacturers. The prospects are brighter than they have been for some time, and the country is rapidly recovering from the depression from which its trade and industry have suffered during the past year.

Near East Markets.

SPECIAL REPORTS.

Bucharest. July 19.

The wheat harvest, which was begun only a few days ago, has been interrupted by rain storms, and wheat lying cut in the fields has been seriously damaged. The temporarily brighter outlook is now gloomy and overcast, and it is feared that the rain will affect adversely both quantity and quality, though how far it is not possible to judge at the moment.

On the other hand the summer planted crops have derived great benefit from the rain, especially maize, which is in splendid condition and from which excellent results are expected.

Business in grain is very quiet. The supplies of last year's wheat are now so small that the wants of the local millers can hardly be supplied. Export of wheat to the neighbouring southern states continues, the demand being greatly increased in the absence of competition from Southern Russia. In Roumania little business is done in new grain, as farmers are holding in the hope of a good demand from Austria-Hungary and big prices.

Sofia. July 19.

Owing to the recent rains the wheat harvest was delayed for about a week, but in most cases half of the work has been done and with the present dry weather it will soon be completed. It appears that the yield of the wheat crop will be satisfactory and of excellent quality.

The opium harvest in the Strumnitza district, which was begun at the end of May, was finished at the end of June. The crops were generally good and here and there excellent.

The following information is extracted from the weekly bulletins received at the London offices of the Imperial Ottoman Bank from its correspondents in the Near East :—

Stamboul. July 11.

No business has been done in Anatolian wheat or barley during the past week owing to the lack of arrivals, and for the same reason the market is firm and prices are maintained.

The total arrivals of opium total 68 cases, against 137 cases to the same date in 1913. The market is active, with a good demand and firm prices. The mohair market is dull, as also is the sugar market.

Rodosto. July 1.

The following are extracts from the monthly report for June :—

The agricultural situation, which has hitherto been favourable, has now begun to cause some alarm owing to the continual rains, which have done serious harm to the crops on the plains. On the other hand, the crops on the plateau are satisfactory, as well as the progress of the winter sowings, to which the wet weather has been propitious.

On account of the shortage of manual labourers in this district, the agriculturists, especially the Greek farmers, have been induced to employ agricultural machinery.

The market is quiet, and the money stringency has hampered exportation.

Konia. July 3.

The following are extracts from the monthly report for June :—

The agricultural outlook continues favourable in this district, and the intermittent rains have been beneficial to the cereal crops. The yield is expected to be above the average of the last ten years. The amount of business transacted here during the month has been trifling

Eskishehir. July 1.

The following are extracts from the monthly report for June :—

The month has been a most unfavourable time for agriculturists. In some places the storms have been terrific. Whole villages have been destroyed, the crops torn up, and the cattle decimated. But, nevertheless, the cereal crop is not so damaged as was feared, and the yield will be, if not greater than, at least, equal to, last year's. As to quality, wheat will be poor, but barley quite good.

Beyrout. July 10.

The market has shown signs of activity lately. Several merchants from the interior have arrived here with the object of renewing their stocks.

Imports have been small, especially of colonial produce, as holders of coffee and sugar have not been able to dispose of their stocks .and have, consequently, not placed new orders.

Busreh. June 26.

The state of the market is slightly better, but the recovery depends on the money market, which still leaves much to be desired.

Although the stock of colonial produce is limited, orders to the refineries are insignificant. The population of the interior still find it more convenient to buy at Baghdad, in spite of the rise in prices there.

Some important orders have been sent to factories abroad, of which Manchester has had the lion's share.

The whole of the available stocks of cereals —about 3,000 tons—have been shipped to London by the steamers "Cheruskia" and "Mainca." Large supplies of wheat and barley are expected within a fortnight, both here and at Mohammera.

The yield of the date crop is definitely stated to be 20 per cent. less than that of last year.

SMYRNA FRUIT REPORT.

In their report dated July 15, Messrs. C. J. Giraud and Co., Smyrna, state :—

Sultanas.—Since our last report of June 24 further rains have fallen at intervals over the vine-growing districts, but, although no damage has apparently resulted, the continued unsettled state of the weather is causing some uneasiness. No change has been made in the estimate of the yield, and advices from all parts confirm the fine development which the grapes are displaying.

Figs.—Reports from the Meander Valley are favourable. The cool, damp weather prevailing is calculated to foster the development of the fruit and to improve the general outlook of the weight of the crop. There is consequently a tendency to increase estimates, many of the leading dealers now anticipating a possible result of about 110,000 loads.

General Outlook.—Unfortunately, no improvement can yet be recorded in the general state of the country. Notwithstanding the arrival of a Commission consisting of the Dragomans of the Foreign Embassies at Constantinople, and the drastic orders issued by the Government authorities, the Moslem population continues to enforce a severe boycott and to maintain a policy of intimidation against the native Greeks who constitute so important an element in the economic life of the province. The thousands who recently migrated dare not return, and those still remaining are systematically prevented from leaving the towns and villages, and are unable to collect their crops. This inimical policy is mainly directed against the Greek inhabitants of the sea-board districts facing the islands of Chios and Mitylene, and has not been extended to the more important districts in the interior of the country where the weight of the fruit crop is produced, and where the Greeks are in a minority.

So far as the fig production is concerned, no fears exist about its collection and marketing, the orchards being for the most part Moslem-owned. But unless security and confidence are restored, there is good cause for apprehension that some portion of the produce of the vineyards will eventually perish, large tracts of vines being owned and farmed by Greeks, who have either been forced to leave the country or who are prevented from attending to their properties.

OPIUM MARKET.

Messrs. Barker Brothers, Smyrna, report as follows for the week ending July 10:—The opium market has been again very active, with sales amounting to 112 cases of old and new crop, the former at 16s. to 18s. 9d., as to quality, and the latter at 15s. to 17s. 9d. Under present conditions, therefore, with heavy weekly purchases, it is hardly likely that anyone can entertain the slightest hope of a reduction in figures, and as our holders may further advance the position, we consider it judicious that all consumers should not hesitate to lay in their stocks for their present requirements.

PRODUCE REPORT.

London, July 23.

Sugar.

Owing to lower Continental advices, and to realisations of August deliveries, the Beetroot market has shown a downward movement this week, and after a fair amount of business at some fluctuations is closing today steadier, for August at 9s. 3½d., October-December, 9s. 4¾d., December, 9s. 5½d., and May, 9s. 8¾d., f.o.b. Hamburg. Refined sugar is steadier with moderate sales of English kinds at late rates, while Foreign has ruled quiet the whole week, with prices barely steady; German granulated, ready first marks, 11s. 6d., August, 11s. 6d., October-December, 11s. 6d., January-March, 11s. 7½d., f.o.b. Hamburg. German and Austrian cubes, prompt, 13s. 4½d. to 13s. 9d., Say's cubes, July, 15s. 4½d., and loaves, 14s., f.o.b. Paris. Dutch crushed prompt, 13s. 3d., f.o.b. Amsterdam.

Coffee.

There has been some activity in the market this week, and the supplies offered at auction have met with a fair demand at steady prices, Costa Rica middling sold at 74s. 6d., and fair bold at 78s., Colombian middling, 70s., bold fair to good, 74s. to 76s. Salvador middling, 70s. to 72s., fair bold, 73s. 6d. Uganda fine ordinary to low middling, 63s. to 66s. 6d., bold 69s. to 72s.; Mocha long berry 83s. to 84s. The speculative market has been firmer at 3d. to 4½d. advance, July, 42s. 3d., September, 43s., December sold at 43s. 10½d. to 44s., and March, 44s. 9d.

Seeds and Oils.

Linseed has been firm, but in generally quiet demand, London-Calcutta on passage is quoted at 51s. 3d., July-August, 51s. 6d., August-September, 52s.; September-October, 52s. 6d.; October-November, done to Hull at 53s. and 52s. 9d.

Rapeseed is inactive, Brown Cawnpore, July-August is offered at 50s. 3d.; Yellow Guzerat, 55s. 3d.; Ferozepore, 49s. 3d. Cotton seed is rather steadier for new crop, London-Egyptian, July is quoted £8 3s. 9d; August, £8 6s. 3d.; and November-January, £8 8s. 9d. per ton. Canary seed is not active. A few sales of Turkish, new seed, are noted for forward shipment, meanwhile prices are steady as stocks are in very narrow compass. Haricot beans are quiet and practically unchanged, but Continental markets are reported very firm with stocks much reduced.

Linseed oil is rather quiet, spot pipes, landed are quoted 25s. 1½d; barrels, 25s. 6d. Rape oil, ordinary brown naked, offered at 30s., and refined casks at 31s. 9d. Cotton oil is in moderate demand, crude spot being offered at 28s. 6d., refined sweet, 32s. to 33s., and ordinary pale, 28s. Petroleum Roumanian and Russian, also American, spot, 7¼d. per gallon.

Oilcakes, etc.

Cotton Cakes:—With some resellers of Egyptian there has been a check to the upward tendency. The present low level, however, continues to attract attention, especially as new crop positions are firmly held at a considerable premium. Best brands make £4 15s. to £4 16s. 3d. ex. quay, with July-August shipment offered at £4 13s. 9d. to £4 15s. ex. ship. English remains quiet, but steady at £4 17s. 6d. to £5, and Bombay, £4 2s. 6d. per ton.

Linseed Cake:—There is only a small demand for retail consumption, while last week's inquiry for autumn and winter delivery shows a considerable falling off, owing, however, to a strong seed market values are well maintained. East India seed pures have changed hands at £7 15s. to £7 17s. 6d. ex. ship for arrival, while best London made meet a steady inquiry at £7 17s. 6d. to £8 per ton, ex. mill.

Fine seedy Russian sells at £7 16s. 3d. to £7 18s. 9d.

Decorticated Cotton Cake is available on spot in limited quantities at £7 15s. per ton ex. quay, while stocks of meal are practically exhausted.

Locust Beans remain scarce and command full prices of £6 5s. for whole, and £6 13s. for kibbled.

EGYPTIAN COTTON MARKET

(From Our Own Correspondent.)

Alexandria, July 17.

This week prices on the cotton market have risen in proportion as the price of American cotton has fallen. The rise is due to the exceptionally strong position of the Egyptian market, the demand for export greatly exceeding the amount offered. The spot market is firm, but somewhat dull, although large quantities have been exported. The prospects of the new crop are excellent. Blooms are plentiful, and the worm, which threatened several districts, has been got rid of without causing any damage.

The question of settlements in the futures market, which has again been discussed, has divided brokers into two camps. One party wishes settlements to be suppressed altogether, for a broker is after all only a middleman and must not buy or sell at his own risk. The other party holds that the suppression of settlements will tend to diminish business while increasing fluctuations on the market, and they are, therefore, unwilling that any change should be made.

Messrs. Davies, Benachi and Co., of Liverpool, have received the following telegram **from Alexandria, dated Wednesday :—**

Market steady. November, 18 1/16, January, 18 5/32. Exchange, three months' date, 97 1/2.

July 11.—"Orange Prince," Manchester.

LIVERPOOL REPORT.

Messrs. Reynolds and Gibson telegraph :—There has been no outstanding feature in the inquiry for Egyptian spot during the week. Business continues on a meagre scale, and the same apathetic listlessness so much in evidence of late still predominates. This state of affairs is likely to continue until the bad trade conditions existing show a brighter outlook and reports are of a more reassuring nature. Estimated sales amount to 1,100 bales, against the same total last week, and chiefly comprise medium grades Affi and Nubari. There were few transactions in Sudan-grown cotton, and top grades Joannovich and Sakellarides were entirely neglected. Quotations were raised five points during the early part of this week, but have again been reduced, and since our last report remain unchanged for all growths.

EGYPTIAN COTTON CROP, 1913-14.

(By Our Alexandria Correspondent.)

The Egyptian cotton crop for 1913-14 will probably reach 7,625,000 cantars in spite of the lack of water which prevailed in certain districts and the damage done by the cotton worm. The experience gained during the last eighteen years by the Irrigation Department shows that "the more water in summer within limits the better the crop." Now the Nile flood of 1913-14 was 40 per cent. less in volume than the normal; it was, moreover, very late. The water stored in the Assuan reservoir was exhausted before the arrival of the new flood, and certain cotton districts were forced to undergo a long period of drought during July and August. Certain districts in the South of the Delta were left for forty-five days without being watered. This lack of water naturally had an unfavourable result on the formation of the fibre and of the staple, both of which leave something to be desired in quality. It must not, however, be concluded from this that last year's stock of Egyptian cotton is not fit for spinning; it is only that the finer qualities are rarer than is ordinarily the case.

The acreage under cultivation in 1913-14 was 1,724,000 feddans as compared with 1,725,815 feddans in 1912-13, the yield per feddan was about 4.40 cantars as compared with 4.36 cantars in 1912-13, the highest percentage was 5.80 cantars in 1897-98, and the lowest 3.24 in 1909-10. From September 1, 1913, to July 3, 1914, 7,056,639 cantars were exported as against 6,941,908 cantars during the corresponding period for 1912-13. England bought 100,000 cantars and the Continent 275,000 cantars more than last year. On the other hand, the United States bought 265,890 cantars less. The stock in hand is 1,036,945 cantars as against 861,202 at the same date last year. There will probably be a large stock left on hand at the close of the present season, which must naturally have a somewhat adverse effect on the price of the new crop.

Dealings in the new crop this summer have been somewhat rarer than is usually the case. In view of the unsatisfactory conditions of the textile industry, it seems that cotton spinners are unwilling to cover future delivery to such a great extent as they have been accustomed to do during previous years.

The Egyptian cotton crop has now for several years been stationary at about 7½ million cantars. To satisfy the growing needs of the markets of the world a larger output would, however, seem absolutely necessary; and the Egyptian Government, anxious to provide for the welfare of the country and to satisfy the needs of Lancashire cotton spinners, has already began to drain large areas in the West Behera and Central Gharbia which will bring 790,000 feddans under cultivation. The irrigation system in Upper Egypt will also shortly be extended, and the preliminary works for the construction of a new reservoir on the White Nile near Khartoum for the exclusive use of Egypt have just been finished. When all these works have been completed Egypt should be able to produce a yearly crop of 10,000,000 cantars—the dream of Sir William Willcocks.

EGYPTIAN IRRIGATION.

The Edfu Contract.

It is understood that an agreement was finally concluded on Saturday last between the Egyptian Government and Mr. Percy W. Stout and Sir John Jackson, Limited, for the irrigation of 60,000 acres of land in Upper Egypt. Hitherto this land has received water for only two months yearly during the flood season, but henceforth it will be irrigated all the year round, and is expected to become as valuable as the Delta. The concessionaires will erect pumps, sink wells, cut canals, etc., and provide perennial water for the fellaheen landowners at a rate not exceeding the fixed maximum. It is understood that the capital involved is about £500,000, and the concession for forty-five years, at the expiration whereof all apparatus and works become Government property. The scheme should result in an increase in the productivity of Upper Egypt.

MANCHESTER MARKET.

(From Our Own Correspondent.)

Manchester, July 22.

Business in our market shows no sign of improvement whatever. Sellers have been at their wits' end to secure fresh orders, but all in vain. A little inquiry has been met with here and there, but it has been of no use, except to very weak sellers. During the last few days, however, a slight change has taken place. Prices in raw cotton have made a turn in the firmer direction, and, in sympathy with it, quotations in our market have shown less irregularity. The curtailment of production which had been developing during the last week or two has been another favourable asset towards prices becoming more settled in appearance, but hopes as to better trade resulting from these inadverse signs has rather waned at the time of writing. There has been a fair amount of inquiry, it is true, but the bulk of it has been far less practicable than expected. Actual sales, therefore, have not been much more plentiful or voluminous than a week ago. Piece goods for the Near East have only moved off in retail lines to meet urgent needs, and reports from the other side are somewhat adverse rather than favourable. India has bought cloth sparingly, Bombay, Madras, and Calcutta each giving about equal support. China trade has shown no improvement at any time this week. South America has continued to give support of a very meagre nature. Weaving districts as a whole are said to be still in a bad way. Loud complaints have been especially numerous from manufacturers in Nelson and Colne. The home trade has experienced no activity worthy of note. Home American yarns have been, on the whole, rather steadier during the week, but the demand has remained somewhat poor. Quietness has prevailed in export numbers for Egypt, and very little trade has been done. Other outlets have given weak support. Bolton counts in both carded and combed qualities have not shown much change in quotation, and the turnover has only been of moderate extent.

POTATO GROWING IN EGYPT.

(From Our Own Correspondent.)

Alexandria, July 17.

Potato growing in Egypt occupies a very important position. The new crop reaches the market in February, and could thus be exported on a large scale. Various kinds of vegetables—cabbages, artichokes, green peas, tomatoes, haricot beans, broad beans, etc.—are already exported during the winter. As it happens, however, this type of business is chiefly in the hands of Egyptians, who do not pay sufficient attention to packing and make no effort to develop the export trade.

The Egyptian potato does not keep well, and it is therefore necessary to import potatoes from abroad either for seed or to meet local needs for nine months out of the twelve. Potatoes have been imported from all countries, but the favourite variety is "Riccio," which comes from Naples. This potato keeps well, is a good cooker, and is very tasty. The native Egyptian prefers this variety, which is also cheaper than all the other imported kinds. The Naples potato is also a good seeder in light soils. The retail price of the Naples potato is from 5 to 6 frs. the sack of one cantar.

The import trade of potatoes from Marseilles and the North of France which at one time reached large dimensions has now almost disappeared. Potatoes of English origin which are grown in Malta and Cyprus have also been imported. They cost little more than the Naples variety, and are sold chiefly in Alexandria and Cairo. Although less tasty than the Naples variety, they are more floury and cook better.

The Ottoman Ministry of Education has placed an order for 300 Birmingham Small Arms air-rifles with the British Agencies Association, Constantinople.

HAIFA GERMAN VICE-CONSULATE.

(From Our Own Correspondent.)

Haifa, July 4.

The activity of the German Government in extending its relations with this country, commercially and otherwise, may be gauged by the step which has lately been taken. The German Vice-Consulate at Haifa has been abolished, and a Consulate has been created instead. Dr. Lloytved Hardegg, the German Vice-Consul here—who, by the way, is generally regarded as the most efficient and energetic consular officer of the whole Consular Corps stationed here—has also been promoted to the rank of Consul. This promotion is assuredly well merited, as Dr. Hardegg is a gentleman of outstanding abilities. His tenure of office here, of several years' duration, has been marked by the tireless persistency with which he has striven for the advancement of his country's interests in Palestine. Unlike his predecessor, Dr. Hardegg has won the favour of the Haifa populace. He was the first to realise the deplorable nature of the strained relations existing between the Germans and natives, and set himself to the task of creating a common understanding between both parties. Although the German colonists are still held in undisguised detestation by the inhabitants, his endeavours have greatly diminished the hostile spirit hitherto prevalent.

Advancing German Interests.

Passing in review the significant results that have ensued from the creation, some five or six years ago, of a salaried German consular post at Haifa, we find that Germany has more than trebled her export figures. This is doubtless mainly due to the combined vigilance of the salaried German consular officer and the German traders in seizing every possible opportunity for the advancement of their country's interests. German steamship services have been started and agencies established with extraordinary rapidity, so that shipping direct from Germany greatly exceeds shipping direct from England.

The recently converted German Vice-Consulate, in common with other foreign Vice-Consulates here—save, of course, that of Great Britain—possesses a large consular staff, which is composed of a highly-paid, proficient dragoman, a well-paid secretary, and two cavasses. In addition to that it has also two honorary dragomans. The Haifa British Vice-Consulate, however, in marked contrast to the undeniable efficiency of the German consular body, has no dragoman at all. Neither is there an official secretary; and it contents itself with one paid cavass only.

His Majesty's Government apparently regards the important improvements in the foreign consular offices with the utmost indifference. The Haifa Vice-Consulate, therefore, rigidly maintains its lamentable "status quo." Such an attitude is injudicious.

OIL IN PALESTINE.

We are informed that the Turkish Petroleum Company has secured an option on some properties of the Syrian Exploration Company and other areas in the oil-bearing districts lying between Haifa and Damascus, as well as in an area on the coast of the Dead Sea, extending over 150,000 acres. The company is sending out a geologist at once to examine and report on these areas.

The Standard Oil Company is actively engaged at present in developing the adjoining oilfields on the south-east coast of the Dead Sea, having lately exercised an option they held on this field. Regarding the operations of the latter company a Jerusalem correspondent informs us that the Americans are constructing a road 75 kilometres long from Hebron to the field. Under the terms of the contract this road is to be finished in four months. The correspondent adds that "the company apparently expects to get a lot of oil, as it is bringing out a large staff of engineers and workmen."

EGYPTIAN PHOSPHATE INDUSTRY.

Important Italian Concern.

The development of the extensive deposits of phosphates situated near the Red Sea coast, about 50 miles to the north of Kosseir, has during the past two years assumed important proportions, says the *Egyptian Gazette*.

The mines, which are worked by the Egyptian Phosphate Company, a British concern, are connected by a railway line some twenty miles long with Port Safaga, on the Red Sea, where the rock is loaded on the steamers for export. The rock is extremely rich, containing 65 per cent. or more of tricalcic phosphate.

The Societa Egiziana per l'Estrazione ed il Commercio dei Phosphati, a company managed by Italians, and founded in 1912, has obtained extensive concessions about twelve miles inland from Kosseir, and also at Sebaia, on the eastern bank of the Nile, between Keneh and Assuan. The *Gazette* is informed by this company that the former concession is being linked up to the port of Kosseir with a light railway, which should shortly be completed, and the rock from the latter mines will be transported down to the Nile by a ropeway, and thence to Alexandria by boat for shipment. The company states that the work for development is being actively pushed on, and it expects to be in a position to begin exporting during the present summer.

Output of Phosphates.

The following table represents the total output of phosphates in Egypt for the years 1908 to 1912. These figures are taken from a note recently issued by the Survey Department, to which we are indebted for other information in this article:—

Years.	Output of Phosphates.
1908	700 tons
1909	1,000 "
1910	2,397 "
1911	11,925 "
1912	69,958 "

According to the Financial Adviser's report recently published, the output during 1913 exceeded that for 1912 by about 33,000 tons.

Although other beds of phosphates are found in various districts in Egypt on both sides of the Nile Valley, the Red Sea area is responsible for almost the whole output. The rapid development of the business of the Egyptian Phosphate Co., and the impending commencement of active operations by the other company mentioned above, leads one to expect a considerable increase in production in the immediate future.

Where Exports Go.

Practically all the raw phosphates produced is at present shipped from Egypt, principally to Japan. That country, in 1912, took about 49,000 tons out of a total export of 52,000 tons, and in 1913, 59,000 tons, out of a total of 64,000 tons. According to the Customs returns the average value of the raw phosphate shipped during 1913 at Port Safaga was about £1 per ton.

The local demand for raw phosphates for manure is practically negligible, but about 13,000 tons of superphosphates were imported during the last year.

Projects for the manufacture of superphosphates at Alexandria, with the aid of pyrites imported from Greece, are said to be under consideration, and the reported discovery of pyrites in the Sinai Peninsula is of interest, in view of the promimity to the Red Sea phosphate field. Should the manufacture of superphosphates be established on a considerable scale in Egypt, the working of other deposits might become commercially possible.

According to *The Moniteur Officiel du Commerce*, the region of Galatz offers an important outlet for apparatus used in the cultivation of the vine. Wine pumps and other vine appliances now come almost exclusively from Austria-Hungary and Germany; they are shipped in bulk on lighters which sail the Danube.

BUSINESS CARDS.

Shipping Intelligence.

WELSH COAL FOR GREECE.

The Cardiff Correspondent of *The Times* states the Cardiff steam coal market was excited on Wednesday through reports that the recent inquiries for coal on Greek Navy account had resulted in ten or twelve steamers being chartered during the last two days to load best Welsh Admiralty coal for Piræus, Greece, within the next fortnight, principally through a German coal-exporting firm.

Particulars of the orders arranged were not disclosed, but the steamers chartered were understood to represent over 50,000 tons. As a result of the heavy requirement, and order-books being previously well filled, leading colliery firms were practically off the market, and those with small quantities to spare advanced prices 1s. per ton to 23s. Other classes of coal were in little demand. The Austrian Navy also are understood to have purchased considerable quantities lately, the prices paid being high to secure prompt delivery.

The urgent character of the Greek business was considered ominous in view of the state of affairs between that country and Turkey, while it was anticipated by colliery owners that the British Admiralty would also ask for additional supplies, although stocks at British depôts in the Mediterranean have been kept very heavy since the last Balkan War trouble.

ANOTHER NEW P. AND O. LINER.

The P. and O. Line has placed an order with Messrs. Harland and Wolff, Belfast, for a passenger and mail steamer, says *Shipbuilding and Shipping Record*. The new vessel will be about 13,000 tons, and will generally be on the lines of the "Maloja," the last vessel built by Harland and Wolff for this company in 1911.

A British Consular Report for Trebizond mentions that tenders for the electric lighting of the town were applied for last year. This concession is to be granted by the local authorities who, by Article 78 of the new Vilayet law, are authorised to grant concessions for periods not exceeding forty years. All available information has been sent to the Commercial Intelligence Branch of the Board of Trade.

NEWS FROM ALL SOURCES.

Our Bucharest Correspondent informs us that the cinematograph is a popular form of entertainment in Roumania, where every little town has its cinema theatres. In Bucharest alone there are now no fewer than eighty-two, and all are well patronised and giving a profitable return. Consequently there is a good demand for films, and the sale and letting of films is already a well-established and flourishing business. One of the best known French firms has had its own agency in Bucharest for some time, and another French firm has recently established its representatives in Roumania. A large British film-supplying firm has also appointed its agent for Roumania.

According to a U.S. Consular Report for Jerusalem, cotton goods continue to form the largest item of import into Palestine; the past year showed a slight decrease, the total being 5,937 bales, as compared with 6,077 bales in 1912. This importation is almost exclusively from England. The only serious competitor of English cotton goods are the Italian goods. Italy is fast regaining the position lost by the Italian-Turkish War. The trade in silks, woollens, textile fabrics, and manufactured articles of clothing remained stationary; the last-named goods come from Austria, and the others from France and England.

The almond is being extensively cultivated in Palestine, says a U.S. Consular Report, and will soon rank among the important exports of the country. Last year's exports amounted to 528,000 pounds, as compared with 317,000 pounds in 1912. France takes the largest portion of the crop.

Messrs. R. J. Moss and Co. report that the importation of coal into Egypt during the period January 1 to July 9 amounted to 804,927 tons, as against 709,066 tons during the corresponding period of last year.

A British Consular Report for Trebizond states that Russian trade with the interior viâ the Caucasus appears to be increasing, and that articles such as petroleum, iron, agricultural machinery and matches, which formerly passed through Trebizond, now take the direct route.

H.B.M. Vice-Consul at Tripoli-in-Syria reports that in 1913 there was an increase of nearly 160,000 barrels and cases in the export of oranges and lemons over that of 1912. These articles might quite well be shipped to the United Kingdom if there were a regular steamship service direct to the British ports. Some lots of onions found their way to Liverpool. Like oranges, these perishable goods need a fast and regular line of steamers. If such a service were created British ports would be their principal destination owing to the prices obtained there and to the usual straightforward way of carrying on business of British firms.

The Oesterreichisch-ungarische Konsular-Korrespondenz (Vienna) states that ready-made dresses for women find an easy sale in Roumania. Each year two Bucharest houses import mantles and ladies' jackets from Berlin to the value of one million francs. On the other hand, furriery mainly comes from France; these are for the most part imitation and ordinary furs. France also imports ready-made clothes for rich people. Millinery is mainly supplied by Austria-Hungary.

British Trade Marks.

The marked preference which Oriental buyers show for British goods, especially for machinery and cutlery, is perhaps the hardest point that foreign competitors have to contend with in the Eastern markets, and mean methods are often adopted by unscrupulous firms to secure customers. One mostly practised is the infringement of British marks or inscriptions on foreign-made machinery, implements, cutlery, etc., which lead the buyers to believe that such articles were manufactured in England. Some time ago, referring to this base practice, we announced in these columns that a Sheffield defence fund had been established for protecting the city's name from infringement by foreign competitors, and that from its beginning it had proved of great utility. The fund then amounted to nearly £12,000, amongst the contributors being several working men's organisations; and ever since, we hear, the amount has been steadily increasing. The existence of this fund has been an incalculable boon, for, apart from the successful prosecutions which the Managing Committee was able to undertake in various parts in cases of violations of trade marks, it has a deterrent effect upon those who may contemplate fraud.

An Important Case in Egypt.

Two firms in Egypt have recently been punished for selling German-made razors bearing inscriptions calculated to lead the public to believe that they were manufactured in Sheffield. The first of these firms is in business in Cairo, and the other is a firm of commission agents in the same city, from whom the razors were purchased. The firm which made them was also joined in the action. The razors were of a very inferior quality, retailing at about 8½d. each, but they were marked on the blade with words to the effect that they were best English quality, and on the handle was the word "Sheffield." The stocks of these razors have been seized and destroyed, and the defendants have had to pay the prosecuting Sheffield Cutlers' Company the sum of £50. The interesting and important point in this case is that it is one of the few in which the Mixed Courts have granted protection to a collective mark of origin or trade description, as distinct from a private registered trade mark. Just as we suggested in these columns some time ago, when the establishment of the Sheffield Defence Fund was announced, the British Chamber of Commerce of Egypt now suggests that other British trades might, in a similar manner, take collective action to purify the markets of commercial frauds of this nature.

A New Resilient Wheel.

Those who want freedom from tyre trouble—and there are many in the Near East—will be very interested to hear of a new and promising spring wheel, which offers a great improvement on the plain, solid tyre. The inventor relies upon the resilient qualities of a steel ribbon in tension and the impression obtained is that the solid tyre is nearly the equal of the ordinary pneumatic. The wheel consists primarily of three parts, the inner rim carrying the steel ribbon, the outer rim carrying the tyre and floating on the ribbon, and the side ring which covers the working parts. The wheel is by no means clumsy in appearance, and contains no parts likely to give trouble. The ribbon is stretched in a series of tangents, and at four points there are straining bolts adjustable from outside the wheel, by means of which the tension of the ribbon can be adjusted. The outer rim carries inward projections, with slots through which the ribbon passes, the tangent arrangement of the ribbon taking the drive. It is quite evident that with the ribbon at proper tension, the outer rim carrying the solid tyre is floating on the ribbon. Also, the resilience of the wheel does not depend upon any one section of the ribbon, but any shock is spread over the whole ribbon, while there is very little variation in the effective radius of the wheel.

Aleppo Tramways—

A U.S. Consular Report, published in the Washington *Daily Consular and Trade Reports* (June 6), makes an interesting reference to the concession for the construction of an electric tramway system in Aleppo which was lately granted to Osman Bey, Union Han, Galata, Constantinople. According to the report it is understood that the concessionaire, not having the means to construct the plant himself, is negotiating with a Belgian firm to the end that the latter shall take over the concession and complete the work. The local government, evidently with the object of helping the enterprise forward, has already begun the widening of some of the principal streets which run through the ancient parts of the city, and which are too narrow to permit the passage of the cars. Between three and four miles of the line will be built to begin with, and later a number of short lines of track will be laid, running into other parts of the city where the streets must be widened by the demolition of buildings.

—And Lighting.

The foregoing concession carries with it also the illumination of the streets and public and private buildings, thereby doing away with the present antiquated and imperfect system of lighting with kerosene lamps. As the greater part of the city is not lighted at all at present, the completion of the installation of electricity will revolutionize its appearance. The Falls of Daphne, near the city of Antioch, will be utilized to provide motor power for both tramways and lights, the transmission of the current to be by cable over a distance of about sixty miles. The waterfall is said to be sufficient to produce 12,000 horsepower at all times of the year, otherwise the cost of fuel would make the project impossible, as coal or other fuel that could be used to operate the plant is not locally produced and its importation would be out of the question.

Mines in Anatolia.

Reuter's Berlin correspondent forwards a report published in the *Lokalanzeiger* to the effect that while staying incognito in Munich, the Khedive had a long conference with Herr Kemmerich, the Turkish Consul there, with regard to mining development in Anatolia, where his Highness has an extensive estate. A representative of a German-Turkish Mining Syndicate possessing large properties on the Anatolian coast was present at the conference.

Abyssinian Railway.

An Addis Abeba correspondent of the *Kolnische Zeitung* reports that the railway has already been completed to kilometre 312 (reckoned from Diredana) and kilometre 621 from Jibuti. But, as there is a scarcity of camels for the transport of materials from the terminus to the site of construction, the work is frequently interrupted, particularly in the mountainous district, where many bridges have to be erected and cuttings made. It is thought, however, that the section to the Mojo River, which is 73 kilometres from Addis Abeba, will be finished next November, and as the foundations for the permanent way from Mojo to Addis Abeba have now nearly been completed, the first train is expected in the latter place at the beginning of February.

Production of Hollow Bars.

By a new process, recently introduced in Sheffield, a bar, say ¾-inch diameter and 15 feet long, with a ¼-inch hole from end to end, can be rapidly and cheaply produced. The process consists of drilling a hole in the bloom or billet, in short lengths varying in size from 12 inches to 20 inches. This hole is then packed tightly with a special composition and the ends are plugged up. The bloom is then rolled in a rolling-mill until a bar of the desired dimensions has been obtained, the packing being elongated in proportion. The packing or core is afterwards removed by fluid pressure. By this process, round, square, hexagonal, and octagonal bars of the required length can be produced, and although the hole is not mathematically cylindrical or central, it is sufficiently accurate for many engineering purposes. When great accuracy is needed, as in the case of spindles, it is a comparatively easy matter to ream out the hole, which serves as a pilot.

TENDERS INVITED.

EGYPT.

[*The London agent of the Egyptian Government is Sir A. L. Webb, K.C.M.G., Queen Anne's Chambers, Westminster, S.W., at whose office particulars of tenders marked (L) are to be obtained.*]

Grey Cloth.—The Egyptian War Office invites tenders for the supply of 12,000 yards of grey cloth for overcoats. Firms who have not previously held a contract with the Egyptian War Office must forward two references (one from a bank). Date, August 27. (L.)

Air Compressing Station.—Tenders are invited by the Egyptian Ministry of Public Works, on behalf of the Municipality of Port Said, for the construction of the Air Compressing Station Building and Engine Foundations at Port Said. August 15.

BULGARIA.

Steamer.—Tenders are invited at the Ministry of Marine, Sofia, by the Bulgarian Steam Navigation Co., for the supply of a steamer of 2,500 tons, of the type "Czar Ferdinand." August 25.

Railway Embankment, etc.—Tenders are invited at the Direction of Roumanian Railways, Bucharest, for the laying out and decoration of 28,067 metres of railway line. August 24.

Coal.—Tenders are invited by the Bulgarian State Railways for the supply and delivery at Varna and Bourgas of 14,000 metric tons of Cardiff coal for locomotives. August 5.

TURKEY.

Adjudication for Silver Lead Mine.—Offers will shortly be invited for the working of a silver lead mine. See our Constantinople Business Letter (page 428).

Purchase of Old Metal.—Tenders are invited for the purchase of about 10,000 tons of scrap iron See our Constantinople Business Letter (page 428).

The German Loan to Bulgaria.

An Incident Behind the Scenes.

(From a Correspondent.)

Writing last week on the death of M. de Hartwig, an occasional correspondent said that the late Russian Minister in Belgrade "was a diplomatic official of the forward school who carries out a more or less independent policy of his own creation, and is applauded or disowned by his Government in accordance with circumstances." In other words, the Russian Bear is an expert in the use of catspaws, and certain documents which have come into my hands only tend to show the extraordinary cleverness with which this policy is often carried out. Of course, in certain instances the policy, by reason of its very cleverness, oversteps itself, as appears to have been the case in the present instance.

The pages of The Near East have already borne witness to the probable jealousies which would arise among the Powers as a result of the contraction of the £20,000,000 between a German group and Bulgaria. Indeed, it is more than probable that without these jealousies Bulgaria might still be hungering for funds. The financial position of that State since the Balkan Wars has been, if not desperate, at least very stringent, and money had to be found somewhere. Leading French financiers were approached, but in view of the uncertain position of relations with Greece and the available securities offered, a deaf ear was turned to the entreaties of the would-be borrower.

A Russian Guarantee.

Ultimately, however, the banking firm of Périer came forward with an offer to lend Bulgaria all she might require, but on conditions. Chief among these was the *sine quâ non* that, in addition to the guarantees offered by Bulgaria herself, the loan was to be underwritten, so to speak, by Russia. The condition might seem a comparatively harmless one. Moreover, were this subsidiary guarantee accepted, the loan was to be issued at 87 per cent., instead of at 82 per cent., whereby a very considerable saving to Bulgaria would be effected. Behind the proposal lay the determination on the part of Russia once more to attract or force Bulgaria into her orbit, out of which recent events have combined to drive her.

In accordance with this preconceived policy the representatives of the Périer group presented a memorandum to the Bulgarian authorities pointing out that it was next to impossible for Bulgaria to secure a loan in any market. It was expected that she would again be engaged in hostilities with Greece during the present year, and her trade and credit generally had been so damaged by the wars that the Périer firm was in reality performing a deed which was almost charitable in consenting to grant a loan at all, and that in the circumstances the Russian guarantee was indispensable.

Two Suitors.

Far from Bulgaria's borrowing powers, however, being nil, negotiations were at once set on foot with a powerful German group headed by the Disconto-Gesellschaft. Here, too, very hard conditions were demanded, but rather than sacrifice her national freedom of action Bulgaria was ready to accept almost anything. She was now, moreover, in the favourable position of having two suitors, and found no difficulty in playing one off against the other. The German group demanded as security certain important tobacco concessions, and these Bulgaria was loth to surrender. The French group came to know that other negotiations were afoot, and immediately modified their conditions. The *sine quâ non* of the Russian guarantee was abandoned, and so anxious did French financiers become, and behind them Russia, lest Germany should secure a further financial lever in the Balkans, that they ultimately offered to treat with Bulgaria without guarantees and to advance her a loan on her sole written bond. Further, *communiqués* were issued by the French and Russian Legations in Sofia, categorically stating that their Governments had in no way been connected with the first offer made by the Périer group.

Bulgaria, however, had gained her point. The German financiers consented to modify the obnoxious demands with regard to tobacco concessions somewhat, and the loan was signed, sealed, and delivered. The first portion of it has already been paid, while as showing the price which Bulgaria has had to pay as the cost of her independence, Treasury bonds, against which the first advance has been made, are now on sale in London at a price which yields about 7½ per cent.

The Net Result.

This by-play partially explains also the violent opposition with which the loan proposals have been met in the Sobranje. It was not altogether disinterested opposition on the part of those deputies who were averse from increasing the national indebtedness of Bulgaria. The hostility was engineered by those members who belong to the Pro-Russian party and, no doubt quite justifiably, dread the extension of German influence.

The net result of the negotiations is definitely to incline Bulgaria towards the Triple Alliance as against the Triple Entente, and to make Bulgarian statesmen still more wary of the Muscovites—"et dona ferentes."

ALEXANDRIA NOTES.

(From Our Own Correspondent.)

Alexandria, July 17.

Share Market.

The market has been slightly more active this week, and prices have been firm. The shares of the Agricultural Bank in particular have been in demand, and a large number have changed hands.

Many co-operative societies have been formed in the interior, which must very soon prove of great benefit to the fellaheen.

In spite of the large amount of gold which has recently left the country, £1,500,000 still remains. In view of the advanced season this sum will probably be left here now to assist in dealing with the new cotton harvest, which should begin in August.

Credit Franco-Egyptien.

An extraordinary general meeting of the shareholders in the Crédit Franco-Egyptien has been summoned to discuss the proposal to reduce the company's capital of 12,500,000 frs. (£500,000) by buying in the shares of the company, and to empower the board of directors to carry out this operation. Last year's net profits amounted to 662,513 frs., as compared with 703,834 frs. for the preceding year. The board has, therefore, thought it prudent not to declare a dividend, but to place the whole sum to reserve.

GREEK TREASURY BILL REDEMPTION.

Messrs. C. J. Hambro and Son are requested by the Greek Legation in Paris to make known that the Greek Government calls in for repayment the following securities:—(1) On July 17, 1914, the loan of 40,000,000 frs. concluded in virtue of the convention of June 28, 1913, between the Government and the National Bank of Greece, approved by Royal Decree of July 8, 1913.

(2) On July 31, 1914, the advance of 40,000,000 frs. represented by the bills of the provisional loan contracted pursuant to the convention of December 19, 1912, and renewed for six months by the convention of January 26, 1914.

Greek Treasury Bills forming part of either of the above issues should be presented for payment at the offices of Messrs. C. J. Hambro and Son, 70, Old Broad Street.

NEW COMPANIES.

British Indian and Persian Trading Company, Ltd.

A private company with the above title was registered on July 16 by T. G. Littlejohn, 88, Fenchurch Street, E.C., with a capital of £2,500 in £1 shares (1,000 6 per cent. cumulative preference). Its objects are: To carry on the business of importers and exporters of and dealers in hides, skins, grain, metals, precious stones and produce, provisions and materials of all kinds, ship and insurance brokers, warehousemen, shippers, stevedores, forwarding agents, ship charterers, etc., and to adopt an agreement with T. G. Littlejohn and C. C. Paqualin. The first directors (to number not less than three nor more than six) are: H. J. Verden, T. G. Littlejohn, P. Benham, and C. C. Paqualin.

London and Piræus Steamships.

The London and Piræus Steamships Company, Limited, has been formed, with a nominal capital of £10,000 in £10 shares, to acquire, contract for building of, equip, and maintain and alter ships and vessels of every description, and to sell, let out on hire, or otherwise deal with the same. The registered office is at 38, Fenchurch Street, E.C.

NEW OMNIBUS COMPANY.

The Near East has repeatedly pointed out the necessity for improving local communications in the Levant, and in some cases—at present all too few—services of motor-omnibuses have been established either as a preliminary to railway construction or to act as feeders to existing lines. Indeed, great hopes are built upon motor traction for the opening up not only of rural Egypt, but of Mesopotamia and Syria as well. There is a motor service from Laruaca to Nicosia. The Bulgarians are carrying their mails into the new provinces over the Rhodope mountains by car, and efforts are being made to supersede the horse-drawn vehicles between Aleppo and Baghdad with motor-omnibuses. In these circumstances, and with a prospect of abundant oil fuel to be obtained locally, it is possible to look forward to a great impetus to British commerce, as represented by the motor-car trade.

The General Omnibus Supply Company is making arrangements for travel facilities in the United Kingdom on an immense scale, and will be well advised to extend the sphere of its activities to the Near East as well, where there is a considerable and growing market for a trustworthy car of great power capable of negotiating inferior roads. Some country residents over here are inclined to repine at the "popularizing" of rural roads, but in Turkey, in Asia, or the Balkans a service of motor-omnibuses would be thrice welcome, and profitable to boot. The General Omnibus Supply Company is fitting its vehicles with Daimler chassis, and has such faith in the workmanship of this firm that a preliminary order for over £1,000,000 worth of material has been given.

We refer our readers to an announcement which appears on page 442 of the forthcoming issue of a prospectus of the General Omnibus Supply Manufacturing Company, which has been formed (1) for the erection of works to provide for the increasing public demand for the motor-bus; (2) for the manufacture and supply of omnibuses of the well-known "London General" system, which is a monopoly of the most exceptional kind; and (3) for the working of "All-England" routes and running omnibus services with this type of chassis, and the formation of subsidiary companies, etc. The General Omnibus Supply Manufacturing Company, Limited, proposes to link up towns and populous places and routes to London now to be furnished with some additional 400 omnibuses and charabancs, for which the promoters say a vast passenger traffic is now waiting.

ALBANIAN LOAN.

Turkhan Pasha, the Albanian Premier, is on his way to Vienna in connection with the loan of three millions sterling, which is not yet available. He will propose (says the Central News) that the director of the new Albanian Bank shall be an Albanian and the president a Frenchman.

Stock and Share Markets.

Bank Rate 3 per cent. (Jan. 29, 1914.)

SETTLING DAYS.

CONSOLS.
Wednesday, August 6.
STOCKS AND SHARES.
In Mining Shares the next carry-over is Aug. 10.

Continuation Day.	Ticket Day.	Pay Day.
Mon., July 27	Tues., July 28	Wed., July 29
Tues., Aug. 11	Wed., Aug. 12	Thurs., Aug. 13

LONDON, July 22.

Markets have been depressed all the week mainly upon Continental selling. The well-informed people do not believe that there is any chance of war breaking out, and it is clear that the liquidation has been due to the closing of speculative accounts. This is shown by the fact that the heaviest falls have been in securities in which there is an account open.

New Issues.

The new issues go very badly. The Ontario loan was practically neglected, the underwriters having to take 90 per cent. The Imperial Ottoman Docks offered through the National Bank of Turkey a block of bonds secured upon certain tithes and guaranteed by the Turkish Government. The Canadian Northern offered a portion of the bonds that have been guaranteed by the Canadian Givernment. The issue price is 94. They do not appear particularly cheap.

Money Harder.

Money has hardened mainly because Paris has been buying gold. It is probable that when the political situation improves we may see a lower rate for money. Sir Felix Schuster takes an optimistic view of the situation, and thinks that rates will be maintained. But what is good for the banker is bad for the trader, and the general public would like to see the Bank Rate down to 2½ per cent.

Internationals Flat.

In the Foreign Market everything has been flat. French Rentes have fallen below 81. Some of the Russian issues have also been offered. Bulgarian 4½ are weak at 82. Egyptian Unified have been done as low as 99, some small lots having been sold from Paris. Hungarian Rentes are only 79½. Greek Fours are under 50. Turkish Unified are a shade under 81. All Servia and Near East stocks have been weak. Tintos slumped, but have recovered to 67½.

Home Rails Almost Slump.

The Home Railway market almost slumped on the news that the South-Eastern and Chatham net earnings have fallen £51,000. This was quite unexpected. The dividend on South-Eastern ordinary was reduced by ½ per cent. Evidently expenses have been largely increased. It is to be hoped that the other railways have been more economical.

Yankees Firm.

The American market has hardened, and Steels rose to 63. Unions are over 161, and even Baltimores were hard at 83½. It is improbable that this market will remain firm, as the general opinion in the States is that more small roads will go into liquidation.

Rubber and Oil.

The Lampard Trust report is very bad, and only 2½ per cent. dividend can be paid. Even this has not been earned if depreciation be taken into account. Eastern International figures are also bad, and no dividend is distributed. But the Board have written £90,000 off depreciation, leaving £60,000 still to be written off. Some of the smaller plantation reports appear fairly satisfactory. Oil shares have been offered from the Continent, and the whole Oil market is in a very distressed condition. Shells have been down to 4½, but have since recovered. Royal Dutch are only 46, and Urals are under 2. The news from Spies continues good, but the shares are barely firm at 18s. Anglo-Egyptian B have hardened, and are now a shade over 1. Suez are quoted at 7s. 9d., and Eastern Petroleum just hold their own.

Fall in Mines.

The main feature in the Mining market has been the heavy fall in Mysores, which have long been very much over-valued. In spite of a drop of 20s. per share, they still seem priced at an extravagant figure. Kaffirs have been unloaded from Paris. Tanks have been weak, and De Beers have been sold. There is no support for either the Canadian or the Russian groups.

Miscellaneous.

In the Miscellaneous market Hudson Bays have been sold, but Maypole deferred are a shade harder. Marconis hang about £2. The meeting was astonished to hear that Mr. Godfrey Isaacs had sold the bulk of his holding at £4, or double the present market price. His excuse for selling was that he thought the public would have more confidence in him if he reduced his holding. This was a very extraordinary statement to make.

Egyptians Idle.

The Egyptian market has been idle and lifeless. There is no business coming from the East, and Paris has been inclined to sell. National Banks have weakened to £14. Land Banks have been offered from Paris, and are a shade weaker, being well under 6½. Agricultural Banks remain steady at just under 5, and the deferred are 280. Bank of Abyssinia are 5s. Delta Light Railway prefs. remain steady, and show a fractional improvement at 8½. Delta Lands are called 9s., but there is very little business. Behera are uncertain at 8. There are more sellers than buyers here. Union Foncière are 1-1⅛. Alexandria Water are steady at 12½, and Aboukir Lands are unchanged at 21s. United Lands remain at 1s. 9d. Sidi Salem is nominally 6s., but without any business. Trusts are 5s. There has been some inquiry for Salts, which have been dealt in at 14s. 9d. New Egyptian business appears to have faded away, and the price is 9s. 3d.-9s. 6d. Markets are a shade harder at 23s. There has been a little business in Khedivial Mail, the preference being 3¾, and the ordinary have hardened up to 11s. Daira Sanieh remain at 3s., and Ginners at ¾, whilst Gharbieh Land are nominally 1¾.

COMPANY NOTES.

Anglo-Persian Oil.

Mr. Charles Greenway has been elected chairman of the Anglo-Persian Oil Company, Limited, to fill the vacancy created by the death of Lord Strathcona.

Oriental Publicity Co.

The Oriental Publicity Company intends, it is said, to increase its capital to £E40,000 by the issue of 5,000 new shares. This decision has been arrived at owing to the company being desirous of founding branches throughout the Near East. It is also intended to start advertising in the Egyptian provinces by means of billposting.

Anglo-Ottoman Tobacco.

The Anglo-Ottoman Tobacco Co., Ltd., was formed in 1912, with an authorised capital of £200,000, divided into 25,000 6 per cent. preferred participating cumulative shares of £4 each and 25,000 ordinary shares of £4 each. The profits are divided between the two classes of shares as follows:—The preferred shares receive first a fixed cumulative dividend of 6 per cent. per annum; the ordinary shares then receive a dividend of 10 per cent. per annum. The surplus, after provision for reserve fund, is divided as to 35 per cent. to the preference shares and as to 65 per cent. to the ordinary shares. The company states that it has acquired one of the oldest established and most reputable businesses for the planting, buying, and sale of Turkish tobaccos. The plantations of the company are situated in the celebrated district of Kavalla, from which the finest qualities of Turkish tobacco are exported. During the first year of its inception the Anglo-Ottoman Tobacco Co., notwithstanding the war in the Near East, paid a dividend on the ordinary shares at the rate of 17½ per cent. (less tax), and on the 6 per cent. cumulative preference and participating shares a dividend at the rate of 12½ per cent. on a total issued capital of £76,000. For the year ended March 31, 1914, the company has declared dividends of 22 per cent. and 15 per cent. respectively on a total issued capital of £80,420, notwithstanding the unsettled state in the Near East during the first part of the financial year.

Ritz Hotels (Egypt).

The report of the directors for the year ended March 31, 1914, states that they have been unable up to the present to come to terms with capitalists for the purpose of raising money for the completion of the hotel. They have not, however, relinquished their efforts to endeavour to obtain the capital and have recently come into touch with an Anglo-American group who are interesting themselves in the matter. As, however, a question of this sort requires long and difficult negotiations, the directors are at present unable to state whether the negotiations will have any result. The directors regret that Baron Hans Pfyffer d'Altishofen has resigned his position on the board of the company and the shareholders are asked to approve a preliminary agreement made between the company and Baron Pfyffer whereby, in consideration of his foregoing a claim for a sum of about £700, he is released from his contract to act as managing director, which contract was signed at the formation of the company.

Union Steamship Co. (Hamburg).

The report states that the political changes which are going on in the Balkan countries make it practically certain that there will be an important economic revival in those lands, particularly as European capital is largely engaged for that purpose. The directors of the Union Company are accordingly of opinion that traffic in that quarter still offers a profitable field in spite of the already existing steamship connection. The directors have, therefore, purchased nine steamers, with a total capacity of 36,000 tons, and have concluded a contract with the Mercantile and Shipping Company of Antwerp, which has 23 steamers at its disposal, according to which the Union Company has established a regular steamship service from Hamburg and Antwerp to Levant ports. This service was opened in June, 1914, under the name of Aegaca Levant and Mediterranean Line.

Agricultural Bank of Bulgaria.

The report of the directors, just issued, shows that the transactions, carried out by the Agricultural Bank of Bulgaria in 1913 amounted to Frs. 781,066,205, as compared with Frs. 1,098,515,456 in 1912, a decrease of Frs. 317,449,251. This falling off is attributed to the events through which the country passed during the period under review. But the report emphasises the development of certain operations of the bank during this remarkable year. In fact, the total of the deposits has increased by five millions. In this connection the directors remark in their report presented to the Minister of Agriculture and Domains: "This increase, in a year when the country was carrying on one war after another, is worthy of notice. It demonstrates clearly the great confidence that our bank inspires in the minds of the people—confidence that remained unbroken throughout the sad days through which we have passed; for these five millions were deposited at a time when Bulgaria was cut off from all the world and when no export of cereals was possible." Advances to agriculturists show an increase of nine millions upon those of the preceding year, upon which fall the directors observe: "The bank has opened its coffers in order to aid with its credit the families of those agriculturists who suffered by the war. Apart form the granting of advances upon security the bank organized the supply of cereals for advances in kind to necessitous cases, and in this way it has been able to meet all the demands created by the needs of the moment, to alleviate the lot of the agriculturists and to second their efforts and their labour." Another point that speaks well for the Bulgarians as a nation is that the agriculturists have met their engagements to the bank: they have paid up fifty per cent. and have renewed their obligations for the balance, paying only interest. And it is to be noted, says the report, that this was at a time of exceptional stress, when the country was at war, and no export of cereals was possible. The gross profits for the year were Frs. 3,173,187 higher than those of the previous year. The capital and reserves of the bank amounted to Frs. 62,290,011 as compared with Fs. 59,962,293 in 1912, being an increase of Frs. 2,327,719.

THE
GENERAL
OMNIBUS
SUPPLY,
LIMITED.

83, Pall Mall,
LONDON, S.W.

Send for Prospectus.

What Has Been Done.

Few people realise the enormous growth of the public motor vehicle.

The coming of the motor has revolutionised travelling for the Million.

THE
General Omnibus Supply Manufacturing Co., Ltd.,

is formed

(1) For the erection of works to provide for the increasing public demand.

(2) The manufacture and supply of Omnibuses of the well-known "London General" system, which is a monopoly of the most exceptional kind.

(In consequence of its success and popularity, as is well known, large orders are now being placed for the supply of fleets of the "London General" type of omnibus for populous Cities and Towns throughout Great Britain and in many other parts of the world.)

(3) For the working of All-England Routes and running Omnibus Services with this type of Chassis and the formation of Subsidiary Companies, etc.

Linking Up Town and Country.

The General Omnibus Supply Manufacturing Co., Ltd., proposes to link up Towns and populous places and routes to London now to be furnished with some additional

400 Omnibuses and Char-a-Bancs

for which a vast passenger traffic is now waiting.

A prospectus of the New Company will be published shortly, and copies may be obtained from:

The LIST will CLOSE on or before SATURDAY, the 25th July, 1914.

Imperial Ottoman Docks, Arsenals and Naval Constructions Company.

(Société Impériale Ottomane Co-Intéressée des Docks, Arsenaux et Constructions Navales.) SOCIETÉ ANONYME. Incorporated under the Laws of the Ottoman Empire in pursuance of a Contract between the Imperial Ottoman Government and

Sir W. G. Armstrong, Whitworth and Company, Ltd., and Vickers, Ltd.

which firms together have subscribed on the terms of the Prospectus for £100,000 of the Bonds now offered.

OFFER FOR SALE OF £600,000 5½ PER CENT. GUARANTEED BONDS

Of the above Company (part of a total authorised issue of £1,100,000 like Bonds) unconditionally guaranteed as to principal and interest by the Imperial Ottoman Government specifically secured by the assignment of an Annuity payable from the tithe revenues of the Vilayet of Sivas. The Administration of the Ottoman Public Debt will collect these revenues and will pay the Annuity direct to the National Bank of Turkey, by whom it will be placed to the credit of the Trustees for the Bondholders for the service of the loan. The service of the loan is further guaranteed by the Government out of the General Revenues of the Empire.

The Bonds are repayable on or before the 14th November, 1943, by means of a Cumulative Sinking Fund of 1½ per cent. per annum, commencing forthwith, and to be applied by half-yearly drawings at par or by purchase below par.

The Bonds will be to Bearer in denominations of £20 (£T22, Fr. 500), £50 (£T55, Fr. 1,250), and £100 (£T110, Fr. 2,500) each, with half-yearly Coupons payable on the 14th May and 14th November in each year. They will bear the signatures of the Ottoman Minister of Finance, of the President of the Council of Administration of the Ottoman Public Debt, and of a representative of the Company, and will be countersigned in London by a representative of the Ottoman Government. The Ottoman Government has granted that the Bonds and Coupons shall be exempt in the Ottoman Empire from all Duties, Taxes, and Stamp dues.

The Company reserves the right to issue further Bonds beyond the said amount of £1,100,000 provided that such further Bonds shall have no right to any charge upon the tithe revenues from which the above-mentioned Annuity is payable.

LLOYDS BANK, LIMITED, Lombard Street and Branches, and the NATIONAL BANK OF TURKEY

are authorised, as Bankers for the Purchasers (the National Bank of Turkey and others) to offer the above Bonds for sale

AT THE PRICE OF £94 PER CENT.,

payable as follows:—**£5** per £100 Bond on Application, **£10** per £100 Bond on Allotment, **£20** per £100 Bond on 14th August, 1914, **£20** per £100 Bond on 14th September, 1914, **£20** per £100 Bond on 14th October, 1914, **£19** per £100 Bond on 14th November, 1914—total, **£94.**

Payment in full may be made on allotment or on the due date of any instalment under discount at the rate of 2 per cent. per annum. Scrip Certificates of the Company will be issued after payment of the amount due on allotment, and will bear a Coupon of 16s. per £100, payable on the 14th November, 1914, representing interest to that date at the rate of 5½ per cent. per annum on the instalments from the due dates of payment. The Bonds will in due course be delivered in exchange for fully paid Scrip Certificates.

Applications from holders of Shares, Stock, Debentures, and Debenture Stock in Sir W. G. Armstrong, Whitworth and Company, Limited, and Vickers, Limited, will receive special consideration.

DIRECTORS.

TRUSTEES, EXECUTORS, AND SECURITIES INSURANCE CORPORATION, LIMITED, Winchester House, E.C.

SOLICITORS FOR THE TRUSTEES.

SLAUGHTER AND MAY, 18, Austin Friars, E.C.

THE COMPANY has been incorporated in pursuance of the terms of a contract dated 2nd December, 1913, made between the Imperial Ottoman Government, Sir W. G. Armstrong, Whitworth and Co., Limited, and Vickers, Limited, and the Council of Administration of the Ottoman Public Debt, under which Sir W. G. Armstrong, Whitworth and Co., Limited, and Vickers, Limited, agreed to purchase the present issue of 5½ per cent. Guaranteed Bonds. These £600,000 of Bonds they have re-sold on terms which cannot in any event result in a profit to them of more than ¼ per cent. to the purchasers on whose behalf the Bonds are now offered.

The Capital of the Company is £250,000, consisting of £200,000 in Ordinary Shares issued as fully paid and £50,000 in 5½ per cent. Preference Shares. Of this Capital £130,000 (including the £50,000 5½ per cent. Preference Shares which have been subscribed in cash) is held by the contracting Companies, and £120,000 by the Imperial Ottoman Government, all shares having the same voting rights. Under the terms of the above-mentioned Contract and of subsequent undertakings of the Government confirmed by Imperial Iradé, the Imperial Ottoman Government has unconditionally guaranteed the Interest and Sinking Fund of the Bonds, and of the above-mentioned £50,000 of Preference Shares, by the exclusive and irrevocable assignment of an Annuity of £T88,550 (£80,500), payable from the produce of the Tithes of the Vilayet of Sivas, of which the average annual revenue for the past three years, as officially stated by the Minister of Finance, has been more than £T220,000 (£200,000). This Assignment is subject to a prior Charge on the said Tithes of £T63,600 (£57,819) per annum, which is reserved for the service of the 4 per cent. Ottoman Loan of 1909; it has priority over any other Charge. The service of the Loan is further guaranteed by the Government out of the General Revenues of the Empire. The Government has undertaken that it will not during the existence of the Company make any modification which might diminish or alter the assigned Revenues without the previous consent of the contracting Companies and without previously assigning other Revenues approved by the said Companies of at least equal value. The contracting Companies have agreed not to give any such consent without the concurrence of the Trustees for the Bondholders, and have further agreed that no claim shall be made on any sums paid or payable by the Government under the Guarantee in respect of any amount due to the holders of Preference Shares until the Bondholders shall have received in each half-year all moneys payable to them in respect of interest and capital.

The Council of Administration of the Ottoman Public Debt is charged with the collection and disposal as above mentioned of the whole of the said Tithe Revenues, and has agreed to pay out of such revenues as and when collected to the National Bank of Turkey for the service of the loan the amount required for each half-yearly Coupon and Sinking Fund, which will be held for account of the Trustees for the Bondholders.

There is good reason to believe that the yield of the above-mentioned Tithe revenues will increase in the future. The construction of a railway from the Port of Samsoun to Sivas has been begun, and when it is completed the value of the agricultural produce of the Vilayet of Sivas (and, therefore, of the tithe) should be increased, in consequence of the improved facilities for bringing the crops to market. Moreover, the collection of revenues by the Administration of the Ottoman Public Debt has been found in practice to be followed by an increase in their yield.

The Bond is an absolute and direct obligation of the Company, but having regard to Turkish Law and the conditions under which the Company enjoys the use of the Government Docks, etc., no charge of the nature of a mortgage can be created.

The Principal and Interest of the Bonds will be payable in London, at the National Bank of Turkey, 50, Cornhill, E.C.; or, at the option of the holders, in Constantinople, at the National Bank of Turkey, at the fixed exchange of £10 for £T11; and in Amsterdam at the Rotterdamsche Bankvereeniging in florins at the exchange of the day. The Interest will be payable by Coupon at the above Banks on the 14th May and 14th November in each year. The Sinking Fund will be applied by half-yearly drawings at par, or by purchase below par. The Company is further at liberty at any time to redeem any part of the Bonds at 105, if they cannot be purchased below par; and at any time after five years, to redeem the whole of the outstanding Bonds at par. Drawn Bonds will be paid on the 14th May and 14th November in each year, the first repayment being made on the 14th May, 1915. Coupons not presented for payment within five years from their due date, and drawn Bonds not presented within fifteen years, will, according to the terms of the above Contract, enure to the benefit of the Ottoman Government.

The following information as to the objects and prospects of the Company is given by Sir W. G. Armstrong Whitworth and Company, Limited, and Vickers, Ltd.

To THE NATIONAL BANK OF TURKEY,
50, Cornhill, London, E.C. 20th July, 1914.

Dear Sirs, OBJECTS OF THE COMPANY.

The Imperial Ottoman Docks, Arsenals, and Naval Constructions Company has been formed in Turkey by Sir W. G. Armstrong, Whitworth and Company, Limited, and Vickers, Limited, in conjunction with the Imperial Ottoman Government, for the purpose of the repair and construction of war and merchant ships of all classes. With this object the Company has undertaken—

(a) To equip in the most modern and up-to-date manner the existing Docks, Arsenals, and Workshops belonging to the Imperial Ottoman Government in the Golden Horn, and

(b) To construct a Floating Dock to be placed in the Gulf of Ismid capable of taking the largest warships afloat or under construction, and to provide the necessary yards, workshops, etc., on shore.

An agreement has also been entered into by our Companies on behalf of the Company to acquire the control of the docks recently constructed at Stenia on the Bosphorus, and intended specially for the use of merchant shipping.

NATURE OF THE CONCESSION.

An agreement has been entered into between the Imperial Ottoman Government and the two contracting Companies (to which the Council of the Administration of the Ottoman Public Debt is a party) by which the Imperial Ottoman Government undertakes (subject to the usual clause enabling the Government to terminate the concession should the Company be proved to be incapable of carrying it out, but this without prejudice to the Government's guarantee to the Bondholders, and subject to the right of the Government to take over the Company's undertaking at the end of twenty years from its incorporation on repaying the outstanding Bonds at par and on paying the sum necessary to complete the redemption fund for the Preference Shares), to grant to the Company for thirty years rights which secure to it practically all Government shipbuilding and ship repairing in the Black Sea, the Straits, the Sea of Marmora, the Archipelago, and the Mediterranean generally, on terms which we consider will provide a satisfactory profit for the Company, and also the exclusive right of constructing and working naval docks, warship-building works, and arsenals in the same regions.

The Turkish Government have agreed, in return for an allotment, fully paid, of three-fifths of the Ordinary Share Capital of the Company, that the Company shall have free of charge the full and exclusive use of the whole of the present Arsenals, Docks and Work-

Digitized by Google

shops situated in the Golden Horn at Constantinople, with the land necessary for the Company's undertaking, as well as the land requisite for the establishment of a Floating Dock and other Works in the Gulf of Ismid, together with all the fixed and moveable machinery and the tools in the said Arsenals, Docks, and Workshops.

The Company will be free of all Customs charges on any imported machinery, tools, and necessary implements for use in its shops, docks, and factories.

Our two Companies have agreed with the Imperial Ottoman Government, in return for an allotment fully-paid of two-fifths of the Ordinary Share Capital, to supply the Company with the necessary technical management and control, and to provide technical instruction with a view to training Turkish personnel. We have also jointly subscribed and paid in cash for £50,000 of Preference Shares of the Company, and are applying on behalf of our Companies for £100,000 of the Bonds.

WORK FOR MERCHANT SHIPPING.

The Company is at liberty to undertake repairs and construction work for Merchant Shipping when their plant is not occupied with Naval Work.

From the statistics available it would appear that there is an average annual movement of shipping at the Port of Constantinople of over 16,000,000 tons.

Dry Docks equipped with the most modern repair plant and latest appliances, installed at the sole approach to the Black Sea, and known to be associated with and under the supervision of the Contracting Companies, should get the bulk of the Mercantile shipping repairs of all nations in those waters.

It is impossible to frame an exact estimate of the revenue to be derived by the Company from this source, but we are of opinion that work of this character should give a very satisfactory result.

MANAGEMENT.

The technical and financial control of the management is in the hands of Sir W. G. Armstrong, Whitworth and Company, Limited, and Vickers, Limited.

The Directorate of the Company is to consist of seven or nine members, and the Contracting Companies will nominate four out of seven, or five out of nine, the remainder being nominees of the Imperial Ottoman Government. The Chairman for the first five years will be one of the English Directors. In addition to the Board, the Company is to have a Financial and Technical Advisory Committee, which will consist of four Directors of the Contracting Companies.

Any difference between the Government and the Company on technical matters is to be referred to the arbitration of the Lords of the Admiralty in England, and on other matters to two arbitrators, and failing agreement between them, to an umpire to be nominated jointly by the Ottoman Minister of Marine and the Lord Chief Justice of England from among the legal members of the Permanent Court of Arbitration at the Hague.

Yours faithfully

For Vickers, Ltd.,
V. CAILLARD,
Director.

For Sir W. G. Armstrong, Whitworth and Co., Ltd.,
C. L. OTTLEY,
Director.

A copy of the Statutes of the Company, of the Clauses of the Contract of 2nd December, 1913, dealing with the Government Guarantee, and of the letters relating thereto exchanged between the Company and the Imperial Ottoman Government together with the Imperial Iradé, and of a letter dated the 6th July, 1914, from the Administration of the Ottoman Public Debt, together with a draft of the Bond (which is subject to the approval of the Imperial Ottoman Government) and of the Trust Deed, can be seen at the Offices of Messrs. Surtees, Philipotts and Co., the Solicitors to the Company, at 6, St. Helen's Place, E.C., or of Messrs. Norton, Rose, Barrington and Co., at 57½, Old Broad Street, E.C., during usual business hours whilst the list remains open.

Applications should be made on the accompanying form, and should be forwarded to Lloyd's Bank, Limited, Lombard Street, E.C., or Branches, or to the National Bank of Turkey, 50, Cornhill, E.C., with a remittance for the amount payable on application.

If no allotment is made, the deposit will be returned in full, and in the case of a partial allotment, the balance will be applied towards payment of the amount due on allotment, and any excess will be returned to the applicant. Interest at the rate of 6 per cent. will be charged on all payments overdue. Failure to pay any instalment when due will render the amounts previously paid liable to forfeiture, and the allotment to cancellation.

An official quotation and settlement on the London Stock Exchange will be applied for in due course.

A commission of one-quarter per cent. will be paid to Brokers and other authorised agents on allotments made on applications bearing their stamp.

Prospectuses and Forms of Application may be obtained from Lloyd's Bank, Limited, Lombard Street, E.C., or Branches; from the National Bank of Turkey, 50, Cornhill, E.C.; from Messrs. Cohen, Laming, Goschen, and Co., 14, Austin Friars, E.C.; or from Messrs. Wise, Speke, and Co., Collingwood Street, Newcastle-on-Tyne.

Dated 21st July, 1914.

Cheques should be made payable to Bearer and crossed.

FAVOURABLE SITUATION.—IMMINGHAM DOCK is geographically the most central port for the Continent, and is in direct rail communication with all parts of Industrial England.

ALWAYS ACCESSIBLE.—IMMINGHAM DOCK has a storm-protected harbour and deep water channel and entrance lock, enabling the largest ships to enter or leave **at any state of the tide**; 48 feet H.W.O.S.T., 27½ feet L.W.O.S.T.

LOW DOCK CHARGES.—IMMINGHAM DOCK charges are more favourable than at any competitive port—no waiting—quick and cheap transhipment between ship and rail.

UNIQUE OPPORTUNITY FOR NEW WORKS.—IMMINGHAM DOCK is adjacent to numerous valuable sites for new works and factories, which are in close proximity to coal and ironstone fields, and its many commercial advantages tend to minimise the cost of production.

TIMBER.—The large Timber Pond with deep water berths has accommodation for all descriptions of Timber.

There is a Timber Quay for Deals, Battens and Boards, Mining Timber, Pit Props, etc., with Sorting Ground and Timber Yards adjacent.

Ships can discharge direct from Hold to Truck Sorting Ground.

S.S. "Noreg" discharged a cargo of 1,404 loads of Pit Props in 17 working hours.

IRON ORE.—Ships discharge at Mineral Quay, with quick-working cranes and three sets of running roads alongside quay.

S.S. "Porjus" discharged a cargo of 4,427 tons Iron Ore in 43 working hours.

GENERAL.—Iron, Wood Pulp, and General Merchandise can be expeditiously handled by the latest type of cranes. Lifting capacity from 30 cwt. to 50 tons.

Sidings run alongside every berth, and spacious Transit Sheds and Bonded Stores are provided for dealing with traffic requiring storage accommodation.

The Ship Chandlery and Provision Department supplies Cabin, Deck Ship, and Engine Room Stores of all kinds, and of best quality, at lowest prices.

DOCK DIMENSIONS.

Dock Estate....1,000 acres.	Depth of water on sill	H.W.O.S.T.	48 ft.

COOK'S NILE STEAMERS AND DAHABEAHS.

THOS. COOK & SON have unequalled facilities for Travellers visiting Egypt, now the premier Winter Resort of the World. Their fleet of **Fourteen Large Passenger Steamers** consists of the finest vessels on the Nile, specially built, luxuriously appointed throughout, and fitted with every modern convenience.

TOURIST SERVICE.—These large and handsomely-fitted Steel Steamers sail once a week from **Cairo** to **Assuan**, and twice a week from **Assiut** to **Assuan**, the sailings from **Cairo** beginning in November, and from **Assiut** in January.

EXPRESS SERVICE.—The Express Steamers also leave **Cairo** twice a week, the Friday departures commencing in November, and the Monday departures in December.

There is thus a Service of **Five Cook's Steamers per week** ascending the Nile to the **First Cataract** during the Season—three from **Cairo** and two from **Assiut**—calling at all points of interest on the Nile, in connection with which complete arrangements for sightseeing and excursions are made, enabling Travellers to visit, to the best advantage, all the famous

PYRAMIDS, TEMPLES, TOMBS, RUINED CITIES, etc.

SECOND CATARACT SERVICE.—In connection with the above Services there is also a Service twice weekly by First-class Steamer from the **First** to the **Second Cataract**, with through bookings to **Khartoum, the Sudan,** and **Uganda.**

PRIVATE STEAMERS AND DAHABEAHS. — **Thos. Cook & Son** have several small Steamers for charter at moderate rates, specially adapted to the requirements of Families, Private Parties, Sporting Parties, etc., accommodating from eight to sixteen passengers, with competent crews, and thoroughly equipped. Also a large Fleet of First-class Sailing Dahabeahs, the best on the Nile.

NOTES OF THE WEEK.

The rapidity with which events have moved during the past week has surprised even those observers who are experienced in the kaleidoscopic effects of Balkan politics and the recurrent crises to which they give birth. Last week we were able to refer to the opinions and desires of the Government of Belgrade, a city which is to-day in the hands of an Austro-Hungarian army. The Servian capital has been established at Nish, while that of Montenegro has been withdrawn by King Nicholas to Podgoritza. Fighting has occurred, and there are signs of an Austro-Hungarian movement up the valley of the Morava.

As far as it is possible to see at present the vast boil of militarism which has afflicted the body politic of Europe for a generation past is upon the point of bursting from the pressure of its own accumulated matter. The rolling of drums in a steady crescendo over Europe is drowning the voices of those who cry for peace. The fighting-men prepare for instant war, the general order is

Blow the bugle, draw the sword,

and the Valkyries stir from their sleep of years once more to be the choosers of the slain. Meanwhile, like some poisonous exhalation from the ground, the fog of war has shrouded half Europe from sight, and the malevolent activities of a widespread mobilization are hastened in its obscurity. A Near Eastern question has been the excuse or the opportunity for this outburst, but the indications seem to point to another part of Europe being chosen for the settlement of the issues raised.

Whatever be the outcome of the present tension, the firm attitude adopted by Great Britain must have given pause to the most advanced Chauvinists, who were light-heartedly contemplating a European war. It may be assumed that Austria-Hungary would never have actually drawn the sword of vengeance against Servia had she not, rightly or wrongly, been convinced that those Powers most immediately concerned already had their hands full. Russia was seen to be in the throes of a great industrial strike, but the contention which has appeared in various quarters that this was an outward and visible sign of deep-seated unrest, seems to be discounted by the rapidity with which the trouble subsided when once the question of national honour was involved. In the same way the Continental Press has openly stated that Great Britain would probably be forced *nolens volens* to adopt the attitude of a spectator, owing to the imminent possibility of civil strife in Ireland. Here again such prophets have deluded themselves. Great Britain is very much "ware and waking." Germany is, of course, the key to the situation. Italy eagerly accepted Sir Edward Grey's invitation that the Ambassadors of France, Germany, and Italy should meet together in London to discuss possible solutions of the quarrel between Austria-Hungary and Servia; France also accepted. Germany, somewhat ominously, but in perfect loyalty to her ally, replied that she is unable to accept such an invitation unless Austria-Hungary herself expresses a desire for such mediation. The possibilities of diplomatic action have for the moment disappeared, and at the time of writing even the direct conversations between Vienna and St. Petersburg have been discontinued.

Apart from all other considerations, the Austro-Hungarian *dêmarche* against Servia must profoundly affect the relations of the Balkan States. Laments are not only inopportune, but the adage of spilt milk strictly applies in this case. It is, however, permissible for the armchair critic to point out that had the impossible been possible, and the various Balkan nations been able to sink their many differences, Austria-Hungary would never have dared to attack Servia, whatever the machinations of this State might have been in the south-eastern districts of the Dual Monarchy.

Things have not remained in the somewhat intangible state of conferences projected. As the very well-informed Berlin correspondent of *The Times* states, it may definitely be assumed that Great Britain has "with the necessary tact," informed Germany that there can be no European war with Great Britain left out. Such being the case, it is only a natural corollary that the Admiralty has issued orders that no manœuvre leave is to be granted to the crews of the First Fleet, recently engaged in tactical exercises, and that the ships of the Second Fleet are to remain near their home ports in order, at a moment's notice, to be able to take on board their full complement. Other precautions have been taken by the Admiralty, and the Press has been requested to refrain from publishing any military or

Digitized by Google

naval information which might in any way tend to hamper what measures the Admiralty may see fit to take.

Servia has no ships of war, but, as during the annexation crisis of 1908, small vessels and launches may be manned by soldiers for the occasion, and may cause considerable annoyance. The Austro-Hungarian Danube Fleet is composed of six monitors, each carrying one or more 4.7-in. guns and several machine guns. The crews vary from sixty to eighty men, and the speed of the vessels from thirteen to eight knots. Two new boats of 527 tons, twelve knots, and five 4.7-in. guns are building, and are due for delivery this summer. The rest of the Austro-Hungarian Navy has its headquarters at Pola, in the Adriatic. The force regularly in commission includes four battleships, two being Dreadnoughts, with three battleships in reserve. It is understood that four cruisers and a torpedo flotilla are also kept in commission. The whole effective strength of the Austro-Hungarian Navy consists of eleven battleships, one armoured and six light cruisers, nineteen torpedo-boat destroyers, fifty-eight torpedo boats, and ten submarines.

The principal base of the Italian Fleet is at Spezia. The ships constantly in commission include ten battleships, divided into three squadrons, with two armoured cruiser squadrons of three ships each, five light cruisers, and a torpedo flotilla. Italy has altogether eleven effective battleships, nine armoured and seven light cruisers, thirty-six destroyers, seventy torpedo boats, and eighteen submarines. The fact that Italy has never abandoned her pretensions to certain of the Ægean Islands, which she has not surrendered since the war with Turkey, cannot be disregarded, and the Consulta is believed to favour an energetic application of what is known as the "Venetian policy."

It is interesting to note that experienced observers are of the opinion that Italy has not yet made up her mind to which side she means to incline should the present conflict spread. The "Venetian policy" which the Consulta is believed to cherish is one which provides for the acquisition of Corfu at least and perhaps others of the Ionian Islands as compensation for possible Austrian acquisitions further up the Adriatic. This policy, needless to say, involves a violation of the neutrality of the Ionian Islands, but it is at least possessed of that driving force which the newly awakened Italian earth-hunger provides. In any case the new position which the Italian fleet has taken up off Brindisi enables it to look both up and down the Adriatic.

It is understood that the Government has in contemplation the introduction of a Press Censorship Bill in view of the danger to the public interest from the indiscreet dissemination of news. It is a proposal which concerns the honour of the Press nearly, and in particular it is likely to affect the daily papers. In the circumstances, however, we welcome the proposal, and feel sure that the editors of our daily contemporaries will be far from resisting measures which will relieve them of the responsibility of deciding between the requirements of the national safety on the one hand and the demands of their circulation on the other.

Apart from rumours and counter-rumours—Zeppelin airships over Woolwich, mobilization of the Fleet, calling up of the Reserves—the most serious portent of all is that political parties should, for the moment at any rate, have agreed to sink their differences in face of a possible foe in order to present a united front. We have always contended that the Irish question was not a Polish one, and that politicians would in the end desist from playing bowls when the Armada came. At the same time Great Britain cannot dissociate herself from all responsibility for the present crisis. Had foreign statesmen not been convinced that the United Kingdom was head over ears in Ulster the crisis might never have reached its present dimensions. Here at home just now we are very quiet. It is unthinkable that we should have automatically to enter the arena on behalf of Servia. But, as in the days when the Russians were at San Stefano, "We don't want to fight, but by Jingo! if we do!" This time there will be no turning back, and France may be sure that in the event of attack the epithet of "perfidious" will not apply.

It is a trite observation that Great Britain is a Moslem Power. She is a Near Eastern Power as well, and, in addition, is bound by the bonds of her traditional policy of supporting the "balance of power." This may, to some, seem like a catch-phrase of forgotten history, but in sober truth we owe the nightmare of German aggression both in the North Sea and in the Near East to our lapse from that policy in 1870. The hand of fate once more holds out the apple of opportunity. It is the duty of the Government, having healed our differences at home, to grasp the chance of seeing that the balance of power is once more redressed. If this can be done without war, well and good. If not, then it is our plain duty to abide by our spoken word. The fact that it is known that Britannia intends to do so will in itself be of almost as great effect as the actual casting of her trident into the scales of war.

The reports which have been in circulation to the effect that Greece and Turkey have been vying with each other in their efforts to increase their respective naval forces at short notice may have been well founded. In view, however, of the demand for all naval commodities at the present it is safe to say that neither of the rivals will be allowed to acquire any vessels of war, large or small, in Europe at any rate. We have in these columns consistently condemned the folly of either country wasting its substance on further purchases of Dreadnoughts, and we can, therefore, afford to congratulate them both upon being prevented from indulging further in the ruinous competition.

One of the most unfortunate results of the crisis is to be seen in the hurried return of the Hellenic Prime Minister to Athens. Close observers have always cynically doubted whether he would meet in Brussels or elsewhere the Grand Vizier, or any other Turkish statesmen. On his arrival at Munich the situation looked so dark that Mr. Venizelos at once started back to Athens, a journey which, we expect, will prove somewhat of an undertaking, as Europe during the last few days has been closing up its communications in the most remarkable way. For the moment, then, at any rate, the hopes of a *conférence à deux* on Turco-Greek difficulties must be relegated to the background, and it is to be feared that the improvement in the situation on the coasts of Anatolia will not receive that stimulus which was confidently expected to result from the meeting of the two statesmen.

The attack on the Khedive in Constantinople on Saturday need not be taken as an outburst of Nationalist fanaticism. There are always a number of misguided beings, more especially among the student class, who regard it as incumbent on them to diminish the number of rulers upon earth. There will be no opportunity of inquiring into the state of the would-be murderer's mind, for he was shot dead by a gendarme, who fired in order to prevent his escape. At the same time it should be noted that an attempt is being made in Cairo to connect the crime with the Nationalist agitation, and to show that the assassin was in close touch with the notorious Sheikh El Shawish, who was chiefly instrumental in working up the campaign against Colonel Aziz Ali Bey El Masri. It is natural that the Egyptian authorities should seize the opportunity to point a moral on the working of the Nationalist propaganda, but against this attempt to fasten the crime on the Nationalists must be set the fact that the Young Egyptian Committee has telegraphed to the Khedive congratulating his Highness on his escape.

Digitized by Google

The Khedive was returning from a visit to the Grand Vizier with his son-in-law, Jemal-ed-Din Pasha, son of the former Grand Vizier, Ferid Pasha Vlora. Just as the motor-car was leaving the courtyard of the Haridjieh a young student named Mahmud Mazhar stepped forward and fired several shots from a Browning pistol. One bullet struck the Khedive on the left cheek and came out on the right, while another grazed the bone of the right forearm. Jemal-ed-Din Pasha was wounded in the right kneecap and foot. At the sound of shots various officials and Ministers, including Damad Enver Pasha, Minister of War, and Talaat Bey, Minister of the Interior, who had both snatched up revolvers, rushed from the building. The Khedive and his son-in-law received first-aid and were then able to proceed to the Palace of Chibukli, on the Bosphorus, the Khedive's summer residence. Several people were arrested by the police on suspicion of being connected with the crime, but in the absence of evidence they were all released. This in itself tends to show that the plot was the creature of Mahmud Mazhar's own brain. Little is known of the man, but he is said to have been the son of a former magistrate in the Native Courts of Egypt, and seems to have failed several times to commit suicide, while he was addicted to the drug habit. The latest information states that both the Khedive and Jemal-ed-Din are progressing satisfactorily.

At almost any other time the resignation of M. Mornard, following so closely on the crowning of the young Shah, would have served to draw fresh attention to that painful subject which has come to be known as the Persian Problem. Stirring events nearer home have, however, practically monopolized the attention of Press and public in this country, and hardly a thought has been spared to Persia. This may be natural, but it is to be hoped that, however interesting events in Europe may become, affairs in Persia will not be left to look after themselves in the near future. Should that be the case we might find, when we had time to devote to them once more, that the Persian Problem had been solved—in a way that would commend itself as little to us as it would to the Persians. In view of that possibility it is, perhaps, fortunate that Parliament has sanctioned the contract between the Admiralty and the Anglo-Persian Oil Company. Having acquired such a substantial interest in Persia we are hardly likely to neglect it entirely.

If only the bursting of the storm cloud over Europe should distract Russian attention from Northern Persia for a while that unhappy country might have yet one more chance of showing what it could do in the way of helping itself; the elections for the Mejliss might be held in tolerable conditions, and certain changes in the administration that seem to be ardently desired in Azerbaijan might be effected. All that, however, seems too much to hope for. Nothing that may happen in Europe is likely to check that march of events in North Persia which has been causing so much uneasiness of late to friends of the country. On the other hand, many things may happen to accelerate that march, and it behoves us to keep a very close watch upon the development of the political situation in that region.

In a letter published in *The Manchester Guardian* an Englishman in Persia reports that in the course of an interview with the Vossuk-ed-Dowleh, M. Korostovetz, the Russian Minister at Teheran, announced *tout court* that "in future no *mamur* or other Persian Government official is to be allowed to go to the northern provinces, and the Persian Government is not to have any authority six farsakhs (twenty-seven miles) beyond Kazvin!" If this account be correct—and in view of all that has been done in the North of late, we see no reason to doubt it—it would seem that Russia does not intend to allow any scruples of false delicacy to deter her from collecting payment up to the uttermost farthing for any benefits she may have conferred on Persia in the way of "town improvements" or security of life and property. In such circumstances it is somewhat strange that she should think it worth while to maintain any show of consideration for the feelings of Persia—or of this country. Yet, according to the St. Petersburg correspondent of *The Times*, "Russia's reply to Sir Edward Grey's recent Memorandum regarding certain matters affecting the northern zone of Persia is couched in the most conciliatory spirit, and indicates Russia's willingness to abandon the consular collection of taxes from Russian subjects, initiated at M. Mornard's request." The correspondent adds that Russia has informed the Persian Government accordingly, but has stipulated that the taxes levied shall be paid into the Russian bank, as was done before 1912.

We referred last week to the unfortunate series of frontier incidents which were constantly taking place on the Bulgarian marches. Now, however, although the Government of Sofia is understood to have given assurances of its intention to preserve a strict neutrality, the Roumanian frontier forces along the Danube and the Dobruja frontiers have been increased. Roumania will be in a somewhat unfortunate position if her two great neighbours come to blows, and, it may be, she will keep her mind distracted from European dangers as long as possible by looking towards the Balkans as guardian of the Treaty of Bucharest.

We have, from time to time, found occasion to animadvert upon the tedious delays of diplomacy, and it is a case in point that the evacuation of Sasseno by the Greeks should have been accomplished more than a month after the Hellenic Chamber had regretfully authorized its cession. But it must be remembered that Mr. Venizelos is very gravely hampered by home politics in the punctual fulfilment of his international obligations. Further, we must point out that he is not personally to blame for the fact that Albania is in such case as to be almost unable to benefit from the belated cession. It is rather to his continental countrymen, according to Mr. Aubrey Herbert's letter to *The Times* of Tuesday, that the deplorable condition of Southern Albania is due, and that the Mpret's realm appears to be in danger of foundering. The studied neglect of the friends and sponsors of Albania has given ample opportunity for her enemies to advance their interests.

The Great Seal has been put in motion, and the grant of an Earldom to Lord Kitchener is now an accomplished fact, confirmed by the picturesque ceremony in the House of Lords. Good wine needs no bush, but, seeing that the realm is in emergency, through no fault on the part of his Majesty's Administration, we greatly hope that the new Earl will be entrusted with the temporary direction of the War Office until such time as the European situation shall be so far readjusted as to permit of his return to Egypt.

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Cairo, July 23.

Fighting Egypt's Modern Plagues.

The hope held out by Lord Kitchener in his last report with regard to the fighting of the dread diseases that are, unfortunately, so prevalent in this country is now in process of being fulfilled. At its last meeting the Council of Ministers raised to £E12,000 the credit of £E3,546 which had been allocated in the budget of the Public Health Department for this purpose, and at the same time it created a new post of woman medical inspector, whose main duty will be the inspection of maternity schools, children's hospitals, and similar institutions existing in the provinces. In the above-mentioned £E12,000 is included the £6,000 which the Rockefeller Institute—on the advice of its delegates, who visited Egypt and inquired into the work already done and about to be undertaken—placed at the disposal of the Egyptian Government from the huge fund that Mr. Rockefeller had given for the express purpose of fighting ankylostomiasis in all parts of the world.

As the work progresses and fresh ground is broken, enabling more effective preventive measures to be introduced, it is hoped that more substantial amounts will be allocated to the Egyptian Government. It is, of course, admitted that at the start the work has been slow, and that it will of necessity continue to be so for some little time owing to the ignorance and apathy of the natives as a mass. In the meantime it is satisfactory to note that the Government is fully alive to the advisability of boldly tackling not only ankylostomiasis, but also bilharziasis, pellegra, ophthalmia, and infant mortality, all of which are closely connected in that the fundamental causes of the propagation of the germs and of the increase in victims are substantially the same, and that the Public Health Department, under its new head, Sir David Semple—who has organised the entire plan of campaign—is entering with praiseworthy keenness on the great fight which, from an hygienic and sanitary point of view, should result in a regeneration of Egypt similar to that already achieved from a financial and economic standpoint.

The Italian Advance in Tripoli.

A denial from Italian sources has been published here of the news circulated last week that an important battle had taken place near Solloum, close to the Egyptian frontier, between the Italians and the Arabs, resulting in the total discomfiture of the former. There seems, however, no doubt whatsoever that an engagement did take place on the 13th, and that the Italians had to beat a retreat to their gunboats after suffering much loss in men and arms. The fight occurred within sight of the Egyptian frontier, whence it was at once reported, and since then confirmation has been received from other sources.

The Situation in Arabia.

Turkish efforts at conciliation are evidently proceeding apace in Arabia. Last week we had the news of the appointment of Ibn Saoud as Mutessarif of Nejd, which had been rumoured in Cairo some time before. Yesterday Dr. Izzet El Guindi, who is the envoy of Sayed El Idrissi, and who received a cable of welcome from the Porte before his departure, left for Stamboul, whither Sherif Abdulla, the son of the Sherif of Mecca, had returned about a week ago from his mission to his father.

The Co-operative Movement.

Every effort is being made to give every opportunity for development to the co-operative movement, for the regulation of which a law was passed at the end of the session of the Legislative Assembly. The Minister of Agriculture has been touring Upper Egypt preaching the doctrine of co-operation to the fellaheen at all the important centres, and explaining the policy which the Government intends to adopt in its relations to the movement. We ought, very shortly, to see some good results from this propaganda in Upper Egypt, where co-operation will be of the greatest advantage to the local population—especially during periods of low water-supply and restricted cultivation, like the recent and present ones. Already there are signs that its benefits are being more widely appreciated in Lower Egypt, where, during the past few days, several new syndicates have been formed. It is interesting to note that the fellaheen and local notables are not at all keen on acquiring any independence of action, but that in fact they are eager for the Government to take full control of, and identify itself intimately with, the movement. This is quite contrary to what certain delegates contended was the country's wish when the Bill was before the Assembly, and it seems perfectly clear that their opposition to the small but necessary control which the Government proposed to exercise was actuated by motives of a personal nature, and that they either ignored or had failed to ascertain the true wishes of their electors.

The Wakfs Ministry.

There appears to be much weeping and wailing and gnashing of teeth in the Wakfs Ministry, and complaints from the staff have become an almost daily occurrence since the reconstruction of the Cabinet. All increases of pay already approved by the outgoing Minister have been stopped by his successor, who, not content with inflicting afternoon hours on his personnel at this hot period of the year, has set his face rigidly against his subordinates taking their usual leave. There may or there may not be arrears of work to warrant these drastic measures, but there would appear to be little doubt that the officials have good cause for complaint. For such treatment is not extended to the other administrations—indeed, the Government decided not long ago that the introduction of afternoon hours, however desirable it might be, was not possible owing to the peculiar circumstances under which the native staff lives—and it is, to say the least, arbitrary and unjust. Unless more consideration is shown by the head of the administration in question, his so-called reforms will have the opposite effect to that which he expects; for an overworked and discontented staff does not conduce to that co-operation and efficiency which should characterise the work, if the affairs of the Wakfs are really to be placed on a satisfactory and business-like footing.

Election of Abaza Pasha.

The by-election at Hehia in the Sharkia aroused an enormous amount of interest and excitement in the Province, and resulted in a victory for Ismail Pasha Abaza, who polled 354 votes against 290 recorded for his opponent, Mustapha Pasha Khalil. As Abaza Pasha challenged his rival to a meeting, where each should expose his political views and his programme it was hoped that some indication would be obtained of the attitude he would adopt, if returned to the Assembly. But Khalil Pasha declined the challenge, and so far the successful member has kept his thoughts on the subject to himself. He is, of course, far too
hand now, but there seems
, as I wrote you at the time
ed, Abaza Pasha, by reason
ound to bring him to logger-
hlul, will, of necessity, be-
e Assembly. It remains to
t in our conclusions. It is
ove to be correct; for a com-
o politicians could not be

ENGLISHMAN'S TRAGIC DEATH.

(From Our Own Correspondent.)

Port Sudan, July 18.

A serious accident, resulting in the death of Mr. A. Backhouse, occurred on Tuesday morning. Mr. Backhouse, who had been acting superintendent of the Customs for the past two months, was inspecting the patent fire extinguishers in the Customs Buildings when the one he was handling exploded with a terrific report, striking him on the jaw and breaking his collar-bone. He was picked up unconscious, and died a few seconds later. His funeral took place the same afternoon, practically the whole European and Egyptian community being present. Mr. Backhouse was one of the most popular of the Customs officials in Port Sudan, and his early death has been a sad blow to his colleagues and many friends.

EARL KITCHENER.

The following notice appears in the *London Gazette*, dated Whitehall, July 27, 1914 :—

The King has been pleased, by Letters Patent under the Great Seal of the United Kingdom of Great Britain and Ireland, bearing date the 27th instant, to grant the dignities of Baron, Viscount and Earl of the said United Kingdom unto Field Marshal Horatio Herbert, Viscount Kitchener of Khartoum and of the Vaal in the Colony of the Transvaal and of Aspall in the County of Suffolk, Baron Kitchener of Khartoum and of Aspall in the County of Suffolk, K.P., G.C.B , O.M., G.C.S.I., G.C.M.G., G.C.I.E., his Majesty's Agent and Consul-General in Egypt and Minister Plenipotentiary in His Majesty's Diplomatic Service, by the names, styles, and titles of Baron Denton, of Denton, in the County of Kent, Viscount Broome, of Broome, in the said County of Kent, and Earl Kitchener of Khartoum and of Broome aforesaid, to hold to him and the heirs male of his body lawfully begotten and to be begotten, with remainder in default of such issue to his first, second, third, fourth, and every other daughter lawfully begotten, and to the heirs male of the body and respective bodies of such daughters severally and successively one after another as they shall be in seniority of age and priority of birth, and in default of such issue and after the death of every such daughter to Henry Elliott Chevallier Kitchener, Esquire, Colonel on the retired list of the Army, a brother of the said Horatio Herbert, Viscount Kitchener of Khartoum, and the heirs male of his body lawfully begotten and to be begotten, and in default of such issue and after the decease of the said Henry Elliott Chevallier Kitchener to the heirs male of the body lawfully begotten of Sir Frederick Walter Kitchener, K.C.B., late Lieutenant-General in the Army, deceased, another brother of the said Horatio Herbert, Viscount Kitchener of Khartoum.

CO-OPERATION IN PERSIA.

Reformers in Persia have not lost all heart under their political misfortunes. A correspondent of *The Manchester Guardian* reports that an attempt is about to be made to introduce the methods of agricultural co-operation into the country. The model will be Sir Horace Plunkett's organisation, and Arbershirji Edalji, the agent of the Parsee community in Persia, who is the promoter of the scheme, has got into touch with Plunkett House in Dublin. Mr. Edalji is a well-known and vigorous personality in Teheran, and, though a Parsee and a British subject, has devoted himself to national interests and the constitutional cause. The rough treatment he received from Liakhof's Persian Cossacks during the civil war illustrated very well the decline of British prestige in Teheran.

Communications with the Near East have been greatly interfered with this week, consequent on the outbreak of war between Austria and Servia, and the mails have suffered disorganisation. On this account we are unable to include several of the usual letters from our Correspondents. In the circumstances we hope our readers will make allowances for any shortcomings.

NOTES FROM CYPRUS.

(From Our Own Correspondent.)

Cyprus, July 17.

British Fleet's Visit.

From the 10th to the 15th instant the island was enlivened by the presence of the British Mediterranean Fleet. Some forty vessels of various types assembled in these waters, and each of the southern ports received some of the visitors. As has often happened before, the visit was made at the quiet season, when numbers of the Government officials are on leave and only one or two, perhaps, are to be found at each of the leading towns. In these cases, moreover, the official representatives are mostly living *en garçon*, their families having been sent up to Troodos for the summer. In such circumstances it is difficult to provide adequate entertainment for our naval guests, and the attempt to do so falls very heavily upon the slender resources of individuals, and we feel that, much against our wish, the welcome extended to them is very second-rate. On the present occasion, we understand, Government has furnished District Commissioners with a small entertainment allowance, and municipalities have in some cases come forward with contributions. At Larnaca and Limassol, especially, a good deal was done to give the visitors a pleasant time on shore. A garden party and ball were the leading events at Larnaca, where also the French Consul took an active part in entertaining the representatives of the naval Power in the "Entente."

At Limassol sports were arranged, and everywhere the ubiquitous cinematograph did a roaring trade. A party of 160 bluejackets and a dozen or so officers came up by train from Famagusta to Nicosia, and spent a few hours in the metropolis, where luncheons were provided, the officers being entertained at the club and afterwards shown round the town.

Salt for Roofing Purposes.

The salt requirements of the island are almost entirely provided locally from the salt lake at Larnaca. An exceptionally large collection was made last year, sufficient for four years' consumption, which averages about one and a-quarter million okes. It is distributed throughout the island to the Government salt stores, and is used not only for culinary purposes, but for various industries. It enters largely, of course, into the preparation of cheese, olives, hides, etc., and a new use for it has been found in one or two villages as a roofing material, as it has been discovered that if spread over the ordinary native mud roof it sets hard after rain and makes a smooth, durable surface.

LEARNING FROM THE PAST.

The question of soil erosion is still very much to the fore, especially in America, says *The Morning Post*, and Sir William Willcocks has been telling the Americans some home truths in contrasting their proceedings with those of the ancient Egyptians, who, he says, would never have allowed the Nile to do anything proportional to the mischief directly attributed to the Mississippi, as a general rule, but really due, says Sir William, to a great extent, to the unscientific blunders of the Americans themselves. He finds fault with nearly everything, not only with the actual construction of "levees" or embankments, but with the very reasoning applied to justify their construction at all. He gives an example from his Oriental experience to show the fallacy of common arguments on the behaviour of streams. The point he is desirous of making is the advantage to be gained by cutting off a bend in the river, to which the objection was raised that it would upset the navigation, as in the case of the Theiss, in Lower Hungary. He admits the spoiling of the Theiss, which he attributes to the cutting of too many bends at once, but quotes the Karun River, in Persia, where a long loop of eight miles brought the stream back to the same point, with a difference of 4 ft. in the level. All sorts of doleful predictions were made as to the disastrous effect of its breaking through at that point, as it was expected to do sooner or later. In actual fact, when it did break through the river adapted itself to its new channel in a week without any difficulty whatever. . . . Sir William Willcocks speaks with knowledge of Egypt and of the Euphrates valley, and his words of criticism will carry weight. It is interesting to note that some of the strongest opposition to the new schemes of storage reservoirs and cuttings came from the railway companies. Finding that they are now joining in urging the Government to do something, Sir William caustically remarks that it reminds him of the man who, having murdered his father and mother, appealed for mercy on the ground that he was now a poor orphan.

ROUMANIAN LETTER.

(From Our Own Correspondent.)

Bucharest, July 24.

The Volunteers for Albania.

Apparently the volunteers who left here for Albania do not find the business quite so pleasant as it promised to be. Out of a party of just over 200 which arrived at Fiume by the steamer "Godollo" it was found that eight had deserted. These declared to the police that they had taken this course because they had not received the pay that was promised to them. Each man, they stated, had been promised that he would receive 200 francs immediately after leaving Bucharest and 4 francs per day after reaching Durazzo, but up to that time they had not received a centime.

Frontier Incidents.

What may reasonably be termed a storm in a tea-cup is the excitement caused during the last fortnight by the various "incidents" on the Bulgaro-Roumanian frontier. The first of these occurred, as already reported, on the 15th inst., when a Roumanian soldier was shot and another wounded. The Bulgarians declared they acted in self-defence, as the Roumanians, though unarmed, tried to wrest the rifles from two Bulgarians, whose comrades fired. The Roumanian account speaks of a party who were marking the new frontier line being fired on without notice. The inquiry instituted has so far given no result, but the first account sounds the most probable. Had this been the only incident the matter would have ended, as usual, with an apology from the offending side and monetary recompense to the relatives of the men killed. But since then almost nightly the Roumanian pickets have been fired on by the Bulgarians, and, very naturally, have replied. To crown all, on the 17th inst., at Turksmil (Kukukla), two Bulgarians were killed during an attack on the Roumanian blockhouse. The incident in this case commenced by the Bulgarians shooting a dog belonging to a Roumanian picket which was going the rounds. These dogs, though mongrels, are much prized by the frontier guards, who spend much time in training them. A dispute ensued, and after a heated exchange of words the Roumanians retired to their blockhouse. They had not been there long when a shot was fired by one of the Bulgarians, which broke a window and narrowly missed two soldiers. At this the Roumanians, seizing their arms, rushed out and opened fire on the Bulgarian picket, their aim being so good that they killed two at the first volley.

Since then further, less important, "affairs" have occurred, but the local Press has so exaggerated matters that it is impossible to know what to believe. So much excitement has been roused by these reports that the Ministry of War has requested the Ministry of the Interior to take steps to put an end to their circulation by the less scrupulous papers.

So far nothing seems to have been actually done to put an end to the state of affairs I have described, but both Governments show every intention to settle the matter. The Bulgarian Government proposed that the Military Attachés from one capital or the other should meet at the scene and decide who was in the wrong, but the Roumanian Government refused the suggestion, saying that such an arrangement would be permissible only when all steps taken by the two countries themselves had failed to bring about an arrangement.

Bucharest, July 26.

The Roumanian Government's objection to a commission composed of military attachés has led to the appointment of a mixed military commission, composed of officers of both countries, to endeavour to adjust the frontier difficulties. On July 24 the delegates, consisting of Colonel Stratilexu, Captain Paltineanu, and the sub-prefect of the district for Roumania, together with Colonel Morfoi, Major Cobajieff, Major Ivanoff, and M. Athanasoff for Bulgaria, met at Turksmil, the scene of the incident. The commission proved the finding of Bulgarian bullets in the walls of the Roumanian blockhouse.

The pickets of both countries have now been withdrawn 100 yards from the frontier, and the troops have also been moved further back. These measures have exercised a pacifying influence on the population on this side the frontier, and the episode may now be considered to be closed.

'Pin Pricks."

Another of those affairs which go so far to prevent the maintenance of good feeling between Roumania and Austria-Hungary is reported from Caineni. A group of forty Roumanian students under a professor, whilst making an excursion to Siebenburgen, were requested by Hungarian gendarmes to remove the Roumanian tricolour favours which they wore. This they refused to do, using at the same time insulting remarks as regards the gendarmery and Hungary in general. Arriving at the frontier station at Rotherthum, they were arrested, and, having since been tried, have been sentenced to fifteen days' imprisonment. This really serves them right, as there is not a Roumanian on either side of the Carpathians who does not know that the wearing of national colours other than Hungarian is not permitted in Hungary, and the Roumanian colours were worn only in order to annoy the authorities and set them at defiance.

Roumania and the War.

The sudden change of events as regards Servia and Austria has given rise to considerable discussion here as to the attitude Roumania would adopt in the event of an outbreak of hostilities. A fairly general impression obtains that Roumania would remain passive unless Bulgaria attacked Servia. In this connection it is worth noting that the belief has taken root that Bulgaria could easily conduct a campaign on two frontiers. It is rumoured that a secret understanding was arrived at between Roumania and Servia after the close of the Balkan War, but the report lacks confirmation, and is not generally believed.

THE UNDIPLOMATIC DIPLOMATIST.

Under the heading "A Diplomatic Don Quixote" in *The Morning Post* (July 28), Mr. A. Maurice Low gives a character sketch of Mr. George Fred Williams, until recently American Minister to Greece. The man who amused and amazed Europe by his undiplomatic utterances on Albania is no "typical product of American politics, to whom diplomacy and Courts and Kings and the fine *nuances* of life were unknown," but on the contrary:—

George Fred Williams is a delightful companion and a gentleman by birth, education, and associations. He is no inexperienced man to whom the etiquette of polite society is unknown. His companions have always been men and women of refinement and culture. He is well read and a man of ability. Yet he went to Greece and made a spectacle of himself. The mystery is easily explained. Mr. Williams is an anachronism. He belongs to a past age and not the present. He would have been an heroic figure when men wore coats of mail and went up and down the world carving fortune with their swords. With equal indifference he would have rescued maidens, or rid the Holy Sepulchre of the infidel, or raised a rebellion, or refused to pay the latest tax imposed by a juggling Chancellor; he would have been found fighting wherever there was a minority, and he would have been the champion of all the lost causes. And if he had not ended his career prematurely at the hands of the headsman, his portrait would be in more than one great European gallery and there would be articles in the magazines explaining him for the benefit of posterity. Mr. Williams is a curious and interesting study in present-day American psychology. He is a radical, a crusader, a protagonist. He has a perfect passion for the "under dog," and in his zeal to find the "under dog" so that he may succour it, his vision is apt to become distorted, and his sympathies to overturn his judgment. What has been said of Lord Randolph Churchill applies with equal force to him: "Underlying his political inconsistencies and superficialities was a genuine sympathy with the ideal of popular government, a real dislike for privilege and oligarchy." Mr. Williams has not always been wise, he has frequently shown that his political wisdom was infinitesimal, but no one has questioned his sincerity or his passionate love for popular government, and his fierce hatred of privilege and oligarchy. His vitality and his ardour have carried him far, sometimes too far for his own good. Had Mr. Williams been a fox-hunting squire a hundred years ago he would have risked his neck and his horse's every time he went to a meet. Other men might go through a gate or around a stone wall, he would have gone over them no matter how high or wide; his enthusiasm would have blinded him to every danger, and compromise he would have deemed as despicable as cowardice.

THE ALBANIAN DEBACLE.

We have received from a trustworthy correspondent in Valona a letter, dated July 23, from which we give below some extracts:—

As for Roumanian intervention here, some intervention is necessary; but having no personal knowledge of the Roumanians, I cannot say if they are capable of conducting themselves decently in dealing with another race. Judging by the newspaper reports, their treatment of the Bulgars is not inspiring. So far all evidence goes to show that the Balkan States (and Roumania is next door to being one) all revert to savagery and run amok when fighting.

It is possible that Roumanian troops might commit atrocities here when excited. And as "intervention" of one Power seems to lead to permanent occupation—*e.g.*, Bosnia and Egypt—it is questionable whether the other Balkan States would acquiesce in Roumania acquiring territory and parts on both sides of the Adriatic.

The true solution is one that I fear is impossible—viz., a small army composed of men from two strong Powers who have no political ambitions here—preferably England and Germany. Both Greece and Bulgaria when they were created were provided, the first with Bavarian and the second with Russian, troops to maintain order until local forces were organised.

Albania might conceivably have worried through her early years unaided had the Powers kept their word and enforced Greek evacuation—enforced it really, and had authorities on the spot to see it done. As it was, the "evacuation" was a farce, and the mass of imported Cretans, Thracians, Macedonians, etc., led by officers said to have "deserted" by the Greek Government—and deserted along with their artillery!—have, as you know, ravaged the land, and were on two occasions at least supported by large regular reinforcements from across the frontier. To cope with this was, of course, beyond the power of the local gendarmerie, though, aided by numbers of volunteers, they put up a good fight. For they had also to contend with the local rebellion which started at Shiak. That this is an artificial affair entirely engineered from without is certain. The Moslem population there is excessively ignorant, and Serb and Greek (and also, it appears pretty certain, Italian) agents have persuaded them that by revolting they will get back the Sultan. The few wounded rebels who were picked up and brought into the Durazzo hospitals all narrated that they had been told that the "Hamidieh," with Turkish troops, was waiting off Durazzo, and that all those who helped in the capture of Durazzo for the Sultan would receive handsome pensions for life.

The other day in the last Greek attack on Koritza the rebels were acting together with the Greeks. It was a combined attack. The Servians were supplying the rebels with ammunition, and were seen doing so by reliable witnesses. The Dibra gendarmes, who were enlisted by and were fighting on the Albanian side, then deserted to the enemy. The Albanians begged them not to, and they replied, "The Greeks have promised to restore to us our town of Dibra, which the Serbs have taken, if we help them. This army that is coming is coming to give us back our Baba" (the Sultan).

It appears also that the Moslems of Tirana and Dibra have all been told—presumably by Serb and Greek agents—that a Protestant king means that they must all turn Christian, and that incestuous marriages and other malpractices will be the rule.

The core of the rebel district is Essad Pasha's land. Essad is the leader of the affair, and he is supported by Italy as well as the Balkan States—all of these being willing to combine to prevent Austria ever getting a footing here.

The Prince's first great mistake was putting himself in Essad's pocket. His second was setting Essad free to return to Italy and contniue the game. The pathetic thing is the adoration with which the Mpret is regarded by the band of Koritza patriots, who have staked their all on freedom for their native town, and who consider him as the symbol of civilization, liberty, and all that is good.

I do not fancy his withdrawal would do any good, but rather harm. It would allow the rebel party to consider it had conquered and excite it to further folly; and it would cause such a bitter feeling of having been betrayed in the hearts of all those who have fought and suffered for him that a second king might meet with universal distrust.

At the same time he must have help. Europe cannot honourably send him here and deny him aid. If it is correct to keep a lot of troops—far more than necessary—eating their heads off in Scutari, it is surely equally so to send some here. Part of the Scutari garrison could be used, in fact, effectively.

RESIGNATION OF DUTCH OFFICERS.

DURAZZO, July 29.

General De Weer, in tendering to the Mpret the resignation of all the Dutch gendarmerie officers in Albania (on account of various differences of opinion, in part cular with the Roumanian officers of the Mpret), said that the Dutch officers would not leave Albania during the present crisis, but would quit the country together when the conditions had become more settled.

The two children of the Prince and Princess of Albania will be taken to-morrow to Sina a, the residence of the King of Roumania, near Bucharest.—(Reuter.)

THE OBLIGATIONS OF GREAT BRITAIN.

We are under no obligation, expressed or implied, to defend Servia, and no considerations of interest require that we should do so. If Servia were to be blotted out from the map to-morrow it would make no earthy difference to us. Nor are we—as Sir Edward Grey has frequently assured us—under any obligations to assist Russia if she goes to war. If such a war is waged against Austria on behalf of the Serbs it will run decidedly counter to our sympathies, if not to our interests. Austria has always been a good friend of ours, and we could not view without sorrow any attack made upon her to prevent her doing anything that she is legitimately entitled to do. As for the alleged Slavophil impulses of Russian action—even if we were able to understand their bewildering variations—we have no concern in them. There remains the question of the Balance of Power, in which we are certainly interested, and which may be jeopardised by the intervention of Germany and France, which a Russian attack on Austria would render inevitable under the Treaties of the Triple and Dual Alliances. But this is a question which in our unfettered position can only be decided by the progress of the war. If we are objectively interested in the Equilibium as such, and apart from any preference for this or that combination of Powers, then we must wait to intervene until we see whether, and on which side, and in which direction hostile to British interests the disturbance is likely to take place.—Lucien Wolfe in *The Daily Graphic* (July 27).

THE NEAR EAST.

THE NEAR EAST is on sale at all Bookstalls and Newsagents in the United Kingdom. Should any difficulty be experienced in obtaining the paper, readers will oblige by notifying the Manager. Abroad THE NEAR EAST may be obtained in:

PARIS. Librairie Hachette, 79, Boulevard Saint-Germain; Librairie Galignani, 224, Rue de Rivoli, and at Railway Bookstalls.
VIENNA. Goldschmiedt Brothers, Zeitungsbureau, Wollzeile, 11.
CONSTANTINOPLE. Economic Co-operative Society, Pera; Benjamin Rawe, British Oriental Bazaar; D. Marianopoulo, 280, Grande Rue de Pera; and The Nautical Bazaar, Galata.
SALONIKA. Librairie Francaise, Rue Sabri Pasha.
SMYRNA. Dem. Tzannou, Petite Rue de Rose, and F. S. McVittie.
BEYROUT. Sarrafian Brothers.
JERUSALEM. Palestine Educational Store, Jaffa Road.
CYPRUS. Cababe and Wilson, Nicosia.
CAIRO. Diemer and Company, Shepheard's Buildings; The British Library, Sharia Kasr-el-Nil; C.M.S. Bookstall, 15, Sharia Madabegh; and at Railway Bookstalls.
ALEXANDRIA. Librairie Schuler, Rue Cherif Pasha; Nacamulli and Company, 12, Rue Sesostris; Librairie Calebotta, Rue Cherif Pasha Librairie Cauro, Rue Cherif Pasha; The Eclectic Bookstall; F. Diemer, Cairo Station.
PORT SAID. Charles Evans, and on board vessels in the harbour.
KHARTOUM. Sudan Stationery and Bookstore, and Victoria Bookstall
ATHENS. Eleftheroudakis and Barth, Place de la Constitution.
SOFIA. Librairie de la Cour.
BUCHAREST. Socec and Company, Calea Victoria
BELGRADE. La Librairie Internationale, 16, Rue Prince Michel.
NEW YORK. The International Bibliopole, 118, East 28th Street.

Readers in France who desire to secure THE NEAR EAST regularly are informed that any Newsagent in that country can obtain the paper for them through Messrs. Hachette, in Paris. In the same way any Newsagent in Belgium can readily obtain the paper from the Agence Dechenne, Bruxelles.

THE LETTER-BOXES OF TABRIZ.

(From an Occasional Correspondent.)

Tabriz, May 23.*

The agitation against Shuja-ed-Dowleh still continues, and appears to be gaining force. As a result of manifestoes against him having been sent by the city mail to prominent citizens, his Excellency forbade the use of the city letter-boxes that had recently been placed at various convenient places; but in consequence of protests from the Belgian postmaster, and "advice" from the Russian Consul, this order was soon repealed.

In addition to being made the receptacle for these manifestoes, the letter-boxes received a great many unstamped letters, sent, apparently, for the express purpose of making the addressee pay double postage on receipt; and very many unsigned letters, usually of a grossly insulting character, were also posted. To put a stop to such an abuse of the postal facilities, by order of Shuja-ed-Dowleh, a gendarme is now posted by each letter-box in order to see (1) that letters are properly stamped, and (2) that they are properly "signed." The Persian signature consists of a seal, and the letters proper are seldom signed, the seal being always placed outside on the envelope, so that anyone can tell who is the author. Now if any letter is not stamped and sealed the person endeavouring to post it is at once placed under arrest. Instead of mailing their manifestoes, the agitators and malcontents are now placarding the walls with same. To put an end to even this means of airing their views, Shuja-ed-Dowleh has ordered that notices and advertisements are only to be attached to the special boards which he has provided!

Shuja-ed-Dowleh is just finding out that there are certain things that he must not and cannot do; that the good old days of Maragha are no more; that a mere motion of his monster moustache is no longer sufficient warrant for the decapitation of any man. But he is still primitive enough to think that if he forbids the use of city letter-boxes the agitation against him will cease. That agitation, however, is organized by people who are more highly educated than he, and at least as intelligent.

Mirza Firooz Khan.

OTTOMAN ASSOCIATION.

Lord Lamington presided at the first annual meeting of the Ottoman Association, which was held at the Café Monico on Wednesday evening of last week (July 23).

Mr. E. N. Bennett, the secretary, presented the first annual report, which showed that the association was founded on January 21 last, and now had a membership of 110. Two memorials had been presented to the Foreign Office, a meeting in the City of London had taken place, questions had been asked in Parliament, and letters had appeared in the public Press with the object of correcting unsteadying, exaggerated, or false information regarding Turkish action which from time to time had been put into circulation. The accounts showed that on June 30 there was a credit balance at the bank of £21, and although there were one or two small outstanding accounts the subscriptions of thirty-seven members were in arrear.

Mr. Schaap called attention to an article which had appeared in *Truth* regarding the financial affairs of the Association, and alleging that £300 had been received from the Turkish Government. He asked whether this was true.

The Secretary (Mr. E. N. Bennett) said that he had not seen the article in question, but so far as he knew the £300 was an absolute myth. The Association had no subsidy from any Government, and entirely depended upon the subscription of the members. A suggestion had been made to him by a gentleman that a series of articles on the finances, ethnological, and other problems of Asia Minor might be written, and that influential papers should be purchased for the purpose of the Association. He (Mr. Bennett) had replied that such articles would entail a great deal of research among Blue Books and in the British Museum, and that no one would undertake to do them for nothing. A further suggestion was made that twenty articles should be written at a fee of ten to fifteen guineas each, which would work out at about £300. That letter, he alleged, was stolen, and that was the only foundation for the mention of £300.

The Secretary was instructed to write and contradict the statement.

The report was adopted.

Mr. Bennett was re-elected hon. secretary, and the executive committee were re-elected, with the addition of the names of Lord Newton, Sir Alfred Paget, Miss Grace Ellison, Major George Paget, and Dr. Pollen.

The Earl of Denbigh presided at the dinner which followed. In proposing the health of the King, his lordship said that under the present circumstances his Majesty's health would be drunk with more than usual heartiness. (Loud cheers.) He then read a letter from Mr. J. L Garvin, who had been prevented by the political crisis from attending the dinner. Lord Denbigh then proposed that the following message should be sent to the Turkish Senate, and the suggestion was received with acclamation:—

"That this assemblage of friends of Turkey sends cordial greetings of goodwill to the people of the Ottoman Empire through their representatives in Parliament engaged upon their task of consolidating the resources of the State by attention to the arts of peace no less than to preparations for defence."

There was, said Lord Denbigh, a great deal of undeserved prejudice in regard to the position of the Turk, and there were large numbers of people in the country who were ready to condemn the Turk unheard, and wished for nothing else than to hound him out of Europe. Whatever one might say with regard to the unfortunate things which had happened in Turkey, one could not help but admit that they had done a great deal to alienate the sympathies of other nations. He regretted that there always seemed to be a suspicion whenever anything Turkish was mentioned. This was supposed to be a conflict between Mohammedanism and Christianity, but when one realised what had happened during the war in the Balkan States he did not think Christians had much to flatter themselves about. (Hear, hear.) The unfortunate part of it was, in spite of the official denials which had issued from diplomatic circles, there was a great deal going on in the Balkan Peninsular which ought to make Christian people hang their heads with shame.

Mr. Marmaduke Pickthall said that diplomacy had never been a friend to Turkey. Diplomacy persuaded Turkey to disband her European army just before the war. They believed that religious fanaticism was inhuman and should be banished from the world. Up to the seventeenth century the Mussulman was far more tolerant than the Christian. Upon an independent Turkey rested the basis of European peace in the East. Turkey was at the head of a great forward movement which was very distasteful for Russia, and therefore this country did not care to recognise it. There was still some help for the Turk if the English would give him an honest opportunity.

Lord Lamington said he could not believe for a moment that this country would fail to support Turkey in Asia Minor, if only from the point of view of our selfish interests.

* Delayed in transmission.

TANGIER TO TEHERAN.

Last week Europe was expecting a possible diplomatic strain within the Governments of Vienna and Belgrade. Events have marched. The latter capital is in the hands of hostile forces, for

An Austrian army awfully arrayed
Boldly by battery besieged Belgrade.

The world, at the moment of writing, waits to see whether or no

Cossack commanders cannonading come,

for in those circumstances it is inevitable that all the armed might of Europe will be engaged in

Dealing destruction's devastating doom.

***

It is a somewhat remarkable coincidence that the publication of a Servian Supplement in THE NEAR EAST should again have been so shortly followed by the outbreak of war in which Servia is involved. It will be remembered that the beginning of the campaign of October, 1912, was preceded only by a few weeks by the Servian Supplement which was published by this journal.

***

Even in a financial panic there are limits to what may be expected, and England has always prided herself on her credit either in gold or paper. It came, therefore, as a surprise to learn yesterday that a cheque for £200, signed by the directors of one of the most English of English institutions, and sent to its representatives in Paris, drew only 60 frs., probably, I take it, in centimes, from the close-fisted French banks. This is only a sample of what may happen should the war spread. The whole financial fabric of Europe will crumble. I remember that during another scare—one of those hardly annuals which come when the harvest is gathered in—a lawyer told me that he was seriously considering whether it would not be wise to collect all spare balances and to bury them at the bottom of his garden until the clouds rolled by. When all is said and done, a cheque is only "*un morceau de papier*," and as such worthless. England, which has developed the cheque system to a fine art, may find herself harder hit than anyone. Better far at the moment the fate of those barbarians who do not know the sight of a cheque, but who believe in "touching" the money, be it unwieldy five-franc pieces or Maria-Theresa dollars, than those whose liquid assets are bounded by the leaves of their cheque book.

***

A portable capital for a European State would assuredly be an innovation of the first magnitude, but to that unique expedient, seemingly, Albania may be reduced. Some time ago an exhibition of Hungarian manufactures was opened at Valona. Acording to the United States Consul-General at Budapest, it was not so much the samples which aroused interest as the portable building in which they were housed. In the not unlikely event that Durazzo might not remain the capital of Albania, officials of the new Government and merchants established in Durazzo were faced with a perplexing problem. Satisfactory houses are very difficult to obtain in Albania, and to build permanent houses and offices in a town which might suddenly be bereft of its importance by the departure of the Court and Government would be a very risky speculation. The portable house seems to have been welcomed as a solution of the problem. I do not know whether residents of Durazzo have had the opportunity to develop the suggestion amidst the uncertainties and surprises of the last month or more. A town which could be pulled down, packed up, and transported to another site whenever the political or military situation necessitated a change of air would have its advantages—in Albania at any rate.

***

Talking of portable capitals, I see that the headquarters of both the Serb monarchies have flitted, if I may say so, overnight. It is a great thing for Court, Government, and Skupshtina to be able to shoot the moon in this way, though probably highly annoying to most official personages. It seems that both Belgrade and Cettinje were found to act admirably as capitals so long as Turkey was the enemy, as in each case they were removed as far as possible from the Ottoman foe and overlooked the territory of the Hapsburgs, positions which are highly inconvenient at the present juncture.

***

Humour marches shoulder to shoulder with the grimmest events in everyday life. I see, for example, that the foreign Press records the movements of the Austrian public executioner—is he perhaps a Lord High official, like the celebrated colleague of Pooh Bah, or is his office hereditary, like that of one of Mr. Crockett's heroes? At any rate, he has been commanded to Serajevo to fulfil his functions, and, in order to do so, has had to interrupt—his cure at Karlsbad. Here at least is an unsuspected patron of that celebrated source of health. Let us hope that the state of siege will not keep him too long from resuming his treatment.

Why is it that the opinions of East and West are so diametrically opposed? In Europe marriages between cousins are comparatively rare, but in the nearer East they are extremely common. Indeed in Arabia it may almost be said that custom, which has there the force of law, practically prescribes them. The subject was brought to my mind last week by the coronation of the youthful Shah; for I understand that amongst the Kajar tribe, to which the Persian ruling dynasty belongs, such marriages are not only common, but are actually rather encouraged. Cynics may be tempted to remark that that fact in itself is not conclusive proof that such marriages are entirely desirable. But as a matter of fact marriages amongst cousins are frequent amongst Moslems, and I have myself met several men whose parents were cousins, and who themselves gave no sign of being lacking either mentally or physically.

***

The mention of marriages in connection with the Kajars reminds me that that really remarkable man Nasr-ed-Din Shah not long before his death insisted on marrying his sister-in-law, the sister of one of his wives. And marry her he did, in spite of all manner of protests from the scandalised ladies of the harem. Their threats to leave the palace, as a protest, and to take *bast* at the British Legation left Nasr-ed-Din quite unmoved. At any rate, if he felt either fear or hope stir within him at the threat he gave no sign of it. But the British Minister at the time—Sir Mortimer Durand, unless I am much mistaken—must have felt somewhat anxious! To have the whole bevy of Court beauties taking refuge in the Legation grounds might have been an interesting experience, but it would have created a situation of extraordinary delicacy, which would have taxed even Sir Mortimer's powers to the uttermost.

***

The pretty daughter of an Egyptian Pasha has put Cairo in a flutter by determining to take to motor cycling. At least, that is what I gather from the Egyptian papers. The lady in question, who is described by an obviously impressed writer as "young and charming," went to a well-known firm of dealers in motor cycles in Cairo quite recently and made a trial of one of their machines. As a result, a large crowd seems to have congregated in the neighbourhood of the shop, and the firm—unlike certain West-end firms here, which are keenly alive to the value of such things—not recognizing the value of such an advertisement, "have made it a condition of the purchase that the machine shall be delivered at the fair damsel's residence instead of being experimented with at the shop." On second thoughts, perhaps the firm is not quite so lacking in business acumen as I suspected at first. A motor bicycle is a difficult thing for a girl to manage. The firm may have done well to get it delivered before its full—er—beauties became known to the Pasha's daughter.

***

According to a letter in *The Times* of yesterday, an urgent appeal is made on behalf of the Albanian Relief Fund, Union of London and Smith's Bank, College Crescent, Finchley Road, London, N.W. The need appears to be pressing, and the destitution very real. Europe is the sponsor of Albania, poor little foundling State, and if the other five Powers are too busy with their own frontiers and other private affairs, the hope is that in the United Kingdom at least some charitable persons may realise that there is a responsibility in this matter, and subscribe to the fund.

NEAR EAST BOOKSHELF.

CONCERNING "MIXED MARRIAGES."*

This book should prove a surprise to any but those who are intimately acquainted with Cape Town conditions of life. We need not here explain—so carefully and explicitly is it set forth in the author's preface—what is a "Malay." Suffice it that he is a Moslem, and that the frequent inter-marriage of Moslems in Cape Town with white women of the poorer classes furnishes, in the present case, the problem for the author.

Mr. Prowse takes his problem in all seriousness, and presents a striking case against Islam, depicting the suffering and oppression, actual and possible, in such marriages. But it must be said in justice that he does not by any means exhaust his theme. Obviously when a woman marries a Moslem she courts disillusion; but what is disillusion except the dispelling of illusion? And why has she formed her illusions? In what, moreover, does the disillusion consist?

She finds on entering her new life that she is but one among several, liable to dismissal for the slightest possible reason or even caprice; she has practically no freedom, no ideal of sharing her husband's life; she has entered into a strictly defined and rigidly limited sphere of existence and subservience, and she must remain therein on pain of summary ejection.

All this is, of course, repugnant and even harrowing to our modern Western notions; but, then, Islam is Islam. Her methods and customs are known to all who care to learn them; she hides nothing, extenuates nothing, changes very little through the centuries. We can absolve Moslems from the charge of concealment or deception, in that those who fail to inform themselves have only themselves to blame if the fair pictures of their imagination fade before the ruthless light of reality. Moslems are not Mormons!

In fact, we fail to see why the Cape Town women should be so ignorant of the conditions and customs of the Malays who live in the same town as they themselves. They may, as the author would seem to indicate, find enlightenment from others, from the clergymen of their parish, and so forth, but that enlightenment must be supplied in a singularly ineffective manner, to judge by its results.

The Anglican clergy have every reason to cite their mandate for missionary work and the superiority of their creed over all others, but that need not blind them to everything in those other creeds, and to much that is admirable—above all, for its environment—in Islam. If they condemn, they should preface their condemnation by statement of absolute fact; they should represent the exact prospects of a Moslem marriage, and so enable the women to choose on the merits and demerits of those prospects. Above all, if Islam is to be rejected, let something of very definite value be set in its stead. Sympathy, authority, help, and the like should form the counterweight, otherwise it is natural that the drab and sordid existence offered to sensitive and ambitious young girls should provoke and enhance those very illusions that lead them to disastrous disillusion.

How far the author may succeed by his book in influencing or modifying the conditions of which he treats must remain to be seen. In any case, though we cannot wholly exempt him from the charge of bias, he is lucid and interesting, and his characterization is good, better indeed than his local colour, of which he is far too sparing.

NEAR EAST BOOK NOTES.

Dr. David M. Beddoe's historical romance, "The Last Mameluke," has, we are pleased to note, been recently issued in the Wayfarers' Library. To all lovers of healthy, stirring fiction Dr. Beddoe's story may be unreservedly recommended. The author has chosen the most picturesque episode in the history of modern Egypt—the overthrow of the Mameluke régime by the Corsican conqueror—as a setting. He has evidently taken pains with the historical details, and no one can question his intimate knowledge of Egypt and the people of the land of the Nile. The characters are drawn with convincing skill, and in no way resemble the stereotyped figures of the many so-called historical romances that we have read to our sorrow. It will not be easy to forget the combat between Stephen Hales and Omar Bey or the glorious knock-out on the point of the chin with which the Englishman put his treacherous opponent out of action. There are two thrilling battle pictures—the battle of the Pyramids and the battle of Aboukir. Messrs. Dent merit all praise for introducing Dr. Beddoe's story, which deserves to be better known, to a larger reading public.

Messrs. Heath, Cranston and Ouseley will publish shortly "The Balkan Tangle," by Mr. Oliver Bainbridge. The book will be illustrated from photographs. The author's aim is to describe the condition of the Balkan States and to disentangle the motives and policies of the chief protagonists of Balkan politics. The price will be 10s. 6d. net.

LETTERS TO THE EDITOR.

The columns of THE NEAR EAST *are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of* THE NEAR EAST.

Letters intended for publication MUST be accompanied by the writer's full name and address, not necessarily for publication, but as an evidence of good faith. They should be worded as briefly as possible and must be written on one side of the paper only.

A PETITION FROM CYPRUS.

To the Editor of THE NEAR EAST.

SIR,—The Cypriote Greeks will shortly present to H.M. King George a petition, of which I enclose a translation. I am of opinion that comment will be superfluous, as the signatories of this petition are practically lost to all sense of shame.—Yours, etc.,

SUBSCRIBER.

[ENCLOSURE.]

To his Majesty the King of England and Emperor of India.

YOUR MAJESTY,—The Greek people of Cyprus, full of gratitude to your Majesty's grandmother, of blessed memory, the magnanimous Queen and Empress Victoria, for their release from the yoke of slavery, cherished the hope at all times that they were being guided, under the Liberal British rule, to their national restoration (Union with Greece!!). This steady hope has changed to a lively impatience ever since the accompliahment of the great facts that have to a large degree restored to the populations in the Balkans and the Eastern Mediterranean their national rights under the generous and magnanimous support of your Majesty.

Do not overlook, great King, a natural, eternal longing on a part of the Greek race which is, upon the whole, grateful to Great Britain—the yearning to be united to the consanguineous Greek Kingdom.

Give back, great King, this happiness to the Cyprus people, who were provisionally placed under your liberal and glorious sway, that they may bless the name of your great grandmother from generation to generation.

God Save the King.

May 21, 1914 (date of drawing up of the document).

"PLIGHT OF ANATOLIAN GREEKS."

To the Editor of THE NEAR EAST.

SIR,—I have compared your two Smyrna correspondents' accounts of recent events in Long Island with that sent by Reuter, which appeared in the Press on Monday, July 20. I find that the three reports disagree in most important details, including :—

(1) The date.
(2) The composition of the landing party.
(3) The manner and locality of the alleged massacre.

(1) Reuter says the slaughter was on the 17th, rumours only reached Smyrna on the 18th, and corroboration on the 19th. Your correspondent, A, writing on the 15th, gives the date as the 10th.

(2) Reuter emphasises that the landing party consisted of a company of eighty regular soldiers, and that the outrage was not committed by refugees or Komitajis, by whom, presumably, he means Bashi-Bozuks, not Bulgarian bands

Digitized by Google

Correspondent A, however, says there were eighty gendarmes and seventy Bashi-Bozuks.

Correspondent B, agrees with Reuter and says the party consisted entirely of soldiers, who were sent from a neighbouring fort under an officer.

(3) Reuter says the troops, under pretext of searching the houses for arms, began to loot. "The Greeks naturally protested," and were then driven on to a square and sixteen were killed before the eyes of their friends.
